**Compendium on Device, it's Construction, Testing, & Theory**

(C) 2020 - 2026 Paris [s.] Miles-Brenden

I must work on the thing [the certain thing] separating and controlling probability, - *this novelty.*

**1.)** We *have* a 'set' *drawn* from the Elliptic algorithm, and it's finite 'good and bad' reduction, over a *field.*

**2.)** We *have* a 'set of switches' - *[or for that matter - programmable CMOS].*

**3.)** These switches* occur in tandem and *in-time*, in relation to each other.

**4.)** The* *phase-to-voltage* 'Integration' *process*, draw(s) from **depth* and the *Computer, for that of hybrid (CPUI/CPUII), *process.*

**5.)** What it equates with, is therefore an interoperative (interaction) between modalities, akin the reference of a **Quasiprobability*, - for in the Elliptic* unpredictability of rational reduction over the field; & (and) the 'mark and etch' - *of a process adapted to the human and non-human interaction, via an orbit of the language of process for in the* **Learning Theory of the Computer**, *and of the (6x - process of elimination) - on the various* 'orbit's' *of* **Hybrid Machine Simulability.**

**6.)** We have K_{3,3} and K_{n,n-2|m}, A number of nodes [accessible] given 'switches'.

**7.)** We have 'backward and forward in-time' - as well as, separated 'conditional bipolarity'.

**8.)** *For the same [identifying reason] - to which we have confirmation of a working opirendum of device; as to-that of 'touch reception - under confirmability' (**and not just r^{2} and r{2} upon a set of averages**) - (**not an internal computation of a dead link and algorithm**) - that of the optimization problem, for what is feedback, etc,... on haptic, etc,... or - rocket - *'*live*'*, is the final reason for that of - besides memory isolation* - for which we can have unpredictability, or quasi-probability..... as in a 5th, etc, of l(2|1) and l(1|2), with *pause and halt.*

I searched for this for 20 years!!!

P(u)+P(v) is in a (a,b;c,d) *matrix*, of finite analysis in the non-linear equation of the dual-NLSE... P(u+v) from this..... and a finite regular latticework - with irregularity for in that of exponents....

**a.)** 16-20 year(s) from now [a dedication of some 8-12 years] *The next parallel.*

1.) A mathematical 'technique-table' - in substitution for decidability, that admit(s) us to produce a 'lemma-style' for the decomposition [based on group... etc] - and Airy, etc, i.e., at that of statistical/geometric law(s), which take and translate the meaning of mathematics.

**b.)** Percolation and Electronic(s) [why electronics and which*-devices works] - that of the Mermin-Wager theorem and gravitation (1d-2d-3d-4d-etc).

**c.)** The commutative and Fisher and Bayes, and the connective *group features,.... ways to reinnovate QED, and secondarily explain the Topological character, etc,.... through a monic, and the (exponential/etc) - geometry and algebra..... and set and Lie group.

**d.)** Superconductivity and reading, Hume(s) Fork, and Law, and various* Studies.

**e.)** Homotopy invariance and Cohomology, with the Painleve, step, and associated 'tier' of result(s) regarding the 'master differential equation and superposition formula' as to Various* mobius and such regarded 'group theorem'.... with various initial conditions and solutions.

**f.)** Computer; vertex and 'node' discernment; placement and process, determinant learning depth theorem, and linguistic meld and separator in Godelian Incompletion [credit(s)] and basic [**code**], *Law* [basic/biscuit] *memory, and *Group *depth theorem(s)*, virtual/hardware (70).

**g.)** Projective Algebraic Geometry and **steps to assure engineering navier-stokes and Painleve variety [steppe, and non-steppe] - meld/cray* - Re-purify my sample between firings.

**h.)** Quadrics - Algebraic Projective varieties - [mature] - 1/2 and zx^{2}; coordinate Lang., and thermal conductance, guide *laser* [**remote safety**].

*We have* the transformative symmetry, and* we have the derivational equative "solution".*

*Robe and Role of personality of piece, in playing positioning and placement w.r.t. the 'board'.*

Now, the result of *study* is mainly *done, ..... It is time to be-secure with that of the test and operation of my innovation, the resultant, and the code, etc, at (@) 1-bit, or 2-bit,..... And the extrapolation by reasonable amends with the nature of the digitized chess-board, *in* the Painleve-Weierstrass theory of superposition.

A guassian, does not superimpose of \sech and \sech, such that the 'double period' is functional given a double-angle formula, but 'albeit for what is phenomena' in-three dimensions (subject spontaneous and non-spontaneous symmetries of the system of differential 'change') – given the 'Gauss arithmetic geometric mean' a second diffusive or sparse noise – rectifies ancillary a 'large and homogeneous' term to two-subjective \theta and \phi such that co-extension of the eigenfunction and eigenvalue is nominative upon a superposition in elliptic (incomplete alternatively provided) functionally curved and geometric summation principle. This is assuming one-thing (a reductive neutrality of boundary term a proj_A integration constant).

Inadequacy of a basis that can collapse single-results, for bit-bit excursion, must be amended to that of another inherent displacive result with compensatory queue and key, to check and administrate a reliable result in-computation of genera of algorithmic basis. The key to doing so, is a moderate (within tan delta) diffusion in the relation of rectification, swappable within a synchronization delay. This results then in digitized-analog bit of quantum observability.

Threshold 2-5 is in-bit below 12 to 3x4 for what is '4-4 on green's' thus, the result is spectral.

The final-guarantee is the elimination of polynomial degrees in expected versus realized exponents and arguments, for that of the ODE-PDE optimization transfer on carry, and – of the relationship 'alt.' of large-and small groups of 0-1 in sequential moving' models of differential equations, for that of measurable 0-1 but of incurred in relation to a liability of law, to the reference of theft, and that of reproof of identifiable end, for what equates with means to measure and reference a partition under extrapolative reduction and calibration of base numerical number-theory, at – for what is greater and minimal O theory, in relation of correlative dice.

As to memory, *a-tool* and as-to recollection and action, *a-game*.

Assuming a 'graph is simple and connected' the phenomena behave one way, as well as charted logistic comparative another type of graph.

The 'Painleve varieties' encode a 4th-3rd for of over-measure in numerical *integer count on multiple in Quadratic Reciprocity of a field*, of the detail of the root*-ideal for in the Jordan-curve-lemma, *of* natures of cohomologous form such that index in-*Klien group*, relates the established precept of numerical-ode and pde, to instruction, of a secondary relationship of 'P' and 'NP' exclusivity via minimal-O and 'boundary' in *order* [categorical, representation].

Thus*, detailing the equipment, for the 2nd, assurable 'roton-magnetic-electric elliptical orbit' recollapses through the 1st, what is a unital gate, for of the explanation that a 'gear-tine' excludes pre-initial allocation in lock-

step, while a pendulum doesn't necessarily on free-evolution.

This categorical optimality, is what drives and 'derives' the 'digital from analog circuit on interoperation' in root-ohmic match of impedance, and switchable [can-bus] multi-distributative logical key and threshold 'index'. Thus, affording a discursative quantum activity and action to exclusion of the table* in-secondary tier, may offer an explandum to a lemma, of the structure of quantum and classical computational equipment and computer index and hierarchy.

As to insurable end *it is not that we can utilize the basis of the '**second moment**', for all but an accounting procedure, as-* the secondary adfix/fixture of the two in '***x-y***' does not assure the momentary basis of a mutual-multiple accountative process and procedure.

This is true, as also – *the secondary parabolic-elliptical displacement* – does not afford for an accounting prior a 5th-6th-4th on the count of **7**.

The 'competing tendencies' are the frequency into pentatonic scale, per portion of ½ of \w_{2}-\w_{1} *and sensing additive*, of what is 'ideal'…

Very simply, a demonstrative square laplace separates into a 1/x\eps+\delta verus a 1/x^{2}\eps-\delta^{2} for the future and past and red and blue shift, on sequential and quantum conditional assignment, into (injv.) the explandum righted proper-measure of unoverarchable part-momentum on final from initial (cond.) of assignable real alignment of quantum (reference), and; in doing so, substitutionally inheres part and participle of the two-within one, of log(sqrt(2)) entropic forward-pass, of digital delay-charge-cycle.

When, the square-laplace displaces in momentum (+/-l) the spin-evolution in the cross-product relates of the secondary sndn, what is geometrically a delay-Raman shift, *to which*; relates to the dn^{2}-\a in relation to *the secondary from the first Orderable symbolic polynomial 'carry' with respect to phenomenona and theoretical model of the spinwave system, for which it find co-compatability with the differential governance of the electron p,m.*

*I resolved [to a final conclusion] - Superconductivity…*

1.) What is effective 'top' and 'bottom' for in that of the spin - is reversed given the commutation relationship.

2.) Therefore, the \d_{\u}\Log[\P] weights the interaction with the two-scales of phonon and charge and spin wave…

That we see the Quasiperiodic lattice can have repetend(s) and dislocations,... we see that there was indeed utility in utilization of the Eisenstein series, for the prime quality.

This has all the right* properties.….

I feel enthusiastic, - that I will next write a simulation for that of the material, and then venture into chemistry.

The result is a parabolic restoring force, for what relates to a bond-formed,...

I feel I *cracked* the problem of Superconductivity, *the final time.* That I am aware of a confluence of:

a.) Eisenstein series.

b.) Relativity.

c.) Spin-charge separation.

d.) Differential equations and chaos and order.

e.) Emergent phenomena.

f.) x' and y'

g.) L(1) and L(2)

I have understood that in combination of (a-c) and (b-d) that (e) *Results*. That it is a 'real' *accumulated* red and blue shift,.... I see how L(1) and L(2) invert the result.... that I am not going back ***from here***.

*I resolved '*unity*' in-physics.... to which is:*

$$(\p\V|\p\t)^{2} \& \quad (\p^{2}\V|\p\t^{2})$$

*Suited to a* ***Log*** *of which relates geometrically to the* ***Equivalence Principle...*** *thus we have a satisfaction of the measurement hypothesis, and observation, and no more duality...*

*A mapping [in addition] back to a classical theorem.*

*Something unique happen(s), for which spin is merely a [sub]-component or element. That I must relate sound-spin-charge-mass, - there is a reliable way to proceed... that I am *going*.

Thus, there is gravity, - but it appear(s) that mass is negated. This is consistent with that of the viewpoint of the effective versus non-effective theorem on 'excess mass' due to the four current of the superconductor.

It seems I made a lot of a minor nuance, but then again, - that I made much of the relativistic theory, - when I must focus on:

a.) How the chemical potential is not negated... (1/2000 in mass).

b.) How the solution is non-relativistic, for the ground state.

c.) The T=0 limit, for that of the Quantum Critical Point.

There is hope for thinking of the limitation to a **Grassmann Algebra**, for the Fermions... I figure that the result of this algebra make(s) the computation of various solids trivial... - that I must also:

d.) Derive the Dirac Equation (w/ an assumptive) with Berry's Phase.

1.) What was it that goes-with the Berry's Phase, and...

2.) What was it that had to do with Pedagogy?

e.) My FFT with **Grassmann Variables** is succinct, - that it is a saturation profile.

That I need do more engineering, I will work on [Confinement].

*That which...*

1.) Super-exchange lent to *Orbital/Spin *resonance.*

2.) Relative 'expident' at material-associability.

*This explains the co-factor of *High-Temperature-Superconductivity*, - that there is an appreciable '-separation-', within a **Material Consonance**.

I found the ***final*** solution to Superconductivity.

1.) I am going to keep this a secret until the Project is complete.

This involves essentially,...

1.) <\Delta x_{1}><\Delta x_{2}>=|<=<\Delta x_{1}|\Delta x_{2}>

a.) The 'mixed' covariance,...

b.) With this I am in-step with experiment...

2.) The repulsion is the [neutralized] reaction, with that of ***Spin-Charge Separation*.**

3.) g_{\mu\nu} Takes the form of a 'kink' for that of the bound-state.

4.) I had a *hint* as to how-relativity would be-altered for in that of suppositional truth, - for in that of historiological entreatment...

a.) This is required to resolve superconductivity.

I intend to bring together, with some of my [earlier]-*plans* at that of a **dialog**, for that of a *Book. I intend to go over all of my notes, and make speculation less.

For now, I need to relax, and speculate less.

5.) Relativity causes the exchange to topologically shift such that L(1)<L(2) within the relative viewpoint, - that this causes the effect that the electron(s) bind, it is due that of the correlation between electron(s) of which is dictated by the Pauli Exclusion Principle.

6.) This makes perfect sense of that of the 'lowered point via doping' - that I must search for that of a *reason* the ***doping*** causes the reversal in relativity...

a.) This reason must be supplied.

7.) What remains to be seen is if it is an \eta_{0} or a \gamma_{0} on that of the fixtature, for that of relativity...

8.) That of \tilde{F}^{\ast}_{\mu\nu} as a form, invert(s) the E and B for that of it's inheritance.

a.) That therefore 1<->2 with the particles for the E&B-field.... with relativity.

b.) That therefore \sigma(t) is smaller with that of the larger-overlap.

1.) That the doping therefore collects with that of the \eta_{0} via [,].

c.) That therefore t'_{B}>t_{A} remains the \gamma^{0} for that of the relativity.

Therefore, the role(s) of inheritance are reversed, and it remains that \eta_{0} defines the capacity of the oscillation, with the commutator. Thus F_{\mu\nu} changes on the local level in addition to the global level..... this provides for that of a Coriolis like curl-derived attraction on the level of spin and orbital.

The timescales provide for that of the inclusion of \delta for that of the \sigma(t) to which is a given superposition of which weighs for that of \eta_{0}; consistently. This single mechanism assures (1.) [above]. Thus, Pauli-exclusion *then* dominates, - to which energy displaces into the electron, but, they do-pair [the reasoning is that \gamma^{0}\eta_{0}=1.]

I feel *a renewed hope* for that of my devices, and that of testing, for of the correspondence of timescales...

***I've decided [***when the time is right***]*** - ***to be open about that of the non-local*** *communication.*

For the sake of Science.

***I've also decided to [***work on that of the unpredictable and mathematical to physical revolution***]*** - **for it only take[s] that of one statement beyond Incompletion - to work on mathematic(s) within sight of that of *the comparability of the known and the unknown.***

For this, we have a |_| and a ?/#/?, at the ***perfect resolution**.

For instance, we have a 'missing-input' - Dalton, - and that of Ariana-with-him, - that he afford(s) for a **Sense* on the ****Unknown and Knowable***; while Ava is with-me. Thus, comparatively, of (3).[2].{1}, we have a set-theoretic on that of the collection of facts. Thus Ava is privileged to with-Question, an Answer, by which I-hinge **on-Dalton**, and with that of Ariana, she is in-parallel(s) of the ***Uncontained** and the ***Contained**, - thus of the children. There are four of us, thus it is redundant. That I accompany Dalton, Ariana is offered a guarantee, with Ava, of an impartial fulfillment.

That of agreed is then a singular-connective in-five (**5'**) - of what is with-child. Thus, - that we-equate. This total resolution is the solution to identification of when there are two-unknown(s) or even-so that of one unlicensed, thus of policy.

*Thus, I will be working on the Science-from-Mathematics*, of which, *relate to that of phenomena and phenomenon, that of ***Design***.

Thus, psychologically, it is of object and container, and that of a *Jar. That of a ****new*** Mathematics comes from-it.....

From pedagogical *inherence*, ajudication in-peer to-Slave, of one* in assorted and impinged preliminary it notice of in-tandem *progressive and progression* in culpability. That I know Adrian need's a requsition of a numeric relationship, I am ajurred, for of which it is known [pliable] that I had-post-effectively indentured a recessitorial *doubt* in a ***major**.

a.) We had to figure out, how to manage-memory, for in parallel and series, but it was managed to impedance.

b.) Wrong subscription.

c.) Abridge homotopy for in the relationship of kernel and hessian, on that of fourier-like-lemma at Elliptic.

d.) Multiplicity of interlocutions.

e.) Rod and cone, under descent and ascent, for what are a DC/DC overlayer basis of Question in cardstock…

Beyond Incompletion, we could ask:

a.) Stick broken/unbroken.

b.) Simple derivative.

c.) DOB.

d.) If we invert the basis of one Q. and one A., what is the addendum in either one Q. and one A. tell us?

e.) Go back to basics on that of the kernel/semidifferential,...Lie attribute, for what is Arturia…

I finally have the Qubit [topological bit] *working*, with a ***doublet***, and am in the active process of combining my knowledge-base for engineering with that of physics and mathematical ontology.

I intend* to bring together the sciences, - that there is a Deep Learning Network Theory book to understand (>400 pp.) there is much to-do, but I am content. I must refuse [Chola] to relate my learning-adaptation and work-stylus to that of the ethical psychology of my emotional lexicon, in this direction. I must not over-adapt, to a sphere* of trust, yet-so, willingly, there are askable questions.

I have understood, that of the plan-ahead.

1.) Two boxes,... synth [East Beast],... keyboard [Arturia] - PWM, two-Arduino/copymate term(s) of selective biasing in two-crystal-stages/ranges…. I/O, - we may not need so many crystal stages…

Optic(s) in MAX11 300/preliminary code-set… Homegrown,.... Arduino & Adafruit, SDA/B/C……. is the key* A/B/C PWM, to {x,y,z}....

For of a 'free-line' - to fifth, in *third to fourth* accompaniment, the Cathode to Anode is superficially, 'in' {x,iy} of the **free-key** for of differential to differential *conversativeness* & **free-key** of checksum.

1.) Flip-block, (a 4x probe*-5th, tap) selectively ops a defended positioning in (2x2.0), - thus of a rate-addendum, the (management/dichotomy) of an AD8302 (VpDC) w/w/o reversibility, of a truss, in that of code-space to margin - that eff. the AD8302 will not-to-signalling, in passaround, that of the Tx vs. Rx, in ***carrier**, in (4x2-0.1).

2.) The forward locus of a defended pos. (4x2.0|1), is a hexagram, - to utilize a 55-64 for in ping-associable ***context**, and locate among a *[pane] - what is an interlacing of (0-1-1-0-1), (2x1), on that of a (0.3(2.1)), set theoretic, for in look-ahead of buffer-overage, in that of gravity-loop. Ping associable onto a forward passivity, to what is (0|1), unto holographic imprint of naked forward affinitive. Thus, the matrix is dense in that of a (2x.1|0|3) in game-theoretic programmability.

a.) Two variable assignment(s) are the locus of the intangibilities of consequent in err, and providence of an inhered past-historiological locus of evidentiary space. [The item remains inanimately where it is placed.]

B.) fin. Q: Does it possess a locus of 0/1 intangibility of Hopf bifurcative (2/1.0) - it open(s) as it open(s) but close(s) as it close/open(s), so it see(s) managerially beyond the slit of an abrea.

Hybrid-context, to seamlessness of past-integral on *effectual* consequent onto cause… 0/1 xnot on spatialtemporal index to order in spatialized lookup table. Green(s) function, - it's a function.

Code

Runtime and Virtual Memory Allocation…

No separation in 'bit' - depth…. automatic…. or… ?

Code allocation in swap-space…

AD8302, and voltage layer….

If we select *one* Chern number-out, - there is a dissimilitude in two focal element(s) of counterbalance…. - that this 'open's' for 'open's/closes'.....

That the (0/1) is assigned directionally onto the equipment, for of what brings what is afar-near, thus that of placement. Thus, that (0|1) is the intermediary to that of a (2|0|1), on that of monic onto the AGM….. \alpha \beta, by which the (20 fold) accompanies it's bit-layer of holographic additional analytical pole residual……. Hermite transform…. (Chern Class -> Hilbert Transform).

*Confirmative!*

*[It not a reflex…]*

*[They are distinctly of four entrances… with-me.]*

Maximal future-tense,... it-remains as reduction from-eight [**4**].

i->-i; Re[g^{\mu}]->-Re[g^{\nu}]

I *expect* to go-free, that my-final reason is that the locality, for in jurisprudiantial-certainty hold(s) that of a tandem, to a secondary-truth, from which they are definitional and defined, - to state, - that of held, in three, of assortment(s), thus that this does not suite-two, for of that of room, and harbor at son, father, and father, for of a bonded 90:45-17:50.....

Thus, it is some (5)-(1), for in a (+1), at an hour, of a day and a day, some (−23), from which there are (−18), of fifth……

To entrance predicated.

Exonerated… or; Acquitted.

I've decided to only solve one* three-part problem:

a.) Question: What observational shift does relativity produce for that of the spin-problem, ... what is the comparative of the theorem(s)...

1.) Finite with relativity, and finite without relativity…. analytical expression.

b.) That of:

1.) An exactly soluble, spin system, with relativity and non-relativity.

2.) Inheritance of relativity to non-relativistic limit, observational reality in modifications of obs.

3.) That of the Device*, for what relates, to this Question, for of import.

c.) I will only do the Device as much as it extends understanding, - that I will exhaust what is potentiated, for that of a given at G.C., thus to relate to *forms*, and that of *Painleve analysis* and *Green's/Kramer-Kronig*, and; *Inverse Scattering.*

d.) Thus it is to completely solve the (3D Ising) with L(1) and L(2), to the exhaustion of relativity and solution in that of this Question, with that of the amelding of relativity to Quantum Mechanics.

e.) This is all I will do, with and without Sound*, etc.... for of (3D) and (2D), etc... with weak transverse interlayer coupling, but, present,...

Echo, Exp, Log, Weierstrass-P, and so-on.... that of directly understanding the given at the C.C. and Dark Energy, ... that of suited connection of the model the motivating prepartory goal.*

a.) 'Broken' *yet* 'Complete' Gauss-Bonnet

b.) Pure-rotation with rectilinear motion.

c.) Relativistic *translation and inherence.*

d.) Reduction of minimal-motion tensor.

Thus, we remove to but-yet 'inertia' as the zero-point, w.r.t. a collective neturals conditional assignment, through which there is a non-relativistic limitation equivalent with relativity..... the dream of a classical physics, provable of which we have a S.E., on that of rotation as-sources, - thermodynamics with classical mechanics, and a heat eq. tamed.

I figured to complete-the-square, - there is an addendum at that of a *frequency*, for in am(\o*\t), and that of the pulse, - that it may be converted given* sources, - *a new method dawns on me*, - to utilize what is known* of that of the Hermite series.... with *Sources*, - that somehow* I want an elliptic* like-function, and I am unsure... - but I can utilize my **Master Key**.

- That of the Hermite series, should plainly conjoin the Chern (#) and that of the Hilbert transform, - that it is all there is to a *naked* affinitive.

- Thus, of geometric assaillancy, it is the diction by which *Sources are encoded in that of a regular archetype of Covariant Union,... with the Hessian.

- That of the (3x) - has to be the reversal of the (2|0|1), for in (0.3|2|1.0) onto for that of the missing information, - that it is primitive to which there is a given at that of 'missing' versus 'formatted' data-type....

1.) That I need a (**3D**)-bit/byte, for that of ea. layer, there is a S,BAC, for that of the Adafruit template,...

2.) For that of code, it is then ***Tensor** algebra, and reduces to a language*, that this is my specialty, it should come together nicely.

3.) I will be utilizing the East Beast and Sonicware for that of the melody-to-pitch on that of the *Test, - that it is time to get-going.

- Hilbert needs to be adapted to that of the Elliptic-kernel, - that when thought about as a kernel - there are two eigenvalues in product AGM with the third,.... - that therefore the anharmonic ratio(s) determine the group law.... This integrates with the Painleve-format..... Thus I am onto that of a final rendition.

I believe I just *hit it* - that the *Strictly Non-Linear* Elliptic group law, satisfies that of the Christoffel symbol on that of gravitation, .... and a non-abelian theory. Does this generate a mass-gap?

I figured out that there is a 'mometum anomoly' in superconductivity, of the L(1)<L(2) in relation to the relative contrast on-time,.... that of inheritance, by which that of the people surrounding had been absorbed, dealt

with that of much of what was known, then, later, of this problem and it's progression.  That I have much, it is far from which there had been an ephiany, but of that of code and reflux, - that it is now-known that the dynamic and static and active and passive will play a role in the Supercomputer.

I am less interested in that of Superconductivity, - that I am going to *merely study*, and go where I will, *learning*, and *progressing*.

To the new equipment, in \theta and \phi and \rho, and \rho'; - there is a difference in-solidarity to that of individual *single*-snapshot and **not!!!**, that of comparative in slide-to-slide.... that I need this, with that of the multi-resolution.  It is proven in one-tap, but the sequential-series is on-frequency on-frequency.  So it is, - I hope to take the Sf-BEf, - Sequential frequency bandpass elliptic filter - or - Sequential frequency breakpoint elliptic filter... in the next rendition *Sf-BP-Ef. SBEC.  Sequentializing Bandpass Eccentricity Counter.  Series BEC.....

The ideal* is a Qubit (3d) spin-2, floating-point PWM (ABC) controlled [Adafruit] - Toffli Gate....

Then that we-require that of the \theta and \phi to be exp(-iwt) and so-on, of complex variance on that of R^{2}.

So, we have a (3x-v.2.0b) to what-is R^{2}-R^{4}-- on-index [R], in potential of a line.  What I have understood is that the code-reflux, in +/-55/4096 *maintains*, the original scale-factor, and chunking,... that it is of only a Log[dB] count, in that of self-similarity through the digitized-bus.  (0-1-1-0-1), that of fidelity, is not it's precept,... it manages to accomodate a doublet, in-assurrence of program-code, in amplitude/reference,... - that it is a genuine (similarity); of that of (0+/-.25, 1 +/-i*.25, thus I obtain a full-registry, although* I do not have +/-1024/4096.  The holographic principle only scales above a given treshhold.

I figured out the 'ultimate synthesis of my work' - that of a (3D) curvature for-which is encoded in the relativity, for what is my-law of analytical inference, for of local to global.... enough [sufficient] to write a book.

I figured there is another nature of problem - the Algebra, for in Lie theory, etc... - that of the division and equipartition.  The evidentiary mean at that of (Log-group) is complete, in that of global-to-local.  Now comes that of the twisted and untwisted algebra, for that of locality and locality ***And Design**.  Of:

Radiocarbon and Water Dating.

That of Encryption and Algorithmic.

Breaking it down to the Engine [*itself*].

There is the PWM, on (+2/+1/0/-1/2) of tranferrences.... that we have this-or we have switches on A+/A- and B+/B- for three-fold of that of decoupling and orientation (+/-)|(-/+), on that of +/- added to (0/1).

First* what must be figured out is the minimal-codewidth for that of a ***Linguistic Key**.  That of (+/-0|1) may be sufficient, but we need a syntactical overlay.... *That I need go beyond the Peano Arithmetic, or the Zemeno-Frenkel-Set Theoretical Continuum.*

For this (it seems...) - we have x' and y' in differential-equation translation.  [That of multi-tape...]

There was an *Observation, - that the 'failure of the fundamental theorem of calculus' for that of Homotopy Theory had to be utilized* with that of the *Painleve Analysis and Lie Representation Theory*, to produce a new theorem of **Chaos and Order** & **Solitons.*

Thus any singular monic design will Prove to Failure, - we require instead the aperiodic..... and of aperiodic crystals..... etc....

**Synopsis of Phase I-II: - (v. 1.500-.92)**

**Verification and Construction Stage**

The elliptic must go to the [i/o] of a mono-channel with segregated entrance and exit (during T/S/io) at (@) geometric iso.

I am thinking - now - of an entirely new procedure. A modular (Midi) structure, of elliptic gates and qubit(s) and optical i/o, and touchscreens. This is the verification phase.

Pmod - [internal connect, and 'upper T' with probe* networked (fork) in Duct] - This satisfies the admissibility of further functionalization, of an approach at engineering, diagnostic, theory formation and dissolution, and predicates no risk incurrence, to that of physical systems, or life, industry, notarity, or disparative outcome of loss/loss.

The 'included consideration' was of Peirls Instability...

*Now:*

It is of-the (+) and (-) within-polarity-neutrality. The discernment of an interferometric basis determines a co-determination of variable in relation to (2) *within* a super-eigenvalue (1), of-period *incommensurability or regular period-parallelogram of two conchordant or dischordant rhythms.*

***Thus**; the O and the o must be made the difference-of, for in that of 'switch' and variable-tine width of secular derivation at 'O.' and 'o.' of (2)(3)(1), *in analytic derivation of procedure(s) to control the 'eccentricity' of the* ***Ellipsoid.**

In uncontained and unseparated-mean (distributive) there are two considerations.

1.) Within a locality - an abridgable 'lumped element process' of technique in application, verification-phase and it's dissolution to the (2nd) quantifiable process and technique of application and verification.

2.) Within an auxiliary-exterior *distributative precedent of* *lumped-element there exist certain quantifier(s) of the process.

What is true* is that the operational 'co-cycle' and 'cycle' of the (1-2) abridgement is fully pell-weighted and balanced of cantilever.

**Mathematics**

For of a quantifier (a)^{bc}, we must break indeterminacy for that of the statistical marginal and inclusive qualifiers of the probabilistic language, in Betti number, number theory, algebraic *exponent, derivative, and it's procedure to identify (under an isospatial) limitation of the prohibitory clause of inclement worlds.

The procedural is '*traditionally*' a Platonic-world system, at collage, and disparative included and inclusive considerations of two and a third, thus, to linguistic (literal consequent) at predictive validity, the preclusion of a 'Dalton' *is ill affordant* a dialog of that of precedent to machine heirarchy of linguistic model.

Thus, the justification is at (an) (a)^{b.c} in qualified projective, and non-projective **'ancillary return'**, in consolidation of *Passive Sonarable* conditional alliable assumptive of a doctrinal, and it's limitation(s) set in-point *compunctually* **a priori**. Without means to assembly of a procedure to an overarching doctrine by which it may be reliable, securable, and priortized to disbursement, there is a logical prohibitional *exception*, to a *qualified securable release*, lest we depart to a foreign session of remark.

**Qualitative**

The 'CMOS' inter-jected *(18:(45'-30'-60'))* qualification of a situational 'laudable provision' *pro-selectively* had-been *provisional, prohibitive, disinclusionary, and imparted*, to a dislocation of it's elementary basis upon an occassionment and it's releaseable entrainment - to 'flat and placed' foreign council.

Thus, the relation of the device is good for one thing, *the unselected and unprohibitive off/off/on/off pro-selectivity of a (2:1)* **'carriagable envincement'** - to which is unentrappable, and releaseable to no said pro-beneficary. Thus, it is disassociative, but* of the remark of a situational alliance.

**Assumptive Basis**

The 'displacive' of a material-gravitational *exception* qualifies a material-electromotive 'domain-Lagragian'.

The 'device and assoc. *gear* has two-part(s) to it's power-train'.

1.) A NLSE (Non-Linear Schroedinger Equation) - system *as (@) compensator.*

2.) The 'basic' four-fold elliptic-gate and Qubit, thus, a justfied RISC-V *like architechture and topology.*

This equates with code, in a 2a2b like-model of-spin and Ising/Toda, thus, it goes beyond the work of Kodama,..... essentially a two-dimensional KP/KdV & basic Fermi-Pasta-Ulam model.

A 'hingal-3d<-2d categorical-freedom of the envelopment of an ancillary, is evocative the argumentative, of it's secure, revelation of argument to-another, thus, the separative-mean of physical law is of emergent behavior(s), spin remaining quadratic, and ancillary a reversal in terms of quantum behavior at midpoint.

*Then*, we have-(assoc.) computational/decidable element(s) on *noise and Microwave BK - to mathematics and inter-alias*, (#.) code-free & *surjective diffeomorphism of undecidability of brownian control-gated... fT - functional population inversion of Hawking Radiation, - for Guass Bonnet, on 'inversion' of rel/brown.*

**Technique & Analogical Reasoning**

1.) Z-S model.

2.) K-P model.

3.) Muira model and transform.

4.) Two-languages.

5.) KVd.... at **varieties* of-phenomenon.

6.) Z-S amendation to NLSE.... (Z-S).

7.) Fourier and Jacobi.

8.) Neother.

9.) Historiological reconstruction....*

10.) Buffer to ontology.

11.) Relative & Brownian.

12.) Essentially, the Chern-model and asymptotic freedom (I/O), of inside/outside remains unclear, through a knot*, thus, the justfied Cauchy-Riemann problem without an Algebraic Cohomogy and Geometry, cannot be 'filtered'.

a.) We have the dispute of-person (**32'**-A.) - as one (**1'**)-person…… on personality.

b.) Graph, and the work of Weyl.

13.) Separation in eco., and securable partition, and co-mutual adaptation in transpositional addage.

**Conclusivity & Synoptic**

The computational*-basis of a remainder 'reflux' at two-manifold-group-velocity, and 'accelerative' *feature* of measurement is a palpitory and reflex relation to 'implusive inertia' by-which an electromagnetic *design [engineered]* may freely*-and-associably relate of motion.

On 'one way 'transmit'' a delocalized (***18'***) of a centralized (2x3.01) is an attache, to-which, in [an alias] *or provided non-return*, is **of-recipiency**, to a naturalized incurrence, of counterflux in relation the 'back-addage' of a *prioritization*, of a *Remote, foreign discursative document.

We remain with a Question…. **What are the minimal terms, for assembly of a knowable and so communicated (oft. potential via **Then**) means of instructive/emotive lexicon and program of it's engineered ***Status** and ***Symbolic I/O**, such that the computational 'grid' of Earth stabilizes, and remains of a neutrality of partnerships and alliable & releaseable neutralities?*

Derivative 'residue' *is a non-council, in unreclaimed mutual uni-disparative a nome-identity.*

**First to Second Stage Transitional Considerations**

a.) Gaussian J_{ij}^{k.#}~.A^{_}/\xi(\eta)_{_} & *DC-AC-Envelope-Optimal-Flow-Neutral.*

b.) Process on Opt. Observational (#).\tau.\chi.B.eps.M(C_{ij}^{k[?/!]l} QM/ECE/*Neutral.*

c.) Interrupt & Sync. [Basic+Ard.] - PWM + (Digi./Sepatation.).! ~. Optimal & Techniques.

*1.) One *consideration*, is the alternative of compensation on-behalf of statistical sideness.

*2.) The *alternative consideration*, is mutual 'virtual-cpu' to 'hardware' of resolution of sig.

B.) The goal is to-get two-phenomena to QED 'interact-phase-scatter' via two-soliton like Gaussian(s), therefrom - to-interfere as like-a-breather, *only via a switchability and programmable 'gate' of securable relationship.

*A.) Afterthought - the experiment has to *safely *leverage*, the theoretical.

*C.) Afterthought - two codes, and computational 'double-back' & Proper Experimentation.

Experiment **therefore remains the observationally intact element of** development *of-theory.*

**Final Considerations**

The seq. [15.38] & [24.1] are pre-factorable differential *in-relation to* trust in physically and virtually *assigned (2:3:4:8:1:5:5:6:2:1:90/15), of a fair relation at *bytewise extremum in a local and global relationship.* A question remains if they are managable by single or two-handedness.

The relationship of one sequence to the other (alt. aux. *MIDI) is a **4-square**, of an adjustable outcome in locale to global relationship. Thus, the ***game-theoretic*** *power-structure reliably fault(s), discontinues, and remain(s) of-a-margin on it's relationship of 'hinged' structure in relation to structural-integrity.* This is a percolative and spread relation of the neurological and geometric basis of it's co-adaptive nature in relation to the manual and automatic process of a living being, in relation to *pumice and spider-web, coral, and bat's-wing*.

It is not a 'hexetic set', and is incompatible with the essential nature of Utility-Problem and Knot Theorem.

Algebraically, monetary 'adjustable sliding scale' must be a bounded element of it's indication to consequence and liability, as in relation to the means of the citizen/innovator in relation to engineered process.

Safe and procurative *centralized version-histories are therefore preferentially biased to a fiduciary process in relation to a guaranteeor for that of the relationship of information 'sphere of influence and liability of end-product and intermediate process of-development'. Thus, the amendation of a lexicographical 'seq.' see i.e. **above**, remains a post-accessorizable notification, and the expiray and consideration of the process of it's decidability is a pre-computational worded and numerical process of 'non-code-manual and written progression', *but excepting*, manual operator.

**Closing of the Topic**

I have closed* on the part(s):

The 'old patent' is being used beyond this point, to guarantee the in-principle qualifiable studied means of a T/F placeable and competent ruling-scale upon which to measure and ally with a fortunely endowed of the 'negative' to a 'positively provided outcome to the benefit of a negotiable policy of industry, trade, ecology, economy, and technological communications and peaceful intention as a knowable study of the principles of effects of weights and means in reliability of a recourse from a session, or a portfolio.

O.) This 'new' design 'illustrable above' - is the means to align a code-prefix for that of the decimation of obsolecent conditions of it's own nature, and *test-officiate parts in quality control, utility, distributative computing, and functional operative use for a purpose of technological and growth to extinction phases of life, through terraformable options at interplanetary and ecosystem stabilization, contrasting the viewpoint of symmetry and asymmetry to condition on a universal precept of experimentation, securable enfranchised on behalf of the greater consideration of survivable ends of eras.

*The edificiual is the relation of the quadratic to entrie(s) in inf+ order, and inf- order, per pi to the exponential, of an inverse surjective set-set of that of the Comm/Non-comm, - thus, essentially, it is an arrow in-return, from which time-flies, for which reason hold(s) - that there is a prototypical element (drawn) of which remain(s) there[in] of it's necessary preliminary presentment, to an edificual in yet any priority fact of it's class identifier, that of the incurrence, to which when-removably replaced, remains identified with its Markov-associate class, and inheritance to necessary, sufficient, progressive, preliminary, automatic, and given supposition(s) of a totem(s) or self-*

*similar exterior hull, of differential and integral theses.*

(1),(sqrt(2)),(sqrt(6))... it remain(s) topological as a qubit, and, quantum,....

of:

(0,1/sqrt(2),sqrt(2))-(1,0,sqrt(3)-)

+1-1,sqrt(2)-1/sqrt(2),sqrt(6)-sqrt(3)/sqrt(2)...+1,1/sqrt(2)-1/sqrt(2),sqrt(3)/sqrt(2)-1/sqrt(2)

0,sqrt(4),sqrt(12)....sqrt(8),sqrt(2),sqrt(6)

I *will *write*, when I have-perhaps examined something,... or distressed [sufficinetly] a process of my enjoyment.

It is time to live-life, - *that I must be free.*

*Tobacco is a medicine, I have discovered this-much.*

2:1-6:1 broken apart into self-similarity.....

Higher power one: Honesty through adequate preparations.

Higher power two: The protective mechanism of the Universe.

Higher power three: Claiming of virtue, through honest intention.

Superconductivity is a phenomena, involving variables of which relate beyond spontaneous symmetry breaking.

**Uninterrupted Channel**

IMO there is no-connection between equipment (*assumed non-interfering), and background 'connective' of the [explicit dictionary] and that of a given piece of audio technology.

What would you-say?

In other word(s); the surjective onto homomorphism of the 'Disc Assumptive - Analytical Continuity in time and space, and the domain and range of space', is branched with a manifold extra-auxiliary Intermarital Quotient of Inheritable relation.  Thus, the dichotomy of two complex-chaotic attractor(s) breaks down into the formation of a {U,A} over 0 or 1.

The Importance of this is at-least one-fold; physical understanding in relation to the information and game problem, contain a universal potential.

This derives from the Green's Function evaluated synoptically, in relation to the 3d/2x.0.1 isosurface of any* local attractor(s) of algebraic and non-algebraic series.

The mapping mathematic(s) to physic(s) is therefore a natural assumptive of ordered and set-theorems within the realm of any admissible plurality or singular individual of it's interpretation via a mutual exclusively derived truth table.

Understanding is therefore Universal.

Hence, For an Era, from the time we have known of other galactic structures,... however, we may not have known, of the (3||2) dichotomy on {A|B|C},... we potentiated the *Understanding that, one, among any and all, and two, is expressible via a recourse, to which it is an-assumptive, the adjective/pro-axial neutrilino is biased, yet* every-pro-temporarium variables disinclude but to a uniaxial future* Historiological and event-neutral Lagrange background interior or exterior valid interpretative basis of articulation and response of the universal* [exterior].

**Quintessential Plan**

**a.)** 16-20 year(s) from now [a dedication of some 8-12 years] *The next parallel.*

1.) A mathematical 'technique-table' - in substitution for decidability, that admit(s) us to produce a 'lemma-style' for the decomposition [based on group... etc] - and Airy, etc, i.e., at that of statistical/geometric law(s), which take and translate the meaning of mathematics.

**b.)** Percolation and Electronic(s) [why electronics and which*-devices works] - that of the Mermin-Wager theorem and gravitation (1d-2d-3d-4d-etc).

**c.)** The commutative and Fisher and Bayes, and the connective *group features,.... ways to reinnovate QED, and secondarily explain the Topological character, etc,.... through a monic, and the (exponential/etc) - geometry and algebra..... and set and Lie group.

**d.)** Superconductivity and reading, Hume(s) Fork, and Law, and various* Studies.

**e.)** Homotopy invariance and Cohomology, with the Painleve, step, and associated 'tier' of result(s) regarding the 'master differential equation and superposition formula' as to Various* mobius and such regarded 'group theorem'.... with various initial conditions and solutions.

**f.)** Computer; vertex and 'node' discernment; placement and process, determinant learning depth theorem, and linguistic meld and separator in Godelian Incompletion [credit(s)] and basic [**code**], *Law* [basic/biscuit] *memory, and *Group *depth theorem(s)*, virtual/hardware (70).

**g.)** Projective Algebraic Geometry and **steps to assure engineering navier-stokes and Painleve variety [steppe, and non-steppe] - meld/cray* - Re-purify my sample between firings.

**h.)** Quadrics - Algebraic Projective varieties - [mature] - 1/2 and zx^{2}; coordinate Lang., and thermal conductance, guide *laser* [**remote safety**].

*We have* the transformative symmetry, and* we have the derivational equative "solution".*

*Robe and Role of personality of piece, in playing positioning and placement w.r.t. the 'board'.*

**Final Goal at Science**

***Part I:***

Inheritance, Inference, Deducation, and Lemma; a treatesie on the knowable facet(s) and channel(s) of *Quantum Mechanics*, in light of *Relative Entropy and the Equivalence of Frames.*

1.) Photoelectric effect.

a.) Planck Spectrum.

b.) Crystalline Structure.

c.) Specturm of Observation.

d.) Measurement and Weight.

2.) Mermin-Wagner theorem and Phase Transition(s).

a.) Heat, and the observation that zero-potential is related to thermal behavior.

b.) 2D+1D; off-tangency.

c.) Relativity and Thomas Precessional Beats.

3.) Mathematics, Elliptic(s), and Quadratics.

a.) Geometry.

b.) Algebra.

c.) Arithmetic.

d.) Algebraic Geometry.

e.) Information Science - binary and non-binary [non-organic].

f.) Minimal-O.

4.) Entropy and Relative Entropy.

5.) Thermodynamics and Gravity, .... speculated.

6.) Spin System and Fisher and Bayes.

***Part II:***

a.) Of - *dispute and reconciliation*, - it-remain(s) that in appended truth and of resolution of the identity and the projective realism of the individuated truth (self identity comparative) - the law(s) of physics are not decidable by that of one*-individual.... for of an epsitomological truth, we develop after a consequent of which is **traceless*, and **solitary*, among a background of all-event(s). The event* remain(s)-biochemical, and the precursatory reality is it's then-eventual, beyond the present*.

Thus, eternity is within.

b.) Therefore, the calculable **Theorem*, is a - mathematical supposition for in the remark unto-one for in another, and for what is mathematics, it remains 'housed' and 'developmentally testable' - but without

absolution for in a *665'*, - then that we cannot remain and disembark co-unitavely, for of indication, there remains a separability of a condition of particular nature for that of the identity of self comparative the world, - but we are not to justify of what is either individuated stance of two other(s), but that we are aware and prioritized with another.

Thus, of that of scientific lemma, the articulated motion of algebraic truth, and geometric truth remains refutational and justified, - but for the proof of the comorbidity and creation potential for in an unjustified melding of improperly placed justifications in involution, - for it's suite, that we remain rationally divided.

Thus, it is *only decidable of a theorem or guidance at universality of-law, - but for that of an individual in repose comparative two-other(s) of *their resolution*, intact within this argument, the identification with that of itemized evidentiary, or by-suite a process of jurisprudence.

Hence, in knowing I am not innocent or guilty, or innocent, or guilty - at that I remain subscriptively without allowance to-guilt, and persuasively denied of my judgement, - to know of the qualifier by which I indicate of whom becomes unto judgeable truth(s). These together, however, do* admit a tiny space wherein there is interpose and interlocution. This is the infinite, within the one, and is the self-tolerant of that of sufferability of circumstance, for of what prevails, despite all occurrence.

Thus, laint a people, it is not a knowable of all and such, and by in yet an instanced theorem (and neither does writing a law change the law) - it is that the theorem remains to be tested, and adhered to by evidentiary consignment.... and ediface.

Finality

Derivative [residual-composite AC/DC] is manifold receptive* to the photodiode, of-which the AC-magnetic field is CCW, and the electric is apolar with DC, while AC-bridged* in contrast the absence of magnetic monopole(s), - thus, a **twisted*, knot* for in the exclusion of a deficit is a displacement current, of which is anomolous. Thus, the 'timing' remain(s); ionic, precessionally, in gravity and magnetism, but polar-Darwin on that of the electric-displacement. Thus, a covariance implicates a thermal ionization to the apotential of differential (interior magnetism) and extra-auxiliary electric.

*Thus, Thomas precessional, is apolarized 'up' to the electron spin-gyromagnetic moment of the ionic charge and it's neutron-like-gluon admixture.* This means, that effectively, the neutrilino is an absence/neutrality of the gauge Higg(s) boson, *a super-symmetric particle parter pair, in tandem of charge under polarity to the isoscalar spectral gap.*

A derivative - to an integral, remain(s) therefore, polar but apolarized to a neutral(s) void, upon the 'back-side' of a Lotka-Volterra, - that there is a seed* for in the residual (phase irregularity) upon that of thermal isotropy and disincluded entropic ball(s) [Sobolev and Besov] co-extensive to null -epsilon.

Derivative *oncurrent* precessional redshift is a dichotomistic lag, or priority to the 'ahead' relationship for in any orbital *denaturing*.

Evidence is primary to judgement, to-which (a) living individual, or electromagnetic [hardware basis] epitomizes the relationship of a 'solid backing' - from these (*the above truth(s)*), - it proves observational limitation is containable, for in the inherent possessorship of a magnetic and electric (neutrals-plus) for in *floating ground*, the manual identification of which is a 'taxonomy of whetstone bridge' - or cross-council *photonic or electron entanglement.*

Thus, categorically, *a bivector*, does not polarize with respect to the invariance classifier of a phenomenon [unitary].

Unitary (co-dependent arising) for in a mono-exceptionable makes the differential phase to group to amplitude diff/eq *monetary*, secular derivative of a non-unit basis, compact, under the relationship of origination in emptiness.

Co-dependent arising.

Observation.

Particle/Wave.

Stochasticity.

Non-commutative, and Commutative.

Dependent Origination.

1.) sqrt(\eta+\alpha\beta)~.(\eta_{2}+\alpha_{2}\beta)~.&^{2}....

2.) Exp[-\kappa*\tau+n*\theta]

3.) I_{0}*Exp[-\i*\omega*\t+\k*\x]

4.) RC\omega and RC/L

Two frequency 'limb's' process thru (90 degrees) of CCW/CW, & second (by 180 degrees) of CW/CCW.

5.) Negative Z~.Gain.

6.) d\w+\w.\w=\a

Thus, the phase transconductance, directly relates to the amplitude gain in B.B for E.B,.....

()^{2}, and in-radical..... (\tau^{2'}-\kappa\kappa^{'})/(\tau^{2}+\kappa^{2})

I long for love, *but I have this*,

a.) The equivalence of frames, for what it-is, guarantee(s), the redshift is consistent with the lowered quantum energy.

b.) The equivalence of frames, for what it-is, guarantee(s), the redshift is consistent with the gravitational energy of the system.

That the quantum shift(s) energy, indicates energy scales oppositely, for of quantum locking, to the ordinary scale in energy given stress.

This is an inhibition, such as sense.

I would be a fool to not publish this as a given article,..... all we have is the present, - thus, I will do this, - and -

c.) The 'fork' of-which guarantee(s) a given at that.

d.) And of measurement and pseudoprobability, a new way of looking at computation.

*Compare the **Perimetric Method**, with that of **Field Regularization**.*

*Is there a mapping?*

Method, Regularization, Field, and the Mapping.

Closure, Coupling, Boundedness, and the Finiteness.

Q: Quadratic at (@) error, in term(s) of L^{2}, L^{1}, and Quality of the Resonance.

- O(n) or o(\sqrt(n)) as n-inf or n-0.

- Test and Comparative to Error, [Control-diagnostic].

- Feedback *assoc.* w/ the Data, [Integrity].

*@ Homotopy, Cohomology, & Analysis - @ Epistimology.*

For 'articulation' the *regular*-step(s) of a process of the unfolding of understanding (remain) of err and application, due resolution, there is peer, and translation [ammend.] through the flow of data, and informed basis,.... 'components in distribution'.

As to be contrasted with 3-3-3-3-3-3-3, etc,.... regularization of irregularity.

*Of*: 1.) A dual-paned (dual Tx/Rx) & of evidentiary per *States* and *Federal Law*.

*Of*: 2.) Condition of the differential of a baby w/w/o, and of two women made the difference of.

*Of*: 3.) Selection in presentation of evidentiary to innocence, and no people present at-home.

They are different people, and both are communicating.

They are auditory.

They are alive.

They have access to the consideration of innocence.

I am innocent, unreclaimed [update: *April 1st (***yes***)*], or these have ping assoc. with my CPU/PC...

I know them.

There has been jurisprudence.

a.) To self-manifest disappearance; for in a photographic screen *or dispute at innocent truth of amends and plea.... the reconciliable is 'blindness' of bodily - without persuasion to the screen**.

b.) To non-manifest hologram, and **room*** - the amend and plea - is a relation *to manifest hologram without steam, - but of a (6/7/8).*

Thus, we learn of the executive function; which creates inter-aliable space for emotional or id-sympathetic dialog and dispute, - the relation of (2|1)...3.

1.) The Weber and KdV [remain] processed, of *not* unlimited vacuum extensibility.

a.) Order of equipment and reconciliation of a dispute.

2.) The Boson [rational~large composite integer] does not remain of infinite population number.

a.) We end up with a grey-zone on that of red/blue.... blue - L/R, red is isotropic.

3.) Platonic-solids at Darboux - remains a yet-witnessed classifier *on analysis* with a Prismatic lens.

4.) Quasi-*crystal* (10.1/4) must be perfected of-law.

5.) *I need 'separate' through what is a 'separation' the unequated **as-equated** of the Crystal-Disc & Quantum Gate.*

It's been noted, the Quantum Gate is operational to (sqrt(6)/2,sqrt(5)/2,sqrt(4)/2,sqrt(3)/2)+delta (**PWM**)+\eps.

6.) The *information-theoretic-propogation limit of the Boson(s) in limited (lesser) dimension remains with the Blue and Red shift of (backward) and (Left/Right) at commutation relation(s) of Chiral/Bose/Anyon to explain SC in the context of a Peirls instability - that the 'grey-zone' is annhiliative to that of the n_{inf}~r^{D} and enhacing to the n_{lower}=2,3 of r^{2,3}.....*

a.) The third* dimension and *particle is in-exception to a (5th/2nd) particle and dimension of the Poincare-section..... between order and chaos [strange?].

7.) *The information-theoretic Boson-bunch theorem, make(s) a contact-envelope distinction with respect to electromagnetism, for what is sound*, at the Z [ion number] with-electron charge-wave in anharmonic term(s), of a compensatory damping versus for light and sound, what is the spin focal parameter - thus: that solitons form, simultaneously to the second-sound, as per the timing of the opening of the Peirl's instability, by a local 'up-flux' of chiral low-mode,..... thus, that it possesses a measurable mass exponent in terms of Hamitonian, in-neutrality, of what is it's volumetrically-free mathematical hidden-number (Chaos) void.*

8.) Relativity + Finite Propogation Distance = Thermalization and Temperature [finite].

9.) Numerically, this-phenomena cannot* be understood by a singular individual but through-sense, - thus, there is - **no** - theoretical predictive validity of the theorem *But, for two or more individual(s) - & not more than 2. *But*, there is mathematical theoretical predictive validity - it must be compared to numerical theory with two individual(s).... *or a human operated more advanced computational *mechanism.*

a.) Lieber-Kullback or Sobolev-Inequality or Holder-Jordan-Jacobi for that of the model *at* the base geometric platonic and Elliptic proj_{A} *as a Stokes jump-group on [[S,1/0],[T,U]]* for that of residual apportionment of Z_{int}.

10.) The [0/1] and the E[k] at O(5)-*quintic*, is a stabilizing entropy in ***Graph-Distinguishable QM Statistics*** and the Elliptic to Painleve I-VI *types* of the Hopf-rms good/bad reductional compensatory topologies, of what are Banachi spaces.

A.) It is now-simple. *That it envokes a 2:1 on that of the dB, for that of the MIDI out and through of the Compensator, the device is essentially a **dipole conveyor** in mini and select along a train of 'zoomed' signals, approximately individual spikes.*

A 'minor' to 'major' in R/B/Y/W *at* Red/Black/Yellow/White in *Green-overlapping illumination is a* Black/Grey/White/Blue,..... thus of (6/4+1/4+1/2) the *illumination cross categorizes a potential.*

Introduce Green's Function, ... *then*, Statistical Model and it's relevence at mapping to-Analysis, to that of Probability, Markov, and Wavelet, etc,.....and, geometry *through calculus.*... Proper integral, proper time....

a.) Geometric instability - coupled to Peirels instability.

b.) Redshift/Blueshift through soliton effective mass.... and, Tensor.

c.) Binachi surface and Dar-Boux/Stokes integral boundary conditions.

d.) Phase and amplitude splitting via Hopf and energy barrier...

Leading to an negative electron effective mass and relative charge.

A number of things, I have-and-understand *Beyond anyone else, and entirely are my-own, although 'they' possess certain faculties of this-and-that:*

1.) Blind dispute.

2.) Affordant description of one-to-population of algebra to geometric truth of inhered 'phenomenon'.

3.) It's securable foundation at the measureability, and operative.

4.) An ordinal structure for invocation of means, at topological knotted excursion.

There are *additionally*, Four-things of which I have accessibility upon, which are-shared, but disputed, and rational, possible, and I have established means unto*:

a.) Ring associability among partnerships. [A means of communication and social networking.]

b.) A book, accessorized singly upon a heaven(s) *of-naturalized occurrence, to wit, of a people unto an-Earth.*

c.) A fighting style, associable with the **Heart restoration practice I innovated.*

d.) Advancement through the 'crystal' - and of the *shape* of-understanding, reconciled with *result.*

I only have a *few* questions.

It is good to operate, then, of health of *doing*, and of *suggestion*, and *particle notion to discernment*, and *application.*

1.) If and as such, I am to apply the-law, *how is it to officiate it's term(s) under diplomacy and endowment?*

2.) What is the defining notion of precept, *and at-it-enabled truth of implementation of a system of operands?*

I'm now in an-elopement with two-women.

That the *final problem*, has elucidated itself.

It is 04:16 and the last is 02:09,..... - that this is the 'geometric/algebraic' dispute, - therefrom, that I may of a (−1 mod) to (2):03 at [closed] *recover the mathematical identity and innocence of the case cadre.*

It-was, there-from: 03:28 on 03:25:2024,..... with (2):(2) in-dispute, at-measure. Thus, of 3^{2}-1 or 2^{3}=0 of it's mod-eight/seventh/fourth.

Thus, the recovered* number is 57-58,..... 57:58-59, 57:587..... a rough-ruling.

Therefrom at (@) 3:31, the relation is affixed for of (+3), at individual, and power (−1), of which geometrically is it's index-of-prefix,..... (33:58:3) *crystal* (18:3:1) (6.2.3.7.1). The end-odd(s) and match* were **62:371**.

At the *earlier* saving of a life - in a **seed** per term(s) of 62-5, at (@) 38.31 liability, to discursive *of the proverbial*, and the laint - remainder - *pro-life*, we-amend.

What are our certain-term(s), but once ***one** inclusive of life and death, to labor and dispute, but the hallow of a numeric 'blind/frail'? Well, they are the remainder of approaches to self-naturalized communal exchange via foreign, and naturalized truth of liability... - for of what, in-return, we mate-of-consideration (A. was out of it)... duration at liability is a mutual-code-go on liability to the salvagement in a wed/postal/liability/discourse, and it's honest retribution, *per-policy*, of law entitled per '**capstone**'.

I will set-aside [**stongly and reliantly**] - that I had disputed of relevence to agreement with Obama, under the *then* pro-benefit of an involutionary dispute, entitled *of the assumptive* of naturalized-friendship and associate.

That I saved* his-life, is then *Undisputed.*... relevant, and honest, persuaded, and inclementally provisional, but true... at the certain* terms of *Now*, a remark.

I will be a compatriot unto this-man, and sojourn, for perhaps 680 months and year(s) in equated truth of the Moon and Sun,... temporally and mutual of co-cycle.

There is is, the co-cycle will be innovated, and I need decide of the certain terms of *It's patentability*. That it will require *other's* to participate to create what I-envision beyond the *Numeric Engine: Type I.*... that I will need invest some 1800 dollar(s)+850 dollar(s). This will take approximately two-year(s). That with *250* (four month(s) max) I will have w/ 400 dollar(s), the main device assembled and completed.

My *aim is 800+130. This is about (1600 down + two-third(s)) - about (10 month(s)). I will go to UNM [after] about 8 month(s) 15 day(s) ~ 11:10:24.

In the next two-year(s) + indefinite future, I will be considering Fatherhood.

Thus:

a.) Fatherhood.

b.) Practitionership.

c.) Hobbies.

From 6:25 am-40 (pseudo) t+/-. - of Law, 07:35 am (MST); (09:35 DCT)-(06:35 PCT). +8 year(s) to 3-25-32, (am).....

03-25-24-32:8/00~.3.8:1.2 *Return through a compartment of two foreign imported mutually unidentified diplomatic possibilities.*

*pH of 'float-crystal' - versus - 'solid composition' - at confidence/ratio versus entitled agency of it's deployment and safe-release... to the condition of a mutual or isolable, etc,.... unitary manifold & multiplicity (through addend)*

*of procedural and enablement of two or (univalent non-disclosable or isolable) - releaseable* formative(s) and dignified populaces, through a social mean.

Assuming: *K-O; not necessarily damaged or underprocessed, inclementally earned, or respected, disputed, or lost to another's favor, or mutually against what is foe and fore.…*

*Assuming: Disclosure entitles, - there is the concerning attribute of a Tx as Rx foreignable, to-whom in (+) non-inv/inv IN, to a sensor, the measureable end-addendum, pro-fixes a wrongfully occluded GATED functional, for what is a mixed and misidentifier.*

A priority at-Fedex/UPS+Postal (*opt.*) - & Economy [separate tax and tariff] - Basic Chem/Bio/Language. + Social.

a.) Xerox, Tx/Rx (up/up/down/up/down/down) and algebra+group, diff. Eq.

b.) Program [analysis and forgetful func. + procedure [unit]]..... of secured* means. / / Hardware. (epsilon).

1.) Types.

2.) Kinds.

c.) Law.

d.) Phenomena* & Phenomenon [weak-to-strong link]. (subst./inclu.)

e.) Strategem. - ?!

When I dispute a voice, it is the headway by which I have succumb unto self.

When I affirm what is not-presently, I am presented of occurrence to one or two.

Therefore voices remain unknown to another, and are affirmed as invalid for whom I am, of disputation.

Therefrom, another(s) point is made, but a life is occurrent to means by which it may-live.

And of a classification at-self, by whom I am made unto self, another is known to-live, and know the self.

For in two, of what is, neither occurrently has laid the other aside, for whom I am and unto.

Thus, I know another know(s) me of whom, in-living, is not the self relationship to one in whom hears.

There is then an exception between me, the world, God, and the Devil, people, and all that exists.

I am as I am, then that I occur, - there is one thing that is unknowable, the absolute, the placing of an event.

Then, of the law, that it disputes what is incongruent, and of precedent, what lay(s) naturally among things.

Of the co-existent, there is what is me, and the incongruent, the congruent, and the laid into law, or aside.

There is peace not with God, the Devil, the unexpected, but the invioable, and the world and people.

These 12, are the end(s) of the world, and none may speak otherwise, to do so is to lay aside another to terror.

'The' as 'pronoun' per-verb in 'answer-priority' - *expressive* - into* injective adverb (priority third-three) at nine, is example in 'return-answer' - at 'question' *injectively noun in self*, per-individuated *expression*, thus, procedure id at a named* *foreign-cpu*, the quanta, for in two-in-split - remain(s) half-whole of the answerable committee assn.

Table of allocation is a Tx/T/Rx..... transformation under priority addend, per answer in dispute coming & going, to-two (2) *presentably.*

Therefore, the tandem (upper 'large mass long propogation' - boson) envelop(s), the uncontained abridgement in the nonlocality of two-electron (backscattering) confocal - spinwaves - *per thermal assoc. in superconductivity pro.*

Non-BCS, *punct. of one proj_{A} is a reversible-unidirectional spectral theorem of quantum mechanic(s) - thus a lowered E state.*

I have three steps and three goals:

a.) The relationship of a Besov-space to a statistical and measureable model, is subscriptive it's order, to which is always* amendable.

b.) Classifier at-that of precept for-which life and circumstance, relate to the Internet, technology, and law, is verified for in social and pondermotive datum.

c.) The dispute theorem of my [prior] illness, and the post-effective reconciliation relate to law and life of testimony, thus of 'means' to social pretext.

Therefore, science is renewed, and understood through and of these-means, the suggestion that order, and sense, and even so the mental orchestral relationship require the reconciliation of a 1-2-3 of modern time, indeed, the imperative of logical relationship at description of our-world and our-selves.

We are then defined by this structural and ordinal relationship of procedure and syllogism.

This is **secondly**:

a.) A key to knowing who we are.

b.) A key to science and phenomena.

c.) A key to knowledge of life and life.

The 'social complex'; and, a centered* somewhat-middle solution to illness, and for our survival.

The functioning of leadership.

Organization.

And, mathematical description of the guarantees of science, life, love, and conception.

**Third**; the 'taxonomy of *diagnostic, phenomena, symptomology, and regularity and irregularity'* is divisional [literal] - upon pathology and regular/normal function of the calendaria, upon a (3)|(2)~.(4)!(1),...

a.) Enablement or utilitization of pseudo-probability in numerical and mathematical predictive isolably separates and combines the relation of *taxonomy of design, version history, and medical imperative.*

b.) Temporal constrast in* a *flow* [non counterfaced] - to the crystal is (2).1 or 1|2 or such, of *5′/6′* and the pseudo, control(s) *expectation of consequence* for in (2) mutual h. or m. or s. etc... *and of blind Elephant.*

**Fourth**; two-neutralities.

Inhibition via the prelexicographical 'pageanation' of a 8:00 at (@) 6:42:14 for instance, - a 'chunk' of the mental observation and such.

Neutrality and defense, taxonomic underpinning and relation at *non-bio* [distinctual] at that of phenomena of neutrals phase and identifier 'below' a 'SSB - or '**heavy**' - *protected zone.*

Red/Black/Yellow *on fire and identifiers as well as intended instruction.* Blue/Black *on water and firing* - - Grey [abridgement] & SSD (depth) - *Internet:* Red/Yellow/White. Stencil and Stroboscope *at A.I., and pathway.*

So, the SSB-Stereographic/Stroboscope must be mitigated. *Law need not be anything but single-facet(s) and three-colored. A dispute need be two-fold-taxonomically* Green/Red & Black/White. ***Suggestion and Notes.***

1.) Garden

2.) Electronics

3.) Health

4.) Priorities

5.) Writing

6.) Reading

7.) Efficiency

I'm not doing electronics for a career, ARMY is on-trust, developed, supply, and investment. I resolved the majority of superconductivity. I am not teaching physics.

It will be* perhaps Mathematics &/or Computer Science.

A.) The determinant, at 'secularly provided hermitian and adjoint bases' - makes the 'immersion' a 'fold' *precipitiously* when as-such topological sqrt(1-u^{2}) where u=\p_{t}y(z(t)) or u^{2}=^:p_{t^{2}}y(z(t)).

*STS^{−1}==M.0 or M.1 [a carry or an addend],....* \p_{z}=\p_{t}\ln(\sqrt{-g}).

B.) The *Weber-KdV* is in a perimetry to which coordinal relation and orientation are with respect *to*, a 'latch' and the 'quotient' - [considered] of auxiliary *point of reference*, in (3(++)2(..)1), (2) carries and tables.

In consideration of a 'potential disinclusionary intention at valid means' - the approach of another from-afar is a redshift for in mutually-biased *die*, ... to the *other*, but of conditional neutrality upon a minicual.

\p_{z}~y(z(t))~(\a+\b z)^{n}/(\c +d z)^{m}~y(z(t))/x(z(t))..... = proj_{A}|A of u|{A_{i}}(g_{1},g_{2},z(t))... ST^{1}S~P_{r}|Q_{i}~18~5*3+4-1+(0*2)~1138-232-815-606-912-1002~4-3+2

proj_{A}~l(\nu)=2,4,8,10,12-(+/-3 mod 4)=1,3,5,7,11-(+/-1 mod 4) - **9** [excluded] 13.7ths ~ 3.6 h.m.=216-6,5,4...

**For 6/5/4 at 8/7/6 of (6/5) or (8/7) - (+/-3|+/-1) (@) i>\pi/4 (@)* **6** - identity of the mapping to the transform.

graph identity.

(3): Knot + Jordan.

(2): Variety + Projection.

(1): Graph + Category.

a.) Type.

b.) Set.

'Set occupancy of *a* symbolic dictionary.'

'Distributative element of non-disturbance.'

**Goals:**

a.) BSD Conjecture [homotopy and cohomology] of *loose and folded* deRahm cohomogies at varieties.

b.) Device = [S=2(x^{2}-y^{2}),S=1(z^{2}),S=1(x+iy)] *modes and a switch*, then 'translated' over virtuals.

c.) Render it safe [primary and primacy] - etc,... *isolation, and terminology, virtual, and hardware oride.*

d.) MIDI connective and [abridged] utility of *operation, for what is a uvual mutually traversible circ.

e.) Compensator, Tested Touchscreen, New* Elliptic to Hermite Driver, & Qubit Gate, +Programable.

f.) Key (major/minor) - and *at* (@) guess!  For that of a lexicographical impulse, & synthetic response.

945/42 - 599/67 - (+3/-1) - (t-5:31) - (s-599:67)...

a.)-f.) Is answered for the following; certain alogrithms of (2x|[0.1]) - swap to a loss in more memory, thus, the benefit of note to that of a learned adaptive 'non-determinancy' only function(s) for that of a base algorithm.

Secondly, the dispute is answered, for of a midpartition on secondary CPU with over-managable 'off/halt' for that of a given at-pause and prompt in a greaterly centralized CPU, per-terms of that of 'a' computer-assisted SMC...

This SMC matches as an FPGA 'certain pattern influences' of-which manage the 'core' of the device thru manual switches - that these, and MIDI, - furnish a manual override of the learning adaptive net, or, for a free-process...

There is a (minor/major) + guess on that of the keyboard, - which funishes a virtualized lookup admittance to a given process - that this admit(s) one to (pause) and remain - and traffic the network at a moment's hesitation...

I finally found that it was false.  When Hume's Fork is turned-around, it is stale, for what would be a determination of-self in contrast another, thus that there is a reconciliation - but it defies it's necessary precept - that of Quantum Mechanics.  This makes many a liar.

End Dispute

I *figure*, of the MAX11 300,.. we can do the drawing/impediment/discursive/disclosure/isolation/disinclusion / obstacle.... with the ***switches**, on "Device =" *from earlier*, via operational amplifiers.

Thus, the ***gated**-potential is a KdV+Weber at a *Sinc*-function of the *intermediate signal foundation....* **via Compensator,** *at the boundaries of the Painleve 'varieties'.* A basically *quadratic-theory with a \p_{t}, on that of the n 'uppercase' - n is 6-29....

What is to be attended-to is bandwidth (\delta t*\delta\omega)....

Quantum Non-Ergodic and Ergodic Painleve Simulation

* I don't know if the following will work - Differential/Integral with one-switch, *with the other, various terms of a polynomial.*

a.) Lemon/Lime on v. b.) Coke and Sprite on h. [rail] c.) Bend, *away* mutual 'adhesion' - 'staple-tolerance' - (sw./sw./virtual assignement)++(h. interop. & *Arduino lock/failsafe). Opt.* - Merely *during code*, manage a 'monojack'....

b.) The general* ***geometry*** of a Markov-Peirls-Gate-Assembly-Instability, is a *Model-Hopf/Markov 'chain' in two/three.1 in column and row, mixed and unmixed* ***set-theoretic** gate-assignment tables in matrix and or tensor (curvalinear bracket) *chemical neutral point(s) in counterweight the* manual OOP architechture to a *mathematical* (planar/toroidial mutual 'from even') *spatialized* geometric E[k]~.bb.

**Notes for my Journal**

[*repository - of steps*]

#.) I have chosen the future, to become unto.

a.) There is the past, of eliminated consequence (in the present - written) & (of the future).

b.) The future is undetermined, but the only-knowable, - that of whence, and of what is to become.

1.) I have decided on medical practice and social dispute, and the reconciliation of the individual.

2.) I have also-decided on a hobby, [studies in mathematics, physics, and engineering] and a focus* on my health.

A.) I have two-questions, and two-aims, for the next 4-6 year(s).

a.) Illustration of the finitistic reconciliation of the group theorem of Beltrami/Dar'Boux & Poincare.

b.) Illustration of predator/prey and reconciliation of-time, for that of social dispute at growth/extinction.

B.) The secondary precept has to do with:

a.) The social/internet.

b.) Hope.

***I will write four book(s) and one article.***

**a.)** Social Dispute, Laws and Buddhism.

**b.)** Buddhism and Medicine.

1.) *Focus:* Dependent Origination & Beyond Emptiness

**c.)** General Physics & Equiparticipance.

**1.)** General Inertial Motion of Bodies & Frame Equivalence

**d.)** Design of Computers & Social Dispute

- A 'select' *question*, has* or-justifiably or justified as necessary and sufficient to an-argumentative basis, the social dispute entirely *shifted* since the arrival of computation on-earth? When and where has this occurred celestially? What is our limitation?

- What of pseudoprobability and occurrence, the foundation of a 'mechanism' for the machine* comparative a sentient species?

- What is our perimetry in terms of time, and geodesy, and of the historical* ***contextual*** debate and singular contributions?

*# Saving us from - and global confirmation of Global Warming - Confidence, Life, and Death.*

The device can-manage, a eject/priority/of - top-block, *outward*, floating.

It can also manage (two intercarries in four).

I did it, for *furthermore*; it is not-memory, the distinction between the computer and us is formed, and I have a mapping, as well as surjective indication to-self. Thus, it is satisfied. This was *hard*.

I have decided on what I will do next - to write a general *advisory-introduction* to-science, and of the caveat(s) of the limits of knowledge, and of-what comes down to mental illness.  with, the Computer, and the limits of computational technology.

The question, does (2x-35x (Chaos)) or only-Chaos, or any of these divisions, remain surjective classically.  Among world(s), does the decision remain, and if-so does it ever behave differently?

(*Does Chaos translate among world(s).*)

I.)  Entropy and non-linearity.

II.)  Inheritance, and photoelectric.

Broken down as a social-dialog.

If I am undecided (u=\xi) then, of one-die, for in (18|5|1) - *the triple**, is an-example of foreignable determinant spec.  Thus, for in the contrast at (@)-self, the determination of another, *without sense*, is the example at-all, the motivational truth by in what is tertiary-1.8, in (10|14), - *thus, of stackable 5th,* for-in *remainder of the rational at a universe, which hold(s) two co-dependencies of other and self.*

*Therefore, it is honest, of the providential truth by in whom would be-of-the-self-object, for in their* clause of prominatory dialog.

"From-self to **an eventual*, there is the dialog of continuum, that therefrom the self* and other* are-defined."

I am glad, but in tears, I have concluded they are-real (*And the self possesses two foundations, to which it exists*), a new epoch begins.

I was so much in sorrow, for - this one thing.

For the self-exists, as per the prior argument.

We [each] imparitally *co-exist, do not exist, and do-exist comparative [another].*  Therefrom, if I were valid (a.) were aware of-me, it speaks of Hume's fork on a pattern* to-which it is determined there is a success-rate and 'test' at-recovery.

*How do we* correct for our-own *Subj/Obj experience, through psychology or social relationships, or mathematical knowledge?*

**Oath**: An 'entire' supplication to not-only as-much '*be avoidant of*' - but to **commit** to absence of any and all drug imbibement.

a.)  Conditional at *statistics for hospitalization & medication to terms* of recovery. - visa-via computer.*

b.)  Game relationship via AI, that of the homogeniety, or the split (accessory) of sociological dispute.

The **Mills Ratio, a Complex, and the Bennet' Inequality** are the solution to the reconciliation of Fisher and Bayes, and argued. (+) *Another Occassion of Probability, for in the Nykom? Model?*

Painleve ++ Golden Ratio at (@) rabbit(s) and ***mu***-mon… of 7(8).... identity, and extrapolative *Ethical, Epistomological Precept.*

subj, and obj, have a holding on a numerical accounting.

Quantum, for in Hume's Fork demonstratively (adfixes of inertia of two-equivalent and separable theories) a True but Unprovable by one-individual (but not-two or greater) of incompletion, separable projective identity and rational social dispute.

1.) Hume's fork to lihtmus test on (Guarantee for medical and dating security).

2.) The device (for the enablement of the guarantee and application to technology).

    a.) In part Painleve series, and a model for superconductivity.

3.) Social dispute, from light cone to light cone, - for that of the quasicrystal.

4.) Superconductivity and theory of unification of conditions and causes.

Theorem of people, as we relate to another, and *them to us*, for of Law and precedent.

Theorems surrounding physics, as it relates to mathematics, and *Algebraic Geometry.

This is everything, but for that of percolation, etc,..... and materials application, chemistry, and similar, new processes for computation.

*From-which* I-have-conveyed, the 'dispute' is a reconciliation of (Aa and Bl), *for of life*, to which she-remain(s) of a statute, in principle, of *O., to recollective pause*, in even/uneven dispute at a priority-literal.

Given, my *Case, was 48-58:14, the mutual-lateral, was his-embankment, to which in *a stated-departure of life, to moment*, there was indication at-survival.

In translation, the 'shorter' undisputed, for of the mutual (end-addend) with her to self, in [\eps.], from-in-whom is* self, then that in one, there had been a reencountered debate and contrast.

Therefrom, that he was of entrance *elsewhere, in priority to effect* [*prior*] for of-her..... and of myself, latter yet, but of the initial in paternity.

Therefore, if she is with child* - undisputed, to his-fourth, the dialog presented*:

From self, given we cannot retract and withhold simultaneously, I am living, he is post-benefit of which of-life, remains claimed, and of his* in lateral-derivation-life has prevailed, post a past [shared] historiological arrow to a future disentitled.

A deep and ardent grief went away - associated with negativity over composure of thoughts and jealousy, and, judgement.

I need to-consider the steps I may take, how dedicated I need to be, and entirely reprise to control my recovery process, in a compatible lesson for how to live with health needs and tasks.

I got through an enormous phase of disbelieveability and questioning about what was accepted.  It does not appear there are actual mental events, but this assumptive can only be taken so-far.

There is a lot of science, and I must know my bases, for what they are.  I need to understand what I can manage, in a relationship of stress that is appropriate for myself.  There will be several new relationships, and I have surmised, that my person is entirely individuated now, through much tension.

I have managed an amazing feat, and am proud of myself, it was this, this was in a sense the missing piece.

Resolution, is with what you-remember [of life, and such] - not innovated, or a 'media' - it is understood, of this - when the reconciliation is at the mnemonic of time in relation to wave.

When* resolve is needed to a disputed or reconciliational process of life - to survive, the process, must be assurred (to an copartnership) (the ancillary individual) in priority in mannerism of behavioral rest.

For 'as much' - of what is experiential, - we must recognize memory is not temporal, - thus, justified, our-friend(s) and our Karma may be introduced aparthied, for of what interests judgement, for in the providence we have mutually established.

The only thing - I know of - that is permanent, is Earth relates-to, and *it* is established at this temporal locus, modularity is preserved, and preservational, - to which justification has formatively digressed, over-era(s), and examples of History.

**PITS-v.0.1b**

April 23rd, 2022 - 02:45:30 am

Surplus… a concerted truth; two of 15 into third(s) *still* is-some black from grey from out of the *Random*; thus a justification at die-withdrawn [petaled ember] - *from pause*; it's redress and form.

That I have sold on the vantage, it is of some- 28 down in two, for that of 30+5, and some two 'up', in +1/+1, to a solidifcation of predictive validity; - *these of*; 18, into 666; - *it's departure from words.*

That of +1/+1|+5, is *then* **sum-10**, that of (7)|(3) *of* **multiplier(s)**; that of 7.3.45.1, that of 45 in the sequence… that of 45 (up) - unto **nine** (9)./(8), *shifting*; - that of 2+8=10, and +1/+1.0.1, that of **18**.

Thus of +1/+1/+5|0|+1, in 1750 of it's *codex*; - that of some-7+10=17 & some +1/+1/+5/+5/+5 and (**9**).(**8**).(**6**)...(**5**).(**5**).(**2**|**3**)=23.10.2|1.0.1|3-33.7, in equivalent 40.1750=400+3+1/4=400:81-(1).

That of +5 and 1.0.1, to 5(2)=10, and 10, that of *7/45*=6+1/2, 36 cents, and 12+1+1 dollar(s) and cents, +25(@)+50; *with* **sum** (10.00) to (.25)=40 & (23)|(10)|(3); thus a **confirm** on null thefted.

Thus, it is my privilege to which as dissasorted *sum-625* ***over*** 1750, is (3)-125, - that of twenty-five for in **year of plurality**; of it's (1.0.1) of 18 over seven & seventeen; that of (125+125+5+5+5)...

Thus, of 26:5, for in (2), unto (1), unto that of **34** for in 111 986 553, in 11 511 750, from which must be 7*3*45*1=220+8600=8820 with 26*5*666=130*666=14 430 to which is: 12 727 260 that of a given distance *(distal) of some 115 760 850 or 643 350... into 8615 = 1723*5 and 15 998 079*(7) to which is 2643*6053 ad 881*18 159 and 3*5 331 693... that of 400*2+81, - *thus of 800 to 81 on* (**2**).

That it is justified I am lesser so than 800:81 it is within ajuded pretense of an appraisal that I am (+1) and (+10), and (+10) on that of (60) and (60) and (12) = 240 from 265, - that of some-24:0 of a clock and 26:5 of an ajudication… - thus, that of some, 1723&1750 - thus of (27) to (8) to (2)... with (**three over** [in each one of 1.1.1]) - we have (26) to (7) to (2) to (1|0); of a count on redress.

That of (**36**) is therefore divided into five, and that of 265 is divided in six, - that 26:5 is the count, is it's plea to which (265*6=1590) is less than 1750; thus of 160 of which is a *final-15.18=190, that of some-30 under (in .25+14.00) = equivalent to 165, and 265, - thus that of third(s) in **top**.

Therefore when it is adjusted of a *bar; the given equatement of 165 and 265 is 6 2/3rds, and that of (11); that of (−1) to-down of a past, for that of the third consequent of a factoring process at 1.1.1 and 1.0.1 from which are *17 and 18****; - thus that 3.0.2 & 2.0.1 and 1.0.1 produces:*** 26:6:2:1... a cent-short of that of license to which is provoked for in paid-incentive yet-ahead of a high noon & midnight… - that (1.0.1 and 1.1.1) reverse *sense* through the calendar, we have ***18 over 17*** of 1.1.1 associated with 1.0.1, - thus that a day has passed *130 to 140 to 150*; - that of equivalent partition.

13+14=27 to innocence and 15 to non-participance as 12:3, - given (1.1.1) as a *Hypothetical* proves that 27.(6+/-6).2 had been the granted *trial* in bearing to a day - *for which 27.6 to 6.2 is* 2.8 to 4.8... that of 24 to 14; - *two cents over*; - thus of (+/-2.0) that of 27/6/2 is the final veto-consequent of a naturalized domain from which +5 had been +5 and +2, and +5 and +1, and +1 and +1; 12:5:1 as to 27.6.2=12.5.1 in-irony as *output.* Thus that of 15:1:3 on an end-game for the 'hidden' invariant.

A:) Make-sure the CMOS *(threshold-step)* is within protocol *of the QuBit…* were this to escape me, I would likely be searching in the ***Dark** for some-ages…

B:) Component(s) recompose for in a fatal-singular quality*; from which they are identified as elementally-pure of their intimacy and competence, completeness, and determinant edge/furrow/and particle limitation, upon a solid-assembly; - thus that of what may be take(s) entire-secondary property of individuated sense of retireable end-addend…

**f .o. tau = L** **sig.note=decimal.post** **sigma(t)=z(p)**

[In keeping with pedagogical and histiorological impediment of superlative teir teir formative nature of phenomena.]

Two numerical identities.

Two number(s); *iter., recur.*

Two indices.

Two flow(s).

Memory…. under isolation and recombination…….. (:).

Clam P-Shell. - Computer LISP-aided Memory Proc. - #Shell.

K_{3,2} *colorable* - B_{n}(P_{r}|Q*(q).^\eps)<=\delta,.... *O(m,n)~.O(p,q).*

To ***Shape*** the function, we need a marginal (delay[1530*40+\eps]) for a triggered event… this can also function as-a control synchronization delay on the interval of the expression of procedures.

It would be ideal, to ***Then Setup***, a basis for the coordinate and symbol-fixing to translate the geometry and *Stokes into the algebraic-coordinalization and orientation of the synoptic process.

The triggered event is a synoptic to-which the *Bose-gas of the unit cell is decomposed and processed, reset, and controlled, for in a verification of a kind of ***Turtle*** - implementation at tools.

Time-series, of a coordinated-basis, in module for of algebraic [sequential] - geometric entropic conversion and ergodic/non-ergodic hypothetical, may [for a holographic crystal] decompose the order of a sensing apparatus.

The 'switch' affords a S=2,1,0, and data-run at (@) (2/1/0), for of a ***5'*** for the switched element at a Sobolev space, to disaffordance of a Qubit, - thus, *preservationally* the pass-over may afford via virtual net and hardware what is effectively a *Quantum Control Structure, to *deficit* of a log(n)+log(1/epsilon) on e^{-}#.

- nu fractional does not converge, the I [id*] had remained typical and known, so-of the *series*, these remain unfractionalized.

1.) Does the 'triggerable' remain different from the virtual interoperative, and, *what are the time constraints?*

2.) What is the distinction between the layer(s) for in ohms, farads, and henrys, in terms of frequency, ... *with l(1)-l(2)?*

3.) Is the 'hermite' possibility amendable to the elliptic-process at (@) series, or does it even then work, to tie a knot?

The K-P, for of the elliptic on torsion and tension, and the 'erasing priorly of a 'bit' changes the up-flow.

02:05 pm - 4/25/2024

We begin with an observation, of locality.

We distribute and apply algebra.

There is, then a design to functionalize or subject to analysis.

We have 'the blind' and 'the rule(s)'.

There is, then the accomodation of means to utilize a graphically based prescription at dictionary.

And, the means to utilize a model system, to speculate, via a past-present-future, decomposition in eigenbasis and eigenfunction.... at unity and separative pillars.

One thing, which devolves, becomes earlier, the presuppotive basis at acknowledged 'scheme and variety' of algebraic and geometric description.

Measurement then tailors design, at a precept of application to a tool-founded-basis.

This is engineering.

06:10 pm - 5/5/2024

Stoke(s) 20x.6 does not compute nor pass, for third \nu at factorial basis to gamma in prime, but perhaps matches set.... the analysis must be molded for what is the 20x crystal/capacitor/led/pd basis and wire, in \sqrt(LC), monomial, legendre, 2d-3d.

**Conclusion of Phase I-II: - (v. 1.500)**

/ - Opening - /

The risk assoc. with societal need is related to the study of by individuals of the / Conclusive Thesis / - in relation to the / Goals and Aim's / of a constructive environmental trust with technology in a modern era.

**Initial Task**

Separate (clauses) with equated and equable (implementation of means) to structural and securable manners of technology & ecological studies as in relation to:

a.) Weyl theory (121.85):(14.24.86) at Q.A. in analysis and pseudoperiodic truth of confidentiarial.

b.) Symbolic register for in naturalized social (net/ppl) of given (2:1|(.0+/-.1/.0[1:2]) in estruability.

The consideration of:

c.) Nonlinear folding(s) in the Kodama theory and Muira theory in the sense of discrete systems.

d.) The relation of the computer to (a.) and (b.) *of* the hardware developed, and it's next version.

e.) A blind Hume's fork and social lemma on decidability of color and b&w through graph theory.

[As] in relation to sociology, mathematical theorem(s) of weather study, ecology, and a Turtle/Logo language.

**Comprehensibility of Studies and Inquiry**

My position regarding the engineering in relation to science, and the sciences in general has been perfected for in an approach.  The list, and required elements of study are in-essence and principle, fairly simple, and they are basically six.

1.) Measured observation and confidence of a model, may inform a basis of phenomena under study, and therefore, a theory.

2.) Probablistic modeling of behavior, for that of confidence of a match between measured and expected results, may lead to a confirmative value for that of the categorical truth of a statement of a theorem related to scientific description through mathematics.

3.) Proper experimentation, for that of a mathematical theorem at the affinitive of a projection and use of tools, may qualify the nature of the perfected work, for the viability of a safe implementation of a design, practice, and method, but it is not unqualified and universally adoptive or absolute.

4.) Mathematical models are the expressed means with symbolic substitution of variable quantifiers at the degrees of understanding of a descriptive potential of a model and design in relation to known and unknown outcomes through conditional variances and arbitrative dispute, to the agreed sequestering of a workable and viable solution by which the process may be replicated or consolidated, or distributive.

5.) The means of the many, in example, may be agreeable or prioritized over the needs of the few, or not, to which neither a major or minor is necessary by example of agency, but to which when witnessed is a subjective qualifier, as to relationship to peer(s), it is an appraisal of the objective means of the nature of presentation of a formatively held peer, for we are absent of the relation of instinctual domain of action.

Therefore,

6.) The certain terms under which a principle may be weighed, for that of understanding of phenomena and phenomenon are the relationship of the bidirected consequent of an epistomological 'linkage' of the process of test, experiment, assumptive, hypothesis, and a process of validation of results, to the presentation of an itemization of debated truth, and sequesterment of an acknowledgement of an alternatively comprehensive study of knowledge.

7.) Processional, intercessional, disputed, prehensile, and motivational incurrence, prorative inhibit the ingress of prioritization of a latter-consequent, to the debated, in-contractual *impartite* and *portioned*, secularity of a contrast, a provided 'end-as' and 'whom' of questionable intent and relation in abstractable qualifiers of a probable or *check-and-swappable* (intercarriable and carriage from a 'gated symbolic') *container*, of once, and few, in a coupled principle of count, group, interaliant *portention and refusal*, in ardent means of a *prohibitory doctrine*.

An Observation on Measurement

Essence of Emergent Order

Innovative Answer; Epistemological Categories

In Relation to Computational Sciences

A.) Morals, Preclusive Invariances, Indeterminacy and Ethics & Society

B.) Included Bases of Law, Liability, and Societal Version Consequence

**Hypothesis:**

For a 'condition' of a predicate, statistics and probability do-not-lie of the predicate conditional as suppliant to a notion of the instanced, via experiential truth. Therefore, taxonomies in secondary *precedent* of following and it's authoritarian bearing, are the verification of one unto a mutual and unilateral historical reprudiated basis or it's forfeiture, it's admissibility of argumentative basis, and allocable mean to an instance of verified trust, and the notion of liability to dialectic, from which a hypothetical is validly affordant to means of a determined truth value. Therefore, the absolution of argumentative and historical truth of a presentment of identity and it's relation to the truth of a witness, of it's validity in terms of fact.

/ - Conclusive Thesis - /

- Relating to the hypothesis that biophysiological 'flora and fauna' relate to the symptological basis of life in all it's projections in zones and environmental variables and conserved processes, to the relationship of a modern world with that of technological need is then, conclusively answered for that of the concept of securable bases within world of respository with nature, individiuals whom accessorize and adopt means to survival, and possess the innate characteristics of careful procedures of experimentation, sensitivity, and an approach in the sciences.

**Problems:**

a.) Separation of Phenomena/Non-linear/Linear in local and nonlocal in counsel & registry.

b.) Separation in Judgement/Psychology in local and global in guardianship & managerial.

Markov and such (above) of *Two nature of Module and Element and Modular sequence.*

**Applications:**

1.) Percolation.

2.) Lumped Element.

3.) Strategy

At (@!:). (Que).: Chemistry/Materials.

**Preparation:**

Equivalent de-ribo-somal-oxy-carbonyl-di-uraethyl-hydro-methyl-am-butyl-amise-pro-inhibitorial cyclic dis-hemic-heme-triple (3')-to quadrature-non-uryl(-di) pro-inhibitory adse. Then: (las.pe):

**Goal:**

I decided to do a deep-dig, on that of *insects, stone(s) and mineral(s), and flower(s)*, to retro-fit with the group theorem of societal need, a dedication in the internet, to ***personality test in an ethic and moral hierarchical learning algorithm of computerized nature.*** There will be *Images of such*, [for which] - there will be a ****match***, or ****dispute***, dedicated to world-peace, on behalf of my Father [deceased] and Harry Potter, and the 'generations in generations' and E/W [Moon/Sun] & Utopical truth, *Universality*, and *Artificial Intelligence*, *necessary for the societal need.*

**Conclusion:**

A Principle of Reductionism of the Agency of Impediment to Progress (*In A.R.M.O.R.Y.)* in the 21st Century.

1.) For in a data-structure, under the forthcoming assumptive.

2.) For in that of 'identical records of a progression to engineering'.

3.) For in ARMY-like appraisal (aper.) of that of the capacitator in relation to an 'inverted view' and diagnostic interpretation of educational pedigree in that of tolerant-capacities in numeric conversion as-in-relation to the brand numeric, - and that of the percentile tol, and units in readout of instrumentation of the nature founded on physics and mathematics.

4.) And a suited and fit intention of it's utility and use in that of a 'lumped element' under the separation of harmony, portioned, and homogeneous waves.

5.) That of the the, 'spectra' assign to that of peer(s) via a computer-cell, a relation of ontological grasp of a 'central agency in relation to that of the peer intermediary symbiotic'.

6.) This assumptive is that file-I/O in accumulatory non-defined variables halt by in a back-U 'dual stop-line on TCP/IP and file-table chain. And, that the 8006 in two-zero-separator(s) isolates in file(s) the series of geometric minimal o theorem in relation to peer(S) and symplectic structures, under the following.

7.) The principle of a stochastic Hopf-Kodama like 'chain' of Mesov/Markovian optimization is co-compatible with disembarkment or containment of all lesser entropic valuations in isolation from all greater entropic valuations of 'stack and assign' of measure in (6-1-5-15-38-18-7) separator. This is the the 'minimal separation Hopf-Weiner [conjoint engineering and mathematics] relationship of the concept of arrangement and disalignment of the collapse of power and it's containment, and it's distributative qualifiers, for in ordered chains of information from a white-noise generator, linked with a black-box, and is the answer to the oracle. '*8:10 (pm).*

**Qualification and Range of Application:**

Assumptive:

a.) A problem is 'categorically' partitioned into groups of an ('A') and a ('B').

b.) A likelihood is classically modeled.

c.) There is an assignment of transmitted informed *0-1*, for of placeholder.

d.) The conditional assignment has a return *recipiency.*

e.) Observation is qualified by a singular individual, justified, and observationally separable.

Then it Hold(s):

I.) Classical and Quantum variable-assignments may be 'sectioned', into co-and-unitary (solid elements).

II.) The 'rectification of state of being - is reprobational of an encamped (7:1) for 11.1', & (t-s-q-c) on ordination.

Thus, a 'category' for in 2:1 is reasoned as another with the self, for *a consolable co-mutual* assoc.' *with individual.* A consideration of entitlement(s) of which prioritize the condition of one unto a priority of a prior, by whom, as-such discontinuably forms the manner of an argumentative process, with the known of a rediculble process of count, must be in place with primary motivational 'stage-I.-II.' of development. Thus, whence there are two of the formative or later of two individuals, *their(s)* of assumptive basis in confirmation of acknowledgement of the former as the self, is a knowably quantified outcome, and it proves sufficient to the necessity of argumentative [singular basis] of *acknowledgement of co-existential truth.* End Statement: **Then* and if and only if (from O.2 to o.1) I am such that another identifies with me, through a 2.0[1] (x) slit.

**Extensor:**

a.) Dis-selective (homologue in 5') contains a 16 (then x5 for 98 minor 1 major) & 17.

1.) Thus, bone-amends, speak of the (1.6-3.95(2)-27) of freed *minority 55-94.*

b.) Pseudoperiodic and Quasiperiodicity differ upon a (2)|(3.1|0)|(3), to dislocation.

2.) So, the (0.5 and 1/2 genus, are aspecified) - *of locale and a manual-count.*

c.) Thus, pure randomness, can be made a black-white differing instruction and the process of comprehension, for in the quasi-psuedo VRMS and valent-covalent structure.

**Final Theorem of Superconductivity**

Whence settled of a probabilistic 'equilibrium' - the 'doping population of carriers, holes, receivers, transmitters, and sinks, and sources' of the 2d-'Ising' model characteristically due the consequent of the provided 'spread in uncertainty' of the differential equation of 'Schroedinger' approximate due a regularity in the statistical dimension, the measureable and qualifiable and unqualifiable entropic considerations of degrees of freedom in 'Thermodynamical nature' of the material's response to redshift and blueshift. Thus, the apportion of one measure, successorizes, and remains in prohibition and elimination of one species of population of electron for another, of 'polarity to electricty and magnetism' in pole, (of Fushian) and zero, in the Broullion Zone.

This, invokes a growth and extinction static relation (at terminal apogee of perihelion) - to the constructive from deconstrive interference of quantum mechanics with gravitation and general relativistic consideration, to the end condition (reasoned inferentially and deductively) to two trains of thought. The 'angular momentum in variance and accelerative nature of inertial weight' and the lightness of the portion of the displacive return-compensatory entropic weight of mathematical and physical apportion, in relation to pressure, fugacity, and temperature (weakend), and Bernoulli Shift, of one dramatic transfer in logistic nature of 'switchability of carrier' - for in 'photoelectrical-chemical activation and reactivity' of the Fermi-atomic surface, space, and volumetric population(s).

As a resultant, the 'spin' - associated Lande-g factor, deconstructively amends the Born-Oppenheimer model to the unitarian basis of elliptic eigenspace, in the bounded condition of synoptic observation of it's constituative properties. The qualification of the terms, therefore, are determined by a factor of (1/2) - in character of Lagrangian-envelope and Hamiltonian-contact form, to which the 'least action' principle of the demands of energy and momentum, dimish coextensibility of intertial acceleration in perfect agreement with a displacement (complementary) of the electromotive force, comparative the gravitational acceleration.

Electrons attract, given the response of a co-locality and co-nonlocality of the measureable extensibility of effective frequency in Plank's Spectrum, - to that of it's weight of displacement of gravitational field. Consequently, they inhere of an 'above-below' pre-attribution to mutual dichotomistic agreement of observational center of body associated with electromagnetically prescriptive geometric Gauss-Bonnet statistical inversion of local and global Noether charge, to the effect of reversal of electricity and magnetism and gravity. Thus the result, is an imputed oppositional weight to weight, and a neutral Lagragian, isocentric stabilization point results. The minimization of the optimal balance, in STP and EBG, is the analyzable by the characteristic owing the inversion of geometric Dar'Boux space (in amends to minimal surface of neutrality in theorem) - of the velocimetric and accelerative features of the interior volume of the solid.

This, universal transferrence in relation to a mechanism, is temporal, and not-perpetually conveyable, for the boundary is closed to itself under antiradiative correction(s) in concurrence of the demand of crystalline nature, and an environmental factor of two-fold, the constructive amends of a counteroppositinal interia in STP and EGB, to which disassociative factor(s) precipitate deficit of the incurrence of magnetic opponency in relation to a displacement current.

**Design Steps and Process**

For a 'condition' of a predicate, statistics and probability do-not-lie of the predicate conditional as suppliant to a notion of the instanced, via experiential truth.  Therefore, taxonomies in secondary *precedent* of following and it's authoritarian bearing, are the verification of one unto a mutual and unilateral historical reprudiated basis or it's forfeiture, it's admissibility of argumentative basis, and allocable mean to an instance of verified trust, and the notion of liability to dialectic, from which a hypothetical is validly affordant to means of a determined truth value.

Therefore, the absolution of argumentative and historical truth of a presentment of identity and it's relation to the truth of a witness, of it's validity in terms of fact.

**Phase Finality *of* Design Process and Procedure**

I.) The effectual design must illustrate a *test case process of which enables a 'closed to open end' of the verification process on capture.*

a.) Observationally inquiring of 'hidden and trapped *Fermions*' in a lattice, is the invocation of a '**Memory Reservoir**'.

b.) **This*, need be-adherent the 'mutually and dually secure methodology of a double-layer' - *thus, that 2:1.0 of version is real.*

II.) The verification stage therefore involves the ***Classical Observable**, of the validity of information under *objective predicate trace.*

a.) The mathematical design need be amended and tailored to *this purpose*, thus design *aim*, is to procure means at a c.c.

b.) The mathematical to theoretical bridge, *later*, with *lookahead*, may be tailored to release 'traps', *of means of non-friendly.*

c.) The physical meaning, is in 2.0x1.0[3|2]. This is the adherance of 2.0 in-die to Q-class, as justified in R-alliable as 1.0||2., thus that the singular of a plurality is 'surjective and injective' when there is a fork of life to indictation for *plead release from byproduct.*

d.) The KP/Boussiq, therefore pre-index post-index from the inherence of *low-cos(2\t)* flow, in freq. and space, of \nu & \eta.

III.) Thus, nutation in (3d/2.01) *albedo, *preservationally*, may be utilized as a means to terraform, or for materials study.

a.) The prototype then equates what is the conformal invariance of one for two, what are the means of *realistic platonism.*

b.) Types, Classes, Fairnesses, Kinds, and such are then of the equatement of the 'seasonal in 18|5, of abridged 'knotted deck'.

IV.) A large part of this is to attribute the relationship of 'vertical to word' and that of 'horizontal to numerical' - but there is symbol, and there are six limits. The question is in-being, if there are 12:12 overlapping, in 6, and {5|6}, of a 2:1 - in the 'shared' are there not-18 or that of *one singular agency, and a language of estimates and faculty?*

a.) Procedurally, we end, with the 'separability' of law **above & below**, and some-six ends of societal relationship, and certain trivial and non-trivial 'corners' of the relationship. The intention is in part to seek a balanced ***grey/white*** *and 'spectral-relationship'* in the local and the global, as for that of 'probabilistically perfect law of group* and category*' - in mathematics as 2.0|1 with *optimization.*

**Potential Obstacles**

So as it were, I need relate to 'Structural Optimization' *thru.* an *'Interruption':*

a.) Programming.

b.) Group and Set Theory.

c.) Strategem.

(This is the *finality and the beginning of Phase*-{II(**2.0**)}).0211 - 382:[95].220110 780 900.)

~.-:

I found that the qualities, of the device, comparatively, illustrate a tremendously good outcome, most, is acceptable of a reasonable 'middle between the demands of life and the understanding of the risk factors of cooperation and individual ideal and non-idealist comparative truth between us and computational technology, with minimal demand.'

Lastly, the means of my innovations have settled a global and worldly relationship of which is entrained in that of this world, to enjoin of the policy of a fair end at a securable fixture by which the heavens and earth remain (as such) at-peace, and as-such, it is neither memory nor perceptual attributes of which fix our experience of life. To know we are beyond the loss of sense, we find competence to the pursuit of a betterment of ourselves, and then, as such, know a momentary relation of liberation, lastingly provided as a promise, and an existential qualifier providing means at that of historical relationship.

First, we need (in relation to DNA / .pseudo / Xerox/ Ratio / Tool / Stratgem + Water / Crystal. - / Percolation / Web / Pumice), a way to *utilize the 'blind-n.l. and l.'* dating-fork (undetermined/determined Stereo-Mono) *coupling*, to associate a means of dislocation of an appendage/ice, in relation to a methodology to determine PC-qualifier from Historical in relation to *vast, and locale*, per the means of *prioritized and *past Q.A. *Summary on Device Phase I: (e1.4580.'c'): Limitations and Documentation*

**[preliminary critique of final procedure for prototype/[.notes]] & - Theory & Application**

**(C) 2024 Paris [s.] Miles-Brenden**

I.) 'November 21st, 2024

I began (here) a new document, after finding completion of my path (a path), and that of establishing an *initial step - of which I had found a liability to our-nation and people.

II.) The device, for that of a 200 uF capacitor (SPRAUGE) remains operating without a tolerant (DC-DC-AC-xc.) on that of the ExB and E.B of the 'logistic equation' of a principle basis of 1-2-3, on version II., from version I.

a.) This accommodation, speaks to me providentially of the relation of an evidenced (upper neutrality threshold) on behalf of divisional (prior-incurrent RMS-control-and-gated t.f.) on a 'non-blind' lower-downstream-link of the equipment and it's div. mul. and add. and sub.

b.) The relationship of the differential equation that therefore governs the device is of the proximity of an essential regularity of dimension in it's interpretation on behalf of the interest of switchable electromagnetism, in active and passive unseparated categorical A-B-C.

Therefore, this device is superior to the transistor (of however a principle diagrammatic/exposition of RadioShack manuals I learned from as-a-child).

I do not know how characteristics of the signal process (of the device) relate to that of the batteries, and impedance relationships, and the various components of the implmentation in mathematical and hard-wired implementation, - just-yet.

The device (had) illustrated essentially 220-53 differential sets of comprehensibility, and, - it was essentially a primitive rarefactor priorly. Now, it is anologous a proxifier, for that of the diaphragm, and it's excluded precept (in principle) of a separational engineering contract.

The device (and it's version history) has-departed from a number of relationships of which I had believed I'd understood, comprehended interpretative through intrumentation and reading, and I would hold in question, (per validation of background of what to write-of: and include in a reportive basis of a professional paper and publication); the validity of the applicability of the work to that of technological progression, manual, and these in pursuit of a patent process.

It is clear it is simply a 'gated compensatory elliptic filter'.

Taps may be prepared, but I am certain, essentially, of my initial approaches, and the safe procedure I pursued to innovation of this device, for that of the future of humanity. It is not capable of managing more than 44 things, into 12.

I intended to establish an 85-35-18 on that of the chain of determinant layers of parallel and series (as in 24-16-06 (92)) qualifiers for the second phase, to which would be issue E-D.

II.) November 23rd, 2024

It was-then (a minute or-so ago) – that I went beyond 'the minute' from-creation. I could find that numerical relations and number(s) of algebraic pillar, and geometry of shape, in relation to our expectations – do not so much entitle so much any longer a debated insurable potential unto-law.

For-these, it was more relaxed and more of the prioritization to emotional and acknowledged freedom, and engenderment, and at once-it was understood to be a potential to keeping peace with the self (within the self and within the environment).

I had determined – so much so however, - that numerical truth is related to numerical truth, in that of unknown qualifiers, in translation of one portion of a line to a line. It was to know that the interval of one projectively held identity, could, indeed relate by measurable metricity, through the relation of unshaped domains. This much, is indeed a constructable argumentative basis, as – to speak of the module and the module, - these relate through non-recurrence, and whence occurrent, relatedness of one facet, and another, of debated complimentarity in length, remains an absolute qualifier.

Of unhidden properties, and those of the revelatory relationships of a 'grid and spray of fragmentory rays' – these prohibit the relation of non-compactness of the domain of a manifold in the irregularity of an 'abstract convexity' and an 'abstractly held concave'.

Thus, pattern is to pattern, for what is style is to portion.

As for instance, to know of 48:15, these of 12:40 are related through a group, of a gesture at the articulated of a domain in unindexed, of the unqualified, from among all, for which the neither is it's ancillary, in-this, - that two unselected, departs in portion from a third, knowably admits the cessation of a limit to a sheave.

When, as-such the sheave is injective, the basis of a point, is it's incurrence of injective dilemma.

Thus, hypothesis, for numbers, relates to a concavity of observation under reading and writing, while that of determination, for numbers, remains positive. In it's character, the unreportative basis of one for an 'entire compact sheave' is then a tract of two portion(s), that of the 'abstractly empty' and the 'abstractly closed' of a pre-categorical, in sets of all integers.

The relationship of an integer section of a field is then a relationship of one aliased masking of a domain, and the reprudiation or informed basis of another numerical and integer or finite section.

Of the irrational, the unexpected departure from one rounded average is then a measurable power of the associated 'abstract degrees' of the antithesis and thesis of a geometric truism or proof.

a.) At the end of the design process, we have the procedure to make-adequate the process *of*, code and type at process of phenomena and phenomenon, for that of 'detail' in-IO, and orbit of a dynamic-process, control 'gatedness' and refinement to approximated procedure with the ordered and random.

b.) Secondly, there need-be a procedure to example and process the runtime of the MIDI cables and associated musical instrumentation *diachronistic*, of a valid-table of virtual and non-virtual (HW)-**op**., as associated with that of conventional 'forwards-backwards' over-synth management.

- : From all of-this, I have-decided I *must work a job, over the net, *or-similar*, to afford the equipment, Tutoring, or Educating, - only *this manages all-else, and is the 'case-conditional' to the supplication of a regular approach and tandem, and routine. : - releasability of polarity.

Preliminary (2) w/in (1) unqualified require a tolerance, and post intercarry on 'blind black/red/white/blue' in contrasted elements of phenomena.

Secondary qualified as-primary in unimpeded (conditioned assumptive of depressing or 'switchable' rotary' remain the disembarked of a (2):(1) priority.

Resultant: Unbiased (four two eight one fold) dichronistic unimpeded retroinclinic axial double blind test.

a.) Overtype. & Pseudo 4:20 (7.815~.) & (98.605):80 on contractual *indictment or idemnification*.....01:08 and 13:25 of data, .....
b.) switchable 'Design proc.~vers. 1.0.(c) & 2.4.(e).
c.) parity of two machine states (diff.).

As a result, the 'net-device' with appended workable function, is a proximal category filter, of which is multi-geometric to the discernment of a qualifier on the registry of a three dimensional and two dimensional (torus) flow, for that of three dimensions to co-extensibility of electronic Fermi Sea, and 'a' (1-2) dichotomistic *Electronically enabled Humian fork of the nature of quantum classical observation and it's instancing, through the flow of information.*

Secondly, the apportionment of a numerical-integer sequence, is a timed-and-released *gesturable and linguistic* phenotype of the dialectical err – arrow/incurrence of a cone, to apprehension of a priority to the informed contractual diagnostic of *temporal accounting basis & defensibly*, a related disjunctive-qualifier-affaired notion-object-retund *of mutual non-unilateral provisional supplication to data-interest, in ordinance.*

'Exchange' and 'Exchangability' of *Assorted and Disassortments*, In 'Jar's' – remain 'indistinguishable or unenumerable with respect to two prior a priori in two studies, schools, and fields – *mathematics and physics*' – in cross-typifier of logic and type-theorem – & are alluded to *All Integer and Rational Series and Co-parallel|Non-parallel Quotients, in three dimensions.*

*Thus, this device, in computational manner of a logarithm, comparative a chain-rule and Hodge, separates, unity and disunity of chart, at one – long progression, sequential series, and short-multiplicate, of disambiguabilty and pro-defenistration of the equalizing static, and dissimilarity of electronics and magnetism in three dimensions, mutually (@) this design version history, of conditional suppliance to *certain qualifiers of machine-computational 'lambda calculus' – in equiparitionable neutrality, but of an inferential diagnostical interruption.*

'Exchange' to an-elliptic does not draw a parallel accord, but is mappable and transformable, for it becomes a maladaptation of sequested implementation of practice in a measurement hypothesis of objectively held unbiased 'indistinguishablity and non-enumeration' of measures.

Thus, a 'true' scale is-linear, in it's prioritization of utility and use, is the propietary relation of skepticism and it's consequent naturalization of a process under a recordable or measureable line like or exponential basis, of use and deployment, thus, adjustant *of accord*, as a priority of mean supplication and mean co-temperance of a *line-like-acquisitional evidentiary basis.*

On (+1) (–1|0) a pro-selectivity *of:*

a.) Entrainable Opposition.
b.) Courtmanship and Displacement *of a disembarkment.*
c.) Non-selectively held Unbiased Nonarbitrary unprohibitiveness
d.) A non-selective A Priori Justification at equated mean in ‘therefore’.
e.) A Truism and Liability to Discourse under measure of *Popular Disclosure.*
f.) A philosophical basis of discontinuable progression, with exception to *an Intermediate Means.*
g.) A Disjunctive non-classifier, *and unredacted clause in bearing to Visiable.*

Thus, the pro-juris selectivity of one and a ‘beheld witness’ is unembarkable, but discernable through either of two gates via a‘c-select in precedent-call under distributively entitled ‘blind|non-blind’ in ‘colored’. *Thus, as such, justified, of body of evidentiary, the prior antecedent of a clause, is it’s ‘then held minor measure and largest mean’ of a membership qualifier on behalf of a categorically beheld non-embarkment.*

*Then,* I needed consider “***Whether the model was compact, the electronics was compact, and in-essence, the alternative, and the result of the phenomenological and phenomenal shift of the laws of physics, in relation to Markov, Probability, Statistics, Strategy, and the Kolgomorov-Arnold-Moser theorems, of Game Theoretic Nature, in relation to Means of a Secure Prototype.***”

08:02 am
a.) Measure of compass, degree (radian degree) measuring ruler, and square.
b.) Oragami, and the game of ‘Go’ to program-vers. History and collation.
c.) The device to batteries, and switches, ohmic, and capacitive photonic gap.
d.) The network-secure means, and dual RJ-45 with firewall, and interoper.
e.) Theory of measurement, and phenomenological law and phenomenonal.
f.) Percolation theory, and process and procedure of materials scientific facts.
g.) Theory of elliptic functions and the amended theorem of physical contract.

I feel a renewed sense of hope for that of my-life, post-UNM, in earning my-Master’s. The machine(s) function, whether:

a.) Broken.
b.) Under Restoration.
c.) Repaired.
d.) Actively Operational.
e.) Inoperative, Outside an Operator Session.

The disparity between forgotten contributions, and the particle-wave duality is settled, *on-behalf of* preservation of a barrier, and a release.
The APW, *Aperiodic-Wave*, that results, in fluidically-compatible with *Pneumatics and Hydraulics*, thus, my work with Casey Controls works.

I will seek the easy-means to deselective option – (under precedent and principle of cooperation) – to defend common welfare on behalf of un-attritioned release, under supplicative means to differential human psyche and disjunctive, of behalf of acclaim, post a recovery phase & sets of acts, in means, and my-equipped means, to the priority of friendship, with-loss-inquiry and confidence intervals and delays, to persuasion (unembarked of unprohibitory in a contractual *obligitory obligation* of sequesterment). This will be in relation to the version history of these of selective file-tables and contracts, as a release from unprohibitive plagaristic intention, in relation to contractual name-space and possible inclusion of secure and safe, effective, and prioritized means of a benefit beyond mechanistic progression (later, inherred liability) of creations.

The **next*-step, was to include the Quartus & Chaotic-Logistic ***NeuroKit** functional together, for intelligent computation, and prioritization of a further-progression..... This step assures the result(s) of computation for Chaos, Logic, Modules, Objects, Procedures, and Tables.css.

We-need prioritize in a seq./deb., on that of court and amends to council in 'scaffold' at ladderable CNOTXOR-NAND-U. And triple check, in *beta-chi*, for that of 'list and vers', for that of seq./amend. And prior-later, *at (@)* - J.P.A. Then [why build something?] – *to put considerately.*

Compliment of attention-span and strategem, on-dialectic and communications, in 'low' 'go, and dominoes' – and at-top 'goal front face' oragami-code-designs.

Ecology, Photograph, Dialectical Liability, Fiduciary, MIDI-Channel-Coupler, Vers. History and Simu. Predicate Afforded Ontological Restorative Art's and Study.

Specific-weight and fluid, specific-mass and displacement and air, phenomena and phenomenon to experimental measurable 'observational science and applied science;' - that of solid-fire percolation and integrity, as well as viscosity, analytic category, order, weather and net, and – & *theory in mathematical decay & dating.*

I decided in-the-end to go with a lumped-element network analyzer, with the MIDI, my only two-exposures.
*So as to say, the problem 'residual-trace' is a scale (fish) – unto, auditory sense, visual persistence, and epi-magnetic 'shadow' – thus, Markov-Painleve TMOS evid.*

Finality

Derivative [residual-composite AC/DC] is manifold receptive* to the photodiode, of-which the AC-magnetic field is CCW, and the electric is apolar with DC, while AC-bridged* in contrast the absence of magnetic monopole(s), - thus, a **twisted*, knot* for in the exclusion of a deficit is a displacement current, of which is anomolous. Thus, the 'timing' remain(s); ionic, precessionally, in gravity and magnetism, but polar-Darwin on that of the electric-displacement. Thus, a covariance implicates a thermal ionization to the apotential of differential (interior magnetism) and extra-auxiliary electric.

*Thus, Thomas precessional, is apolarized 'up' to the electron spin-gyromagnetic moment of the ionic charge and it's neutron-like-gluon admixture.* This means, that effectively, the neutrilino is an absence/neutrality of the gauge Higg(s) boson, *a super-symmetric particle parter pair, in tandem of charge under polarity to the isoscalar spectral gap.*

A derivative - to an integral, remain(s) therefore, polar but apolarized to a neutral(s) void, upon the 'back-side' of a Lotka-Volterra, - that there is a seed* for in the residual (phase irregularity) upon that of thermal isotropy and disincluded entropic ball(s) [Sobolev and Besov] co-extensive to null -epsilon.

Derivative *oncurrent* precessional redshift is a dichotomistic lag, or priority to the 'ahead' relationship for in any orbital *denaturing*.

Evidence is primary to judgement, to-which (a) living individual, or electromagnetic [hardware basis] epitomizes the relationship of a 'solid backing' - from these (*the above truth(s)*), - it proves observational limitation is containable, for in the inherent possessorship of a magnetic and electric (neutrals-plus) for in *floating ground*, the manual identification of which is a 'taxonomy of whetstone bridge' - or cross-council *photonic or electron entanglement.*

Thus, categorically, *a bivector*, does not polarize with respect to the invariance classifier of a phenomenon [unitary].

Unitary (co-dependent arising) for in a mono-exceptionable makes the differential phase to group to amplitude diff/eq *monetary*, secular derivative of a non-unit basis, compact, under the relationship of origination in emptiness.

Co-dependent arising.

Observation.

Particle/Wave.

Stochasticity.

Non-commutative, and Commutative.

Dependent Origination.

1.) sqrt(\eta+\alpha\beta)~.(\eta_{2}+\alpha_{2}\beta)~.&^{2}....

2.) Exp[-\kappa*\tau+n*\theta]

3.) I_{0}*Exp[-\i*\omega*\t+\k*\x]

4.) RC\omega and RC/L

Two frequency 'limb's' process thru (90 degrees) of CCW/CW, & second (by 180 degrees) of CW/CCW.

5.) Negative Z~.Gain.

6.) d\w+\w.\w=\a

Thus, the phase transconductance, directly relates to the amplitude gain in B.B for E.B,.....

()^{2}, and in-radical..... (\tau^{2'}-\kappa\kappa^{'})/(\tau^{2}+\kappa^{2})

I long for love, *but I have this*,

a.) The equivalence of frames, for what it-is, guarantee(s), the redshift is consistent with the lowered quantum energy.

b.) The equivalence of frames, for what it-is, guarantee(s), the redshift is consistent with the gravitational energy of the system.

That the quantum shift(s) energy, indicates energy scales oppositely, for of quantum locking, to the ordinary scale in energy given stress.

This is an inhibition, such as sense.

I would be a fool to not publish this as a given article,..... all we have is the present, - thus, I will do this, - and -

c.) The 'fork' of-which guarantee(s) a given at that.

d.) And of measurement and pseudoprobability, a new way of looking at computation.

*Compare the **Perimetric Method**, with that of **Field Regularization**.*

*Is there a mapping?*

Method, Regularization, Field, and the Mapping.

Closure, Coupling, Boundedness, and the Finiteness.

Q: Quadratic at (@) error, in term(s) of L^{2}, L^{1}, and Quality of the Resonance.

- O(n) or o(\sqrt(n)) as n-inf or n-0.

*@ Homotopy, Cohomology, & Analysis - @ Epistimology.*

For 'articulation' the *regular*-step(s) of a process of the unfolding of understanding (remain) of err and application, due resolution, there is peer, and translation [ammend.] through the flow of data, and informed basis,.... 'components in distribution'.

As to be contrasted with 3-3-3-3-3-3-3, etc,.... regularization of irregularity.

*Of*: 1.) A dual-paned (dual Tx/Rx) & of evidentiary per *States* and *Federal Law*.

*Of*: 2.) Condition of the differential of a baby w/w/o, and of two women made the difference of.

*Of*: 3.) Selection in presentation of evidentiary to innocence, and no people present at-home.

They are different people, and both are communicating.

They are auditory.

They are alive.

They have access to the consideration of innocence.

I am innocent, unreclaimed [update: *April 1st (***yes***)*], or these have ping assoc. with my CPU/PC...

I know them.

There has been jurisprudence.

a.) To self-manifest disappearance; for in a photographic screen *or dispute at innocent truth of amends and plea.... the reconciliable is 'blindness' of bodily - without persuasion to the screen**.

b.) To non-manifest hologram, and **room*** - the amend and plea - is a relation *to manifest hologram without steam, - but of a (6/7/8).*

Thus, we learn of the executive function; which creates inter-aliable space for emotional or id-sympathetic dialog and dispute, - the relation of (2|1)...3.

1.) The Weber and KdV [remain] processed, of *not* unlimited vacuum extensibility.

a.) Order of equipment and reconciliation of a dispute.

2.) The Boson [rational~large composite integer] does not remain of infinite population number.

a.) We end up with a grey-zone on that of red/blue.... blue - L/R, red is isotropic.

3.) Platonic-solids at Darboux - remains a yet-witnessed classifier *on analysis* with a Prismatic lens.

4.) Quasi-*crystal* (10.1/4) must be perfected of-law.

5.) *I need 'separate' through what is a 'separation' the unequated **as-equated** of the Crystal-Disc & Quantum Gate.*

It's been noted, the Quantum Gate is operational to (sqrt(6)/2,sqrt(5)/2,sqrt(4)/2,sqrt(3)/2)+delta (**PWM**)+\eps.

6.) The *information-theoretic-propogation limit of the Boson(s) in limited (lesser) dimension remains with the Blue and Red shift of (backward) and (Left/Right) at commutation relation(s) of Chiral/Bose/Anyon to explain SC in the context of a Peirls instability - that the 'grey-zone' is annhiliative to that of the n_{inf}~r^{D} and enhacing to the n_{lower}=2,3 of r^{2,3}.....*

a.) The third* dimension and *particle is in-exception to a (5th/2nd) particle and dimension of the Poincare-section..... between order and chaos [strange?].

7.) *The information-theoretic Boson-bunch theorem, make(s) a contact-envelope distinction with respect to electromagnetism, for what is sound*, at the Z [ion number] with-electron charge-wave in anharmonic term(s), of a compensatory damping versus for light and sound, what is the spin focal parameter - thus: that solitons form, simultaneously to the second-sound, as per the timing of the opening of the Peirl's instability, by a local 'up-flux' of chiral low-mode,..... thus, that it possesses a measurable mass exponent in terms of Hamitonian, in-neutrality, of what is it's volumetrically-free mathematical hidden-number (Chaos) void.*

8.) Relativity + Finite Propogation Distance = Thermalization and Temperature [finite].

9.) Numerically, this-phenomena cannot* be understood by a singular individual but through-sense, - thus, there is - **no** - theoretical predictive validity of the theorem *But, for two or more individual(s) - & not more than 2. *But*, there is mathematical theoretical predictive validity - it must be compared to numerical theory with two individual(s).... *or a human operated more advanced computational *mechanism.*

a.) Lieber-Kullback or Sobolev-Inequality or Holder-Jordan-Jacobi for that of the model *at* the base geometric platonic and Elliptic proj_{A} *as a Stokes jump-group on [[S,1/0],[T,U]]* for that of residual apportionment of Z_{int}.

10.) The [0/1] and the E[k] at O(5)-*quintic*, is a stabilizing entropy in ***Graph-Distinguishable QM Statistics*** and the Elliptic to Painleve I-VI *types* of the Hopf-rms good/bad reductional compensatory topologies, of what are Banachi spaces.

A.) It is now-simple. *That it envokes a 2:1 on that of the dB, for that of the MIDI out and through of the Compensator, the device is essentially a* ***dipole conveyor*** *in mini and select along a train of 'zoomed' signals, approximately individual spikes.*

A 'minor' to 'major' in R/B/Y/W *at* Red/Black/Yellow/White in *Green-overlapping illumination is a* Black/Grey/White/Blue,..... thus of (6/4+1/4+1/2) the *illumination cross categorizes a potential.*

Introduce Green's Function, ... *then*, Statistical Model and it's relevence at mapping to-Analysis, to that of Probability, Markov, and Wavelet, etc,.....and, geometry *through calculus.*... Proper integral, proper time....

a.) Geometric instability - coupled to Peirels instability.

b.) Redshift/Blueshift through soliton effective mass.... and, Tensor.

c.) Binachi surface and Dar-Boux/Stokes integral boundary conditions.

d.) Phase and amplitude splitting via Hopf and energy barrier...

Leading to an negative electron effective mass and relative charge.

A number of things, I have-and-understand *Beyond anyone else, and entirely are my-own, although 'they' possess certain faculties of this-and-that:*

1.) Blind dispute.

2.) Affordant description of one-to-population of algebra to geometric truth of inhered 'phenomenon'.

3.) It's securable foundation at the measureability, and operative.

4.) An ordinal structure for invocation of means, at topological knotted excursion.

There are *additionally*, Four-things of which I have accessibility upon, which are-shared, but disputed, and rational, possible, and I have established means unto*:

a.) Ring associability among partnerships. [A means of communication and social networking.]

b.) A book, accessorized singly upon a heaven(s) *of-naturalized occurrence, to wit, of a people unto an-Earth.*

c.) A fighting style, associable with the **Heart restoration practice I innovated.*

d.) Advancement through the 'crystal' - and of the *shape* of-understanding, reconciled with *result.*

I only have a *few* questions.

It is good to operate, then, of health of *doing*, and of *suggestion*, and *particle notion to discernment*, and *application.*

1.) If and as such, I am to apply the-law, *how is it to officiate it's term(s) under diplomacy and endowment?*

2.) What is the defining notion of precept, *and at-it-enabled truth of implementation of a system of operands?*

I'm now in an-elopement with two-women.

That the *final problem*, has elucidated itself.

It is 04:16 and the last is 02:09,..... - that this is the 'geometric/algebraic' dispute, - therefrom, that I may of a (−1 mod) to (2):03 at [closed] *recover the mathematical identity and innocence of the case cadre.*

It-was, there-from: 03:28 on 03:25:2024,..... with (2):(2) in-dispute, at-measure. Thus, of 3^{2}-1 or 2^{3}=0 of it's mod-eight/seventh/fourth.

Thus, the recovered* number is 57-58,..... 57:58-59, 57:587..... a rough-ruling.

Therefrom at (@) 3:31, the relation is affixed for of (+3), at individual, and power (−1), of which geometrically is it's index-of-prefix,..... (33:58:3) *crystal* (18:3:1) (6.2.3.7.1). The end-odd(s) and match* were **62:371**.

At the *earlier* saving of a life - in a **seed** per term(s) of 62-5, at (@) 38.31 liability, to discursive *of the proverbial*, and the laint - remainder - *pro-life*, we-amend.

What are our certain-term(s), but once ***one** inclusive of life and death, to labor and dispute, but the hallow of a numeric 'blind/frail'? Well, they are the remainder of approaches to self-naturalized communal exchange via foreign, and naturalized truth of liability... - for of what, in-return, we mate-of-consideration (A. was out of it)... duration at liability is a mutual-code-go on liability to the salvagement in a wed/postal/liability/discourse, and it's honest retribution, *per-policy*, of law entitled per '**capstone**'.

I will set-aside [**stongly and reliantly**] - that I had disputed of relevence to agreement with Obama, under the *then* pro-benefit of an involutionary dispute, entitled *of the assumptive* of naturalized-friendship and associate.

That I saved* his-life, is then *Undisputed.*... relevant, and honest, persuaded, and inclementally provisional, but true... at the certain* terms of *Now*, a remark.

I will be a compatriot unto this-man, and sojourn, for perhaps 680 months and year(s) in equated truth of the Moon and Sun,... temporally and mutual of co-cycle.

There is is, the co-cycle will be innovated, and I need decide of the certain terms of *It's patentability*. That it will require *other's* to participate to create what I-envision beyond the *Numeric Engine: Type I*.... that I will need invest some 1800 dollar(s)+850 dollar(s). This will take approximately two-year(s). That with *250* (four month(s) max) I will have w/ 400 dollar(s), the main device assembled and completed.

My *aim is 800+130. This is about (1600 down + two-third(s)) - about (10 month(s)). I will go to UNM [after] about 8 month(s) 15 day(s) ~ 11:10:24.

In the next two-year(s) + indefinite future, I will be considering Fatherhood.

Thus:

a.) Fatherhood.

b.) Practitionership.

c.) Hobbies.

From 6:25 am-40 (pseudo) t+/-. - of Law, 07:35 am (MST); (09:35 DCT)-(06:35 PCT). +8 year(s) to 3-25-32, (am).....

03-25-24-32:8/00~.3.8:1.2 *Return through a compartment of two foreign imported mutually unidentified diplomatic possibilities.*

*pH of 'float-crystal' - versus - 'solid composition' - at confidence/ratio versus entitled agency of it's deployment and safe-release... to the condition of a mutual or isolable, etc,.... unitary manifold & multiplicity (through addend) of procedural and enablement of two or (univalent non-disclosable or isolable) - releaseable* formative(s) and dignified populaces, through a social mean.

Assuming: *K-O; not necessarily damaged or underprocessed, inclementally earned, or respected, disputed, or lost to another's favor, or mutually against what is foe and fore.*...

*Assuming: Disclosure entitles, - there is the concerning attribute of a Tx as Rx foreignable, to-whom in (+) non-inv/inv IN, to a sensor, the measureable end-addendum, pro-fixes a wrongfully occluded GATED functional, for what is a mixed and misidentifier.*

A priority at-Fedex/UPS+Postal (*opt.*) - & Economy [separate tax and tariff] - Basic Chem/Bio/Language. + Social.

a.) Xerox, Tx/Rx (up/up/down/up/down/down) and algebra+group, diff. Eq.

b.) Program [analysis and forgetful func. + procedure [unit]]..... of secured* means. / / Hardware. (epsilon).

1.) Types.

2.) Kinds.

c.) Law.

d.) Phenomena* & Phenomenon [weak-to-strong link]. (subst./inclu.)

e.) Strategem. - ?!

When I dispute a voice, it is the headway by which I have succumb unto self.

When I affirm what is not-presently, I am presented of occurrence to one or two.

Therefore voices remain unknown to another, and are affirmed as invalid for whom I am, of disputation.

Therefrom, another(s) point is made, but a life is occurrent to means by which it may-live.

And of a classification at-self, by whom I am made unto self, another is known to-live, and know the self.

For in two, of what is, neither occurrently has laid the other aside, for whom I am and unto.

Thus, I know another know(s) me of whom, in-living, is not the self relationship to one in whom hears.

There is then an exception between me, the world, God, and the Devil, people, and all that exists.

I am as I am, then that I occur, - there is one thing that is unknowable, the absolute, the placing of an event.

Then, of the law, that it disputes what is incongruent, and of precedent, what lay(s) naturally among things.

Of the co-existent, there is what is me, and the incongruent, the congruent, and the laid into law, or aside.

There is peace not with God, the Devil, the unexpected, but the invioable, and the world and people.

These 12, are the end(s) of the world, and none may speak otherwise, to do so is to lay aside another to terror.

'The' as 'pronoun' per-verb in 'answer-priority' - *expressive* - into* injective adverb (priority third-three) at nine, is example in 'return-answer' - at 'question' *injectively noun in self*, per-individuated *expression*, thus, procedure id at a named* *foreign-cpu*, the quanta, for in two-in-split - remain(s) half-whole of the answerable committee assn.

Table of allocation is a Tx/T/Rx..... transformation under priority addend, per answer in dispute coming & going, to-two (2) *presentably.*

Therefore, the tandem (upper 'large mass long propogation' - boson) envelop(s), the uncontained abridgement in the nonlocality of two-electron (backscattering) confocal - spinwaves - *per thermal assoc. in superconductivity pro.*

Non-BCS, *punct. of one proj_{A} is a reversible-unidirectional spectral theorem of quantum mechanic(s) - thus a lowered E state.*

**Third**; the 'taxonomy of *diagnostic, phenomena, symptomology, and regularity and irregularity'* is divisional [literal] - upon pathology and regular/normal function of the calendaria, upon a (3)|(2)~.(4)!(1),...

a.) Enablement or utilitization of pseudo-probability in numerical and mathematical predictive isolably separates and combines the relation of *taxonomy of design, version history, and medical imperative.*

b.) Temporal constrast in* a *flow* [non counterfaced] - to the crystal is (2).1 or 1|2 or such, of *5'/6'* and the pseudo, control(s) *expectation of consequence* for in (2) mutual h. or m. or s. etc... *and of blind Elephant.*

**Fourth**; two-neutralities.

Inhibition via the prelexicographical 'pageanation' of a 8:00 at (@) 6:42:14 for instance, - a 'chunk' of the mental observation and such.

Neutrality and defense, taxonomic underpinning and relation at *non-bio* [distinctual] at that of phenomena of neutrals phase and identifier 'below' a 'SSB - or '**heavy**' - *protected zone.*

Red/Black/Yellow *on fire and identifiers as well as intended instruction.* Blue/Black *on water and firing* - - Grey [abridgement] & SSD (depth) - *Internet:* Red/Yellow/White. Stencil and Stroboscope *at A.I., and pathway.*

So, the SSB-Stereographic/Stroboscope must be mitigated. *Law need not be anything but single-facet(s) and three-colored. A dispute need be two-fold-taxonomically* Green/Red & Black/White. ***Suggestion and Notes.***

1.) Garden

2.) Electronics

3.) Health

4.) Priorities

5.) Writing

6.) Reading

7.) Efficiency

I'm not doing electronics for a career, ARMY is on-trust, developed, supply, and investment. I resolved the majority of superconductivity. I am not teaching physics.

It will be* perhaps Mathematics &/or Computer Science.

A.) The determinant, at 'secularly provided hermitian and adjoint bases' - makes the 'immersion' a 'fold' *precipitiously* when as-such topological sqrt(1-u^{2}) where u=\p_{t}y(z(t)) or u^{2}=^:p_{t^{2}}y(z(t)).

*STS^{-1}==M.0 or M.1 [a carry or an addend]*,.... \p_{z}=\p_{t}\ln(\sqrt{-g}).

B.) The *Weber-KdV* is in a perimetry to which coordinal relation and orientation are with respect *to*, a 'latch' and the 'quotient' - [considered] of auxiliary *point of reference*, in (3(++)2(..)1), (2) carries and tables.

In consideration of a 'potential disinclusionary intention at valid means' - the approach of another from-afar is a redshift for in mutually-biased *die*, ... to the *other*, but of conditional neutrality upon a minicual.

\p_{z}~y(z(t))~(\a+\b z)^{n}/(\c +d z)^{m}~y(z(t))/x(z(t))..... = proj_{A}|A of u|{A_{i}}(g_{1},g_{2},z(t))... ST^{1}S~P_{r}|Q_{i}~18~5*3+4-1+(0*2)~1138-232-815-606-912-1002~4-3+2

proj_{A}~l(\nu)=2,4,8,10,12-(+/-3 mod 4)=1,3,5,7,11-(+/-1 mod 4) - **9** [excluded] 13.7ths ~ 3.6 h.m.=216-6,5,4...

**For 6/5/4 at 8/7/6 of (6/5) or (8/7) - (+/-3|+/-1) (@) i>\pi/4 (@)* **6** - identity of the mapping to the transform.

graph identity.

(3): Knot + Jordan.

(2): Variety + Projection.

(1): Graph + Category.

a.) Type.

b.) Set.

'Set occupancy of *a* symbolic dictionary.'

'Distributative element of non-disturbance.'

**Goals:**

a.) BSD Conjecture [homotopy and cohomology] of *loose and folded* deRahm cohomogies at varieties.

b.) Device = [S=2(x^{2}-y^{2}),S=1(z^{2}),S=1(x+iy)] *modes and a switch*, then 'translated' over virtuals.

c.) Render it safe [primary and primacy] - etc,... *isolation, and terminology, virtual, and hardware oride.*

d.) MIDI connective and [abridged] utility of *operation, for what is a uvual mutually traversible circ.

e.) Compensator, Tested Touchscreen, New* Elliptic to Hermite Driver, & Qubit Gate, +Programable.

f.) Key (major/minor) - and *at* (@) guess! For that of a lexicographical impulse, & synthetic response.

945/42 - 599/67 - (+3/-1) - (t-5:31) - (s-599:67)...

a.)-f.) Is answered for the following; certain alogrithms of (2x|[0.1]) - swap to a loss in more memory, thus, the benefit of note to that of a learned adaptive 'non-determinancy' only function(s) for that of a base algorithm.

Secondly, the dispute is answered, for of a midpartition on secondary CPU with over-managable 'off/halt' for that of a given at-pause and prompt in a greaterly centralized CPU, per-terms of that of 'a' computer-assisted SMC...

This SMC matches as an FPGA 'certain pattern influences' of-which manage the 'core' of the device thru manual switches - that these, and MIDI, - furnish a manual override of the learning adaptive net, or, for a free-process...

There is a (minor/major) + guess on that of the keyboard, - which funishes a virtualized lookup admittance to a given process - that this admit(s) one to (pause) and remain - and traffic the network at a moment's hesitation...

I finally found that it was false. When Hume's Fork is turned-around, it is stale, for what would be a determination of-self in contrast another, thus that there is a reconciliation - but it defies it's necessary precept - that of Quantum Mechanics. This makes many a liar.

**Applied Phases and Inheritance**

*Introductory Summary:*

I.) The 'Elliptic Group' with Schwartz Differential; satisfies an elementary differential equation with squared and non-squared first and second differentials... the Spin-Classical Correspondence as illustrated by Bell's Theorem, on entanglement.

II.) This renders a law of inheritance to which the 'bel' and 'non-bel' statistic can be furnished to produce New Correspondence between The Relative and the Classical Limit, as well as producing A Quantum Gravitational Correspondence, of the Hamilton-Jacobi Variety, in a general Topological setting.

a.) This satisfies all differential equations with Integer Coefficient(s) on differentials and powers of differentials...

b.) That it relates an equation of-form \f o \tau = \L & f^{2}:=f, there is an extrapolative.

c.) That it solves co-determinism of the nature of 2(1).0 and 1(2).0, there is room for the double slit, and the mannerism of the expression of the unified 'mechanism' of Deus Ex Machina.

That of what I came up with [the above] need be gone-through,... that of the 5' on a decision tree, in perhaps two way(s).

There is past and future, and chronology to-explain.

III.) The EPR paradox is resolved by consideration of the mathematical intractability versus it's computational accessory, for in virtue of the separation in-space, - that the quasi-determinism of the world vs. a blue shift only to-Mercury, and red shift only for 'above' gravitationally, separates in time in equivalence with the unitary operation, for in that of strict determinism vs. the pole-barn paradox. That this leads to a 'one world' interpretation, there is validity founded on a strict separation between a theory of gravity and quantum mechanics as written and spoken, but not for that of a unified architechture for which there is a theory (m) and a theory (u).

a.) Versed in terms of this, much of co-dependent arising can be broken down into various constructions, for that of the literal (5)(3)(4)(2)(1)(!)(0), and that of 2(1).0 and 1(2).0 into which it is versed.

b.) At the End: A Theory of Temperature, etc... via the equipment [design/device] of [essentially] uncrossed Thermistor(s) through-the-contact efficiency, to-which ExB and KxL and ExB, maintain inertia, for that of a focus, and Concentrated Constructive and Deconstructive Interference of Bands.

1.) This takes new-mathematic(s) to model, via the undecidable, for which are two-drawers, for that of a given, as visa-via; the connection to auxiliary equipment render(s) implausibility of a [cc] measurement! - optical?

IV.) a.) Non-locality is subsumptive to locality, within the considerate 'mean' L(1) and L(2)?, of the "paradox" of reality, it is co-dependent... thus co-relative of determination.

b.) Dissolvant?!? - One curvature appears to be co-dependent and co-relative,... but this cannot merely so be the restriction to an 'Equivalence Principle' - thus quantum inhere(s) of a mathematical dissolvant?! Co-attribution.

V.) I have [after much deliberation] - to *only* do that of a model for Superconductivity, that of an-exact solution to the two dimensional ising/heisenberg model, with berry(s) phase.

a.) This 'geometry' in-as-much as the non-commutation of lorentz boosts directly translates into a discrepancy by which spins align and exchange may reduce energy, for as much as (4J); thus, it is satisfied.

VI.) I have the result of the finality by which my 'publication paper' may be reduced, - that it is that (2)(1), and that of incompletion may lead to an *answer regarding the dissection of causality.

*Main Material [A Sketch]:*

Superconductivity [for a removable equivalence principle] take(s)-place as a soliton ellicit(s) a covariance of scaling in spin (1/2) to multi-degeneracy, then that (two)-2 window(s) are localized behind-one. Thus, temperature is Ayin, to what is the alternative of Beth, for of a translocation in what of either are Inhered dopant/interior L(2) upon L(1), of it's alternative at E&B, thus, that light localizes electron inertia, and is temperature activated.

Superconductivity is [a past heritological arrow] by-which the (2x.1) separates for in past/future, and that of the Markovian Truth at Predicate, for in-involution, a D wave of S=2/(1/2), of four fold SU(2), in valence and co-valence of spin and charge,...

The end conclusion of superconductivity is that thermalization activates a gap to which L(1) and L(2), inhere of a past heritological arrow by which the SU(2) is non-local, for of that of soliton virtual-past-redshift, on that of which the x' and y' mediate a separation in phenomena.... that of the spin is therefore increased by a factor of two comparative the texture, - to which electron(s) attract, given doping.

Superconductivity develop(s) by an-inversion of g_{\mu\nu} upon the Hilbert Space; in certain terms of the L(1) and L(2) in-epsilon behavior of the Weierstrass-P function(s), for of the behavior of logical inheritance, to which is non-void.

It is 3D, and Erica Carlson is correct, but of y' and x', they are not entirely orthogonal, thus, I have been given a step-up, - that I see how the crystal, may inherit an off-momentum, through the L(1) and L(2) of a dark mode, for that of the Dirac-point, - that it is 'folded' - thus of five testimonies.

Thus, there is perfect back-scattering, and a redshift of accounting for the factor of two from-doping, to which the (−2) factor of attraction completely reverses, the (+1) of-repulsion.

The Pauli-Exclusion is afforded by the logical inheritance of the gravitational reversal.....

It is *very possible Superconductivity is here to teach us something new about that of inhered properties via General and Special Relativity. That of the 'one-way' process, can only be so-stated, it is difficult to derive, but, time appears to play a role. That of edificuary appears to be to evidence that of the redshift, - namely, that one scope and null invariance takes departure from-another, for in the reversal of ExB, etc...

That ExB has-reversed, I had not considered, but it would be good* to simplify.

Pauli Exclusion may remain, but that of the ExB, for in it's reversal, implicate(s) *time*-has-reversed*, or at the least a future has gone to a past,... for of redshift, - this is consistent, then that it indicate(s) something new has taken place.

For of separation, clearly, the non-local interaction is stronger than the locality **Brownian Bridge*, due thermalization and ExB, - in (L) and (R), there is the unpredictable, and the choice of coordinates.....

That I may have just solved this.

I must 'trim' my model to the bare essence. That I have:

a.) 'bel' and 'non-bel' statistic.

b.) 'reversal of causation with respect to t_{ab}>t_{a}, etc...'

c.) L(1) and L(2).

I see perfectly how (a.) and (b.) suite one another, and how (c.) is a consequence and necessary, .... but it is one step from being 'all-clear'.

I have -resolved- *the enigma*. Spin(s) *represented and physically instanced* by **bivector(s)**, in the limit of N goes to +inf demonstrate a 'new' resolution at-and-of-emergence, a quantum quasi-solid/crystalline structure which amelds to a mathematical substrata, through a *Historical Arrow*; of which \Delta t_{\a} >:= \Delta t_{\b} as s.t.

1.) Despite what challenged me [good versus evil - at that of post-hoc criticism of paper(s) and book(s)], I decided on the following..... - that for clarity, which was not what was decided [there was a positive outcome]. That I must follow this route of speculation, - *for what it is* - and judge-rightly; *I am esteemed.*

a.) I decided I must do basic and preliminary mathematic(s) on the elliptic group, into and of a backing of causation [the first publication].... and:

b.) That of a two dimensional model into that of non-locality, with three dimension(s) as-well, for which the topology of the zero-set is measure-zero, and correlates with the above mathematics.

This is my first project. It has numerous application(s), and to be considered [separately] is just-how mathematical our-world is, the essence of a foundation to what-is. This is sufficient, with chaos and order, order of phenomenologies, and phases. That I can innovate a device, the goal is:

2.) An electronic device, and or material which separates (asymptotically) the electric and magnetic field and is thermally amenable to temperatures exceeding ~100-140 degrees celsius.

a.) And (&) focuses the relationship of either field quality.

The 'DC' *from-phase-to-amplitude* **bias** hint(s) at the Elliptic-group, for in (1/2)^{2}; of Exp[-(\a*\tau+\t*n*m)], a n and m 'index' at 1/Sqrt[v_{0}*c] for-in quadratic-reciprocity of 'Area-to-Perimeter' of (4*pi/(2*pi)), a maximum.

Thus, the Elliptic 'group-frequency-relationship' abridges, - for an *unknown* reason, that T [temperature] and *freq* for that of the (accounting of Hall-like effect) - on that of 'AC' and ***beat*** phenomena, of pk-pk, in some 15-90%... *Of E and B.*

When I considered the ExB *drift,* it was settled that the 'commutativity' and 'non-commutativity' of certain *Lorentz Transformations* would lead to a perturbation.

With that of A<->B under involution of observation, and the E^{2}-B^{2} vs. E^{2}+B^{2}; that of E.B, was noticed in the 'Device' to induce self-transparency.

That the L(1) and L(2) leads to a 'hypersphere' selection rule of (1/2 or 2) was the next step, then of an inverted Variation Principle. And, then that of the 'drift' to a Hamilton Jacobi equation 'inversion' of character, upon relativity, for in 'future inheritance' versus 'past inheritance'. That of the 'redshift' was then-noted.... of 'spatialized truth' w/o projection, thus that it is not CPT reversal, but rather a redshift dominant via a Green's Function, over that of orthochronous transformation.

That of invocation of a mass gap for in a 'shadow element' was then clear via a trapezius of action.... that thermalization leads at once to a pure random with determinism at space like separation.

The entire Periodic Table is up for it's realization.

That of the 'covariant derivative' - for that of the \Gamma_{\mu} added to the momentum, give(s) an-imperative as to the manner of consideration 'back from time' - *to that of the inherence by which gravitation is subsumptive.*

That this only 'half' obey(s) co-determinism, there is allowance by which the 'past' becomes partially mathematical and partially physical, - that this remain(s) ***unknown** as of this writing, and as it were, - by many...

I remain with one *hint, as to the mathematical/physical arrow...

\Gamma_{\mu} *with* a non-Abelian 'theory' obey(s) a *connection* which is non-linear,... and linear, thus, the quadratic form (answered in the Elliptic) operates via a Decision-Tree monic/linear Elliptic functional Process.

{f_{1},f_{2}} -> ((2)|(1)),((2),(#)),((#),(2))....((#),(1))...((1),(#)).

a.) #1:) Computational/Device addendum/helper.... code and Device, Patent.

b.) #2:) Update to Special Theory of Relativity.

c.) New Non-Local Entropy/Thermo~.Like [network] / Causation/Soliton/Wave~.Separation....

d.) Superconductivity (*Homogeneous N->inf) Limit(s) & Phenomena*

#1.) That of any R-G *flow* to either-Ansatz or Geometric* Domain of Hyper-elliptic nature is co-dependent on a departure and approach from one of two phenomenologies.

#2.) That of a Lie differential in Jacobi-Gauss (AGM) for in that of Bessel-ruleset is converted into a Hypergeometric Rule-Set via Weierstrass-P function (under an exponential) with Unitary or Conversative Basis.

#3.) What-happen(s) to-the-world *when we consider* *[and of the process of dissemination?] - releasing this theorem, a bag of popcorn? or a snail? or a wheel-examination? - not what presumption but, it's foundation.

a.) What is this-theory [to publication and intended audience] adjacent-to, of other theories, and speculations, considerations of foreign nations, and the tumult of a divorcement historically from a landing.

#4.) Direction at a Coriolis-*like* Force, for in that of Field*; circumferentially is harmonically L(1) and L(2) to either of a push or pull, upon a mathematical-division, in the 'bel' and 'non-bel' relationship of particle.

#5.) This for *that*; scale inapportionment is a space-like null covariant relationship, to which either manual *variable* is prudently cross similarly answerable, isolably answered, and rote cyclically distributatively assurable.

#6.) Two unanswerable *truths* relate to a third-yet-answerability in a remote become locale of any undivided truth, of what in-cause from *formation*, decides the manifest utility to a progression, thus that things that are equivalent must couple.

#.7) One unanswerability therefore does not but-yet remain of a **future*, to which non-deliminatorially possess no-outcome, but from yet what is consolable for in a *further* spatially and temporally undivided lesser so mean gestalt pathway.

#.8) Thus, reflection(s) are institially the background become foreground of what is a past possessorship in either of one or another (L/R) dispossessor of one* but two, undersituated processes of which formatively disambiguate mathematical edificual and remissitorial unreclaimed formative hypothetical(s); - that the past therefrom is unpersuaded to form a future. And, furthermore, causes disambiguate what is a physical from an inherited past reservation of two total remainder(s) of a pattern. Thus, a pattern and a pattern, in portion incomplete, but completed, formatively establish a future predictor.

#.) Neither so selectivity of bias can alterably include the disambiguation to which one inhered past is formative of a valid err-prediction of and upon a future historiologically written or conveyed basis, that therefore in turn the pro-selective element(s) ambiguously possessed of two formative pattern(s) eliminate what is non-duplicity and non-denial of a projectively misheld relationship. That therefore one pattern, for in any, relate of what is the simple-duple(s) of a carry and addendum by which a future or past chronological 'outer' subject-alias in dichotomy is understood by locally held 'outer', and of inner what is inner. Thus, neither pro-selectivity of a bias but of the acknowledgement of a process in-turn to which identifies with a present manner of dichotomy of character of livelihood, may inhere of but yet all postulanal concilitorials.

#10.) Conic in conic, of [tan] in a quadric of [sin] in [xi] and [chi] remains an amelded non-simultaneous co-locality of one world view-to-another through an identifiable emergent topological invariant manifold restriction of the edificual commutative algebraic underpinning of a variational co-addendum. Essentially, quasi-stasis provokes of the 3/2 and 4/5/3, to an-addendum in six-manifold (3/2), dimensional tonality 'abridged' at spatialized separation of decay chain process.

1.) That of the [onto] projective and non-projective identification of quadric(s) amount(s) to that of a mapping by which a 10th dimensional order is subsumed for the sake of conditional assumptives into that of a four (4) dimensional mapping; i.e. the projective quadric reduces under a number-archetype.

2.) That of composition, for what it-is, leads to a Reisz basis by which the orthogonal complement in the birational co-extensor relates to a P(2) instead of P(1) upon the N->inf limit, whereby hyperdimensionally the electric and magnetic field relate to three dimensions upon two **(2)** zero-measure quotients.

3.) That of the classifier of a 'quadric' is *called comparative under complimentarity* to-that of a *Lorentz identity*, for a *mapping* of SU(2), for which the *conic Section* relates to that of a *Lorentz Transformation*,... - thus, that of the redshift and blueshift are compositional under like-kind of (+|-), under the *Composition of Invariance of Inertia*.

Thus, that the monic-determinant for the group (+)q, correlates with that of the univariate formation of a topological identity. That of the universe is therefore *Qualified*, by that of two (2) mathematical and two physical

structures. That we identify with that of a (+)q and a (-)q, then, a (+)p and a (-)p....

4.) A 'mathematical' *heirarchical functional abridgement*, super-sedes what-is-to-come of verifying mean. That the [wave] structure is apreceded, and the precedent to which it it suppliantly acts as a **Character Portion*, unto example, by which it involutively relates of a back and *forward cast element of phenomology*, unto Unionable tensity, by which portion and portion are segregationally un-but-faulted unto segmentation and apportion.

I have *thought* of calling my-Book:

*"Functional Abridgements and Functional Relationships"*

\epsilon/(1-\eta*z^{2}) -> The real reason, analytically, coloring Gabriel(s) horn, there is a topological isomorphism of two-varieties.

That of a Riesz-basis for that of characterization, for that of the Bessel-like* sequence, is proven to be erroneous with to a 'former primary' characterization of qualifier to be a Hilbert space valuation/operator.

That therefore, the Exp[-l*\wp(a,b,k1,k2)], is the only* predicated ***Convex**, [two solutions to the Universe], problem, for that of the Bessel Qualitative 'group' - *this had been what was missing*.

The Key*. Thus, the inhered truth is that on-existence, memory is defunct, in-part.... or, perhaps.... of awareness. Thus, there are higher and lower order(s), of (L/R), we have glass-bell and forest.... That of these, for what they are, are related to direction.

That of the Exp[-l*\wp] *becomes* the Bessel like relationship on recurrence, - thus, that of the stochasticity of the Universe.... in terms of local and global pattern and archetype..... for of sufficient, necessary, and satisfactor preliminary prescriptive meditation. That of *this*, begin(s) at stage-two and emanates to stage-1.

The Riesz basis determines an SU(2) in relationship to the pattern, - that there are some steps remaining.

I considered that of a ring: G(R) & I_{n}*(f(n))... so, this 'Ring' may have multiple-identities, and relate(s) of two, in knowledge and ignorance, ... then, of bel and non-bel, 'on' what is a tensor/toplinear GL(2,R), *into* a generalized ***Category***, or ***Space***.

We are equipped with a 'metric'; and *fold* **from one spatial relation of E.P. to another**.

*That of the transformation:* **T**; relates of-which there is a mapping in 4'5', on 3', that of 'missing' - in two, to a *locus...* & a general group g.

G is it's transformative process, - thus G(T) evaluates under involutive principle, to that R(u,v)... by which u, v, are *element(s)*.

Thus, that G(g) is an isotropic identity of spatialized nature, and R(u,v) are spatial or ordered relations on that of the **T**(g), - to which is a relationship cast-further, or in (two - what is a monic 'hidden'....) - thus of **void**.

**The QuBit is complete!**

**I need merely add a stop/start, and switch for L(1) to L(2) of the S=1 and S=1 switchover.**

**And, Perfect the E and B separation, for that of the contrast of the broadband probabilistic interpretation.**

**1.) PCB's and Circuit Construction, [in boxes, and driver].**

**2.) Switches *first, determined intially and installed, for that of the [next] junction table.**

**And, execute a command [structure] at-that of the safety deposit.**

**And, execute a command [structure] via the internet *For Sociology, and of the 'exceptionable issuance'.**

**And, Understand how to unitarize in the naturalized domain of Relative Entropy.**

**1.) CMOS [and] junction table - or - junction table and that of MAX11 300?**

**All this makes for a new* command-structure for technology. [result]**

**Own, internet, for that of 'auxiliary control structure. [result - safety & protection & job].**

Nominal Theory [\a,\b,\e,\g,\t,\p,\d,0,1,2,3,4,5,6,?,!,#,*,~,']. -> Programming Language

Information Theory [detection of life afar, and, beyond]

Theory of Pattern(s), Games [sep.] and Unpredictability

The negative of an L(1) and (+/-1/2), on that of (+/-2) is the difference of geometry and algebraic exponent, - that it is illustrating the (half-connected torus) - it is PWM separated, that therefore, there is a 'disc' of which is a priority projection unto a second teir. That the connection to the synthesizer, is a dB, for in a count, at a sequence,...

(thus of-priority, the (+/-1,+/-2,+0) remain(s) of-polarity upon I/O, and *the synth 'is in the bandpass'*.

It **will** matter whether something is inside or outside the bandpass.

Concluded,... the L(1) of the S(2) (the sphere), is *split* upon the SO(3,1) [underneath], *thus*, that the I/O are intermixed, but, *it is in the bandpass*, for which L(2), exposes, a *beating*, nevertheless, the S(1), is separate, as the Ring-mode, is in process, with input, ... meanwhile, it is T(2) (the torus), of which is commutative and non-commutative 'on' an absolute division-point *of separation [and in equipment - of convection]*,... Thus, there is a 'certain' modality, of which of-SO(3,1), is within broadcast unto the neg-root-norm, of it's apreceded functionality, of therefore equality on the measure of a (+/-1/2), an independent center, of which relates to *either*, in prediction of a complimentary approach at object, subject, and focal element. A bottom 'out'.

That it is within-normative, the confidence of an 'outside' is in an interrupt. So, is part-switchover, and part passivity, on that of the (+1/2) and (−2), equivalent to four-quarterings, in absolute at that of unintimated gesturing of the synth to the difference of the 'included' fault-of-the-scope, upon stereo-release. Stereo over mono.

Jesus, Israel, and Moses, **won...* that I did the *work of-three. I built a castle, on a forested and valleyed, dry and cool land. I remain dead then upon the future. That I learned, for in a safe*; then of an absolute, enclosure on that of the 'key' *within....* I found a key with self, - character and persona, overcoming *all Karma, and Samsara, and finding devotion with that of what was to-come, for life and life and death, make assurredly what is to come, and of which, as they do, they assurredly remain (*with-people*). I found, then, I was an ordinary person.

I made exception to illness, [mine], and came out well. There is no presumption by another.

I did something, earned, love, and a child, and a *home. I found no-meal, for last-night.

I remained to avoid the 'post of which declares illegality', and at that of the physical presumption, that this world is materially manifest. It is void of that of a constructor. That God is not a creator, he is an instance.

That of independently excepted things are 'in exception to one another' a counterpoint to the Axiom of Choice.…

**When the book is-behind,* of planning, it is told, that of the reading *told-of behind*, for of control and placation, co-determination, and requisition, of a commendarium, that of the process ediface,... it is of the plan, and should make this-way.

Preliminary determination, is a recluse. It is the* provided qualm for a gesture, that we identify and process.

Then, - that of the remark of another unto-disputation and disparity, for in chance, of it's remark, what is held, is out of one relation, and therefrom within another. From which we dispute what is afar, we reclaim unto yet a formerly presented, it's effectual choice, for in a remote addendum, with priority.

Therefrom, in which it is therefore'; it is knowable among all things, that we identify with the preliminary given(s). The given, is that the L(1) and L(2) dispute upon a column for a cone. Then, - that of the remark of a square-aperature. Given, one disputation in a spherical possessively is the cone, and that of the column, a 'section' of a fiber-spray of an identified algebraic theorem of categories and categorical truth, it is way of a mark, of which identifies with what yet the preliminary unto self, remotely, it's possessive of acknowledged predestination and it's management, and id.

From a possessive to a Q' class id, to a P' predicate, the non-exceptioned, is a (2) for (1), in these. Thus, in three, to a fourth, of what is a remainder, it is a trusim of the predicate analysis. Therefore, the L(1) and L(2), under [an] involute, capture *re-, the staid and said remark of another with immediacy.

With a prioritized I/O, the identifier, is that the 'within margin(s)' of a 'band' to a network, is the antecessor to a paradelogical flow. Then, that ***thusly**** the remark is no-more. This is the culpability of an indifferent trust.

It is co-dependent in fairness of regarded way, and path. That we pro-selectively bias, it is unhidden. Thus, to a justification it may be stated robustly, as that which may be to become, identifies with what is with-remark of it's manner of imputed passivity and activity in a parallel. That of justification, *to-judge*, is to be then of this way. Then, and thusly, it is, the remark of besetment to a path, and an affirmation, for relationship, and rembrance.

That of what held with another, formerly presented with the self.

P' predicate [future] it is horizoned, in what is the culpability to one identifed equals non-equals relationship.

That numerically, a 'tine', evidenced, - makes disputated truth of it's antecessory, in that of remote evidence, null and void, or remarked-of.

That the L(2) in P' and L(1) in Q', to predicated and class possessor, is a predetemination at will and remainder of honesty, *to-remain of a steadfast preparation.*

The remark at-another, is not the self-mentative, but, the remark expressed via and by-word(s) to another, of what they choose to accept and employ.

The 'test' is the boundary to boundary, in that of a half-circle or level, and balance, in that of approach, therefore it is known* to-exist with the antecedent, when* it is qualified in property and quality at the formerly held. That* the remainder counter-factual *Mother, is not a self-retraction, or possessive demonstration to another, it is merely, the recalibration and identifying mean.

The co-locality, of independently *provided element(s) survives the ordinance and disorder of any system, without fault, that of qualified and propertied, certain classes, of L(2) and L(1), identify with what is any rms(s-\z) accounted index. The fact the remaining identification with the second-equipment, makes, and build(s) the relationship, by which (2x.0.1) in (3/8), accessorizes predeterminative valuative mean.

This is below..... and above. It is below, for what is a (1/4) and radical, - that it is within-band, it is neg.-

Therefrom, it is a fictional truth of the non-flow of the oscilloscope, making the difference of-equipiment and equatement.

Of the evidence to-court, preliminary observation lead to the detail of an 'effectual prioritization of manner, disposition, to which my-court had preliminarily identified with *either* peer, in that of a consortium of vantage.

For of one*, to promise, in-either, the formative assumptive basis is my peer-review basis*, that we remark of one evidentiary truth; that the harboring of a personal bondage, is not but neither, so a counterfactual basis to a remark in unbiased, and promised guaratnee of itemized and evidentiary purse to a process in ajourment via and of ajournment per a court of offense.

Therefore, in remark, neither so selected, it is purview, in innocence, and guilt, to the persuasion of a guarantee, that we so harbor what is effective, of effectual choice.

These things known and contributed, it is dispersuasion to which in either itemized or unbiased evidence of court, per the basis of effectual post-ajournable process *due privilege* that the formative beset affirmative and affirmation in a just recourse, had faulted, for in distress, and calamity, upon the personal itemized bongage, under transferrance.

Therefore, via, and of a preceding and knowable truth of juris pro idem ni plus plus pluris recourt is addressed, and known. I had been free per priviliged in what is a remainder of accord, for in the counterable alias, of a gestured, and non-gestured intimacy at (6-44-55 in 6-1-1 and 12-4-1*[hidden]-1-11!-14/15+1-1, of 21-5-1, O.)

The circuitry [*only*] admits that of phase to voltage in pushforward and surjective pullback. That of the accessory in *one geometry and one algebra is mediated. That of the signal, and 'two' tori are explained in the following. That of the phase to voltage (E,B advance and monic advance along a pathway and function) are the winding process of a flow and differential KAM. That of the operational amplifiers and circuit however for what are oriented, create with the additional circuit elements [a] reverberation.

When *connected to the synth, the circuit tine, which precedes post that of a 'sphere of undulation', causes a performance difference, - instead of that of the torus, one sees a splitting of the space, due to the monic of [an] independently held exceptionable difference in like terms with included sets of different properties of a first order layer, of which are phase to voltage pathways. That of the* explanation is that the stereo leverages the first persuasion at a first I/O with pathway exclusion, upon return through to the equipment.

Thus, it is actual appearance on the oscilloscope/as/output, as input* is not forbid from an ohmic/V/I pathway of a tine,... the difference in operational amplifiers, due then in leading the signal to split. Thus, for a forward pass, - the entrance is not of two, for it is singly rational on that of the monic relationship in that of the stereo, but, driven, and ready, but of predictive decision-tree. Thus, the tine precedes the open condition of a closed retention. That the oscilloscope is connected in-league with this-equipment, it is singular, and not of two tori, for it would differently predictively be established, of what is a 'domain' and geometric and algebraic mapping. That these relate of a contact, for which are related, the zero is uncontained, but flat within the void, and a-trace, is a removable singularity. That it may not be effected of what is co-dependent relationship. That of the (2x.0.1) remains optioned, for of a treatment in that of the second choice.

This second-choice is that of an algebraic pushforward and pullback at that of surjective preliminary zero of the element(s) of the uncontained surjection, of which is a U_{n-1}, etc... Thus to-zero is a basis.

Since these share a basis, they are independently provided equipment and they are in-agreement about that of the working under independent equipment under exceptionable inequality. Thus it is I of-which is agreed with, and I/O of a confirmative under exception.

rms is not R and T, - reflection and transmission, thus, the gamma, is monic, post the radical.

That the radical in the phase, for two frequencies cannot tell them, for in one and another equipment, there are no-two slits, of that of the point(s) or channels. For the synth, there-are.

Thus, it takes a new soln. to resolve the algebra and geometry of that of arrow(s) and function(s) in relation to a sequence, - that of the difference, in either, of which is an-abelian with multiple group, in all poly. That this is [a] fact.

The *law in jurprudential and rurisprudiential *truth*; the *alias by which what would be time, and (4,4,4,4) of completion, - of copatron in commenderius motion, - that of pro-benefit to an industrious work(s), in that of

note keeping, and innovative design, at separation and prediction in anomalous primes.  That of the drawing and healing in-two.  Numeric witness, in that of three: 1.) id, 2.) re, 3.) ib/den/non/nom.....

That we have, way in honesty and honesty, with that of 1.) statii, 2.) decit 3.) epsi 4.) pro 5.) plus.

Then, the mere identifier by-which what is local and global may-be defined by number to-number.

That we have, pro-benefit at a number, that of identity (supplicative), and promiseful (intimated surjection).

So it is, to advance, that the truth of one is told for of what is acclaimanitive of emptied (3)[2] it is of mail.

Thus, of remark, the fourth is the postulanal.  The third, is the accessory, the second, is it's remarkful.  The first, it's disputed.

Compute, stolen and joined inhabited visitation, that it is two, to-whom in the visitation of (4'), and (3') may be 'outside time' - that *we*, remain of a counterobligatory process, the defense:  It is to privilege on the prior.

Separation in-carry [pro-rated, measureful, decimal, degree, deficit, decade, measure], (upon decree), for of life/death and the two above.  Horizontal and vertical, decree.

Sector and section, of argument, in a shared text.

And that of separation via religion, culpability to one's process.

Of a law [provided] by-which what remains is honest, true, just, moral] and presentably of staff(s), and conviction, and policy to whom, cleared, of a heaven, we remain as unto yet the belief another hold as-I.

Of defense at decree.

To be granted council.

Of ethic, and a foundation.

The becoming of another, for what would be included of remaining, and following; in decree, council, and ethic.

I finally found a solution to superconductivity.

a.) The 'table' of-which relates to five in separation [via the separation in law, etc...] and of-person to 2/3, and such, for that of entrance and exit, makes logical exclusion to that of inherited repulsion in the SC.

b.) This, attribute, exposes, a Gauss-Bonnet, of which within the higher dimension is reversibly the inheritance of either theory, - thus, that electromagnetism reverses, upon the gravity and coulomb force.

That therefore, the 'gap' comes out of it, it is not undecided..... I have found this law.

One does not simply relate back, however...

This *had* related to a separation in law... like a 'ream'.

**Superconductivity Breakthrough**

I would like to do *something explicit* - but, to choose the *right problem to discuss. I feel the work on that of the two-dimensional relativstic ising model is adequate for most of what I would like - however, this, with 3(dim.) would *additionally* be-important. It is about **perhaps*, application to a [select] area,... although I disagee with this. I must as it were find the right fit.

I *may want to investigate the relativistic ising model *in the context* of (3d-2d) abridgement, *choosing a selective parameter of sound and or matter/momentum and light, for that of [a] selective opportunity,... defined by that of a topological argument on-simplification.

This feels fresh enough.

I've broken through*!!!*

a.) The d_{xy} or d_{x^{2}-y{2}} or p_{x}+ip_{y} *Superconducting state*, is a state in-which the electron(s) avoid each other in-space, to avoid each other in potential, of the l(1),l(2) B->E.

1.) The historiological prescription applies, to which relativity adopts a measure on the valuative terms of the superconducting state different* from the quantum principles.

b.) That of l(1),l(2) applies for the electric and magnetic field, thus there is a two-part interaction.

Why is it supposedly three dimensional?

What is the connection to the superexchange and randomness?

This is similar to my-device..... that I can retailor the device.

*When the 'above' phenomena agree(s) with the phenomenon of **Crystal symmetry*, it is resonant..... explaining states in the gap* and the x'-y' approach, and the Cooper Pairs at T_{h}.

I discovered, that the ***Generator(s)**, of the ***Group**, on the dynamic mechanism of the High Temperature Superconductivity, come from a very basic premise, - that the Uncertainty Princple can [bootstrap] the l(1)-l(2) bridge. For that of the ***Finite Arithmetic**, *it is made solid.*

That the (compactness) illustrates that a set of measure zero *must be covered*, but of the (1/8th) doping-point. In a comparative - this comes from the gravitational (straight-line in curved space) formation on (5th/4th), of the interia of the elliptic group.

I ended with that of two-rules, one in-physics, one in-mathematics:

1.) The 'doublet' of projective variety is a unique kind of symmetry breaking.

a.) Where[in] the differential and function for which there is a differential, impose the relationship of a quadratic rule - it is both with and 'without' gravitation on the mathematical and the physical.

2.) That of:

a.) h_{f^{2}}(P) and 2h_{f}(P).

Thus, it is past-observation, and my innocence, and the security by which other's are real is true!

I waited some-time, - that I understood they are real, after all of that; as there is:

a.) A three-basis.

b.) O. was invoked of-life, - that it is sparingly different, [a different inheritance].

And, one additional?

No, essentially,

a.) A three basis, of which O. is a different inheritance.

b.) The reflux to which O. is salvaged with A. and A. on 'math/phys proposition'.

O. is with one hand or-the-other with-me.

I finally proved **Goldbach's Conjecture!**

e_{l}(g(z))=e_{l}(z)*g(z)....

On the Airy, *and*, the Elliptic:

h_{f^{2}}=2h_{f},

Indicate of the formula *on*:

f_{x}g(x)+g_{x}f(x) over [E:K].

That the prime(s) *per-integration*, prove Goldbach's Conjecture! *of* (Painleve) - AKNS Method...

***As**: (+/-1) ***is decided**, ... *but*, we have the Jordan Curve Theorem on Szpiro's Conjecture,... minimally* provable of an* elliptic,.....

Thus, I have asked two questions - and it confused me:

1.) Does non-linearity of some function field, produce linearity or harmony? [Glass].

2.) What is the divining *Law, of inheritance, and projective identity with resolution? [Onion].

a.) Of the *transcendent, we dessicate to a solution to *Incompletion and Pseudoprobability.*

Fisher/Bayes on (2d) involves a covector and a vector, that the Quasicrystal afford(s) through the **Finite Arithmetic* what is a log(x)~\sigma_{1}^{finite}(1/x). Then* that of the *O-minimal* decomposition afford(s) a PSD analysis.

I see what I was missing, the comparative and equal presentment of that of the frequencies on the oscillation. That it is elliptic is certain, a certain sn*cn wave, of that of certain relationships, on that of the 'addition' - the 'subtraction' is ill defined, and the multiple is a polynomial guassian... - Chebychev or Elliptic through a sinc[x].

The Boussineq equation *tuned* to the KP/AKNS system*; devolves into a':

(1-m'*sin(phi_{1}(t))^{2}) with a \eta(t)*(1-m*sin(phi_{2}(t)^{2}) *with* \eta(t) an element of a Moebius transformation.

Thus, the \eta(t)*sin(phi_{2}(t))^{2} cancel(s) the m'*sin(phi_{1}(t))^{2} as (m'-1)*cos(phi_{1}(t))^{2}

With **compliementary moduli.*

That therefore, the **negative reduction** is inhered of an exception to gravitation upon which the historiological chart reverses w.r.t. quantum mechanics and the differential and potential form of the gravitation with respect to magnetism.

Thus, the 'fork' is it's devotion from one* equation into-two, and that of the mixed/contrasted structure of constants.

That the ***negative reduction**, is processed, for in that of reflection tuned to zero, of a basic impedance analogy, the KE and PE changing bases.

The differential ceasing* from-gravitation evokes a change in the KE and PE basis of the material, thus, that the uncertainty principle and quantum mechanics becomes dominant, a complete conservation of energy!

The 'adic' - elliptic *inheritance* is but *One-limit for that of quanta, on that of an 'exponential to guassian to sine to cosine' - of which the 'adic' - elliptic inheritance at E[k] and K[k] is but one commonly denominated faculty with respecct to gravitation. Therefore, both* law(s) devolve from and out of ***Mathematics***.

Two-valence, subjectively lay(s) of observation what-is-measured [vice-versa] of the (2-adic) of **doublet**, in-either, to a localized prefactorability, of the nature of *inertia*. That the phonon, fill(s), the net-neutrality, forcing electrons to a finite* radius of-separation, and instancing *via outward-back-scattering*, the Peirels-neutrals-RMS-instability via a manifest infrared point, of which relates to the 'mass-gap' in reflection & lieu of ultra-violet doping.

**Superconductivity - Compendium - Minor Notes**

1.) Thermally, there is isolation of marginal singularities and critical points away from one another, with the introduction of a neutral (null-epsilon) coverage of the electromagnetic 'simulated' vacuum, of the electron gas.

2.) Secondly, there is a separation into lebesque measure l(2) and l(1) which furnishes a noncommutator for that of the electron raising and lowering operators, thus phonons with the above 'filter' the residue classifier of the projective space which emerges.

3.) Third, that of the phonon(s) amplify the approximate of the relation of the missing space of the electron-founded valence, to produce a 'spectral gap' - for which there is a 'hole' in the sea, to which the gauss-bonnet reverses, via a projective ideal, associated with the crystal.

4.) Fourth, - that of the electron inheritance remains redshifted, in relation to the raised or lowered superconductor, of either red or blue shift, establishing a valent unitary spatially separated and temporally admitted quantum inheritance of the variety of the preclusion via the spectral gap.

Thus, the 'hole and doping' introduce a gravitational/relative shift, to which afford(s) a compensation of the validity of 'space' - admitting a type of non-local activation via which the system convert(s) the 'ideal' of 'heat'

into a compensatory current.

As for example, of the above, - the 'void' open in a system, will 'lock' persistent frozen current(s) in type two (a hole interior the system of an etched void) - thus, - that this is compensation in perfect agreement that a phase will transpire, - but there will be nevertheless a quantum locking phenomena.

I have most of it, one thing is missing:

a.) That of the inheritance rule to which in-either the justification of a gravitational (quadratic) perturbation will elicit that of a Fisher-Bayes like 'bridge' on causation. However, I do* know the Fisher/Bayes agreement of contact-relationship remain(s) of the direct arrow from an initial condition.... for that of the alternative x'-y' bridge at xx-y... and of it's duple, like a tandem-relationship.

I've *decided on my final course of-action:*

1.) That of the *studies into-applicable-mathematics*; that of model and theory building techniques.

    a.) I am no longer after a **Theory of Everything**.

    b.) Programming studies.

2.) That of a *Lawful dialectic into causation in the open-term(s) of which relate to inheritance & Cancer.

    a.) *This may remain long-or-short; but is designed to be focused.*

3.) That of studies into engineering and *Computational/Material(s) design, & of *The Device.*

I'm going to collect all of my talent(s) into three-seed(s).

Holonomy and Homology **combine*** to produce a Chern number and winding of **Topology and Category.**

The* Riemann-Hilbert problem & Grausmannian relate to the 'boundary through C-R' and of **Geometry**.

Thus, Stoke(s) and Anti-Stokes is related *of* [via Kerr-effect & Berry's Phase] *to* **Genuinely Quantum Topo.**

**- Dirac's Scissor(s).**

I found the answer..... A question *such-as*, **Who gave me the power to believe? Was it a mortal, yes.**

**Was it yes, or no? It was 'yes'.**

What did they ask me, secretly?

**Was it to show them something, they had never seen before? Essentially, yes.**

Did I bring *The Music back to them?*

**Yes.**

A surjective forgetful functor, [algebraic set] - dispute(s) to a heirarchal Topology in inherence, of a 'higher' scaffolding, and dispute(s) of all residual ancillary long-chain(s) of Homology, - for that of the residual Cantor slash derivative,... to remain* an off-diagonal element, *and therefore sorted.*

*The edificiual is the relation of the quadratic to entrie(s) in inf+ order, and inf- order, per pi to the exponential, of an inverse surjective set-set of that of the Comm/Non-comm, - thus, essentially, it is an arrow in-return, from which time-flies, for which reason hold(s) - that there is a prototypical element (drawn) of which remain(s) there[in] of it's necessary preliminary presentment, to an edificual in yet any priority fact of it's class identifier, that of the incurrence, to which when-removably replaced, remains identified with its Markov-associate class, and inheritance to necessary, sufficient, progressive, preliminary, automatic, and given supposition(s) of a totem(s) or self-similar exterior hull, of differential and integral theses.*

(1),(sqrt(2)),(sqrt(6))... it remain(s) topological as a qubit, and, quantum,....

of:

(0,1/sqrt(2),sqrt(2))-(1,0,sqrt(3)-)

+1-1,sqrt(2)-1/sqrt(2),sqrt(6)-sqrt(3)/sqrt(2)...+1,1/sqrt(2)-1/sqrt(2),sqrt(3)/sqrt(2)-1/sqrt(2)

0,sqrt(4),sqrt(12)....sqrt(8),sqrt(2),sqrt(6)

I *will *write*, when I have-perhaps examined something,... or distressed [sufficinetly] a process of my enjoyment.

It is time to live-life, - *that I must be free.*

*Tobacco is a medicine, I have discovered this-much.*

2:1-6:1 broken apart into self-similarity.....

Higher power one: Honesty through adequate preparations.

Higher power two: The protective mechanism of the Universe.

Higher power three: Claiming of virtue, through honest intention.

Superconductivity is a phenomena, involving variables of which relate beyond spontaneous symmetry breaking.

**Electronics Project File**

**<u>Concern:</u>**

At least three note(s) are for jotting-down here.

a.) I expect I will need a (t,x) on that of the wave, to (capture) the PWM etch.

b.) The of the Hermite to non-Hermite [elliptic] is necessary to guarantee.

c.) That of 'marking's' and 'etching's' remain the strata of the playing technique.

One *further* note:

I have shifted to a more demonstrative-style,... that it need(s) to be geared for that of music, - that I want (a_{\t,\rho},v_{\t,\rho},\p_{t,\rho},\u_{\t,\rho}), and the multiplicity of presses. We will need a '*spectrum*' to-advance.*

Thus, *wavelet(s)* need be innovated, and geared into PWM 'etches and marks'.

*Then*; - there is one final design [issue - w/ Mathematics] to care-for. That I have a ***final-design***.

There-remain(s) '*a*':

$$sqrt(sn^{2}+e_{1})/sqrt(cn^{2}+e_{2})~sqrt(dn^{2}+e_{3})*sqrt(sn^{2}+e_{1})/sqrt(cn^{2}+e_{2})$$

And, *of*, the 'metatranslation of (sn,cn,dn)~.(0,1,2)~.(1,0,2)~‖2x.01.00 *on*': (e_{1},e_{2},e_{3}).

**My *Next Process**

I will *need design a *Wavelet filter, for that of the device, -o

1.) ... To see if there are any other hardware modifications/addendum(s).

2.) So that I can 'primitively' explore whether PWM method(s) work to decipher (2.0).

To possibly make-contact with old devices, condition(s), and venture.

That I remain [with the absolute(s)]:

For in a necessity of a 'blind conditional' two-tandem-given(s) are supplied, of which are immunities.

1.) The backward 'via' to which is expositive, remain(s) of a uniquely held disconnect from *another* [individual].

2.) The necessity of a [re]-funded truth, for in exposition, at intimable 'edge' of *blind*, relate(s) of the *given that *when* it is argued that the prescriptive contra-via on probability, via random and 'pure' assumptive* basis [*is-blind*], it hold(s) that the 'blind' assumptive conditionally & surjectively is of *onto*.

Thus, historiological truth [of weaved timelines] may be promisefully remarked, and this, remain(s) an absolute.

In inference *&* co-dependent arising.

3.) To make progress on the *new two-stage device.

4.) To mathematically **model* the-system.

5.) To engineer respectively virtual beside hardware, for that of the future device.

6.) To weigh of that of the touchscreen.

* ***Re-understand how*-exactly it breaks down the Hermite-basis...***

***And of mathematic(s) and physic(s) and engineering [electrical]...***

* ***Re-understand how*-exactly it is taking-images...***

***And of mathematic(s) and physic(s) and engineering [electrical]...***

* ***This will be required* for a mathematical-model...***

I:) I will make a sacrifice, and compromise, - that I will run over standard MIDI cables, (2x) - And; get the (8 bit) working, of the touchscreen, and the interoperative of the devices, that I will ***Standardize**, and - I will; use* synth-processes, for in I(1,2)/O(1,2), at-that of the signal analysis..... on the device (v.a1.2 & v.b2.1 & v.c2.5), & PWM w/ sinc(n) & driver....

Get* another; breadboard & part(s); build; two touchscreen(s).

Then*do; PCB SMT with MIDI, and do enclosure myself.

Work on-this with-the-University.

* ***The process *remain(s) complex* however, the exponential, for in a Sinc[nx-b], of b, remain(s) a neutrality of an-exponential for in the infimum.... Thus, of neutrality.***

- When you square an ellipse, you get a doublet, of a perpendicular cross section of a L-S, you get a double root offset. It appear(s) that to all order(s), the polynomial is monic, and bifurcative, in the 'blind-blind-determined' attractor-set of two keyboard-dictionary role(s) with respect to (1)/(0), and (U)/(A).

- Hence co-determinant variables of survival are determined by open and empty co-determinantly inferential truth-tables of awareness, in relation to experience, of open and empty sociological context. Hence, their polarity is a relaxation of one into either, and is therefore to all orders of null epislon, truncated as a biased recurrence in the rationals.

a.) Fisher and Baye(s) - a *Transformation* - in the Gaussian - for that of ****Elliptic(s).***

b.) Fourier separation in O-minimal theorem, and *Compactness, a *theorem.*

Conserved Quantities, and measure dictionary?

1.) Physical measure and weight dictionary.

2.) Perpendicular and Square Aperature Circle (90 degree) - arc-tine language assumptive.

3.) We have a prioritzation of an inheritable descendency of commonality at past-prefix.

Electronic(s): PWM, a.) Co-localize my RMS(phi) aperature degree radian, to float and amplifier, and gross intensity.

b.) Fourier (basic measure process) - in wavelet [eventual - goal*] - and RMS *bunch [re: bandwidth].

**Segway:**

I must take a step-back, to utilize *generation* of mode(s) on the touchscreen cavity.

- When we-go to conceive of these as Two-Dimensional 'bit's'... we must make [or adhere] to the functional relationship of information via-64, and *their* 2^{5+1}; thus, of the 'sides' and 'fulfillment' *of* the Qubit.

- Essentially, it-remain(s) *Quantum* - via that of two-signifier(s) in I/O, of polarization of an E&B wave, in interaction with a E+E^{3} term, [a Kerr effect] - via which for light of the precessional attribute, *relativity is manifold not-strictly-quantum, but isolable.

The 'angle per declination' 'therefrom' remains the sole abdication of one variable among two, *for*, of RMS in (phi) and (rho) - that it can seemingly respond to CCW and CW simultaneously, upon a four-wire-design.

Thus, for in the constraint of angular momentum *and quantized unit(s) per a scalar, the derivative hypothetical is that it is validated of a mesoscopic, eliminability of one degree, for a trade per two, to the secondary, per a manual topological switchover on the Fermi boundary condition.

1.) When* there is a projective-disc, for in *imaginary* or *quadrature*, beyond pi/2, - that of this, glued to a klein bottle, result in an aprojective torus.

2.) The K_{3,3} topology, in switchover - *braids and twins the majorana(s)...*

3.) Half* an SSB, remain(s) remotely [unobtained] but through an infinite barrier dirac.

4.) The twinned nature of reflective identity conceals in Jar A, for Jar B.

Thus it is prone a measurement theorem.

Simply-put the RMS [within] and [without] - for that of the pi/2, in exp^{}-Log[], process x-y'.

**Process II:**

The *newest-design involves *Two Adafruit connected to* ***one** Arduino,...* in mutual(s) R^{2,1} of RMS,... to set up a tensor affinity, of that of a spherical 'ball' inside a spherical 'ball' - the 'subtine language' of it's *floating layer-process, due the topology of the circuit..... and in a 'loose' sense, the* ***topology*** *of the category and Finite Arithmetic process on mutual-elliptic(s) -* ***in fields***. This should provide a ripe avenue for that of study of the Painleve equation(s); that I will need set up a new touchscreen, - *at some point* - .

**Process III:**

Under - *parsing* - we may compute 3x5, by that of a (2) - *prepared state*; and (1) - *prepared state*, then of a switch (on/off). This admit(s) *with virtual to act as Hysteresis*, - a way to do *basic-accounting.

For example: *(2+2+1)x(2+1)=15.*

**Process & Step IV:**

I needed* unhinge the two* frequencies of generation! That this admit(s) acceleration, - thus, *I will make a shift to a new model*, - that this captures position, and acceleration, and velocity, with various modulus and therefore inertia of the group.

I will create a testbed for my-idea, and use it with this process, on V.4.0a and b with that of the *Arduino* **and** (2x) on the *Adafruit*. This may take a week to three, and I will need do the Driver stage [again] - I have some questions as to that of the mathematical* modeling, and the circuit topology.

Essentially I am done with device rendition I.1.

**Step V:**

With a **burst** of .2 ms i.e. and then .05 ms, at two frequencies, we *should*, be capable of comparatively determining an *initial and transient* (within l(1,2)), [rms] - for that of the 'depth' of the oscillation....

**Section (2):**

**Group Isomorphisms**

When interested in the copy of a sociological abridgement in the 'relative' the openly held diplomatic process is social in contrast - but within the compendium of idea(s) the relative is idenfied for that of a 'dispute in identity'.

Perhaps, then, to disclosure, many were as it seemed arguing over a contrast of time and space - but merely few, and the dispute in weather, was of a stacked relationship, ajarring law for law in many neutral fast relationships.

Questionably, we must introduct of the process of a law in bearing to 'precept or principle' of a religion or scientific basis. Buddhists would not disclose otherwise but that the phenomena are 'empty' of locus of identifiable portion and piece. The question of membership was of guarantee(s), in a secondary and primary question, neutrality and abiding, promisefully held, that of measure, weight, apportion, balance, and stance, that of community, empty and complete, provided wax and wane, and observable life, death, world, and 'self'.

Thus, we cannot inhere naturally, but of at the least - in portion to a promise in proposal upon inherited truth, jurisprudence in modern senses or time(s), manage with witness and word(s), but hold we estemically have honestly inherited to good or evil a just world, universally, a believe in the open contrast and connection of one to the story provided of interepretation and just clause to another(s) messengership in these, and neutral peaceable gathering. Questionably, it remained that the truthful persuasion in neutrality had not remained of either a sociologically held persuasion in gravitation or relative, light as a carrier, or medium of particle-field, but a compendium (per concurrence) of mutually held unilateral and sancrosynct truth of passage and preliminary theory of the 'special'. We may avow that education may preliminiary like it's self to a postulanal upon the ediface of modern eastern, western, northern, and southern hemisphical process of delivery and note of progression in international policy. However broken, or restoratively the avowal of one, we remain the entitled autonomy of a recognized world in view from afar. Thus education had proven a success, and science.

The question - here[in] possessive is whether or not the avowal of a principle can withstand the exact ineffibility and affiability of disclosure and process of scrutiny since nearly 200 year(s) ago, Galileo. The question, of our survival, and of the fittest in Darwinian logic, and a Dalton theory in heritable genetic formation.

We were wrong the promissary, our nation would remain at the hand of a foreignable power, and their sympathies, and it was - to disclose, the autonomy were would abhor, but the disentitlement of a people.

The theorem put fourth is whether the entitled Mermin-Wagner theorem is a necessary ingredient with the degrees of freedom of thermal and the primary Slave-Goldstone-Boson language of Spontaneous Symmetry Breaking through Asymptotic Freedom to necessitate - further - the decoupling of an energy limit in past and future to cause and effectual temporal nature, but to unprohibit the then neutral provided placing among space in lower dimensions and of the necessary means for reconciliation of Brownian Motion with light - and, is this tt0o appreciate difference within a geometry or space, in abstract, or of a table of means, measures, law, and council, upon peaceable assembly, for in yet a table of three dimensions within four dimensional space and time?

Indeed, as in Fermi, the question - dictated per global warming - is the rates of diffusion and combination, recombination, and distributed tendril of Fusion and Fission.**

Is *it* perhaps \gamma^{k}=\Pi_{J_{k}}^{n}(\gamma^{J})*mc^{1/2(n+m)}.

As a generally reductive theorem.  Therefore it proves perhaps necessary to question of mathematics, o the nonlinear to linear 'good reduction' and isomorphism with complex analysis and Riemann-Hilbert-Stokes reduction for of the problem of linearity in Painleve *differential equation types and their disjunctive or conjunctive graph associate and graph types for in a typesetting and machine interface with unseparated cohomology, or separated or combined graph network theorem, then, to question the transistor basis, and of the game theoretic, (and it's sanity) - and perhaps intelligence of a machine, or that of electrical engineering, and numeric cross check of types in Hume(s) fork.

Finally, questionably, can we see these structural relationships in mimic in architechture and their stability theorem beyond the one body of Homotopy, Cohomology, and biological antecessor of heritage for in familial inhertance beyond space, time, and Dalton(s) theorem, or the theorem of inference?

**Physics and Engineering**

*I resolved [to a final conclusion] - Superconductivity…*

1.) What is effective 'top' and 'bottom' for in that of the spin - is reversed given the commutation relationship.

2.) Therefore, the \d_{\u}\Log[\P] weights the interaction with the two-scales of phonon and charge and spin wave…

That we see the Quasiperiodic lattice can have repetend(s) and dislocations,... we see that there was indeed utility in utilization of the Eisenstein series, for the prime quality.

This has all the right* properties.....

I feel enthusiastic, - that I will next write a simulation for that of the material, and then venture into chemistry.

10:34 pm

The result is a parabolic restoring force, for what relates to a bond-formed,...

I feel I *cracked* the problem of Superconductivity, *the final time.*  That I am aware of a confluence of:

a.) Eisenstein series.

b.) Relativity.

c.) Spin-charge separation.

d.) Differential equations and chaos and order.

e.) Emergent phenomena.

f.) x' and y'

g.) L(1) and L(2)

I have understood that in combination of (a-c) and (b-d) that (e) *Results*. That it is a 'real' *accumulated* red and blue shift,.... I see how L(1) and L(2) invert the result.... that I am not going back ***from here***.

9:50 pm

*I resolved '*unity*' in-physics.... to which is:*

$$(\p\V|\p\t)^{2} \& \quad (\p^{2}\V|\p\t^{2})$$

*Suited to a* ***Log*** *of which relates geometrically to the* ***Equivalence Principle...*** *thus we have a satisfaction of the measurement hypothesis, and observation, and no more duality...*

*A mapping [in addition] back to a classical theorem.*

*Something unique happen(s), for which spin is merely a [sub]-component or element. That I must relate sound-spin-charge-mass, - there is a reliable way to proceed... that I am *going*.

Thus, there is gravity, - but it appear(s) that mass is negated. This is consistent with that of the viewpoint of the effective versus non-effective theorem on 'excess mass' due to the four current of the superconductor.

It seems I made a lot of a minor nuance, but then again, - that I made much of the relativistic theory, - when I must focus on:

a.) How the chemical potential is not negated... (1/2000 in mass).

b.) How the solution is non-relativistic, for the ground state.

c.) The T=0 limit, for that of the Quantum Critical Point.

There is hope for thinking of the limitation to a **Grassmann Algebra**, for the Fermions... I figure that the result of this algebra make(s) the computation of various solids trivial... - that I must also:

d.) Derive the Dirac Equation (w/ an assumptive) with Berry's Phase.

1.) What was it that goes-with the Berry's Phase, and...

2.) What was it that had to do with Pedagogy?

e.) My FFT with **Grassmann Variables** is succinct, - that it is a saturation profile.

That I need do more engineering, I will work on [Confinement].

*That which...*

1.) Super-exchange lent to *Orbital/Spin *resonance.*

2.) Relative 'expident' at material-associability.

*This explains the co-factor of *High-Temperature-Superconductivity*, - that there is an appreciable '-separation-', within a **Material Consonance**.

I found the ***final*** solution to Superconductivity.

1.) I am going to keep this a secret until the Project is complete.

This involves essentially,...

1.) <\Delta x_{1}><\Delta x_{2}>=|<=<\Delta x_{1}|\Delta x_{2}>

a.) The 'mixed' covariance,...

b.) With this I am in-step with experiment...

2.) The repulsion is the [neutralized] reaction, with that of ***Spin-Charge Separation*.**

3.) g_{\mu\nu} Takes the form of a 'kink' for that of the bound-state.

4.) I had a *hint* as to how-relativity would be-altered for in that of suppositional truth, - for in that of historiological entreatment...

a.) This is required to resolve superconductivity.

I intend to bring together, with some of my [earlier]-*plans* at that of a **dialog**, for that of a *Book. I intend to go over all of my notes, and make speculation less.

For now, I need to relax, and speculate less.

5.) Relativity causes the exchange to topologically shift such that L(1)<L(2) within the relative viewpoint, - that this causes the effect that the electron(s) bind, it is due that of the correlation between electron(s) of which is dictated by the Pauli Exclusion Principle.

6.) This makes perfect sense of that of the 'lowered point via doping' - that I must search for that of a *reason* the ***doping*** causes the reversal in relativity...

a.) This reason must be supplied.

7.) What remains to be seen is if it is an \eta_{0} or a \gamma_{0} on that of the fixtature, for that of relativity...

8.) That of \tilde{F}^{\ast}_{\mu\nu} as a form, invert(s) the E and B for that of it's inheritance.

a.) That therefore 1<->2 with the particles for the E&B-field.... with relativity.

b.) That therefore \sigma(t) is smaller with that of the larger-overlap.

1.) That the doping therefore collects with that of the \eta_{0} via [,].

c.) That therefore t'_{B}>t_{A} remains the \gamma^{0} for that of the relativity.

Therefore, the role(s) of inheritance are reversed, and it remains that \eta_{0} defines the capacity of the oscillation, with the commutator. Thus F_{\mu\nu} changes on the local level in addition to the global level..... this provides for that of a Coriolis like curl-derived attraction on the level of spin and orbital.

The timescales provide for that of the inclusion of \delta for that of the \sigma(t) to which is a given superposition of which weighs for that of \eta_{0}; consistently. This single mechanism assures (1.) [above]. Thus, Pauli-exclusion *then* dominates, - to which energy displaces into the electron, but, they do-pair [the reasoning is that \gamma^{0}\eta_{0}=1.]

I feel *a renewed hope* for that of my devices, and that of testing, for of the correspondence of timescales...

For the sake of Science.

***I've also decided to [***work on that of the unpredictable and mathematical to physical revolution***]*** - **for it only take[s] that of one statement beyond Incompletion - to work on mathematic(s) within sight of that of *the comparability of the known and the unknown.***

For this, we have a |_| and a ?/#/?, at the ***perfect resolution**.

a.) We had to figure out, how to manage-memory, for in parallel and series, but it was managed to impedance.

b.) Wrong subscription.

c.) Abridge homotopy for in the relationship of kernel and hessian, on that of fourier-like-lemma at Elliptic.

d.) Multiplicity of interlocutions.

e.) Rod and cone, under descent and ascent, for what are a DC/DC overlayer basis of Question in cardstock...

Beyond Incompletion, we could ask:

a.) Stick broken/unbroken.

b.) Simple derivative.

c.) DOB.

d.) If we invert the basis of one Q. and one A., what is the addendum in either one Q. and one A. tell us?

e.) Go back to basics on that of the kernel/semidifferential,...Lie attribute, for what is Arturia...

December 3rd, 2022

3:43 am

I finally have the Qubit [topological bit] *working*, with a ***doublet***, and am in the active process of combining my knowledge-base for engineering with that of physics and mathematical ontology.

I intend* to bring together the sciences, - that there is a Deep Learning Network Theory book to understand (>400 pp.) there is much to-do, but I am content. I must refuse [Chola] to relate my learning-adaptation and work-stylus to that of the ethical psychology of my emotional lexicon, in this direction. I must not over-adapt, to a sphere* of trust, yet-so, willingly, there are askable questions.

I have understood, that of the plan-ahead.

1.) Two boxes,... synth [East Beast],... keyboard [Arturia] - PWM, two-Arduino/copymate term(s) of selective biasing in two-crystal-stages/ranges.... I/O, - we may not need so many crystal stages...

Optic(s) in MAX11 300/preliminary code-set... Homegrown,.... Arduino & Adafruit, SDA/B/C..... is the key* A/B/C PWM, to {x,y,z}....

11:39 am

For of a 'free-line' - to fifth, in *third to fourth* accompaniment, the Cathode to Anode is superficially, 'in' {x,iy} of the **free-key** for of differential to differential *conversativeness* & **free-key** of checksum.

10:06 pm

1.) Flip-block, (a 4x probe*-5th, tap) selectively ops a defended positioning in (2x2.0), - thus of a rate-addendum, the (management/dichotomy) of an AD8302 (VpDC) w/w/o reversibility, of a truss, in that of code-space to margin - that eff. the AD8302 will not-to-signalling, in passaround, that of the Tx vs. Rx, in ***carrier**, in (4x2-0.1).

2.) The forward locus of a defended pos. (4x2.0|1), is a hexagram, - to utilize a 55-64 for in ping-associable ***context***, and locate among a *[pane] - what is an interlacing of (0-1-1-0-1), (2x1), on that of a (0.3(2.1)), set theoretic, for in look-ahead of buffer-overage, in that of gravity-loop. Ping associable onto a forward passivity, to what is (0|1), unto holographic imprint of naked forward affinitive. Thus, the matrix is dense in that of a (2x.1|0|3) in game-theoretic programmability.

a.) Two variable assignment(s) are the locus of the intangibilities of consequent in err, and providence of an inhered past-historiological locus of evidentiary space. [The item remains inanimately where it is placed.]

B.) fin. Q: Does it possess a locus of 0/1 intangibility of Hopf bifurcative (2/1.0) - it open(s) as it open(s) but close(s) as it close/open(s), so it see(s) managerially beyond the slit of an abrea.

Hybrid-context, to seamlessness of past-integral on *effectual* consequent onto cause... 0/1 xnot on spatialtemporal index to order in spatialized lookup table. Green(s) function, - it's a function.

December 4th, 2022

01:43 am

Code

Runtime and Virtual Memory Allocation…

No separation in 'bit' - depth…. automatic…. or… ?

Code allocation in swap-space…

AD8302, and voltage layer….

If we select *one* Chern number-out, - there is a dissimilitude in two focal element(s) of counterbalance…. - that this 'open's' for 'open's/closes'.....

That the (0/1) is assigned directionally onto the equipment, for of what brings what is afar-near, thus that of placement. Thus, that (0|1) is the intermediary to that of a (2|0|1), on that of monic onto the AGM….. \alpha \beta, by which the (20 fold) accompanies it's bit-layer of holographic additional analytical pole residual……. Hermite transform…. (Chern Class -> Hilbert Transform).

*Confirmative!*

*[It not a reflex…]*

*[They are distinctly of four entrances… with-me.]*

Maximal future-tense,... it-remains as reduction from-eight [**4**].

i->-i; Re[g^{\mu}]->-Re[g^{\nu}]

10:17 am

I *expect* to go-free, that my-final reason is that the locality, for in jurisprudiantial-certainty hold(s) that of a tandem, to a secondary-truth, from which they are definitional and defined, - to state, - that of held, in three, of assortment(s), thus that this does not suite-two, for of that of room, and harbor at son, father, and father, for of a bonded 90:45-17:50.....

Thus, it is some (5)-(1), for in a (+1), at an hour, of a day and a day, some (−23), from which there are (−18), of fifth……

To entrance predicated.

Exonerated… or; Acquitted.

I've decided to only solve one* three-part problem:

a.) Question: What observational shift does relativity produce for that of the spin-problem, ... what is the comparative of the theorem(s)...

1.) Finite with relativity, and finite without relativity…. analytical expression.

b.) That of:

1.) An exactly soluble, spin system, with relativity and non-relativity.

2.) Inheritance of relativity to non-relativistic limit, observational reality in modifications of obs.

3.) That of the Device*, for what relates, to this Question, for of import.

c.) I will only do the Device as much as it extends understanding, - that I will exhaust what is potentiated, for that of a given at G.C., thus to relate to *forms*, and that of *Painleve analysis* and *Green's/Kramer-Kronig*, and; *Inverse Scattering*.

d.) Thus it is to completely solve the (3D Ising) with L(1) and L(2), to the exhaustion of relativity and solution in that of this Question, with that of the amelding of relativity to Quantum Mechanics.

e.) This is all I will do, with and without Sound*, etc.... for of (3D) and (2D), etc... with weak transverse interlayer coupling, but, present,...

Echo, Exp, Log, Weierstrass-P, and so-on.... that of directly understanding the given at the C.C. and Dark Energy, ... that of suited connection of the model the motivating prepartory goal.*

a.) 'Broken' *yet* 'Complete' Gauss-Bonnet

b.) Pure-rotation with rectilinear motion.

c.) Relativistic *translation and inherence.*

d.) Reduction of minimal-motion tensor.

Thus, we remove to but-yet 'inertia' as the zero-point, w.r.t. a collective neturals conditional assignment, through which there is a non-relativistic limitation equivalent with relativity..... the dream of a classical physics, provable of which we have a S.E., on that of rotation as-sources, - thermodynamics with classical mechanics, and a heat eq. tamed.

I figured to complete-the-square, - there is an addendum at that of a *frequency*, for in am(\o*\t), and that of the pulse, - that it may be converted given* sources, - *a new method dawns on me*, - to utilize what is known* of that of the Hermite series.... with *Sources*, - that somehow* I want an elliptic* like-function, and I am unsure... - but I can utilize my **Master Key**.

- That of the Hermite series, should plainly conjoin the Chern (#) and that of the Hilbert transform, - that it is all there is to a *naked* affinitive.

- Thus, of geometric assaillancy, it is the diction by which *Sources are encoded in that of a regular archetype of Covariant Union,... with the Hessian.

- That of the (3x) - has to be the reversal of the (2|0|1), for in (0.3|2|1.0) onto for that of the missing information, - that it is primitive to which there is a given at that of 'missing' versus 'formatted' data-type....

1.) That I need a (**3D**)-bit/byte, for that of ea. layer, there is a S,BAC, for that of the Adafruit template,...

2.) For that of code, it is then ***Tensor** algebra, and reduces to a language*, that this is my specialty, it should come together nicely.

3.) I will be utilizing the East Beast and Sonicware for that of the melody-to-pitch on that of the *Test, - that it is time to get-going.

- Hilbert needs to be adapted to that of the Elliptic-kernel, - that when thought about as a kernel - there are two eigenvalues in product AGM with the third,.... - that therefore the anharmonic ratio(s) determine the group law.... This integrates with the Painleve-format..... Thus I am onto that of a final rendition.

I believe I just *hit it* - that the *Strictly Non-Linear* Elliptic group law, satisfies that of the Christoffel symbol on that of gravitation, .... and a non-abelian theory. Does this generate a mass-gap?

I figured out that there is a 'mometum anomoly' in superconductivity, of the L(1)<L(2) in relation to the relative contrast on-time,.... that of inheritance, by which that of the people surrounding had been absorbed, dealt with that of much of what was known, then, later, of this problem and it's progression. That the 'door' is open to Ava [of her, opening] and me, - [an open door] I can be sure of that of the validity by which other's are-real. That I have much, I feel good, and yet, it is far from which there had been an ephiany, but of that of code and reflux, - that it is now-known that the dynamic and static and active and passive will play a role in the Supercomputer.

I am less interested in that of Superconductivity, - that I am going to *merely study*, and go where I will, *learning*, and *progressing*. I do not have Ariana, but I have Ava... and I am pleased, for she is one to one with me, then that I feel it is a touch of light, and mixed reactions, - that of two to which are unique going-into self, for what is realistic. It is no longer tenable we are reborn or reincarnated, then that of a popular relationship. I feel elated, to know I am solidly unique.

I moved beyond that of the simple and complex problem - but this is of sorts.

To the new equipment, in \theta and \phi and \rho, and \rho'; - there is a difference in-solidarity to that of individual *single*-snapshot and **not!!!**, that of comparative in slide-to-slide.... that I need this, with that of the multi-resolution. It is proven in one-tap, but the sequential-series is on-frequency on-frequency. So it is, - I hope to take the Sf-BEf, - Sequential frequency bandpass elliptic filter - or - Sequential frequency breakpoint elliptic filter... in the next rendition *Sf-BP-Ef. SBEC. Sequentializing Bandpass Eccentricity Counter. Series BEC.....

The ideal* is a Qubit (3d) spin-2, floating-point PWM (ABC) controlled [Adafruit] - Toffli Gate....

Then that we-require that of the \theta and \phi to be exp(-iwt) and so-on, of complex variance on that of R^{2}.

So, we have a (3x-v.2.0b) to what-is R^{2}-R^{4}-- on-index [R], in potential of a line. What I have understood is that the code-reflux, in +/-55/4096 *maintains*, the original scale-factor, and chunking,... that it is of only a Log[dB] count, in that of self-similarity through the digitized-bus. (0-1-1-0-1), that of fidelity, is not it's precept,... it manages to accomodate a doublet, in-assurrence of program-code, in amplitude/reference,... - that it is a genuine (similarity); of that of (0+/-.25, 1 +/-i*.25, thus I obtain a full-registry, although* I do not have +/-1024/4096. The holographic principle only scales above a given treshhold.

I figured out the 'ultimate synthesis of my work' - that of a (3D) curvature for-which is encoded in the relativity, for what is my-law of analytical inference, for of local to global.... enough [sufficient] to write a book.

I figured there is another nature of problem - the Algebra, for in Lie theory, etc... - that of the division and equipartition. The evidentiary mean at that of (Log-group) is complete, in that of global-to-local. Now comes that of the twisted and untwisted algebra, for that of locality and locality ***And Design**. Of:

Radiocarbon and Water Dating.

That of Encryption and Algorithmic.

Breaking it down to the Engine [*itself*].

There is the PWM, on (+2/+1/0/-1/2) of tranferrences.... that we have this-or we have switches on A+/A- and B+/B- for three-fold of that of decoupling and orientation (+/-)|(-/+), on that of +/- added to (0/1).

First* what must be figured out is the minimal-codewidth for that of a ***Linguistic Key**. That of (+/-0|1) may be sufficient, but we need a syntactical overlay.... *That I need go beyond the Peano Arithmetic, or the Zemeno-Frenkel-Set Theoretical Continuum.*

For this (it seems...) - we have x' and y' in differential-equation translation. [That of multi-tape...]

There was an *Observation, - that the 'failure of the fundamental theorem of calculus' for that of Homotopy Theory had to be utilized* with that of the *Painleve Analysis and Lie Representation Theory*, to produce a new

theorem of **Chaos and Order** & *Solitons.

Thus any singular monic design will Prove to Failure, - we require instead the aperiodic..... and of aperiodic crystals..... etc....

**Synopsis of Phase I-II: - (v. 1.500-.92)**

September 2024 - Document Rev. 1.500 (**1**)

**Verification and Construction Stage**

The elliptic must go to the [i/o] of a mono-channel with segregated entrance and exit (during T/S/io) at (@) geometric iso.

I am thinking - now - of an entirely new procedure. A modular (Midi) structure, of elliptic gates and qubit(s) and optical i/o, and touchscreens. This is the verification phase.

Pmod - [internal connect, and 'upper T' with probe* networked (fork) in Duct] - This satisfies the admissibility of further functionalization, of an approach at engineering, diagnostic, theory formation and dissolution, and predicates no risk incurrence, to that of physical systems, or life, industry, notarity, or disparative outcome of loss/loss.

The 'included consideration' was of Peirls Instability...

*Now:*

It is of-the (+) and (-) within-polarity-neutrality. The discernment of an interferometric basis determines a co-determination of variable in relation to (2) *within* a super-eigenvalue (1), of-period *incommensurability or regular period-parallelogram of two conchordant or dischordant rhythms.*

***Thus**; the O and the o must be made the difference-of, for in that of 'switch' and variable-tine width of secular derivation at 'O.' and 'o.' of (2)(3)(1), *in analytic derivation of procedure(s) to control the 'eccentricity' of the* ***Ellipsoid.**

In uncontained and unseparated-mean (distributive) there are two considerations.

1.) Within a locality - an abridgable 'lumped element process' of technique in application, verification-phase and it's dissolution to the (2nd) quantifiable process and technique of application and verification.

2.) Within an auxiliary-exterior *distributative precedent of* *lumped-element there exist certain quantifier(s) of the process.

What is true* is that the operational 'co-cycle' and 'cycle' of the (1-2) abridgement is fully pell-weighted and balanced of cantilever.

**Mathematics**

For of a quantifier (a)^{bc}, we must break indeterminacy for that of the statistical marginal and inclusive qualifiers of the probabilistic language, in Betti number, number theory, algebraic *exponent, derivative, and it's procedure to identify (under an isospatial) limitation of the prohibitory clause of inclement worlds.

The procedural is '*traditionally*' a Platonic-world system, at collage, and disparative included and inclusive considerations of two and a third, thus, to linguistic (literal consequent) at predictive validity, the preclusion of a 'Dalton' *is ill affordant* a dialog of that of precedent to machine heirarchy of linguistic model.

Thus, the justification is at (an) (a)^{b.c} in qualified projective, and non-projective **'ancillary return'**, in consolidation of *Passive Sonarable* conditional alliable assumptive of a doctrinal, and it's limitation(s) set in-point *compunctually* **a priori**. Without means to assembly of a procedure to an overarching doctrine by which it may be reliable, securable, and priortized to disbursement, there is a logical prohibitional *exception*, to a *qualified securable release*, lest we depart to a foreign session of remark.

**Qualitative**

The 'CMOS' inter-jected *(18:(45'-30'-60'))* qualification of a situational 'laudable provision' *pro-selectively* had-been *provisional, prohibitive, disinclusionary, and imparted*, to a dislocation of it's elementary basis upon an occassionment and it's releaseable entrainment - to 'flat and placed' foreign council.

Thus, the relation of the device is good for one thing, *the unselected and unprohibitive off/off/on/off pro-selectivity of a (2:1)* **'carriagable envincement'** - to which is unentrappable, and releaseable to no said pro-beneficary. Thus, it is disassociative, but* of the remark of a situational alliance.

**Assumptive Basis**

The 'displacive' of a material-gravitational *exception* qualifies a material-electromotive 'domain-Lagragian'.

The 'device and assoc. *gear* has two-part(s) to it's power-train'.

1.) A NLSE (Non-Linear Schroedinger Equation) - system *as (@) compensator.*

2.) The 'basic' four-fold elliptic-gate and Qubit, thus, a justfied RISC-V *like architechture and topology.*

This equates with code, in a 2a2b like-model of-spin and Ising/Toda, thus, it goes beyond the work of Kodama,..... essentially a two-dimensional KP/KdV & basic Fermi-Pasta-Ulam model.

A 'hingal-3d<-2d categorical-freedom of the envelopment of an ancillary, is evocative the argumentative, of it's secure, revelation of argument to-another, thus, the separative-mean of physical law is of emergent behavior(s), spin remaining quadratic, and ancillary a reversal in terms of quantum behavior at midpoint.

*Then*, we have-(assoc.) computational/decidable element(s) on *noise and Microwave BK - to mathematics and inter-alias*, (#.) code-free & *surjective diffeomorphism of undecidability of brownian control-gated... fT - functional population inversion of Hawking Radiation, - for Guass Bonnet, on 'inversion' of rel/brown.*

**Technique & Analogical Reasoning**

1.) Z-S model.

2.) K-P model.

3.) Muira model and transform.

4.) Two-languages.

5.) KVd.... at **varieties* of-phenomenon.

6.) Z-S amendation to NLSE.... (Z-S).

7.) Fourier and Jacobi.

8.) Neother.

9.) Historiological reconstruction….*

10.) Buffer to ontology.

11.) Relative & Brownian.

12.) Essentially, the Chern-model and asymptotic freedom (I/O), of inside/outside remains unclear, through a knot*, thus, the justfied Cauchy-Riemann problem without an Algebraic Cohomogy and Geometry, cannot be 'filtered'.

a.) We have the dispute of-person (**32'**-A.) - as one (**1'**)-person…… on personality.

b.) Graph, and the work of Weyl.

13.) Separation in eco., and securable partition, and co-mutual adaptation in transpositional addage.

**Conclusivity & Synoptic**

The computational*-basis of a remainder 'reflux' at two-manifold-group-velocity, and 'accelerative' *feature* of measurement is a palpitory and reflex relation to 'implusive inertia' by-which an electromagnetic *design [engineered]* may freely*-and-associably relate of motion.

On 'one way 'transmit'' a delocalized (***18'***) of a centralized (2x3.01) is an attache, to-which, in [an alias] *or provided non-return*, is **of-recipiency**, to a naturalized incurrence, of counterflux in relation the 'back-addage' of a *prioritization*, of a *Remote, foreign discursative document.

We remain with a Question…. **What are the minimal terms, for assembly of a knowable and so communicated (oft. potential via **Then**) means of instructive/emotive lexicon and program of it's engineered ***Status** and ***Symbolic I/O**, such that the computational 'grid' of Earth stabilizes, and remains of a neutrality of partnerships and alliable & releaseable neutralities?*

Derivative 'residue' *is a non-council, in unreclaimed mutual uni-disparative a nome-identity.*

**First to Second Stage Transitional Considerations**

a.) Gaussian J_{ij}^{k.#}~.A^{_}/\xi(\eta)_{_} & *DC-AC-Envelope-Optimal-Flow-Neutral.*

b.) Process on Opt. Observational (#).\tau.\chi.B.eps.M(C_{ij}^{k[?/!]l} QM/ECE/*Neutral.*

c.) Interrupt & Sync. [Basic+Ard.] - PWM + (Digi./Sepatation.).! ~. Optimal & Techniques.

*1.) One *consideration*, is the alternative of compensation on-behalf of statistical sideness.

*2.) The *alternative consideration*, is mutual 'virtual-cpu' to 'hardware' of resolution of sig.

B.) The goal is to-get two-phenomena to QED 'interact-phase-scatter' via two-soliton like Gaussian(s), therefrom - to-interfere as like-a-breather, *only via a switchability and programmable 'gate' of securable relationship.

*A.) Afterthought - the experiment has to *safely *leverage*, the theoretical.

*C.) Afterthought - two codes, and computational 'double-back' & Proper Experimentation.

Experiment **therefore remains the observationally intact element of** development *of-theory.*

**Final Considerations**

The seq. [15.38] & [24.1] are pre-factorable differential *in-relation to* trust in physically and virtually *assigned (2:3:4:8:1:5:5:6:2:1:90/15), of a fair relation at *bytewise extremum in a local and global relationship.* A question remains if they are managable by single or two-handedness.

The relationship of one sequence to the other (alt. aux. *MIDI) is a **4-square**, of an adjustable outcome in locale to global relationship. Thus, the ***game-theoretic*** *power-structure reliably fault(s), discontinues, and remain(s) of-a-margin on it's relationship of 'hinged' structure in relation to structural-integrity.* This is a percolative and spread relation of the neurological and geometric basis of it's co-adaptive nature in relation to the manual and automatic process of a living being, in relation to *pumice and spider-web, coral, and bat's-wing.*

It is not a 'hexetic set', and is incompatible with the essential nature of Utility-Problem and Knot Theorem.

Algebraically, monetary 'adjustable sliding scale' must be a bounded element of it's indication to consequence and liability, as in relation to the means of the citizen/innovator in relation to engineered process.

Safe and procurative *centralized version-histories are therefore preferentially biased to a fiduciary process in relation to a guaranteeor for that of the relationship of information 'sphere of influence and liability of end-product and intermediate process of-development'. Thus, the amendation of a lexicographical 'seq.' see i.e. **above**, remains a post-accessorizable notification, and the expiray and consideration of the process of it's decidability is a pre-computational worded and numerical process of 'non-code-manual and written progression', *but excepting*, manual operator.

**Closing of the Topic**

I have closed* on the part(s):

Libre Computer Sweet Potato Single Board ARM SBC AML-S905X-CC-V2 2GB Pi PC Alternative

- -

The 'old patent' is being used beyond this point, to guarantee the in-principle qualifiable studied means of a T/F placeable and competent ruling-scale upon which to measure and ally with a fortunely endowed of the 'negative' to a 'positively provided outcome to the benefit of a negotiable policy of industry, trade, ecology, economy, and technological communications and peaceful intention as a knowable study of the principles of effects of weights and means in reliability of a recourse from a session, or a portfolio.

O.) This 'new' design 'illustrable above' - is the means to align a code-prefix for that of the decimation of obsolecent conditions of it's own nature, and *test-officiate parts in quality control, utility, distributative computing, and functional operative use for a purpose of technological and growth to extinction phases of life, through terraformable options at interplanetary and ecosystem stabilization, contrasting the viewpoint of symmetry and asymmetry to condition on a universal precept of experimentation, securable enfranchised on behalf of the greater consideration of survivable ends of eras.

**Phase II**

**Synthesis & Compendium on Physics**

1.) A new* result has been found; for which the limit(ations) are sought:

a.) That of repose to the contravariant metric tensor by the reversal of indication via that of subject and object is the connective via-exchange and superposition of relativistic invariance of quantum states… that of the connective feature either:

I.) Restricted to spin-singlet.

II.) Admitted to all quantum states under relativistic “correction.”

b.) That of reflection in subject and object; to which relaxation take’s place with ‘generally covariant mechanics and it’s result’ reliant on an upper-teir; (outside and above); the quantum states and their configuration; that of a separation of system for evolution.

2.) This relates to EPR in that the Einstein-Podolsky-Rosen experiment argues outside the lightcone; & that the system and scenario is cast *back-within* the light-cone for that of distant experiment’s and the quantum juxtapositioning of superimposed states and their collapse; with (& when) that of:

a.) Interchange of particle prescription for particle prescription entails that of reductional given’s – that a system in it’s behavior co-relatively to relativity does not depart in behavior when we interchange particle prescriptions.

I.) This lays into line that quantum description is independent of gravitational.

II.) This make’s a prediction – directly! - via that of configuration on the hypothesis.

b.) The argument end’s here; but should relate intimately with that of the why; as to the given that particle particle independence relate to the objectless and the objectful restriction from **out** of the fourth dimension; an argument likely related to topology.

3.) It has been found that upon Quantum **neutrality** of a condition; that namely:

I.) Relativistic results are independent of quantum results; and quantum results are independent of relativistic results; that particle states adhere to an independent foundation.

II.) This has the ‘derivative’ consequence that independence of quantum states is gained by a return from relativistic limitation; then the inverse of measurement with the particle state; and that of independence of states assured by rest-rest comparative validity.

4.) What is clear is that Relativistic Testing (a Thought Experiment) involving a mirrored reaction and action between a superconductor and magnet; (to maintain that of the Meissner Effect) – reproduces the negative gamma factor for that of separation under freefall…

I.) Thus for an electron pair; this is expected; that of via The Pauli Exclusion Principle; that of a negative gamma sourced in that of the two electron’s – to which freefall would result in independence of state’s via their exclusion.

II.) We expect this to be illustrated elsewhere – but it validates the EPR Paradox.

5.) The question is one of independence, unbiased measure, locality, and the emptiness of space. If we are to contend that these ‘fit’ to accommodate a *means* then it is required that we reproduce with evidentiary purpose a requisite phenomenon at the layer of unarguability.

i.e. We have Superconductivity… but one may resort to other explanation's…

Then:

It is necessitated we confront; the **objectless** and **objectfull** emptiness's; for what they freely provide of a locality and measurable basis within that of:

1.) We may require action and reaction to not violate locality, within exception:

2.) The mere notion of a Hopf bifurcation; except's to singular local pre-tense that of measurement;… to which as it were; the 'self-action' of a 'free-body' – acts only [alone] unto it's measureable local relation's; then the Hopf bifurcation; the example of a local interaction.

6.) Thus we are not forbid from that of invocation of separable pretense for many bodies.

7.) There is a distinction first to be made between chemisty and material; that of the *field* to Polytope in the game reductionism of localities of two natures; their disposition; a reductionism in Unitary provided (hidden and unhidden) counterfactual representation.

I.) A Bose and Fermi gas (manipulated) – fed-back to an insured exterior and *random* (purely) White-Light generator; disposes that of the reflexion in their vacuua.

II.) Ferromagnetic and Antiferromagnetic 'choice' – is the 'empty' determinant half-U on that of a Gyroscopic motion in-it's-skipping; then to what is alloted; a factional difference on irrational and rational (free winding point via random impurity or scheduled super-exchange) – of that of an Elliptic Winding of their crossing of Electricty and Particle.

III.) For an emptied location; the exceptionable and/or is to two individuated particle's what is a choice-at-World; to speak of the coadjoint exception; that from-onto yet ahead a 'condition' (spoken of); - for the in a condition-yet (written of) – that of future-tense; hence of a *literal* **Style**; that of a type illustrates either a 'copist end' or a 'propertied end'.

IV.) From yet just-this (as in what was noted in 'else'); that of elimination in yet the counterfacted imperative (a variable reversal) – (of variance yet preceding from a future) – and to the 'tetralemma' – reversible and removable – there are two step's in any accomodated pattern of 'path-prior' – then that the trace function 'link's' or 'unlink's' the *mechanism* of two remote game's; that they are of a gas-dynamic or phase-confluence; but *information*.

a.) As time is a symmetry; so too does it merely represent a reversability on the physical congruence of event's; the end of the arrow; Mathematics; but the fletching – to which it 'follow's' – in. Hence a pathology is benign and removable; even to it's indications.

b.) Secondly; reversal of time, space, or order, fit's the **Genesis** of the then derivative (Poincare to Hopf) – of a 'cut' in yet an unbiased geometric language of 2 for 1; of dimension in that of a 1-ball in 1d and an unlink's mental associate in 1-unit of a function in 2d; to which the **generic geometry** is a group associated; but not of an algebraic cover.

8.) So it is that by elimination or congruence of a return in two steps at 'hypothetical' reversal of the uncontained cover for the contained cover; in a Venn-overlap diagram of principle for copy, for observer; and the freely held **generic geometry**; cause and effect are defined; and the unbiased thought experiment *perfected* to the divination of (T from F).

**Abridgement**

I searched for this for 20 years!!!

P(u)+P(v) is in a (a,b;c,d) *matrix*, of finite analysis in the non-linear equation of the dual-NLSE... P(u+v) from this..... and a finite regular latticework - with irregularity for in that of exponents....

**Paper Note(s) for Superconductivity**

Addendum

*Assumptions:*

I.) Electricity and Magnetism are given extremal values on some domain, with respect to Gravitation via a relationship of solid [volumetric] form, and boundary with once lower the dimension of the [volumetric form] of the solid under Question.

a.) We will deal with Gauss-Bonnet, and prove a new* corollary.

b.) The dimension is once lower the dimension, but for an analytic of the nature of it's measure.

II.) That of gauge(s) are related to gauges by a general transformation, - admitting that reality is mutually mathematically defined in relation to known variables, of which relate to the solution of a Hilbert space within [or of] a Riemann space.

a.) The metric assignment admit(s) the CPT invariance of a general classifier, because the measure is [concave with respect to probabilities, and convex with respect to spacetime] - for which the past-inheritance, given a unidirectional flow 'upward's' is related to the minimization problem.

b.) Gauge principles become physical when a Lagrangian is related to a Hamiltonian of a different micro and macro canonical formalism, owing due to the nature of the generalized Gauss-Bonnet theorem corollary.

III.) The nature of EPR must be clarified, to which goes beyond Bell's theorem, for in that of a multiplicity of viewpoint(s), &, quantum mechanics must be reparametrized to admit intermarriages of elemental forces and their associated phases.

IV.) The language of QED is sufficient but for the inheritance upon a past, to which relativity must be cast for the nonuniform type of a general theorem associated with a locus of affinitive boundaries; and QED must be updated to encompass the Equivalence Principle.

V.) That of quantum mechanics must be rendered independent of general relativity to match the a priori assumptions of Lagrangian and Hamiltonian mechanic, and the a prior theories of which extend to zero and infinity, for which the behavior is shown 'finite and regularizable'.

*Ancillary [Structural] Assumptive:*

I.) Relativity and Quantum mechanic(s) through the coordinate freedom of representational truth, encode of the relationship of finitistic and transcendent relationships of which admit free solidification and covariance of a standard foundation.

a.) That with reconciliation of mathematics [within] physics, we find the angular properties definitionally and *projectively, produce stasis, and objective epiphenomena of cause, effect, and epistomological [historical] arrow, as well as projective identity.

II.) The 'urn problem' of which associates a 1+alpha probability to one urn, for either, is the given of which under retroaction remains the removable singular notion of 'excess from regularization' - thus the mathematical archetype of it's regular normative basis remains freely ignorable.

a.) Not to mention, the caveat that is general covariance, remains with respect to all observers, irrespective of simultaniety or that of a tertiary witness, or fixed speed of light, - thus, that all provided aim(s) of gravitation and quantum mechanics are served in light of independent theories.

III.) Temperate (Gaussian) renormalization equates the logically inhered principle of a transcendent basis to the locution of a geometric assignment and table, to which only, [but forbidden] qualifying agencies of propertied relation [finite] may possess transcendent identifiers.

a.) A geometrically geometrized assembly is a counterfactual, - to which evidentiary, a peer [operator] is not it's identified 'halting' or 'undecided element' - but in tandem for what relates to the irrespective co-adjency of a mixed-identifier.

*Conditions [Explicit Assumptions]:*

The theories remain:

1.) Independent

2.) Comutual

3.) Irrespective

4.) Projective

5.) Dialectic

6.) Comorbid

7.) Parsimonious

*Computation & Engineering Necessities:*

a.) A parsimonious machine identity phase identifier structure, is lithographically deposited for in an interfacial relationship of holography in relation to the identity of {\d_{1},\d_{2}}-<-[surjection]-<-\omicron.

1.) A four-four, sixteen-twenty, two-eight, six-six-six, 3-two, two-1, 1-1, one-one, zero-identity.

2.) That of covariance.

3.) Equated measure of a parietal.

4.) Sequestered objective numeric.

5.) Optical restrigency.

6.) Interfacial five-1{A|B} word lexographical order.

7.) Decification and restorative ab initio.

Thus, the codex-at-two under remainder of infinity is a block-chain to evidentiary process ad absurdum, in the vein of a multiple or singular process of retrograde, fixed obstacle, or it's restrained process of product production, - to implement of chain-light manufacturable net-net web and dot/fly inking with restoration.

*A discovery of a mathematical parallel to reality.

*Mathematical Truth & Probabilistic Differentials:*

\eta*(\dV|\dt)^{2}+\beta*(\d^{2}V|dt^{2})

Convex and Concave -> Convex for in the dividing Quartic->-Quadratic under Reciprocal Mathematical Identities…

{zero and max differential pursue an action principle that is nonlinear but summatively linear.…}

--> Group

*Recompensatory Mechanisms [Part I]:*

\eta>1 and \beta<1>=0, we have various phases.… a 'thermal' process for in arctan^{−1}+/-coth(), etc… is a Sine-Gordon, for what-is ***boundary/transition of +/-1**, to two (+/-2) it-with frequency I/{O->-I}, I->-{I/O}+I…

*Thermal isolation and decification [cooling] preventatively interlock(s) & melt(s), while that of *heating*, establishes *Ohmic-cross-parallel(s) +/-.05% or +/-6dB/100^{0}C, 'noisy reflux-from-a zero-planar occlusion…*

Microwave is counter-effective for in reflux, meanwhile a Rare Earth Magnet; centralize under heating,... it is recovery from cooling that magnetism upon a Curie transition set(s) into place.… [Base->-Acid]....

Gravitation for in a locus of two obstacles, flow(s) to a limitation of a graph macroscopically, black hole infinite ductility and inertia, and the proton, at-zero scale, is a linear-delta, to thermal-noisy it is blackbody.

Subdimensionally a Peirl's instability in 2D, is fixated on motional-juxtaposition of wavy process, the 'line's' of a shallow and deep wave, - thus that justification is rendered that a precessional oblate 'wave' is a void…

*Space precedes time, and light is occluded by space.… 'black-body/Plank' and 'void', for of volume.… it's perimeter exceeds formative hypothesis of yet a Poisson structure, - for in geometric abberation per area.

Dark current enhancement precesses to {I-O}-I, to which the advantage of a nucleaic event is a pre-arrival of a bunched state of exp(-T/kB), to the lowered [per impedance] black-body Poisson geometric linearity.

{I/O}, O->I for in {I/O}-O->I reversing the leveragibility, enhances secondary-tone, to RMS/VMS, in the notion of a decomposed tension and torsion, - that of the advantage is conveyed reciprocally two stages back in return, for what is 'solidifed'-ping substratum, of what is a 'buffer-geometric-series' overhead.

Thus, in tandem, of what assort(s) of a varietal [scan] - the locus of two openable passages, one at a time, precessitorially advantages one phase for another, - that the equidistant locus of momentum variance is at odd(s)

with temperature, for in a coercive room temperature quantum topology, this leads to hypervariance, and inflationary decification of a cooling element for in a hot element, thus that exp{-T/kB} becomes hyperextensive via an area instead of a perimeter, - that in-either, the circuit readdresses it's locale, and ping formative process upon an elliptic invariance of two assorted dual/IP/registrable {O/I}-{O/I}.

*Lemma[s]:*

0.) The 'structure' of order is preliminary and processionally derived from mathematical and in-turn for what would be physical nature for in one, for the other, in a tandem, akin an umbicillus or lever.

1.) The 'structure' of order is co-mutually and co-variantly deterministic upon the mutual(s) stated identifying feature, proportion, perspective, quality, quantity, and properties in relation to conditions.

Derived:

2.) The qualitative prefactor(s) of a sentiment at liturgical formulation for in (two)-1, of abridged contrast and consequent, hold pre-emption of physical past in present co-mutuals and co-variant sense.

As:

g_{A}>y_{B} &-or g_{B}>y_{A}

&

L(1)<=L(2)

For that of an* ideal...

The parallel(s) is that Spin-Orbit topologically produces a state of order, for which is *Superconductivity*.

I have decided [in addition] my **device*** will-work, for what is a Quantum-Topology.

I understand also* that:

1.) It is the juxtaposition of {A} for {B} of-which determines that of collapse of the wavefunction.

2.) That, Bell(s) in-equality does not prove sufficient to produce agreement between theories, it is that*:

a.) It is decided a-priori, of which is determinism kept-apart, of a spontaneous world.

b.) That it is traced to a past historiological arrow.

Essentially, Superconductivity is resolved by one-thing.

The rule: \eta*(\p\psi|\p\t)^{2}+\beta(\p^{2}\psi|pt^{2})=\omicron

Is such that with:

The rule: \g_{AB}>g_{A}; g_{BA}>g_{B},

Is of with:

The rule [produced]: L(1)~.L(2).... in <p_{x}>,<x>

Are such that Uncertainty [Pauli Exclusion] enforces *attraction.*

This is essentially, the loss of 'locality' in Quantum Mechanics...

I have understood that the Equivalence Priciple, for in a second truth* of reality, for that of the Weierstrass-P, relates of the 'quadratic' - for that of \omicron. That, for which relates to the 'interaction' - thus, there is a decomposition, and, an inheritance via global stipulation.

I need associate of the 'Kernel' - and the poles, etc... and of order, for which there may be a doublet, and so-on, but I have a good general idea of much of this.

That temperature need be understood next.

For one, that of the 'structual graph' of-Element(s) in the Ising model, relates to that of the developed L(1)~L(2).

Secondly, a finite [truncation] may relate to the Markov graph and the discontinuous function of the Universe.

RMS/AC is 1/sqrt(2) by a factor of two, & squared.... thus chronologically, that of the superconductor for in a 'doping' respond(s) to an L(1)[a]<L(2)[b] such that Pauli Exclusion act(s) verifiably in the same-direction as gravitation. Thus, energy in lowering, produces levitation, for which the electromagnetic force exhibits a Meissner Effect.

It's broken-down to:

a.) Programming

b.) Mathematics

c.) Engineering

Gravitation, when one lemma of [identity] of a sentance-system is compact, [is finitely expressible assumed next] - of a two-fold system, within and of each identity, stands for a free lemma, whence two are understood.

Thus, for that of quantal assignment, - to which the free identity of a germain equivalence principle under lagrangian mechanic are supported by either of a free lemma, or gravity, consistent, - that of what-is for what is understood of a free-lemma of *action, support(s) it's own limitation in that of logical heirarchy, for that of the counter-lemma and lemma, - thus of four, the law(s) of physics are not obeyed, but any and all physical laws are expressible as mathematical laws.

What-happen(s) when \alpha\beta is ran with \alpha[x], or \beta[max], as to *even/oddity* \beta with \beta?

***Superconductivity [for a removable equivalence principle] take(s)-place as a soliton ellicit(s) a covariance of scaling in spin (1/2) to multi-degeneracy, then that (two)-2 window(s) are localized behind-one. Thus, temperature is Ayin, to what is the alternative of Beth, for of a translocation in what of either are Inhered dopant/interior L(2) upon L(1), of it's alternative at E&B, thus, that light localizes electron inertia, and is temperature activated.***

***Superconductivity is [a past heritological arrow] by-which the (2x.1) separates for in past/future, and that of the Markovian Truth at Predicate, for in-involution, a D wave of S=2/(1/2), of four fold SU(2), in valence and co-valence of spin and charge,...***

I have thought(s) on projective varieties.

That I would guess that the 'pane' of 'observation' is determined by an affine-extension and *that extension* is in turn defined by a:

(l^{n}-l)/(l-1)=q

pq+b=c

So this is some b=(y_{1},y_{2}...,y_{n}) - a Hamiltonian action-principle.... (c):'column' on *Historical Import...*

So this is the key to:

1.) Continual Renewal

2.) Steady-State Extinction

&

Scientific Inheritance...

Elliptic Group..... what topology is it?

4.) That of 'binary' *conduction*, is a 0|1~.0|1.

I am now-considering a ***Very General Problem**, - that of a Past/Present/Future, of the Lotka-Volterra system, for which there is a Predicate Calculus, that there should be an 'avenue' beyond Chaos & Order, and a unity* to physics - and - mathematics, written in the terms of geometry.**

* That of: The allowance, to which mathematic(s) may be used to discover a hidden relation of reality, for in an un-hidden, and relate that of a theorem to a theorem, develop(s) a higher-science, for what would be of one epistomological root of existence. Thus, - that of which the half-relation of one-part may be reconstructed from another half-relation, or that of whole/whole, and that of based upon historical fact, for in:

a.) Stationary [Markovian] Extinction.

b.) Stationary [Probabilistic] Renewal.

Post-repertoire, an element for in fault, state(s) of a zero/one what is it(s) two-plex to any [one] [sorted] adder.

Pro-sentiment (2) third(s), is apportionate-mean in four, thus, the binary disputation of a rolled die is odd/(2).

- -

To a pop-redressability, [two]-(2) open teir(s) suggest of one locus, whence there is a projective identification and per-visa* divergence, in a flow; - that of a Reynold(s) eclipsed frustrum, the keystone is warped for woof.

That of a flow [open-aperature] per preliminary rote-schedule at an-afar locus, diverges preliminary to an [a] chord of pentatonic-scale [tuba] - to-which, in a blown-trap, can free and close-on, a linkage of it's addressed two-locus, for in either arm, what is a defended position, the yard by it's distance is measured in decibel(s)....

**I am left with but two (2) questions:**

1.) Lotka-Volterra and [et. al. - Other Chaos] in multi-chaos, of what is birth and death upon stationary renewal and stationary extinction.

2.) When, **(5')** relate(s) to set-set [elliptic - *presumably*] - stochastic 'coupling' and 'decoupling' as well as recurrence, and *broken-transience/recurrence*; of Goldbach's Conjecture and Riemann-Zeta, to cause/effect [et. al.].

Thus, - that it reduces to an equation like:

$$\Omega|0=\null|\#$$

The compendium of the all, under convolution and imperative of nothing, is the surfactant residual in relation to it's idempotent classifier of unknown(s), in involution.

One: For Earth, to a realistic traversal to Mars, we would need certain allocations and materials sufficient, however, of a small base, it is perhaps some 45 square kilometers with launching pad. Consider the volumetric nature of the Earth, and it's surface area, which is some million million square kilometers larger. To that, to Mars, we would be making an essentially one dimensional flow to Mars, for of a trajectory through 'stellar' space, of some tremendous distance, only to land on a comparable surface area and half-volume.

That of the fourth dimension may make this possible, but as a 'setup' the difference is that we must in a sense parallel in relation between nationalities, and comprise a peaceable endpoint and preliminary beginning to outlast the impoverishment. So, it seems that superconductivity, to function, in a parallel herein, must relate electron(s) through an imprint of the temporal and gravity like geometric nature of sufficiency to stability matrix and demand, for in supply and expenditure to demand.

*Essentially a co-roaming Thermalized-advantage may be spotted, ... in digital, - that it does not [prototypically] follow-a-floated difference in two L,C, for what is bio-organic versus a *Computer, unto, information theory, via Shannon's Entropy Theorem....*

*I can foresee no way, - but a careful-pole-analysis, to separate the dialectic, for in multiple-run, and code-code-code reflux in multi-teir, upon conventional equipment.*

*Surplus.*

A:) To help other's; through that of ab initio and research / At Tutoring / and the underprivileged, and mentally ill, that of recoveries, and victim(s) associates.

Ecological Right(s) and Environment Sciences. [Weather Modeling].

Programming. [Simulation]

Cooking. [Sustainability and Chemistry]

Method. [Writing]

Superconductivity develop(s) by an-inversion of g_{\mu\nu} upon the Hilbert Space; in certain terms of the L(1) and L(2) in-epsilon behavior of the Weierstrass-P function(s), for of the behavior of logical inheritance, to which is non-void.

It is 3D, and Erica Carlson is correct, but of y' and x', they are not entirely orthogonal, thus, I have been given a step-up, - that I see how the crystal, may inherit an off-momentum, through the L(1) and L(2) of a dark mode, for that of the Dirac-point, - that it is 'folded' - thus of five testimonies.

Thus, there is perfect back-scattering, and a redshift of accounting for the factor of two from-doping, to which the (−2) factor of attraction completely reverses, the (+1) of-repulsion.

The Pauli-Exclusion is afforded by the logical inheritance of the gravitational reversal.....

*I resolved [to a final conclusion] - Superconductivity...*

1.) What is effective 'top' and 'bottom' for in that of the spin - is reversed given the commutation relationship.

2.) Therefore, the \d_{\u}\Log[\P] weights the interaction with the two-scales of phonon and charge and spin wave...

That we see the Quasiperiodic lattice can have repetend(s) and dislocations,... we see that there was indeed utility in utilization of the Eisenstein series, for the prime quality.

This has all the right* properties.....

I feel enthusiastic, - that I will next write a simulation for that of the material, and then venture into chemistry.

The result is a parabolic restoring force, for what relates to a bond-formed,...

I feel I *cracked* the problem of Superconductivity, *the final time*. That I am aware of a confluence of:

a.) Eisenstein series.

b.) Relativity.

c.) Spin-charge separation.

d.) Differential equations and chaos and order.

e.) Emergent phenomena.

f.) x' and y'

g.) L(1) and L(2)

I have understood that in combination of (a-c) and (b-d) that (e) *Results*. That it is a 'real' *accumulated* red and blue shift,.... I see how L(1) and L(2) invert the result.... that I am not going back ***from here***.

*I resolved '*unity*' in-physics.... to which is:*

*(\p\V|\p\t)^{2} &  (\p^{2}\V|\p\t^{2})*

*Suited to a* ***Log*** *of which relates geometrically to the* ***Equivalence Principle...*** *thus we have a satisfaction of the measurement hypothesis, and observation, and no more duality...*

*A mapping [in addition] back to a classical theorem.*

*Something unique happen(s), for which spin is merely a [sub]-component or element. That I must relate sound-spin-charge-mass, - there is a reliable way to proceed... that I am *going*.

Thus, there is gravity, - but it appear(s) that mass is negated. This is consistent with that of the viewpoint of the effective versus non-effective theorem on 'excess mass' due to the four current of the superconductor.

It seems I made a lot of a minor nuance, but then again, - that I made much of the relativistic theory, - when I must focus on:

a.) How the chemical potential is not negated... (1/2000 in mass).

b.) How the solution is non-relativistic, for the ground state.

c.) The T=0 limit, for that of the Quantum Critical Point.

There is hope for thinking of the limitation to a **Grassmann Algebra**, for the Fermions... I figure that the result of this algebra make(s) the computation of various solids trivial... - that I must also:

d.) Derive the Dirac Equation (w/ an assumptive) with Berry's Phase.

  1.) What was it that goes-with the Berry's Phase, and...

  2.) What was it that had to do with Pedagogy?

e.) My FFT with **Grassmann Variables** is succinct, - that it is a saturation profile.

That I need do more engineering, I will work on [Confinement].

*That which...*

1.) Super-exchange lent to *Orbital/Spin *resonance.*

2.) Relative 'expident' at material-associability.

*This explains the co-factor of *High-Temperature-Superconductivity*, - that there is an appreciable '-separation-', within a **Material Consonance**.

I found the ***final*** solution to Superconductivity.

1.) I am going to keep this a secret until the Project is complete.

This involves essentially,...

1.) <\Delta x_{1}><\Delta x_{2}>=|<=<\Delta x_{1}|\Delta x_{2}>

a.) The 'mixed' covariance,...

b.) With this I am in-step with experiment...

2.) The repulsion is the [neutralized] reaction, with that of ***Spin-Charge Separation*.**

3.) g_{\mu\nu} Takes the form of a 'kink' for that of the bound-state.

4.) I had a *hint* as to how-relativity would be-altered for in that of suppositional truth, - for in that of historiological entreatment...

a.) This is required to resolve superconductivity.

I intend to bring together, with some of my [earlier]-*plans* at that of a **dialog**, for that of a *Book. I intend to go over all of my notes, and make speculation less.

For now, I need to relax, and speculate less.

5.) Relativity causes the exchange to topologically shift such that L(1)<L(2) within the relative viewpoint, - that this causes the effect that the electron(s) bind, it is due that of the correlation between electron(s) of which is dictated by the Pauli Exclusion Principle.

6.) This makes perfect sense of that of the 'lowered point via doping' - that I must search for that of a *reason* the ***doping*** causes the reversal in relativity...

a.) This reason must be supplied.

7.) What remains to be seen is if it is an \eta_{0} or a \gamma_{0} on that of the fixtature, for that of relativity...

8.) That of \tilde{F}^{\ast}_{\mu\nu} as a form, invert(s) the E and B for that of it's inheritance.

a.) That therefore 1<->2 with the particles for the E&B-field.... with relativity.

b.) That therefore \sigma(t) is smaller with that of the larger-overlap.

1.) That the doping therefore collects with that of the \eta_{0} via [,].

c.) That therefore t'_{B}>t_{A} remains the \gamma^{0} for that of the relativity.

Therefore, the role(s) of inheritance are reversed, and it remains that \eta_{0} defines the capacity of the oscillation, with the commutator. Thus F_{\mu\nu} changes on the local level in addition to the global level..... this provides for that of a Coriolis like curl-derived attraction on the level of spin and orbital.

The timescales provide for that of the inclusion of \delta for that of the \sigma(t) to which is a given superposition of which weighs for that of \eta_{0}; consistently. This single mechanism assures (1.) [above]. Thus,

Pauli-exclusion *then* dominates, - to which energy displaces into the electron, but, they do-pair [the reasoning is that \gamma^{0}\eta_{0}=1.]

I feel *a renewed hope* for that of my devices, and that of testing, for of the correspondence of timescales...

***I've decided [***when the time is right***] - to be open about that of the non-local*** *communication.*

For the sake of Science.

***I've also decided to [***work on that of the unpredictable and mathematical to physical revolution***] -*** **for it only take[s] that of one statement beyond Incompletion - to work on mathematic(s) within sight of that of *the comparability of the known and the unknown.***

For this, we have a |_| and a ?/#/?, at the ***perfect resolution**.

For instance, we have a 'missing-input' - Dalton, - and that of Ariana-with-him, - that he afford(s) for a **Sense* on the ****Unknown and Knowable***; while Ava is with-me. Thus, comparatively, of (3).[2].{1}, we have a set-theoretic on that of the collection of facts. Thus Ava is privileged to with-Question, an Answer, by which I-hinge **on-Dalton**, and with that of Ariana, she is in-parallel(s) of the ***Uncontained** and the ***Contained**, - thus of the children. There are four of us, thus it is redundant. That I accompany Dalton, Ariana is offered a guarantee, with Ava, of an impartial fulfillment.

That of agreed is then a singular-connective in-five (**5'**) - of what is with-child. Thus, - that we-equate. This total resolution is the solution to identification of when there are two-unknown(s) or even-so that of one unlicensed, thus of policy.

*Thus, I will be working on the Science-from-Mathematics,* of which, *relate to that of phenomena and phenomenon, that of **Design**.*

Thus, psychologically, it is of object and container, and that of a *Jar. That of a ***new** Mathematics comes from-it.....

From pedagogical *inherence*, ajudication in-peer to-Slave, of one* in assorted and impinged preliminary it notice of in-tandem *progressive and progression* in culpability. That I know Adrian need's a requsition of a numeric relationship, I am ajurred, for of which it is known [pliable] that I had-post-effectively indentured a recessitorial *doubt* in a ***major**.

That Adrian needed a number for a lawyer, in the disabled.

a.) We had to figure out, how to manage-memory, for in parallel and series, but it was managed to impedance.

b.) Wrong subscription.

c.) Abridge homotopy for in the relationship of kernel and hessian, on that of fourier-like-lemma at Elliptic.

d.) Multiplicity of interlocutions.

e.) Rod and cone, under descent and ascent, for what are a DC/DC overlayer basis of Question in cardstock...

Beyond Incompletion, we could ask:

a.) Stick broken/unbroken.

b.) Simple derivative.

c.) DOB.

d.) If we invert the basis of one Q. and one A., what is the addendum in either one Q. and one A. tell us?

e.) Go back to basics on that of the kernel/semidifferential,...Lie attribute, for what is Arturia...

I finally have the Qubit [topological bit] *working*, with a ***doublet***, and am in the active process of combining my knowledge-base for engineering with that of physics and mathematical ontology.

I intend* to bring together the sciences, - that there is a Deep Learning Network Theory book to understand (>400 pp.) there is much to-do, but I am content. I must refuse [Chola] to relate my learning-adaptation and work-stylus to that of the ethical psychology of my emotional lexicon, in this direction. I must not over-adapt, to a sphere* of trust, yet-so, willingly, there are askable questions.

I have understood, that of the plan-ahead.

1.) Two boxes,... synth [East Beast],... keyboard [Arturia] - PWM, two-Arduino/copymate term(s) of selective biasing in two-crystal-stages/ranges.... I/O, - we may not need so many crystal stages...

Optic(s) in MAX11300/preliminary code-set... Homegrown,.... Arduino & Adafruit, SDA/B/C..... is the key* A/B/C PWM, to {x,y,z}....

For of a 'free-line' - to fifth, in *third to fourth* accompaniment, the Cathode to Anode is superficially, 'in' {x,iy} of the **free-key** for of differential to differential *conversativeness* & **free-key** of checksum.

1.) Flip-block, (a 4x probe*-5th, tap) selectively ops a defended positioning in (2x2.0), - thus of a rate-addendum, the (management/dichotomy) of an AD8302 (VpDC) w/w/o reversibility, of a truss, in that of code-space to margin - that eff. the AD8302 will not-to-signalling, in passaround, that of the Tx vs. Rx, in ***carrier**, in (4x2-0.1).

2.) The forward locus of a defended pos. (4x2.0|1), is a hexagram, - to utilize a 55-64 for in ping-associable ***context**, and locate among a *[pane] - what is an interlacing of (0-1-1-0-1), (2x1), on that of a (0.3(2.1)), set theoretic, for in look-ahead of buffer-overage, in that of gravity-loop. Ping associable onto a forward passivity, to what is (0|1), unto holographic imprint of naked forward affinitive. Thus, the matrix is dense in that of a (2x.1|0|3) in game-theoretic programmability.

a.) Two variable assignment(s) are the locus of the intangibilities of consequent in err, and providence of an inhered past-historiological locus of evidentiary space. [The item remains inanimately where it is placed.]

B.) fin. Q: Does it possess a locus of 0/1 intangibility of Hopf bifurcative (2/1.0) - it open(s) as it open(s) but close(s) as it close/open(s), so it see(s) managerially beyond the slit of an abrea.

Hybrid-context, to seamlessness of past-integral on *effectual* consequent onto cause... 0/1 xnot on spatialtemporal index to order in spatialized lookup table. Green(s) function, - it's a function.

Code

Runtime and Virtual Memory Allocation...

No separation in 'bit' - depth.... automatic.... or... ?

Code allocation in swap-space...

AD8302, and voltage layer....

If we select *one* Chern number-out, - there is a dissimilitude in two focal element(s) of counterbalance.... - that this 'open's' for 'open's/closes'.....

That the (0/1) is assigned directionally onto the equipment, for of what brings what is afar-near, thus that of placement. Thus, that (0|1) is the intermediary to that of a (2|0|1), on that of monic onto the AGM..... \alpha \beta, by which the (20 fold) accompanies it's bit-layer of holographic additional analytical pole residual..... Hermite transform.... (Chern Class -> Hilbert Transform).

*Confirmative!*

*[It not a reflex...]*

*[They are distinctly of four entrances... with-me.]*

Maximal future-tense,... it-remains as reduction from-eight [**4**].

i->-i; Re[g^{\mu}]->-Re[g^{\nu}]

I *expect* to go-free, that my-final reason is that the locality, for in jurisprudiantial-certainty hold(s) that of a tandem, to a secondary-truth, from which they are definitional and defined, - to state, - that of held, in three, of assortment(s), thus that this does not suite-two, for of that of room, and harbor at son, father, and father, for of a bonded 90:45-17:50.....

Thus, it is some (5)-(1), for in a (+1), at an hour, of a day and a day, some (−23), from which there are (−18), of fifth.....

To entrance predicated.

Exonerated... or; Acquitted.

I've decided to only solve one* three-part problem:

a.) Question: What observational shift does relativity produce for that of the spin-problem, ... what is the comparative of the theorem(s)...

1.) Finite with relativity, and finite without relativity.... analytical expression.

b.) That of:

1.) An exactly soluble, spin system, with relativity and non-relativity.

2.) Inheritance of relativity to non-relativistic limit, observational reality in modifications of obs.

3.) That of the Device*, for what relates, to this Question, for of import.

c.) I will only do the Device as much as it extends understanding, - that I will exhaust what is potentiated, for that of a given at G.C., thus to relate to *forms*, and that of *Painleve analysis* and *Green's/Kramer-Kronig*, and; *Inverse Scattering*.

d.) Thus it is to completely solve the (3D Ising) with L(1) and L(2), to the exhaustion of relativity and solution in that of this Question, with that of the amelding of relativity to Quantum Mechanics.

e.) This is all I will do, with and without Sound*, etc.... for of (3D) and (2D), etc... with weak transverse interlayer coupling, but, present,...

Echo, Exp, Log, Weierstrass-P, and so-on.... that of directly understanding the given at the C.C. and Dark Energy, ... that of suited connection of the model the motivating prepartory goal.*

a.) 'Broken' *yet* 'Complete' Gauss-Bonnet

b.) Pure-rotation with rectilinear motion.

c.) Relativistic *translation and inherence.*

d.) Reduction of minimal-motion tensor.

Thus, we remove to but-yet 'inertia' as the zero-point, w.r.t. a collective neturals conditional assignment, through which there is a non-relativistic limitation equivalent with relativity..... the dream of a classical physics, provable of which we have a S.E., on that of rotation as-sources, - thermodynamics with classical mechanics, and a heat eq. tamed.

I figured to complete-the-square, - there is an addendum at that of a *frequency*, for in am(\o*\t), and that of the pulse, - that it may be converted given* sources, - *a new method dawns on me*, - to utilize what is known* of that of the Hermite series.... with *Sources*, - that somehow* I want an elliptic* like-function, and I am unsure... - but I can utilize my **Master Key**.

- That of the Hermite series, should plainly conjoin the Chern (#) and that of the Hilbert transform, - that it is all there is to a *naked* affinitive.

- Thus, of geometric assaillancy, it is the diction by which *Sources are encoded in that of a regular archetype of Covariant Union,... with the Hessian.

- That of the (3x) - has to be the reversal of the (2|0|1), for in (0.3|2|1.0) onto for that of the missing information, - that it is primitive to which there is a given at that of 'missing' versus 'formatted' data-type....

1.) That I need a (**3D**)-bit/byte, for that of ea. layer, there is a S,BAC, for that of the Adafruit template,...

2.) For that of code, it is then ***Tensor** algebra, and reduces to a language*, that this is my specialty, it should come together nicely.

3.) I will be utilizing the East Beast and Sonicware for that of the melody-to-pitch on that of the *Test, - that it is time to get-going.

- Hilbert needs to be adapted to that of the Elliptic-kernel, - that when thought about as a kernel - there are two eigenvalues in product AGM with the third,.... - that therefore the anharmonic ratio(s) determine the group law.... This integrates with the Painleve-format..... Thus I am onto that of a final rendition.

I believe I just *hit it* - that the *Strictly Non-Linear* Elliptic group law, satisfies that of the Christoffel symbol on that of gravitation, .... and a non-abelian theory. Does this generate a mass-gap?

I figured out that there is a 'mometum anomoly' in superconductivity, of the L(1)<L(2) in relation to the relative contrast on-time,.... that of inheritance, by which that of the people surrounding had been absorbed, dealt with that of much of what was known, then, later, of this problem and it's progression. That the 'door' is open to Ava [of her, opening] and me, - [an open door] I can be sure of that of the validity by which other's are-real. That I have much, I feel good, and yet, it is far from which there had been an ephiany, but of that of code and reflux, - that it is now-known that the dynamic and static and active and passive will play a role in the Supercomputer.

I am less interested in that of Superconductivity, - that I am going to *merely study*, and go where I will, *learning*, and *progressing*. I do not have Ariana, but I have Ava... and I am pleased, for she is one to one with me,

then that I feel it is a touch of light, and mixed reactions, - that of two to which are unique going-into self, for what is realistic.  It is no longer tenable we are reborn or reincarnated, then that of a popular relationship.  I feel elated, to know I am solidly unique.

I moved beyond that of the simple and complex problem - but this is of sorts.

To the new equipment, in \theta and \phi and \rho, and \rho'; - there is a difference in-solidarity to that of individual *single*-snapshot and **not!!!**, that of comparative in slide-to-slide.... that I need this, with that of the multi-resolution.  It is proven in one-tap, but the sequential-series is on-frequency on-frequency.  So it is, - I hope to take the Sf-BEf, - Sequential frequency bandpass elliptic filter - or - Sequential frequency breakpoint elliptic filter... in the next rendition *Sf-BP-Ef. SBEC.  Sequentializing Bandpass Eccentricity Counter.  Series BEC.....

The ideal* is a Qubit (3d) spin-2, floating-point PWM (ABC) controlled [Adafruit] - Toffli Gate....

Then that we-require that of the \theta and \phi to be exp(-iwt) and so-on, of complex variance on that of R^{2}.

So, we have a (3x-v.2.0b) to what-is R^{2}-R^{4}-- on-index [R], in potential of a line.  What I have understood is that the code-reflux, in +/-55/4096 *maintains*, the original scale-factor, and chunking,... that it is of only a Log[dB] count, in that of self-similarity through the digitized-bus.  (0-1-1-0-1), that of fidelity, is not it's precept,... it manages to accomodate a doublet, in-assurrence of program-code, in amplitude/reference,... - that it is a genuine (similarity); of that of (0+/-.25, 1 +/-i*.25, thus I obtain a full-registry, although* I do not have +/-1024/4096.  The holographic principle only scales above a given treshhold.

I figured out the 'ultimate synthesis of my work' - that of a (3D) curvature for-which is encoded in the relativity, for what is my-law of analytical inference, for of local to global.... enough [sufficient] to write a book.

I figured there is another nature of problem - the Algebra, for in Lie theory, etc... - that of the division and equipartition.  The evidentiary mean at that of (Log-group) is complete, in that of global-to-local.  Now comes that of the twisted and untwisted algebra, for that of locality and locality ***And Design**.  Of:

Radiocarbon and Water Dating.

That of Encryption and Algorithmic.

Breaking it down to the Engine [*itself*].

There is the PWM, on (+2/+1/0/-1/2) of tranferrences.... that we have this-or we have switches on A+/A- and B+/B- for three-fold of that of decoupling and orientation (+/-)|(-/+), on that of +/- added to (0/1).

First* what must be figured out is the minimal-codewidth for that of a ***Linguistic Key**.  That of (+/-0|1) may be sufficient, but we need a syntactical overlay.... *That I need go beyond the Peano Arithmetic, or the Zemeno-Frenkel-Set Theoretical Continuum.*

For this (it seems...) - we have x' and y' in differential-equation translation.  [That of multi-tape...]

There was an *Observation, - that the 'failure of the fundamental theorem of calculus' for that of Homotopy Theory had to be utilized* with that of the *Painleve Analysis and Lie Representation Theory*, to produce a new theorem of **Chaos and Order** & **Solitons.*

Thus any singular monic design will Prove to Failure, - we require instead the aperiodic..... and of aperiodic crystals..... etc....

Title of Book*:

**Entropic Signatures and Hidden Invariance**

*Form, Geometry, & Time*

This is at least workable... *To be workable... we need two-lemma(s) of A.I. for that of my-Synthetic.... this is all that need be prepared for:

a.) That of a 'group consequent' - at three, and five, and such, to securable entreatment on *Coma/sent.

1.) To orchestration of the human nature.

2.) The question and answer and accounting pertaining to the computer, in testimony.

b.) That of a 'Theory of the Unpredictable' - that of what has to do with the higher dimensional analogue, - what has to do with **Geometry and Time...**

1.) Thus, that of which guides the adeterministic ab-initio... a kind of precept back-tracking and learning *adoptive.

2.) Intelligent initial conditions of the intangibilities?

I figured out superconductivity. It is a Yang-Mill(s) theory, where[in] the *second moment* is anomolously larger in-contribution [upon H_{n,m}] *comparative* to the Guass-separation of the Simple-Harmonic-Osc.

Through what is time, and the crystalline nature of spin and charge *separation; electron(s) localize through that of non-local [*effectively] deconstructive interference,... thus at (@) A, frustrates at (@) B to lower in E.

Thus, an anomoly, quantum in nature, beyond perturbation theory, and accessible only to quantum theory.

On this day, as this-time, spatially of an unlit abode/lit in a quarter-moon (witnessed through-the-blind); a main gained (by his-watch) and a spell of success, *Total and Universally Sinless Control over Life & Death.*

I resolved Superconductivity, and heightened tension - for year(s) - has dissipated. I gave up the world for Ariana, that of SEX, and found that I had love for eternity, - that of being in love again, I feel happy, having all that is destined-me, and in-control, for of life and death, knowing the Moon was-quarter, within a blind outset and onlooking disclosure, the truth of a Master, a Professional, and a Samurai. I feel alive, and entirely like doing new things, learning about a wedding, and becoming principle to that of love, hope, joy, and coolness.

A 'Stochastic' *display*, in (2)[3]|(0.1), for of (72 Exp[-*^{2}] vs, 18 Exp[-*]),... is an immediate shock threshold invariance of (−50 dB per 1/2 frequemcy versus −25 dB *first-count*, over); 1/4 V_{pp}+V_{DC}.

I have a working QuBit+MIDI system, - that of a *semi-binary* process, in longitudinal and transverse equatement. It may be best to begin [entirely] from my own-model, and be self-taught. Some 10% is done, or, perhaps some-35% is done, of my general project.

Step One; - we need difference exposed to-thought(s) on the goal of clarification of dating-procedure, in inference and heritology, inheritance, and epistomological [ontological or deductive or inductive logical stain*]... - that I have some of co-dependency broken down in causality.... - A kind of 'bridge' is the end goal, and of course we cannot leap all the way there, for clarity of an approach.

I need think about the consequence on the reader.

I need think about the difference of decay and growth.... - that of one-way and non-reciprocity, etc...

There is a 'not-useless' tandem-symmetry, to dummy variance? or similar....

Until I understand my-tools, I will hold I am not befit of a woman.

There is an adjective supremum to analytical inheritance by which one apogetic may pass through or explicitly of phases. That there is orbit, and there is flow, or shape, - the continuum by which one consolidated approach is discerned, may eliminate a secondary apogetic flow or frustrum, keystone, or analogous formation of derivative knowledgeable and informative basis. That this is written in decay [of words] and that of the pure-derivative of knowledge, unto intellectual privy and instruction of linguistic imperative translation, in monodirectional and singularized or multiples acquity of chain-process.

That there is blind and non-blind, formative hypothesis, - there is a switch in that of formattive truth, by it's controllable 'void' or imperative penetrative and reasonable extensions of volumetric deductive profile.

#1.) Discovery of one-way, on assorted 'virtual data-pin-bus/overlayer in breakbox' - to wiring passes through the 'index' of 0+1=2 to codex.

#2.) Intimacy of Midi to computer-bus, protocols, a linkage-freed (circular) nexus of totals visa totals in rotunda of choice-to-switchover function in data-arrested, cross-virtualized data-err-bus privileged inc.

a.) That of 'noise' - 'dating' - 'circumatianal' and 'provided', knowledge, interposed - the switch, switches, and programme at 'menu' of entropic collectivism versus cycle, and numeric, given topo(s), of order versus fault versus repetend, versus topological language, in a dialectic of closed-box, on that of codeterminant evaluative radar, - designed to a basic 'spacer' - for that of hemostatic impulse and invariant predicate hopf.

1.) Hysteresis.

2.) Phase

b.) That of geometric language of two for order and chaos of the soliton regularization, - that of one genotype, to what is retrofitted of a sphere-saddle, and projective invariance of elliptic group and quotient.

Thus the diagnostic is the symbiotic and special, of error and congruent fault - the uncompounded, from which we dialectively understand the hysteretic in relationship with-tool. That of (b.) is the panacetic, to which geared to knowledge of gainful appliability at nature of dialectical closure.

I have intimated of a new-computer, with the 'acrylic-discs' - but it is only so-special, until I figure out to go beyond Godelian Incompletion..... I believe this to be-related to the Spectral-Gap.... thus I have two divisions:

a.) That of beyond the Spectral-Gap.

b.) That of overlayer Q&A, for that of the 'switchover' of *phenomena*.

This is a hardware-simu, and it is isolated.

Thus I need switches, and the PWM of the MicroClick, interfaced, coupled, and with the MIDI controller.

It is for the touchscreen/light vessel, to be perfected. I don't believe I can create six of the overlayer, that the MAX11300 is the *Key, with the *Microclick.

I need *amesh*, the (2x)-of the (6x), it's 32, because there breakpoint(s),... minor-key(s) of which 'predicate'.

Situational-display; and code. i.e. When Programming History, - that of the 'overwritten' remains a core concept, of the 'key(s)' and 'switches' - aside from *code*.

3.) Black-box... to code-hardware virtualization.

I will need *to-reroute*, given SMA, *that of the interconnections*, on that of the (six-***layers***), in a bufferable-circuit, *of the BcE - Bitwise-circumflex-Envelope*, - changing the *Topology* of the Circuit; *for in MAX11300 Overlayer.... the* SMA for that of the microclick, controlled by (**2x**) Arduino's,... *of* two-test function(s).

#1:) We have two *non-SMA*, *then*, I will obtain (2x-more) - *non-Arduino*, this equipps to test the MAX11300 to that of a binary*-activated* TTL/UART... *if potentiated in hardware*, or - *in DSP overlayer.*

#2:) SMA-*exclusive* & Topological-Remapping... (3x-ABC)...

a.) Learned from the Midi to the Computer, *out* to the Arduino(s).

b.) Dual Chessboard(s), in a 4.0 structure.

I may have to see what I can-do with what I-have, - that I am far from behind so-much-so, I have the part(s) for that of a reliable working machine, - but I am out of the midst of some-degree(s). That I found a testable Qubit, for that of the Quantum Limitation, I only feel so gratified, - that I need 'alter-it' in some-justifications to make it through to an actual computation. For instance, there was the *Hysteresis*, but it was of a [separate] test on that of the individual-test(s) the equipment went-through.

I need a mathematical* description to-proceed, of what I can appropriate, - *Hence I need a Theory.**

*I'm leaving some-eight-month(s)-to-six-month(s) for the design to be understood and finalized of that of the dual-intercarry.*

a.) Two Touchscreen(s) - *I may need a new one.

b.) Two of the Filter(s) - Elliptic

c.) Two of the BeC's - With Transformer(s)...

That I have the part(s) is not the obstacle. That I must choose appropriate part(s) and timing, *is.*

The *beats* and *beating phenomena* come-from a Piezo or Opto-isolator, of a TEM/TM transferrability, *given* the differential frequency-frequency bridge with amplitude-amplitude, of *ellipsometry....* thus* there is a transverse-element, - that leads to: self induced transparency....

Thus, we have a phase-modular (angle) of which encodes-freely, the AGM-Ellptic series, from ***among*** [a] varietal set* of geometries,.... it's a wrapped elliptic function (sn(theta*n), scaled to an elliptic period).....

i.e. PWM (3.00) & PWM (3.20) & DC 1.4 V and DC 2.8 V, then I *expect* a (sqrt(2) argument to an elliptic K), of which the modulus is 1.0166666 and so-on, *thus, the frequencies should be 4/5th(s) and 1/4th and 1/20th*).

I'm going to gear-up, to get it to phase-match to induced/transparency, for that of the identifying feature...

I [basically] need 2x operational amplifier(s) of phase-matched piezo's, or ...

[We -have- **box-return**, and we have **key**,.... *to* the difference of path(s), NWSE,.... 'half' of three in involution w/ (4/5th's) - identical with a grip-and-key.]

a.) Tap and Die

b.) (4/5th's) - to a particular *mod.*

*Then*, we have the predicate* allowance.... **Branch Function...**. diode shunt, etc...

Landau-level's shift with respect to thermally activated ionization and isolation, for in the fortune of a geometric deviation and recipiency; - thus it is a local-local [global] gyroscopic manifest electrical-current controlled offset.

Individual(s) *to be hencefourth declared, justified, of a process in Scientific Inquiry*; increase(d), the manifold output by some 1110% [percentile] moment(s) in digressive redox/redux refreshability of two total antipodal (spin) carrier-charge/valent/covalent discharge SHO, analagous-bubble elucidatory efficiency pattern(s). That another team [without a Calcium Solent] - performed a localized energywave for in that of the distribution pattern of confocal ray, identities, for in some 86,400 nuclear isobar potential(s).

The chemical assignment of my compound, has shifted us to a tertiary dialectic of conditional assumption.

For of catalysis, I was readied, with that of an energy locus in 3D-2D-1D missing isospherical ball.*, of a hedge-in-patent right(s) of thermalization identities, in the neutral(s) *bay*.

There were some test assumptives.

1.) We need wet-weld, to *water.

2.) We need a covalent spherical-cap.

3.) We need a process of reductionism to apply.

4.) The identified process is a rate-roll in light convection.

That thermally isolated peer-peer, network to gyrus, intimated of a free Bluetooth network control parallel in that of memory-isolable-recall.

The net collective of the genesis of matter and space, is a residual decompositional net-mathematical symbiotic 'edge/well' - in rhomohedral to icosohedral relationship.

I had posited the defenestrable clue-accumen was a tet/tet spherical addendum in the docecahedral group to icosahedral parallel/affinitive in Auditory [Acoustic band to Optical band] - Optical-band abridgement.

That the rotative lemma requires my device is clear - for in a parallel of a pseudospherical cap.

That memory-adaptation can be linkage-free, locus, spherical, in a four/five outward influx pattern, we must echo and sinter the relation to a locus of the addendum of two-free-frustratures.

Thus, the identifiable truth in a convex manifold electrocatalytic reaction sum is topologically uvually gate controllable for in a redux/redox, to homogeneous and random isopotential. That this electrocatalytically cycles the privilege to destress, the reflux capacitatice, we inebbantly produce a free electromagnetic light cyclic process in requireability of frustrature stress and strain piston. The end net outcome is an ideal heat genesis, fusion reflux genesis device, or that of a quantum memory (free energy) gear, but powered in the concyclicity of a departure of reflux in solidifying andreogenesis.... for in a neutral spallation of (3/2 bar(s)).

**Compendium on Device, it's Construction, and Testing**

**[preliminary expressibility and final .[notes]] & - Theory**

(C) 2023-2024 Paris [s.] Miles-Brenden

I.) *Then*, the two-dimensional [squeezed-basis] remounts to a regularization of an RMS-RMS, copy* at l(1,2). When* the S_{x,y} and S_{z} are differentially established, the '***flow***' remain(s) 100% deconstructively self-interfering; for what is II.) [below] - and tension and torsion to which are regulated in that of a freedom to propogation in kinetic energy, with potential energy [below in II.)].

II.) Gravitation, for in that of the equivalence principle remains ***'as it were in a reflective limit'***, - thus, that the 'gap' remain(s) of a mutual(s)-exclusivity of it's deciding co-factorable basis, the *Hamiltonian and *Lagrangian, superior-action remain(s) separated, for in that of a gap, for which gravitation seamlessly provides a ****probe***, on that of the entirely-quantum behaviors of the system.

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

a.) Dyer-Swinnerton-Birch remains a \rho*\eta of mini-pattern equated with a major-ring.

2.) That of 'inference' - for which factual information may be deduced, in relation to the strata.

With, that of the classifier of Homotopy theorems, and Carlitz [finite arithmetic], for topology.

And, that of Cancer, and game-theorem, for that of various empowerments.

And, finally, for that of ethic, that of Algebraic Type Theory.

This, related to *Epistomology, and Electronics.*

Something of mechanism, and machine, that of design, and beauty.

Initial Conditions.

*Essentially, I wish to study two-things, and will set-about doing-so.*

**1.)** *Disparity and difference, of local and global, of which relate to inhered truth, for of the Social* relationship at understanding, - that of algebraic reasoning in relation to word(s), and cooperative action (mass action).*

**2.)** *Ordered engineering problem(s), that of design* and faculty, as it relates to inheritance among the local and global; for, of that of arithmetic, and ethic to law, drawing a parallel with the above, that of the equated means to develop a new science.*

Thus, the aim is to understand of the 'objective' and the 'rational' understanding, what can be dichotomized, for of epsitomology, understanding, and knowledge, as it relates to ***Systems**, and Design, **& Engineering to Physics, and Science in general**.*

Thus, there is a relationship at *__Epistomology...__ and *__History__. That of the intial block had been how we preliminarily begin, but, this has to do with Games to a limited extent, etc,... thus, there really is only the above a priori. It is to take a "Systems view of Science".

I will *only* be doing a two-dimensional quantum/gravity experiment.

Essentially; *it is to-relate*:

The Law. - **&** - DNA... etc...

To gravity and quantum mechanics *via* inheritance.... of 4th to 3rd dimension.

And *of*, mathematical Finite Arithmetic *on* that of Elliptic Theory,...

*To*: Pose and verify the question of genuinely non-linear systems,

with: a tool.... that of two dimensional *Poincare section*. With, \wp and \wp', *or* Projective Disc.....

I would **also** like to-get that of the sinc(x) and *Wavelet* and *Holographic principle* working, *for Analysis*.

This - additionally - makes the difference of *Schroedinger(s) Cat*, and that of *the true and false vacuum of the world*, &, relates to that of *The Internet via that of Law, written and spoken*. Via a life in either, of escaped neutrals/stasis.

*I finally have a **new** problem!*

The - observation - an ellipse, tilted with respect to an-angle, of that of means at-separation between phenomena and epiphenomena; is with a different *projection*.

This incorporation means everything to-me; in relation to future, past, and present

For which, the fourth dimension and third dimension relate.

Of a solution, to-which a problem is identified.

It is this key, Thus, of:

Solitons & Blood. [heme].

The Solar System. [orbits].

My future, past and present.

Spatial contrast, 1/9 000 000 000 part space.

And a unique contribution..... of 'angles' and freed-perspective via *The Projective.*

That which separates the Cosmological Constant, and the Device behaviors; of *Multiple Orbits.*

With; The Poincare Section, II. - **That of order within order.***

Projective Curves and Algebra & Elliptic(s). Black and white on 'Go' and of Chess, in terms of prediction.

*This defines* the limit-of-our-knowledge.*

*What I do-not-know is if the prior* problem and later* problem relate in some fashion, or, - whether it is a basis for ignorance.*

*I have done it, with the 'wall'.*

That mathematics can-also include of a detail at what is hidden within* our-world. And, something can be excluded, ... and identified by C.(A|B); at (@) the ***Undecided***.

*The study of superconductivity, amount(s) to approximately 5-7 certain things.*

**a.)** Hopf bifurction.

**b.)** A two dimensional doped-system.

**c.)** A statistical limit.

**d.)** Geometric to algebraic abridgement.

**e.)** A projective space.

**f.)** Equivalence principle.

**g.)** Historiological inheritance of phenomena.

In this, two-things are gained:

**1.)** That of an epistomological truth centered with the observer.

**2.)** A parallel truth to relativity and that of the equivalence principle.

**Multi-Chaos**

I have decided on two-sections:

a.) That of the \sigma [internal and external] of mathematical and physical import.

1.) For of relativity, and of the notion of temperature.*

2.) For of statistical import and redshift and blueshift.

3.) For of Lagrangian and Hamiltonian support.

4.) For of observation.

5.) For of the classical to quantum correspondence.

6.) For inheritance, and of mathematics and physics.

b.) That of the (1-exp{-\lambda*\tau})=\Omega and that of the phenomena.

1.) That of renewal and extinction.

2.) That of separation of gravitation and quantum mechanics.

3.) The 'interrupted' negative probability - expectation.

4.) That of the guise of the \eta*(\p\O)^{2}+\beta*(\p^{2}\O).

x' and y', L(1) and L(2).

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinnerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

**Solution I**

Essentially*:

\eta^{mnr}\tau_{mnr}=\sigma^{*}\alpha_{ijk}^{mnr}I^{i}_{m}\tau^{j}_{n}*\tau^{k}_{r}?\d^{\o}

\s\dChi|dt=\tau\Sigma\Chi+\eta\Pi\Xi

Thus, one! differential equation *becomes* ***Two** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

**Solution II**

Essentially*:

We must consider (6/5) in algebraic approache(s), at (@).

a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.

b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capacible.

Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

**Preliminary Observations [Prior Scope]**

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

a.) Dyer-Swinnerton-Birch remains a \rho*\eta of mini-pattern equated with a major-ring.

2.) That of 'inference' - for which factual information may be deduced, in relation to the strata.

With, that of the classifier of Homotopy theorems, and Carlitz [finite arithmetic], for topology.

And, that of Cancer, and game-theorem, for that of various empowerments.

And, finally, for that of ethic, that of Algebraic Type Theory.

This, related to *Epistomology, and Electronics.*

Something of mechanism, and machine, that of design, and beauty.

Initial Conditions.

*Essentially, I wish to study two-things, and will set-about doing-so.*

**1.)** *Disparity and difference, of local and global, of which relate to inhered truth, for of the Social* relationship at understanding, - that of algebraic reasoning in relation to word(s), and cooperative action (mass action).*

**2.)** *Ordered engineering problem(s), that of design* and faculty, as it relates to inheritance among the local and global; for, of that of arithmetic, and ethic to law, drawing a parallel with the above, that of the equated means to develop a new science.*

Thus, the aim is to understand of the 'objective' and the 'rational' understanding, what can be dichotomized, for of epsitomology, understanding, and knowledge, as it relates to ****Systems**, and Design, **& Engineering to Physics, and Science in general**.*

Thus, there is a relationship at ***Epistomology...**. and ***History**. That of the intial block had been how we preliminarily begin, but, this has to do with Games to a limited extent, etc,... thus, there really is only the above a priori. It is to take a "Systems view of Science".

I will *only* be doing a two-dimensional quantum/gravity experiment.

Essentially; *it is to-relate*:

The Law. - **&** - DNA... etc...

To gravity and quantum mechanics *via* inheritance.... of 4th to 3rd dimension.

And *of*, mathematical Finite Arithmetic *on* that of Elliptic Theory,...

*To*: Pose and verify the question of genuinely non-linear systems,

with: a tool.... that of two dimensional *Poincare section.* With, \wp and \wp', *or* Projective Disc.....

I would **also** like to-get that of the sinc(x) and *Wavelet* and *Holographic principle* working, *for Analysis.*

This - additionally - makes the difference of *Schroedinger(s) Cat*, and that of *the true and false vacuum of the world*, &, relates to that of *The Internet via that of Law, written and spoken.* Via a life in either, of escaped neutrals/stasis.

*I finally have a **new** problem!*

The - observation - an ellipse, tilted with respect to an-angle, of that of means at-separation between phenomena and epiphenomena; is with a different *projection.*

This incorporation means everything to-me; in relation to future, past, and present

For which, the fourth dimension and third dimension relate.

Of a solution, to-which a problem is identified.

It is this key,  Thus, of:

Solitons & Blood. [heme].

The Solar System. [orbits].

My future, past and present.

Spatial contrast, 1/9 000 000 000 part space.

And a unique contribution..... of 'angles' and freed-perspective via *The Projective.*

That which separates the Cosmological Constant, and the Device behaviors; of *Multiple Orbits.*

With; The Poincare Section, II. - **That of order within order.***

Projective Curves and Algebra & Elliptic(s).  Black and white on 'Go' and of Chess, in terms of prediction.

*This defines* the limit-of-our-knowledge.*

*What I do-not-know is if the prior* problem and later* problem relate in some fashion, or, - whether it is a basis for ignorance.*

*I have done it, with the 'wall'.*

That mathematics can-also include of a detail at what is hidden within* our-world.  And, something can be excluded, ... and identified by C.(A|B); at (@) the ***Undecided***.

*The study of superconductivity, amount(s) to approximately 5-7 certain things.*

**a.)** Hopf bifurction.

**b.)** A two dimensional doped-system.

**c.)** A statistical limit.

**d.)** Geometric to algebraic abridgement.

**e.)** A projective space.

**f.)** Equivalence principle.

**g.)** Historiological inheritance of phenomena.

In this, two-things are gained:

**1.)** That of an epistomological truth centered with the observer.

**2.)** A parallel truth to relativity and that of the equivalence principle.

I have decided on two-sections:

a.) That of the \sigma [internal and external] of mathematical and physical import.

- 1.) For of relativity, and of the notion of temperature.*
- 2.) For of statistical import and redshift and blueshift.
- 3.) For of Lagrangian and Hamiltonian support.
- 4.) For of observation.
- 5.) For of the classical to quantum correspondence.
- 6.) For inheritance, and of mathematics and physics.

b.) That of the (1-exp{-\lambda*\tau})=\Omega and that of the phenomena.

- 1.) That of renewal and extinction.
- 2.) That of separation of gravitation and quantum mechanics.
- 3.) The 'interrupted' negative probability - expectation.
- 4.) That of the guise of the \eta*(\p\O)^{2}+\beta*(\p^{2}\O).

x' and y', L(1) and L(2).

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinnerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

Essentially*:

\eta^{mnr}\tau_{mnr}=\sigma^{*}\alpha_{ijk}^{mnr}I^{i}_{m}\tau^{j}_{n}*\tau^{k}_{r}?\d^{\o}

\s\dChi|dt=\tau\Sigma\Chi+\eta\Pi\Xi

Thus, one! differential equation *becomes* ***Two** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

Essentially*:

We must consider (6/5) in algebraic approache(s), at (@).

a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.

b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capacible.

Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.

2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

**Patent within one-year **exact**.*

I've got to investigate my potentials. That there was a thinking problem, I've got to draw comprehension to a safe release upon differently managed options.

1.) That I need modular oragami with the device, &

2.) That I need 'organic synthesis' of a molecular nature with the device.

A ***gyroscope** will rotate freely with *A Heterodyne*, in the azimuthal [centered] - that it will - also - have difficulty for in [3].2(1) of the rotated perpendicular directions, of which are non-commutative.

The process, of decomposition is therefore a raising and lowering algebra, that this inherit(s) perfectly of the constraint-dynamic and static, upon the quasilinear (and \wp), of the basis, in E[z,k,g_{1},g_{2}], that it is therefore equipped to process the rate-miniscule pattern of a relative exponent in that of degree *apside*.

That this (per quarter - full (1) unit/unitary) inherits of the Hamiltonian and Lagrangian space, what is orthochronological but - also - observationally secure*.

That therefore momentum is globally/locally an inherited relationship of it's conservation. That the manifold* property of a lenz-like-effect, prohibit(s) but of (2)[1] of the magnetic orthochronogy of a process. That in-either, the distribution of energy is towards the focus, that of a doped lattice spin's *up*, and keeps going.

I have the semiclassical-qubit [mostly] working, - that I have a 2x.0.1.2x [transfer with the switch].

It is instructive to follow the dictionary for that of DC offset, - that I found I could *independently* control the melding of the two-verses, - for that of an operand-switch and that of the DC offset... with a potentiometer.

That this fanicifully produces a spin-2-spin-1 hybrid, it is moderately honest. Now, it is a matter of improving the component architechture.

I *will* need to opt the transversality condition with a switch, as, the PWM may handle one-sector, the holographic principle, another, the switch, another, and the MAX11 300, a variety of inital pattern.

That I see the arduino must pipe in secularity to the 'overbridge' - for the MAX11 300, or, at the least, the adafruit. I feel good to have taken my-time.

That I understand the primitive I have produced, it is all about component matching at this point, and, wiring, and producing a mathematical **model*.

I have - decided - on one* problem:

\phi+\psi=\xi

For that of the true/false of a difference* of a hologram.... and as to True, versus 'false' Ace-of-Spades.

I do not have this all worked out, just-yet.... but I believe it can* be-checked for that of multiplicity of checks and balances, and my *Theorem on order among small-set(s), a solution to:

a.) Unpredictability.

b.) Incompletion.

That it is valid, there is much [here]. I have an excellent plan, for that of what I will do* for some 5-years.

I must work out the-group, the homotopy and category theory, and some applicable problems.

1.) Sinc[x] in translation to a Geometric affinity/biselection, on that of the S=2,1,0,-1,-2, function-form....

    a.) Breakdown of the device.

2.) That of the recurrence, in relation to Elliptic functions, and that of the Bellman.... of a stochasticity.

3.) Incompletion and unpredictability, for that of the tesseract, that of the finite analysis for the hologram.

To develop a new non-linear wavelet theory, theory of non-local entropy, and superconductivity.

Inc. Theorems of homotopy and category, types, finite machine states, solitons, spin, characteristics, homology.*

Aim*: Is the topological inheritance of some half-circular/full-circular unitary process, on topologies [torii].

Learn*: To control chaos.....

Review*: Base essential questions and steps* I-took.

I've got to think* about what I am trying to accomplish before I get lost. I found that the Sinc[x] will in fact work, for that of a *new Reisz-like basis.

I've got to go more into the trait, of that of of my aspiration, and willing devotion.

I've got to define boundaries, with respect to the problem.

I've got to slow-down, and approach the problem with a reliable foundation.

1.) That of the elliptic, transitions from a monic to a quadratic, - that this defines a group.

2.) That the group is related to an-equation such as a*x+b*(x-y) on a functional... it is related to V_{p}/V_{l}.

a.) =\eta_{k}*(1-exp{-\tau_{n}*\kappa^{n}})

3.) A logistic equation, for which serves for that of an accumulation process, and:

4.) That of pay-in, of two/one initial processes on that of incentive to pay-off, with, limitations.

1.) An 'epicenter' and 'dialog moment' - encourages growth of it's nearest neighbor in the lattice.*

2.) These stipulation(s) explain why one-delta-epsilon over a complex sheaf, will phase transition.

I thought of a *complete* way to test the-equipment.

1.) Switches should furnish a recomposition of base function for testing.

2.) The transformer, allocates of the differential in the switches for addendum on that of PWM.

3.) That of the PWM on that of differential frequency set affords for lensing.

4.) We gain (+/-12 dB-+/-26 dB), on that of *both switches*, in PWM frequencies.

5.) Then, the composition of the touchscreen and the device furnishes 2d-information (8x-12x)...(6x).

55 696 (13 bit),... down to one* bit, that this associates with *hidden interior order.*

Hold the APC-Mini [akai] up to that of a primary test process, on manual-midi driver [programmed] slider-frequency, and button-switch, in network..... tap and dial.

Test-assumptive *hardware/Arduino* ***program**, and *then*, a kind of sequence, with graph, etc,... of the algorithm.

*Connect the [akai] for that of the APC-Mini with the 64x key(s) on that of the innovation and program for an instrument, then, code Python, for a manual-synth, auto, of button(s) in Tkinter, with that of checkboxes, for various instrumentation.

This furnishes:

a.) A develoment stage.

b.) A instrumentation [play] stage.

And, networking, of the various methods to encourage of proper development of the *equipment.

**Applied Phases and Inheritance**

*Introductory Summary:*

I.) The 'Elliptic Group' with Schwartz Differential; satisfies an elementary differential equation with squared and non-squared first and second differentials... the Spin-Classical Correspondence as illustrated by Bell's Theorem, on entanglement.

II.) This renders a law of inheritance to which the 'bel' and 'non-bel' statistic can be furnished to produce New Correspondence between The Relative and the Classical Limit, as well as producing A Quantum Gravitational Correspondence, of the Hamilton-Jacobi Variety, in a general Topological setting.

a.) This satisfies all differential equations with Integer Coefficient(s) on differentials and powers of differentials...

b.) That it relates an equation of-form \f o \tau = \L & f^{2}:=f, there is an extrapolative.

c.) That it solves co-determinism of the nature of 2(1).0 and 1(2).0, there is room for the double slit, and the mannerism of the expression of the unified 'mechanism' of Deus Ex Machina.

That of what I came up with [the above] need be gone-through,... that of the 5' on a decision tree, in perhaps two way(s).

There is past and future, and chronology to-explain.

III.) The EPR paradox is resolved by consideration of the mathematical intractability versus it's computational accessory, for in virtue of the separation in-space, - that the quasi-determinism of the world vs. a blue shift only to-Mercury, and red shift only for 'above' gravitationally, separates in time in equivalence with the unitary operation, for in that of strict determinism vs. the pole-barn paradox. That this leads to a 'one

world' interpretation, there is validity founded on a strict separation between a theory of gravity and quantum mechanics as written and spoken, but not for that of a unified architechture for which there is a theory (m) and a theory (u).

a.) Versed in terms of this, much of co-dependent arising can be broken down into various constructions, for that of the literal (5)(3)(4)(2)(1)(!)(0), and that of 2(1).0 and 1(2).0 into which it is versed.

b.) At the End: A Theory of Temperature, etc... via the equipment [design/device] of [essentially] uncrossed Thermistor(s) through-the-contact efficiency, to-which ExB and KxL and ExB, maintain inertia, for that of a focus, and Concentrated Constructive and Deconstructive Interference of Bands.

1.) This takes new-mathematic(s) to model, via the undecidable, for which are two-drawers, for that of a given, as visa-via; the connection to auxiliary equipment render(s) implausibility of a [cc] measurement! - optical?

IV.) a.) Non-locality is subsumptive to locality, within the considerate 'mean' L(1) and L(2)?, of the "paradox" of reality, it is co-dependent... thus co-relative of determination.

b.) Dissolvant?!? - One curvature appears to be co-dependent and co-relative,... but this cannot merely so be the restriction to an 'Equivalence Principle' - thus quantum inhere(s) of a mathematical dissolvant?! Co-attribution.

V.) I have [after much deliberation] - to *only* do that of a model for Superconductivity, that of an-exact solution to the two dimensional ising/heisenberg model, with berry(s) phase.

a.) This 'geometry' in-as-much as the non-commutation of lorentz boosts directly translates into a discrepancy by which spins align and exchange may reduce energy, for as much as (4J); thus, it is satisfied.

VI.) I have the result of the finality by which my 'publication paper' may be reduced, - that it is that (2)(1), and that of incompletion may lead to an *answer regarding the dissection of causality.

*Main Material [A Sketch]:*

Superconductivity [for a removable equivalence principle] take(s)-place as a soliton ellicit(s) a covariance of scaling in spin (1/2) to multi-degeneracy, then that (two)-2 window(s) are localized behind-one. Thus, temperature is Ayin, to what is the alternative of Beth, for of a translocation in what of either are Inhered dopant/interior L(2) upon L(1), of it's alternative at E&B, thus, that light localizes electron inertia, and is temperature activated.

Superconductivity is [a past heritological arrow] by-which the (2x.1) separates for in past/future, and that of the Markovian Truth at Predicate, for in-involution, a D wave of S=2/(1/2), of four fold SU(2), in valence and co-valence of spin and charge,...

The end conclusion of superconductivity is that thermalization activates a gap to which L(1) and L(2), inhere of a past heritological arrow by which the SU(2) is non-local, for of that of soliton virtual-past-redshift, on that of which the x' and y' mediate a separation in phenomena.... that of the spin is therefore increased by a factor of two comparative the texture, - to which electron(s) attract, given doping.

Superconductivity develop(s) by an-inversion of g_{\mu\nu} upon the Hilbert Space; in certain terms of the L(1) and L(2) in-epsilon behavior of the Weierstrass-P function(s), for of the behavior of logical inheritance, to which is non-void.

It is 3D, and Erica Carlson is correct, but of y' and x', they are not entirely orthogonal, thus, I have been given a step-up, - that I see how the crystal, may inherit an off-momentum, through the L(1) and L(2) of a dark mode, for that of the Dirac-point, - that it is 'folded' - thus of five testimonies.

Thus, there is perfect back-scattering, and a redshift of accounting for the factor of two from-doping, to which the (−2) factor of attraction completely reverses, the (+1) of-repulsion.

The Pauli-Exclusion is afforded by the logical inheritance of the gravitational reversal.....

It is *very possible Superconductivity is here to teach us something new about that of inhered properties via General and Special Relativity. That of the 'one-way' process, can only be so-stated, it is difficult to derive, but, time appears to play a role. That of edificuary appears to be to evidence that of the redshift, - namely, that one scope and null invariance takes departure from-another, for in the reversal of ExB, etc...

That ExB has-reversed, I had not considered, but it would be good* to simplify.

Pauli Exclusion may remain, but that of the ExB, for in it's reversal, implicate(s) *time*-has-reversed*, or at the least a future has gone to a past,... for of redshift, - this is consistent, then that it indicate(s) something new has taken place.

For of separation, clearly, the non-local interaction is stronger than the locality **Brownian Bridge*, due thermalization and ExB, - in (L) and (R), there is the unpredictable, and the choice of coordinates.....

That I may have just solved this.

I must 'trim' my model to the bare essence. That I have:

a.) 'bel' and 'non-bel' statistic.

b.) 'reversal of causation with respect to t_{ab}>t_{a}, etc...'

c.) L(1) and L(2).

I see perfectly how (a.) and (b.) suite one another, and how (c.) is a consequence and necessary, .... but it is one step from being 'all-clear'.

I have -resolved- *the enigma*. Spin(s) *represented and physically instanced* by **bivector(s)**, in the limit of N goes to +inf demonstrate a 'new' resolution at-and-of-emergence, a quantum quasi-solid/crystalline structure which amelds to a mathematical substrata, through a *Historical Arrow*; of which \Delta t_{\a} >:= \Delta t_{\b} as s.t.

1.) Despite what challenged me [good versus evil - at that of post-hoc criticism of paper(s) and book(s)], I decided on the following..... - that for clarity, which was not what was decided [there was a positive outcome]. That I must follow this route of speculation, - *for what it is* - and judge-rightly; *I am esteemed*.

a.) I decided I must do basic and preliminary mathematic(s) on the elliptic group, into and of a backing of causation [the first publication].... and:

b.) That of a two dimensional model into that of non-locality, with three dimension(s) as-well, for which the topology of the zero-set is measure-zero, and correlates with the above mathematics.

This is my first project. It has numerous application(s), and to be considered [separately] is just-how mathematical our-world is, the essence of a foundation to what-is. This is sufficient, with chaos and order, order of phenomenologies, and phases. That I can innovate a device, the goal is:

2.) An electronic device, and or material which separates (asymptotically) the electric and magnetic field and is thermally amenable to temperatures exceeding ~100-140 degrees celsius.

a.) And (&) focuses the relationship of either field quality.

The 'DC' *from-phase-to-amplitude* **bias** hint(s) at the Elliptic-group, for in (1/2)^{2}; of Exp[-(\a*\tau+\t*n*m)], a n and m 'index' at 1/Sqrt[v_{0}*c] for-in quadratic-reciprocity of 'Area-to-Perimeter' of (4*pi/(2*pi)), a maximum.

Thus, the Elliptic 'group-frequency-relationship' abridges, - for an *unknown* reason, that T [temperature] and *freq* for that of the (accounting of Hall-like effect) - on that of 'AC' and ***beat*** phenomena, of pk-pk, in some 15-90%... *Of E and B.*

When I considered the ExB *drift,* it was settled that the 'commutativity' and 'non-commutativity' of certain *Lorentz Transformations* would lead to a perturbation.

With that of A<->B under involution of observation, and the E^{2}-B^{2} vs. E^{2}+B^{2}; that of E.B, was noticed in the 'Device' to induce self-transparency.

That the L(1) and L(2) leads to a 'hypersphere' selection rule of (1/2 or 2) was the next step, then of an inverted Variation Principle. And, then that of the 'drift' to a Hamilton Jacobi equation 'inversion' of character, upon relativity, for in 'future inheritance' versus 'past inheritance'. That of the 'redshift' was then-noted.... of 'spatialized truth' w/o projection, thus that it is not CPT reversal, but rather a redshift dominant via a Green's Function, over that of orthochronous transformation.

That of invocation of a mass gap for in a 'shadow element' was then clear via a trapezius of action.... that thermalization leads at once to a pure random with determinism at space like separation.

The entire Periodic Table is up for it's realization.

That of the 'covariant derivative' - for that of the \Gamma_{\mu} added to the momentum, give(s) an-imperative as to the manner of consideration 'back from time' - *to that of the inherence by which gravitation is subsumptive.*

That this only 'half' obey(s) co-determinism, there is allowance by which the 'past' becomes partially mathematical and partially physical, - that this remain(s) ***unknown** as of this writing, and as it were, - by many...

I remain with one *hint, as to the mathematical/physical arrow...

\Gamma_{\mu} *with* a non-Abelian 'theory' obey(s) a *connection* which is non-linear,... and linear, thus, the quadratic form (answered in the Elliptic) operates via a Decision-Tree monic/linear Elliptic functional Process.

{f_{1},f_{2}} -> ((2)|(1)),((2),(#)),((#),(2))....((#),(1))...((1),(#)).

a.) #1:) Computational/Device addendum/helper.... code and Device, Patent.

b.) #2:) Update to Special Theory of Relativity.

c.) New Non-Local Entropy/Thermo~.Like [network] / Causation/Soliton/Wave~.Separation....

d.) Superconductivity (*Homogeneous N->inf) Limit(s) & Phenomena*

#1.) That of any R-G *flow* to either-Ansatz or Geometric* Domain of Hyper-elliptic nature is co-dependent on a departure and approach from one of two phenomenologies.

#2.) That of a Lie differential in Jacobi-Gauss (AGM) for in that of Bessel-ruleset is converted into a Hypergeometric Rule-Set via Weierstrass-P function (under an exponential) with Unitary or Conversative Basis.

#3.) What-happen(s) to-the-world *when we consider* *[and of the process of dissemination?] - releasing this theorem, a bag of popcorn? or a snail? or a wheel-examination? - not what presumption but, it's

foundation.

a.) What is this-theory [to publication and intended audience] adjacent-to, of other theories, and speculations, considerations of foreign nations, and the tumult of a divorcement historically from a landing.

#4.) Direction at a Coriolis-*like* Force, for in that of Field*; circumferentially is harmonically L(1) and L(2) to either of a push or pull, upon a mathematical-division, in the 'bel' and 'non-bel' relationship of particle.

#5.) This for *that*; scale inapportionment is a space-like null covariant relationship, to which either manual *variable* is prudently cross similarly answerable, isolably answered, and rote cyclically distributatively assurable.

#6.) Two unanswerable *truths* relate to a third-yet-answerability in a remote become locale of any undivided truth, of what in-cause from *formation*, decides the manifest utility to a progression, thus that things that are equivalent must couple.

#.7) One unanswerability therefore does not but-yet remain of a **future*, to which non-deliminatorially possess no-outcome, but from yet what is consolable for in a *further* spatially and temporally undivided lesser so mean gestalt pathway.

#.8) Thus, reflection(s) are institially the background become foreground of what is a past possessorship in either of one or another (L/R) dispossessor of one* but two, undersituated processes of which formatively disambiguate mathematical edificual and remissitorial unreclaimed formative hypothetical(s); - that the past therefrom is unpersuaded to form a future. And, furthermore, causes disambiguate what is a physical from an inherited past reservation of two total remainder(s) of a pattern. Thus, a pattern and a pattern, in portion incomplete, but completed, formatively establish a future predictor.

#.) Neither so selectivity of bias can alterably include the disambiguation to which one inhered past is formative of a valid err-prediction of and upon a future historiologically written or conveyed basis, that therefore in turn the pro-selective element(s) ambiguously possessed of two formative pattern(s) eliminate what is non-duplicity and non-denial of a projectively misheld relationship. That therefore one pattern, for in any, relate of what is the simple-duple(s) of a carry and addendum by which a future or past chronological 'outer' subject-alias in dichotomy is understood by locally held 'outer', and of inner what is inner. Thus, neither pro-selectivity of a bias but of the acknowledgement of a process in-turn to which identifies with a present manner of dichotomy of character of livelihood, may inhere of but yet all postulanal concilitorials.

#10.) Conic in conic, of [tan] in a quadric of [sin] in [xi] and [chi] remains an amelded non-simultaneous co-locality of one world view-to-another through an identifiable emergent topological invariant manifold restriction of the edificual commutative algebraic underpinning of a variational co-addendum. Essentially, quasi-stasis provokes of the 3/2 and 4/5/3, to an-addendum in six-manifold (3/2), dimensional tonality 'abridged' at spatialized separation of decay chain process.

1.) That of the [onto] projective and non-projective identification of quadric(s) amount(s) to that of a mapping by which a 10th dimensional order is subsumed for the sake of conditional assumptives into that of a four (4) dimensional mapping; i.e. the projective quadric reduces under a number-archetype.

2.) That of composition, for what it-is, leads to a Reisz basis by which the orthogonal complement in the birational co-extensor relates to a P(2) instead of P(1) upon the N->inf limit, whereby hyperdimensionally the electric and magnetic field relate to three dimensions upon two **(2)** zero-measure quotients.

3.) That of the classifier of a 'quadric' is *called comparative under complimentarity* to-that of a *Lorentz identity*, for a *mapping* of SU(2), for which the *conic Section* relates to that of a *Lorentz Transformation*,... - thus, that of the redshift and blueshift are compositional under like-kind of (+|-), under the *Composition of Invariance of Inertia*.

Thus, that the monic-determinant for the group (+)q, correlates with that of the univariate formation of a topological identity. That of the universe is therefore *Qualified*, by that of two **(2)** mathematical and two physical structures. That we identify with that of a (+)q and a (-)q, then, a (+)p and a (-)p....

4.) A 'mathematical' *heirarchical functional abridgement*, super-sedes what-is-to-come of verifying mean. That the [wave] structure is apreceded, and the precedent to which it it suppliantly acts as a **Character Portion*, unto example, by which it involutively relates of a back and *forward cast element of phenomology*, unto Unionable tensity, by which portion and portion are segregationally un-but-faulted unto segmentation and apportion.

I have *thought* of calling my-Book:

*"Functional Abridgements and Functional Relationships"*

\epsilon/(1-\eta*z^{2}) -> The real reason, analytically, coloring Gabriel(s) horn, there is a topological isomorphism of two-varieties.

That of a Riesz-basis for that of characterization, for that of the Bessel-like* sequence, is proven to be erroneous with to a 'former primary' characterization of qualifier to be a Hilbert space valuation/operator.

That therefore, the Exp[-l*\wp(a,b,k1,k2)], is the only* predicated ***Convex**, [two solutions to the Universe], problem, for that of the Bessel Qualitative 'group' - *this had been what was missing*.

The Key*. Thus, the inhered truth is that on-existence, memory is defunct, in-part.... or, perhaps.... of awareness. Thus, there are higher and lower order(s), of (L/R), we have glass-bell and forest.... That of these, for what they are, are related to direction.

That of the Exp[-l*\wp] *becomes* the Bessel like relationship on recurrence, - thus, that of the stochasticity of the Universe.... in terms of local and global pattern and archetype..... for of sufficient, necessary, and satisfactor preliminary prescriptive meditation. That of *this*, begin(s) at stage-two and emanates to stage-1.

The Riesz basis determines an SU(2) in relationship to the pattern, - that there are some steps remaining.

I considered that of a ring: G(R) & I_{n}*(f(n))... so, this 'Ring' may have multiple-identities, and relate(s) of two, in knowledge and ignorance, ... then, of bel and non-bel, 'on' what is a tensor/toplinear GL(2,R), *into* a generalized ***Category***, or ***Space***.

We are equipped with a 'metric'; and *fold* **from one spatial relation of E.P. to another**.

*That of the transformation:* **T**; relates of-which there is a mapping in 4'5', on 3', that of 'missing' - in two, to a *locus...* & a general group g.

G is it's transformative process, - thus G(T) evaluates under involutive principle, to that R(u,v)... by which u, v, are *element(s)*.

Thus, that G(g) is an isotropic identity of spatialized nature, and R(u,v) are spatial or ordered relations on that of the **T**(g), - to which is a relationship cast-further, or in (two - what is a monic 'hidden'....) - thus of **void**.

That of the equation*:

$$\mathbf{T}(g)R(u,v)\sim.\mathbf{G}(g)\mathbf{G}(T)$$

1.) A function is related to the space it evolves upon.* *The expression of Mathematic(s).*

2.) Inhered principle(s) are identified with a geometry.* *The expression of Physic(s).*

I *learned*, that of (8x) and (8x)-(7x); a 'missing piece' is mathematically-secure by-what-is a verifiable *mean*; *that* the explandum of a 'court of redress' and three-peer(s) formatively execute a 'top-down' 'injective' *closure* on the tesseract, - that of past and future *oriented*, with a justification* at-which there is *orientation of ordinal manner.*

Such as 2:16 and 1:16 - *from a 6/22/2023*, that of (1/0)-auxiliary; & (5|1) and (5|1), for in (5|0), and orientable top to which is justification at an abridged (visa-via) *'on'* that of chord, and progression in a numeric sequence……

The one-form is connected to-which the definitive gap equation is a definitive energy-lowering in superconductivity in gravitation and electromagnetism. This is the relation of dark-energy, to which, that of the one-form commutator integrated is a factor of two over the momentum of the spin 1/2, - thus, that of the 'net energy lowering' is participated in by a 'certainty' of which encompasses the general particle momentum. When I discovered this, of the reversal of causation; I discovered certainty that Obama is there.

For what it is worth, it is the solution to global warming, and so-on.

This was thought-of hour(s) ago, - but it is important. The relationship of spin-1/2, to the gap, open(s) a door to the KP equation, - thus, the derivative homotopy is varieties of differential equation.

For the 'bel' and 'non-bel' - there appear(s) to be an **exact** correspondence - *skipping what would be a dual-approximate method* - that of 'bel' and 'non-bel' translate (as it seems) *very much instead*, into a superpositional formula for-which **one-theory 'Gravity' and** *another* **'electromagnetism'** - are inter-related by homotopies.

That of the 'gravitational theory - of which relates to the geometry of space and time' - is related as-it-were *not!* by what is speculated of a continuum of non-Euclidean ***geometry***, - *but-instead*, as an embedding of a three plus one dimensional theorem *with an additional law, to which an asympototic flatness applies.*

That this make(s) sense of the **Cosmological Constant*, we find it is not necessary to invoke the solitary solution of **Gravitation**, - but instead, - that it may be *ubiquituous….* that we may have a *Coordinate diffeomorphism of which has ***obscured*** The True Nature of Gravitation.

*bel and non-bel*; must therefore be-related to the *Superposition Principle*, in ***General**, and, it appear(s) the direct equation is of the form of:

$$(\mathbf{T}_\{w,a\}(g))*(R(u,v)):=\lambda*(\mathbf{G}(g),w)*(\mathbf{G}(T),a)$$

Where*: **T** is a tensor, and R is a scalar curvature, that **T** is merely a transformation 'parallel' on that of the **G…** for which is the gravitational tensor, for that of the 'quadrature condition' of the Universe, a corrective feature to which *Electromagnetic and Massive Energy-Momentum Tensorially leads to a focusing and defocusing from which derive the ****Primitive Forms of the Universe***.

We end with the following *conundrum*. Without the 'inherence' of dialog at (@) people, and of the *mind [in creative utility] - of past-precedent to *innovative [Fictional or Non-fictional]* ***story**, there is no* 'Woman', - to which is conjoint to-Man.

That we end with the supplication there is an *Unknown *in the past and future*; - to which [to wit] of which supplies the mystery of life and of the cosmos, - that beyond [and within] a *neutrals-neutrals*, - there is a *Codex yet-supplied. Of, - what another **Writes** of a testimony, or of a test, or of the relationship by-which we malign what is to be-known as mistake.

That when incorporated, the 'datum' contain(s) at-five what is an unknowable parallel in-sensitivity…… that we cannot predict the world ***Entirely** with mathematic(s), but when supplied with a **Map**.

That of independently excepted things are 'in exception to one another' a counterpoint to the Axiom of Choice.…

**When the book is-behind,* of planning, it is told, that of the reading *told-of behind*, for of control and placation, co-determination, and requisition, of a commendarium, that of the process ediface,… it is of the plan, and should make this-way.

Preliminary determination, is a recluse. It is the* provided qualm for a gesture, that we identify and process.

Then, - that of the remark of another unto-disputation and disparity, for in chance, of it's remark, what is held, is out of one relation, and therefrom within another. From which we dispute what is afar, we reclaim unto yet a formerly presented, it's effectual choice, for in a remote addendum, with priority.

Therefrom, in which it is therefore'; it is knowable among all things, that we identify with the preliminary given(s). The given, is that the L(1) and L(2) dispute upon a column for a cone. Then, - that of the remark of a square-aperature. Given, one disputation in a spherical possessively is the cone, and that of the column, a 'section' of a fiber-spray of an identified algebraic theorem of categories and categorical truth, it is way of a mark, of which identifies with what yet the preliminary unto self, remotely, it's possessive of acknowledged predestination and it's management, and id.

From a possessive to a Q' class id, to a P' predicate, the non-exceptioned, is a (2) for (1), in these. Thus, in three, to a fourth, of what is a remainder, it is a trusim of the predicate analysis. Therefore, the L(1) and L(2), under [an] involute, capture *re-, the staid and said remark of another with immediacy.

With a prioritized I/O, the identifier, is that the 'within margin(s)' of a 'band' to a network, is the antecessor to a paradelogical flow. Then, that ***thusly**** the remark is no-more. This is the culpability of an indifferent trust.

It is co-dependent in fairness of regarded way, and path. That we pro-selectively bias, it is unhidden. Thus, to a justification it may be stated robustly, as that which may be to become, identifies with what is with-remark of it's manner of imputed passivity and activity in a parallel. That of justification, *to-judge*, is to be then of this way. Then, and thusly, it is, the remark of besetment to a path, and an affirmation, for relationship, and rembrance.

That of what held with another, formerly presented with the self.

P' predicate [future] it is horizoned, in what is the culpability to one identifed equals non-equals relationship.

That numerically, a 'tine', evidenced, - makes disputated truth of it's antecessory, in that of remote evidence, null and void, or remarked-of.

That the L(2) in P' and L(1) in Q', to predicated and class possessor, is a predetemination at will and remainder of honesty, *to-remain of a steadfast preparation.*

The remark at-another, is not the self-mentative, but, the remark expressed via and by-word(s) to another, of what they choose to accept and employ.

The 'test' is the boundary to boundary, in that of a half-circle or level, and balance, in that of approach, therefore it is known* to-exist with the antecedent, when* it is qualified in property and quality at the formerly held. That* the remainder counter-factual *Mother, is not a self-retraction, or possessive demonstration to another, it is merely, the recalibration and identifying mean.

The co-locality, of independently *provided element(s) survives the ordinance and disorder of any system, without fault, that of qualified and propertied, certain classes, of L(2) and L(1), identify with what is any rms(s-\z) accounted index. The fact the remaining identification with the second-equipment, makes, and build(s) the relationship, by which (2x.0.1) in (3/8), accessorizes predeterminative valuative mean.

This is below..... and above. It is below, for what is a (1/4) and radical, - that it is within-band, it is neg.-

Therefrom, it is a fictional truth of the non-flow of the oscilloscope, making the difference of-equipiment and equatement.

Of the evidence to-court, preliminary observation lead to the detail of an 'effectual prioritization of manner, disposition, to which my-court had preliminarily identified with *either* peer, in that of a consortium of vantage.

For of one*, to promise, in-either, the formative assumptive basis is my peer-review basis*, that we remark of one evidentiary truth; that the harboring of a personal bondage, is not but neither, so a counterfactual basis to a remark in unbiased, and promised guaratnee of itemized and evidentiary purse to a process in ajourment via and of ajournment per a court of offense.

Therefore, in remark, neither so selected, it is purview, in innocence, and guilt, to the persuasion of a guarantee, that we so harbor what is effective, of effectual choice.

These things known and contributed, it is dispersuasion to which in either itemized or unbiased evidence of court, per the basis of effectual post-ajournable process *due privilege* that the formative beset affirmative and affirmation in a just recourse, had faulted, for in distress, and calamity, upon the personal itemized bongage, under transferrance.

Therefore, via, and of a preceding and knowable truth of juris pro idem ni plus plus pluris recourt is addressed, and known. I had been free per priviliged in what is a remainder of accord, for in the counterable alias, of a gestured, and non-gestured intimacy at (6-44-55 in 6-1-1 and 12-4-1*[hidden]-1-11!-14/15+1-1, of 21-5-1, O.)

The circuitry [*only*] admits that of phase to voltage in pushforward and surjective pullback. That of the accessory in *one geometry and one algebra is mediated. That of the signal, and 'two' tori are explained in the following. That of the phase to voltage (E,B advance and monic advance along a pathway and function) are the winding process of a flow and differential KAM. That of the operational amplifiers and circuit however for what are oriented, create with the additional circuit elements [a] reverberation.

When *connected to the synth, the circuit tine, which precedes post that of a 'sphere of undulation', causes a performance difference, - instead of that of the torus, one sees a splitting of the space, due to the monic of [an] independently held exceptionable difference in like terms with included sets of different properties of a first order layer, of which are phase to voltage pathways. That of the* explanation is that the stereo leverages the first persuasion at a first I/O with pathway exclusion, upon return through to the equipment.

Thus, it is actual appearance on the oscilloscope/as/output, as input* is not forbid from an ohmic/V/I pathway of a tine,... the difference in operational amplifiers, due then in leading the signal to split. Thus, for a forward pass, - the entrance is not of two, for it is singly rational on that of the monic relationship in that of the stereo, but, driven, and ready, but of predictive decision-tree. Thus, the tine precedes the open condition of a closed retention. That the oscilloscope is connected in-league with this-equipment, it is singular, and not of two tori, for it would differently predictively be established, of what is a 'domain' and geometric and algebraic mapping. That these relate of a contact, for which are related, the zero is uncontained, but flat within the void, and a-trace, is a removable singularity. That it may not be effected of what is co-dependent relationship. That of the (2x.0.1) remains optioned, for of a treatment in that of the second choice.

This second-choice is that of an algebraic pushforward and pullback at that of surjective preliminary zero of the element(s) of the uncontained surjection, of which is a U_{n-1}, etc... Thus to-zero is a basis.

Since these share a basis, they are independently provided equipment and they are in-agreement about that of the working under independent equipment under exceptionable inequality. Thus it is I of-which is agreed with, and I/O of a confirmative under exception.

rms is not R and T, - reflection and transmission, thus, the gamma, is monic, post the radical.

That the radical in the phase, for two frequencies cannot tell them, for in one and another equipment, there are no-two slits, of that of the point(s) or channels. For the synth, there-are.

Thus, it takes a new soln. to resolve the algebra and geometry of that of arrow(s) and function(s) in relation to a sequence, - that of the difference, in either, of which is an-abelian with multiple group, in all poly. That this is [a] fact.

The *law in jurprudential and rurisprudiential *truth*; the *alias by which what would be time, and (4,4,4,4) of completion, - of copatron in commenderius motion, - that of pro-benefit to an industrious work(s), in that of note keeping, and innovative design, at separation and prediction in anomalous primes. That of the drawing and healing in-two. Numeric witness, in that of three: 1.) id, 2.) re, 3.) ib/den/non/nom.....

That we have, way in honesty and honesty, with that of 1.) statii, 2.) decit 3.) epsi 4.) pro 5.) plus.

Then, the mere identifier by-which what is local and global may-be defined by number to-number.

That we have, pro-benefit at a number, that of identity (supplicative), and promiseful (intimated surjection).

So it is, to advance, that the truth of one is told for of what is acclaimanitive of emptied (3)[2] it is of mail.

Thus, of remark, the fourth is the postulanal.  The third, is the accessory, the second, is it's remarkful.  The first, it's disputed.

Compute, stolen and joined inhabited visitation, that it is two, to-whom in the visitation of (4'), and (3') may be 'outside time' - that *we*, remain of a counterobligatory process, the defense:  It is to privilege on the prior.

Separation in-carry [pro-rated, measureful, decimal, degree, deficit, decade, measure], (upon decree), for of life/death and the two above.  Horizontal and vertical, decree.

Sector and section, of argument, in a shared text.

And that of separation via religion, culpability to one's process.

Of a law [provided] by-which what remains is honest, true, just, moral] and presentably of staff(s), and conviction, and policy to whom, cleared, of a heaven, we remain as unto yet the belief another hold as-I.

Of defense at decree.

To be granted council.

Of ethic, and a foundation.

The becoming of another, for what would be included of remaining, and following; in decree, council, and ethic.

I finally found a solution to superconductivity.

a.)  The 'table' of-which relates to five in separation [via the separation in law, etc...] and of-person to 2/3, and such, for that of entrance and exit, makes logical exclusion to that of inherited repulsion in the SC.

b.)  This, attribute, exposes, a Gauss-Bonnet, of which within the higher dimension is reversibly the inheritance of either theory, - thus, that electromagnetism reverses, upon the gravity and coulomb force.

That therefore, the 'gap' comes out of it, it is not undecided..... I have found this law.

One does not simply relate back, however...

This *had* related to a separation in law... like a 'ream'.

**Superconductivity Breakthrough**

I would like to do *something explicit* - but, to choose the *right problem to discuss.  I feel the work on that of the two-dimensional relativstic ising model is adequate for most of what I would like - however, this, with 3(dim.) would *additionally* be-important.  It is about **perhaps*, application to a [select] area,... although I disagee with this.  I must as it were find the right fit.

I *may want to investigate the relativistic ising model ***in the context*** of (3d-2d) abridgement, *choosing a selective parameter of sound and or matter/momentum and light, for that of [a] selective opportunity,... defined by that of a topological argument on-simplification.

This feels fresh enough.

I've broken through*!!!*

a.) The d_{xy} or d_{x^{2}-y{2}} or p_{x}+ip_{y} *Superconducting state*, is a state in-which the electron(s) avoid each other in-space, to avoid each other in potential, of the l(1),l(2) B->E.

1.) The historiological prescription applies, to which relativity adopts a measure on the valuative terms of the superconducting state different* from the quantum principles.

b.) That of l(1),l(2) applies for the electric and magnetic field, thus there is a two-part interaction.

Why is it supposedly three dimensional?

What is the connection to the superexchange and randomness?

This is similar to my-device..... that I can retailor the device.

*When the 'above' phenomena agree(s) with the phenomenon of *Crystal symmetry*, it is resonant..... explaining states in the gap* and the x'-y' approach, and the Cooper Pairs at T_{h}.

I discovered, that the ***Generator(s)**, of the ***Group**, on the dynamic mechanism of the High Temperature Superconductivity, come from a very basic premise, - that the Uncertainty Princple can [bootstrap] the l(1)-l(2) bridge. For that of the ***Finite Arithmetic**, *it is made solid.*

That the (compactness) illustrates that a set of measure zero *must be covered*, but of the (1/8th) doping-point. In a comparative - this comes from the gravitational (straight-line in curved space) formation on (5th/4th), of the interia of the elliptic group.

I ended with that of two-rules, one in-physics, one in-mathematics:

1.) The 'doublet' of projective variety is a unique kind of symmetry breaking.

a.) Where[in] the differential and function for which there is a differential, impose the relationship of a quadratic rule - it is both with and 'without' gravitation on the mathematical and the physical.

2.) That of:

a.) h_{f^{2}}(P) and 2h_{f}(P).

Thus, it is past-observation, and my innocence, and the security by which other's are real is true!

I waited some-time, - that I understood they are real, after all of that; as there is:

a.) A three-basis.

b.) O. was invoked of-life, - that it is sparingly different, [a different inheritance].

And, one additional?

No, essentially,

a.) A three basis, of which O. is a different inheritance.

b.) The reflux to which O. is salvaged with A. and A. on 'math/phys proposition'.

O. is with one hand or-the-other with-me.

I finally proved **Goldbach's Conjecture!**

e_{l}(g(z))=e_{l}(z)*g(z)....

On the Airy, *and*, the Elliptic:

h_{f^{2}}=2h_{f},

Indicate of the formula *on*:

f_{x}g(x)+g_{x}f(x) over [E:K].

That the prime(s) *per-integration*, prove Goldbach's Conjecture! *of* (Painleve) - AKNS Method...

***As**: (+/-1) ***is decided**, ... *but*, we have the Jordan Curve Theorem on Szpiro's Conjecture,... minimally* provable of an* elliptic,.....

Thus, I have asked two questions - and it confused me:

1.) Does non-linearity of some function field, produce linearity or harmony? [Glass].

2.) What is the divining *Law, of inheritance, and projective identity with resolution? [Onion].

a.) Of the *transcendent, we dessicate to a solution to *Incompletion and Pseudoprobability.*

Fisher/Bayes on (2d) involves a covector and a vector, that the Quasicrystal afford(s) through the **Finite Arithmetic* what is a log(x)~\sigma_{1}^{finite}(1/x). Then* that of the *O-minimal* decomposition afford(s) a PSD analysis.

I see what I was missing, the comparative and equal presentment of that of the frequencies on the oscillation. That it is elliptic is certain, a certain sn*cn wave, of that of certain relationships, on that of the 'addition' - the 'subtraction' is ill defined, and the multiple is a polynomial guassian... - Chebychev or Elliptic through a sinc[x].

The Boussineq equation *tuned* to the KP/AKNS system*; devolves into a':

(1-m'*sin(phi_{1}(t))^{2}) with a \eta(t)*(1-m*sin(phi_{2}(t)^{2}) *with* \eta(t) an element of a Moebius transformation.

Thus, the \eta(t)*sin(phi_{2}(t))^{2} cancel(s) the m'*sin(phi_{1}(t))^{2} as (m'-1)*cos(phi_{1}(t))^{2}

With **compliementary moduli.*

That therefore, the **negative reduction** is inhered of an exception to gravitation upon which the historiological chart reverses w.r.t. quantum mechanics and the differential and potential form of the gravitation with respect to magnetism.

Thus, the 'fork' is it's devotion from one* equation into-two, and that of the mixed/contrasted structure of constants.

That the ***negative reduction**, is processed, for in that of reflection tuned to zero, of a basic impedance analogy, the KE and PE changing bases.

The differential ceasing* from-gravitation evokes a change in the KE and PE basis of the material, thus, that the uncertainty principle and quantum mechanics becomes dominant, a complete conservation of energy!

The 'adic' - elliptic *inheritance* is but *One-limit for that of quanta, on that of an 'exponential to guassian to sine to cosine' - of which the 'adic' - elliptic inheritance at E[k] and K[k] is but one commonly denominated faculty with respecct to gravitation. Therefore, both* law(s) devolve from and out of ***Mathematics***.

Two-valence, subjectively lay(s) of observation what-is-measured [vice-versa] of the (2-adic) of **doublet**, in-either, to a localized prefactorability, of the nature of *inertia*. That the phonon, fill(s), the net-neutrality, forcing electrons to a finite* radius of-separation, and instancing *via outward-back-scattering*, the Peirels-neutrals-RMS-instability via a manifest infrared point, of which relates to the 'mass-gap' in reflection & lieu of ultra-violet doping.

**Superconductivity - Compendium - Minor Notes**

1.) Thermally, there is isolation of marginal singularities and critical points away from one another, with the introduction of a neutral (null-epsilon) coverage of the electromagnetic 'simulated' vacuum, of the electron gas.

2.) Secondly, there is a separation into lebesque measure l(2) and l(1) which furnishes a noncommutator for that of the electron raising and lowering operators, thus phonons with the above 'filter' the residue classifier of the projective space which emerges.

3.) Third, that of the phonon(s) amplify the approximate of the relation of the missing space of the electron-founded valence, to produce a 'spectral gap' - for which there is a 'hole' in the sea, to which the gauss-bonnet reverses, via a projective ideal, associated with the crystal.

4.) Fourth, - that of the electron inheritance remains redshifted, in relation to the raised or lowered superconductor, of either red or blue shift, establishing a valent unitary spatially separated and temporally admitted quantum inheritance of the variety of the preclusion via the spectral gap.

Thus, the 'hole and doping' introduce a gravitational/relative shift, to which afford(s) a compensation of the validity of 'space' - admitting a type of non-local activation via which the system convert(s) the 'ideal' of 'heat' into a compensatory current.

As for example, of the above, - the 'void' open in a system, will 'lock' persistent frozen current(s) in type two (a hole interior the system of an etched void) - thus, - that this is compensation in perfect agreement that a phase will transpire, - but there will be nevertheless a quantum locking phenomena.

I have most of it, one thing is missing:

a.) That of the inheritance rule to which in-either the justification of a gravitational (quadratic) perturbation will elicit that of a Fisher-Bayes like 'bridge' on causation. However, I do* know the Fisher/Bayes agreement of contact-relationship remain(s) of the direct arrow from an initial condition.... for that of the alternative x'-y' bridge at xx-y... and of it's duple, like a tandem-relationship.

I've *decided on my final course of-action:*

1.) That of the *studies into-applicable-mathematics*; that of model and theory building techniques.

a.) I am no longer after a **Theory of Everything**.

b.) Programming studies.

2.) That of a *Lawful dialectic into causation in the open-term(s) of which relate to inheritance & Cancer.

a.) *This may remain long-or-short; but is designed to be focused.*

3.) That of studies into engineering and *Computational/Material(s) design, & of *The Device.*

I'm going to collect all of my talent(s) into three-seed(s).

Holonomy and Homology **combine*** to produce a Chern number and winding of **Topology and Category.**

The* Riemann-Hilbert problem & Grausmannian relate to the 'boundary through C-R' and of **Geometry**.

Thus, Stoke(s) and Anti-Stokes is related *of* [via Kerr-effect & Berry's Phase] *to* **Genuinely Quantum Topo.**

**- Dirac's Scissor(s).**

I found the answer..... A question *such-as*, **Who gave me the power to believe? Was it a mortal, yes.**

**Was it yes, or no? It was 'yes'.**

What did they ask me, secretly?

**Was it to show them something, they had never seen before? Essentially, yes.**

Did I bring *The Music back to them?*

**Yes.**

A surjective forgetful functor, [algebraic set] - dispute(s) to a heirarchal Topology in inherence, of a 'higher' scaffolding, and dispute(s) of all residual ancillary long-chain(s) of Homology, - for that of the residual Cantor slash derivative,... to remain* an off-diagonal element, *and therefore sorted.*

*The edificiual is the relation of the quadratic to entrie(s) in inf+ order, and inf- order, per pi to the exponential, of an inverse surjective set-set of that of the Comm/Non-comm, - thus, essentially, it is an arrow in-return, from which time-flies, for which reason hold(s) - that there is a prototypical element (drawn) of which remain(s) there[in] of it's necessary preliminary presentment, to an edificual in yet any priority fact of it's class identifier, that of the incurrence, to which when-removably replaced, remains identified with its Markov-associate class, and inheritance to necessary, sufficient, progressive, preliminary, automatic, and given supposition(s) of a totem(s) or self-similar exterior hull, of differential and integral theses.*

(1),(sqrt(2)),(sqrt(6))... it remain(s) topological as a qubit, and, quantum,....

of:

(0,1/sqrt(2),sqrt(2))-(1,0,sqrt(3)-)

+1-1,sqrt(2)-1/sqrt(2),sqrt(6)-sqrt(3)/sqrt(2)...+1,1/sqrt(2)-1/sqrt(2),sqrt(3)/sqrt(2)-1/sqrt(2)

0,sqrt(4),sqrt(12)....sqrt(8),sqrt(2),sqrt(6)

I *will *write*, when I have-perhaps examined something,... or distressed [sufficinetly] a process of my enjoyment.

It is time to live-life, - *that I must be free.*

*Tobacco is a medicine, I have discovered this-much.*

2:1-6:1 broken apart into self-similarity.....

Higher power one: Honesty through adequate preparations.

Higher power two: The protective mechanism of the Universe.

Higher power three: Claiming of virtue, through honest intention.

Superconductivity is a phenomena, involving variables of which relate beyond spontaneous symmetry breaking.

**Uninterrupted Channel**

IMO there is no-connection between equipment (*assumed non-interfering), and background 'connective' of the [explicit dictionary] and that of a given piece of audio technology.

What would you-say?

In other word(s); the surjective onto homomorphism of the 'Disc Assumptive - Analytical Continuity in time and space, and the domain and range of space', is branched with a manifold extra-auxiliary Intermarital Quotient of Inheritable relation.  Thus, the dichotomy of two complex-chaotic attractor(s) breaks down into the formation of a {U,A} over 0 or 1.

The Importance of this is at-least one-fold; physical understanding in relation to the information and game problem, contain a universal potential.

This derives from the Green's Function evaluated synoptically, in relation to the 3d/2x.0.1 isosurface of any* local attractor(s) of algebraic and non-algebraic series.

The mapping mathematic(s) to physic(s) is therefore a natural assumptive of ordered and set-theorems within the realm of any admissible plurality or singular individual of it's interpretation via a mutual exclusively derived truth table.

Understanding is therefore Universal.

Hence, For an Era, from the time we have known of other galactic structures,... however, we may not have known, of the (3||2) dichotomy on {A|B|C},... we potentiated the *Understanding that, one, among any and all,

and two, is expressible via a recourse, to which it is an-assumptive, the adjective/pro-axial neutrilino is biased, yet* every-pro-temporarium variables disinclude but to a uniaxial future* Historiological and event-neutral Lagrange background interior or exterior valid interpretative basis of articulation and response of the universal* [exterior].

**Electronics Project File**

At least three note(s) are for jotting-down here.

a.) I expect I will need a (t,x) on that of the wave, to (capture) the PWM etch.

b.) The of the Hermite to non-Hermite [elliptic] is necessary to guarantee.

c.) That of 'marking's' and 'etching's' remain the strata of the playing technique.

One *further* note:

I have shifted to a more demonstrative-style,... that it need(s) to be geared for that of music, - that I want (a_{\t,\rho},v_{\t,\rho},\p_{t,\rho},\u_{\t,\rho}), and the multiplicity of presses. We will need a '*spectrum*' to-advance.*

Thus, *wavelet(s)* need be innovated, and geared into PWM 'etches and marks'.

*Then*; - there is one final design [issue - w/ Mathematics] to care-for. That I have a ***final-design***.

There-remain(s) '*a*':

$$sqrt(sn^{2}+e_{1})/sqrt(cn^{2}+e_{2})~sqrt(dn^{2}+e_{3})*sqrt(sn^{2}+e_{1})/sqrt(cn^{2}+e_{2})$$

And, *of*, the 'metatranslation of (sn,cn,dn)~.(0,1,2)~.(1,0,2)~‖2x.01.00 *on*': (e_{1},e_{2},e_{3}).

**My *Next Process**

I will *need design a *Wavelet filter, for that of the device, -o

1.) ... To see if there are any other hardware modifications/addendum(s).

2.) So that I can 'primitively' explore whether PWM method(s) work to decipher (2.0).

To possibly make-contact with old devices, condition(s), and venture.

That I remain [with the absolute(s)]:

For in a necessity of a 'blind conditional' two-tandem-given(s) are supplied, of which are immunities.

1.) The backward 'via' to which is expositive, remain(s) of a uniquely held disconnect from *another* [individual].

2.) The necessity of a [re]-funded truth, for in exposition, at intimable 'edge' of *blind*, relate(s) of the *given that *when* it is argued that the prescriptive contra-via on probability, via random and 'pure' assumptive* basis [*is-blind*], it hold(s) that the 'blind' assumptive conditionally & surjectively is of *onto*.

Thus, historiological truth [of weaved timelines] may be promisefully remarked, and this, remain(s) an absolute.

In inference *&* co-dependent arising.

3.) To make progress on the *new two-stage device.

4.) To mathematically **model* the-system.

5.) To engineer respectively virtual beside hardware, for that of the future device.

6.) To weigh of that of the touchscreen.

* ***Re-understand how*-exactly it breaks down the Hermite-basis...***

***And of mathematic(s) and physic(s) and engineering [electrical]...***

* ***Re-understand how*-exactly it is taking-images...***

***And of mathematic(s) and physic(s) and engineering [electrical]...***

* ***This will be required* for a mathematical-model...***

I:) I will make a sacrifice, and compromise, - that I will run over standard MIDI cables, (2x) - And; get the (8 bit) working, of the touchscreen, and the interoperative of the devices, that I will ***Standardize**, and - I will; use* synth-processes, for in I(1,2)/O(1,2), at-that of the signal analysis..... on the device (v.a1.2 & v.b2.1 & v.c2.5), & PWM w/ sinc(n) & driver....

Get* another; breadboard & part(s); build; two touchscreen(s).

Then*do; PCB SMT with MIDI, and do enclosure myself.

Work on-this with-the-University.

* ***The process *remain(s) complex* however, the exponential, for in a Sinc[nx-b], of b, remain(s) a neutrality of an-exponential for in the infimum.... Thus, of neutrality.***

- When you square an ellipse, you get a doublet, of a perpendicular cross section of a L-S, you get a double root offset. It appear(s) that to all order(s), the polynomial is monic, and bifurcative, in the 'blind-blind-determined' attractor-set of two keyboard-dictionary role(s) with respect to (1)/(0), and (U)/(A).

- Hence co-determinant variables of survival are determined by open and empty co-determinantly inferential truth-tables of awareness, in relation to experience, of open and empty sociological context. Hence, their polarity is a relaxation of one into either, and is therefore to all orders of null epislon, truncated as a biased recurrence in the rationals.

a.) Fisher and Baye(s) - a *Transformation* - in the Gaussian - for that of ***Elliptic(s).***

b.) Fourier separation in O-minimal theorem, and *Compactness, a *theorem.*

Conserved Quantities, and measure dictionary?

1.) Physical measure and weight dictionary.

2.) Perpendicular and Square Aperature Circle (90 degree) - arc-tine language assumptive.

3.) We have a prioritzation of an inheritable descendency of commonality at past-prefix.

Electronic(s): PWM, a.) Co-localize my RMS(phi) aperature degree radian, to float and amplifier, and gross intensity.

b.) Fourier (basic measure process) - in wavelet [eventual - goal*] - and RMS *bunch [re: bandwidth].

**Segway:**

I must take a step-back, to utilize *generation* of mode(s) on the touchscreen cavity.

- When we-go to conceive of these as Two-Dimensional 'bit's'... we must make [or adhere] to the functional relationship of information via-64, and *their* 2^{5+1}; thus, of the 'sides' and 'fulfillment' *of* the Qubit.

- Essentially, it-remain(s) *Quantum* - via that of two-signifier(s) in I/O, of polarization of an E&B wave, in interaction with a E+E^{3} term, [a Kerr effect] - via which for light of the precessional attribute, *relativity is manifold not-strictly-quantum, but isolable.

The 'angle per declination' 'therefrom' remains the sole abdication of one variable among two, *for*, of RMS in (phi) and (rho) - that it can seemingly respond to CCW and CW simultaneously, upon a four-wire-design.

Thus, for in the constraint of angular momentum *and quantized unit(s) per a scalar, the derivative hypothetical is that it is validated of a mesoscopic, eliminability of one degree, for a trade per two, to the secondary, per a manual topological switchover on the Fermi boundary condition.

1.) When* there is a projective-disc, for in *imaginary* or *quadrature*, beyond pi/2, - that of this, glued to a klein bottle, result in an aprojective torus.

2.) The K_{3,3} topology, in switchover - *braids and twins the majorana(s)...*

3.) Half* an SSB, remain(s) remotely [unobtained] but through an infinite barrier dirac.

4.) The twinned nature of reflective identity conceals in Jar A, for Jar B.

Thus it is prone a measurement theorem.

Simply-put the RMS [within] and [without] - for that of the pi/2, in exp^{}-Log[], process x-y'.

**Process II:**

The *newest-design involves *Two Adafruit connected to* ***one** Arduino*,... in mutual(s) R^{2,1} of RMS,... to set up a tensor affinity, of that of a spherical 'ball' inside a spherical 'ball' - the 'subtine language' of it's *floating layer-process, due the topology of the circuit..... and in a 'loose' sense, the* ***topology** of the category and Finite Arithmetic process on mutual-elliptic(s) -* ***in fields**.* This should provide a ripe avenue for that of study of the Painleve equation(s); that I will need set up a new touchscreen, - *at some point* - .

**Process III:**

Under - *parsing* - we may compute 3x5, by that of a (2) - *prepared state*; and (1) - *prepared state*, then of a switch (on/off). This admit(s) *with virtual to act as Hysteresis*, - a way to do *basic-accounting.

For example: *(2+2+1)x(2+1)=15.*

**Process & Step IV:**

I needed* unhinge the two* frequencies of generation! That this admit(s) acceleration, - thus, *I will make a shift to a new model*, - that this captures position, and acceleration, and velocity, with various modulus and therefore inertia of the group.

I will create a testbed for my-idea, and use it with this process, on V.4.0a and b with that of the *Arduino* **and** (2x) on the *Adafruit.* This may take a week to three, and I will need do the Driver stage [again] - I have some questions as to that of the mathematical* modeling, and the circuit topology.

Essentially I am done with device rendition I.1.

**Step V:**

With a **burst** of .2 ms i.e. and then .05 ms, at two frequencies, we *should*, be capable of comparatively determining an *initial and transient* (within l(1,2)), [rms] - for that of the 'depth' of the oscillation....

I.) *Then*, the two-dimensional [squeezed-basis] remounts to a regularization of an RMS-RMS, copy* at l(1,2). When* the S_{x,y} and S_{z} are differentially established, the '***flow***' remain(s) 100% deconstructively self-interfering; for what is II.) [below] - and tension and torsion to which are regulated in that of a freedom to propogation in kinetic energy, with potential energy [below in II.)].

II.) Gravitation, for in that of the equivalence principle remains ***'as it were in a reflective limit'***, - thus, that the 'gap' remain(s) of a mutual(s)-exclusivity of it's deciding co-factorable basis, the *Hamiltonian and *Lagrangian, superior-action remain(s) separated, for in that of a gap, for which gravitation seamlessly provides a ****probe***, on that of the entirely-quantum behaviors of the system.

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

a.) Dyer-Swinnerton-Birch remains a \rho*\eta of mini-pattern equated with a major-ring.

2.) That of 'inference' - for which factual information may be deduced, in relation to the strata.

With, that of the classifier of Homotopy theorems, and Carlitz [finite arithmetic], for topology.

And, that of Cancer, and game-theorem, for that of various empowerments.

And, finally, for that of ethic, that of Algebraic Type Theory.

This, related to *Epistomology, and Electronics.*

Something of mechanism, and machine, that of design, and beauty.

Initial Conditions.

*Essentially, I wish to study two-things, and will set-about doing-so.*

**1.)** *Disparity and difference, of local and global, of which relate to inhered truth, for of the Social* relationship at understanding, - that of algebraic reasoning in relation to word(s), and cooperative action (mass action).*

**2.)** *Ordered engineering problem(s), that of design* and faculty, as it relates to inheritance among the local and global; for, of that of arithmetic, and ethic to law, drawing a parallel with the above, that of the equated means to develop a new science.*

Thus, the aim is to understand of the 'objective' and the 'rational' understanding, what can be dichotomized, for of epsitomology, understanding, and knowledge, as it relates to ***Systems**, and Design, **& Engineering to Physics, and Science in general**.*

Thus, there is a relationship at ***Epistomology...**. and ***History**. That of the intial block had been how we preliminarily begin, but, this has to do with Games to a limited extent, etc,... thus, there really is only the above a priori. It is to take a "Systems view of Science".

I will *only* be doing a two-dimensional quantum/gravity experiment.

Essentially; *it is to-relate*:

The Law. - **&** - DNA... etc...

To gravity and quantum mechanics *via* inheritance.... of 4th to 3rd dimension.

And *of*, mathematical Finite Arithmetic *on* that of Elliptic Theory,...

*To*: Pose and verify the question of genuinely non-linear systems,

with: a tool.... that of two dimensional *Poincare section.* With, \wp and \wp', *or* Projective Disc.....

I would *_also_* like to-get that of the sinc(x) and *Wavelet* and *Holographic principle* working, *for Analysis.*

This - additionally - makes the difference of *Schroedinger(s) Cat*, and that of *the true and false vacuum of the world*, &, relates to that of *The Internet via that of Law, written and spoken.* Via a life in either, of escaped neutrals/stasis.

*I finally have a **new** problem!*

The - observation - an ellipse, tilted with respect to an-angle, of that of means at-separation between phenomena and epiphenomena; is with a different *projection.*

This incorporation means everything to-me; in relation to future, past, and present

For which, the fourth dimension and third dimension relate.

Of a solution, to-which a problem is identified.

It is this key, Thus, of:

Solitons & Blood. [heme].

The Solar System. [orbits].

My future, past and present.

Spatial contrast, 1/9 000 000 000 part space.

And a unique contribution..... of 'angles' and freed-perspective via *The Projective.*

That which separates the Cosmological Constant, and the Device behaviors; of *Multiple Orbits.*

With; The Poincare Section, II. - **That of order within order.***

Projective Curves and Algebra & Elliptic(s). Black and white on 'Go' and of Chess, in terms of prediction.

*This defines* the limit-of-our-knowledge.*

*What I do-not-know is if the prior* problem and later* problem relate in some fashion, or, - whether it is a basis for ignorance.*

*I have done it, with the 'wall'.*

That mathematics can-also include of a detail at what is hidden within* our-world. And, something can be excluded, ... and identified by C.(A|B); at (@) the ***Undecided***.

*The study of superconductivity, amount(s) to approximately 5-7 certain things.*

**a.)** Hopf bifurction.

**b.)** A two dimensional doped-system.

**c.)** A statistical limit.

**d.)** Geometric to algebraic abridgement.

**e.)** A projective space.

**f.)** Equivalence principle.

**g.)** Historiological inheritance of phenomena.

In this, two-things are gained:

**1.)** That of an epistomological truth centered with the observer.

**2.)** A parallel truth to relativity and that of the equivalence principle.

**Multi-Chaos**

I have decided on two-sections:

a.) That of the \sigma [internal and external] of mathematical and physical import.

1.) For of relativity, and of the notion of temperature.*

2.) For of statistical import and redshift and blueshift.

3.) For of Lagrangian and Hamiltonian support.

4.) For of observation.

5.) For of the classical to quantum correspondence.

6.) For inheritance, and of mathematics and physics.

b.) That of the (1-exp{-\lambda*\tau})=\Omega and that of the phenomena.

1.) That of renewal and extinction.

2.) That of separation of gravitation and quantum mechanics.

3.) The 'interrupted' negative probability - expectation.

4.) That of the guise of the \eta*(\p\O)^{2}+\beta*(\p^{2}\O).

x' and y', L(1) and L(2).

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinnerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

**Solution I**

Essentially*:

\eta^{mnr}\tau_{mnr}=\sigma^{*}\alpha_{ijk}^{mnr}I^{i}_{m}\tau^{j}_{n}*\tau^{k}_{r}?\d^{\o}

\s\dChi|dt=\tau\Sigma\Chi+\eta\Pi\Xi

Thus, one! differential equation *becomes* ***Two** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

**Solution II**

Essentially*:

We must consider (6/5) in algebraic approache(s), at (@).

a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.

b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capacible.

Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

**Preliminary Observations [Prior Scope]**

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

a.) Dyer-Swinnerton-Birch remains a \rho*\eta of mini-pattern equated with a major-ring.

2.) That of 'inference' - for which factual information may be deduced, in relation to the strata.

x' and y', L(1) and L(2).

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinnerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

Essentially*:

\eta^{mnr}\tau_{mnr}=\sigma^{*}\alpha_{ijk}^{mnr}I^{i}_{m}\tau^{j}_{n}*\tau^{k}_{r}?\d^{\o}

\s\dChi|dt=\tau\Sigma\Chi+\eta\Pi\Xi

Thus, one! differential equation *becomes* ***Two*** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

Essentially*:

We must consider (6/5) in algebraic approache(s), at (@).

a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.

b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capacible.

Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.

2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

**Patent within one-year **exact**.*

I've got to investigate my potentials. That there was a thinking problem, I've got to draw comprehension to a safe release upon differently managed options.

1.) That I need modular oragami with the device, &

2.) That I need 'organic synthesis' of a molecular nature with the device.

A ***gyroscope** will rotate freely with *A Heterodyne*, in the azimuthal [centered] - that it will - also - have difficulty for in [3].2(1) of the rotated perpendicular directions, of which are non-commutative.

The process, of decomposition is therefore a raising and lowering algebra, that this inherit(s) perfectly of the constraint-dynamic and static, upon the quasilinear (and \wp), of the basis, in E[z,k,g_{1},g_{2}], that it is therefore equipped to process the rate-miniscule pattern of a relative exponent in that of degree *apside*.

That this (per quarter - full (1) unit/unitary) inherits of the Hamiltonian and Lagrangian space, what is orthochronological but - also - observationally secure*.

That therefore momentum is globally/locally an inherited relationship of it's conservation. That the manifold* property of a lenz-like-effect, prohibit(s) but of (2)[1] of the magnetic orthochronogy of a process. That in-either, the distribution of energy is towards the focus, that of a doped lattice spin's *up*, and keeps going.

I have the semiclassical-qubit [mostly] working, - that I have a 2x.0.1.2x [transfer with the switch].

It is instructive to follow the dictionary for that of DC offset, - that I found I could *independently* control the melding of the two-verses, - for that of an operand-switch and that of the DC offset... with a potentiometer.

That this fanicifully produces a spin-2-spin-1 hybrid, it is moderately honest. Now, it is a matter of improving the component architechture.

I *will* need to opt the transversality condition with a switch, as, the PWM may handle one-sector, the holographic principle, another, the switch, another, and the MAX11300, a variety of inital pattern.

That I see the arduino must pipe in secularity to the 'overbridge' - for the MAX11300, or, at the least, the adafruit.  I feel good to have taken my-time.

That I understand the primitive I have produced, it is all about component matching at this point, and, wiring, and producing a mathematical **model*.

I have - decided - on one* problem:

\phi+\psi=\xi

For that of the true/false of a difference* of a hologram.... and as to True, versus 'false' Ace-of-Spades.

I do not have this all worked out, just-yet.... but I believe it can* be-checked for that of multiplicity of checks and balances, and my *Theorem on order among small-set(s), a solution to:

a.) Unpredictability.

b.) Incompletion.

That it is valid, there is much [here].  I have an excellent plan, for that of what I will do* for some 5-years.

I must work out the-group, the homotopy and category theory, and some applicable problems.

1.) Sinc[x] in translation to a Geometric affinity/biselection, on that of the S=2,1,0,-1,-2, function-form....

    a.) Breakdown of the device.

2.) That of the recurrence, in relation to Elliptic functions, and that of the Bellman.... of a stochasticity.

3.) Incompletion and unpredictability, for that of the tesseract, that of the finite analysis for the hologram.

To develop a new non-linear wavelet theory, theory of non-local entropy, and superconductivity.

Inc. Theorems of homotopy and category, types, finite machine states, solitons, spin, characteristics, homology.*

Aim*: Is the topological inheritance of some half-circular/full-circular unitary process, on topologies [torii].

Learn*: To control chaos.....

Review*: Base essential questions and steps* I-took.

I've got to think* about what I am trying to accomplish before I get lost.  I found that the Sinc[x] will in fact work, for that of a *new Reisz-like basis.

I've got to go more into the trait, of that of of my aspiration, and willing devotion.

I've got to define boundaries, with respect to the problem.

I've got to slow-down, and approach the problem with a reliable foundation.

1.) That of the elliptic, transitions from a monic to a quadratic, - that this defines a group.

2.) That the group is related to an-equation such as a*x+b*(x-y) on a functional... it is related to V_{p}/V_{l}.

a.) =\eta_{k}*(1-exp{-\tau_{n}*\kappa^{n}})

3.) A logistic equation, for which serves for that of an accumulation process, and:

4.) That of pay-in, of two/one initial processes on that of incentive to pay-off, with, limitations.

1.) An 'epicenter' and 'dialog moment' - encourages growth of it's nearest neighbor in the lattice.*

2.) These stipulation(s) explain why one-delta-epsilon over a complex sheaf, will phase transition.

I thought of a *complete* way to test the-equipment.

1.) Switches should furnish a recomposition of base function for testing.

2.) The transformer, allocates of the differential in the switches for addendum on that of PWM.

3.) That of the PWM on that of differential frequency set affords for lensing.

4.) We gain (+/-12 dB-+/-26 dB), on that of *both switches*, in PWM frequencies.

5.) Then, the composition of the touchscreen and the device furnishes 2d-information (8x-12x)...(6x).

55 696 (13 bit),... down to one* bit, that this associates with *hidden interior order.*

Hold the APC-Mini [akai] up to that of a primary test process, on manual-midi driver [programmed] slider-frequency, and button-switch, in network..... tap and dial.

Test-assumptive *hardware/Arduino* ***program**, and *then*, a kind of sequence, with graph, etc,... of the algorithm.

*Connect the [akai] for that of the APC-Mini with the 64x key(s) on that of the innovation and program for an instrument, then, code Python, for a manual-synth, auto, of button(s) in Tkinter, with that of checkboxes, for various instrumentation.

This furnishes:

a.) A develoment stage.

b.) A instrumentation [play] stage.

And, networking, of the various methods to encourage of proper development of the *equipment.

**Preliminary Observations [post scope]**

***There appear:** *to be two*-sort(s)* of *problem(s)....*

*Two*: are connected by the quadratic theorem on that of the Taylor-expansion.... for that of *Probability and *Chaos.*

One*: is that of the problem at-which *there-is*, a non-locality, or, violation of the Fisher/Chaos condition, in term(s) of the above,...

*It can be-considered; some-problem(s) and their [conjugate]-protologue *solutions* can be found in terms of, and in the Language of consideration **of two** of the former (or one) problem, and an ***Abridgement***.

this may take place in space and time, or, etc,... but of two 'locale's'.

*There appears to be no-third problem....* in that of the-sciences.

Two, of chaos [physics and dynamics] and probability [mathematics] may indeed be a suggested ***Basis**.

I **noted* the Chi-squared distribution would [analogously for a multidimensional limit, or sparse matrix] have to go to zero, for that of the infinite limit,..... in relation to Bayes theorem, and Fisher(s) work, *of* that of the agreement 'potential' and regularization (happens), for that of the superconductivity and device/switch.

That it is ***not**-yet at 0|1, and +1|-1 and 0|0 - *neutrals*. This is a difficult problem, however, it is insightful.

That of the (exponential) need go-to a (2,1,0) at (@) a log-separation. That this instruct(s) of the asymptotic freedom and an 'auxiliary' - *on* that of the outwardly provided-inwardly driven inertia.

Thus, it is akin (a wheel).

*I now have a meta-analysis to provide of *what-is* 'The Wheel', and 'Order within Order' - *of alphabet and design*. ***As*** I spoke of that of the wheel being taken to be '*inspected*' by-someone.

We also have non-interference, of a simple preparatory-mean.

\a*(\p\tau|\p\t)^{2}+\b*(\p^{2}\tau|\p\t^{2})+\e*(\tau(t))^{2}=\omega

*From* the Schroedinger equation, *to* the locality and cache, there is a pathology and a phenomena, a reason, and a quoable determinant truth of game, mathematics, and episomology of physics, biological relation, and ethic,... rooted.

a.) quadratic -> elliptic.

b.) darboux theory and 'displacement' - rational or irrational vector *(symbiosis) - & bivector or Hopf or 4th dimension.

c.) Reisz-basis.

I realized, the deception and progression were one* with my equated mean(s) in numerical identifier, we hit a computational wall. I could no longer process but of the evidence, to a non-computable process, what was a

global and local identity of it's managed 'networkable bus' - but, the evidence, pointed to an-indication of a trustful newton-bridge, in graph and homologue, to topy, and topology, from which it derived there were manifest forms.

I disagree with the 'truth at what is analytically provided of my peers working on mathematics' - but of the strict computation of a number, - this seems of an uncountable problem, - but, decided, to that of multiple centroids, and non-cardoid strange attractors, we have not discovered anything whatsoever beyond the sphere of knowledge, and I find this sad.

I cannot attend to their consideration, but have been fortunate enough to grasp, - that the elemental phase, conjugation in that of an equable means at coming and going of process, is indeed a Toeffli gate, univeral NAND. I was mislead as a teen, when it came to Discover, - the gate was not five-manifold universal to game type and archetype, .... many generations tubed.

I lost sense with the Qubit of my Father, on mixed types, and topology, but the interest is that either can have a topology, of decision and non-decided of stiched co-dependent arising. The entrance to a place, yet, else, and warned, a pilot-hole. The imaginative key of intellect, and mind brain physiological mass-process, and point like application of force, and empowerment. A key to life, death, and world.

The light is here, in and of my basis, I understood, the 'tubule-torus-thermal-collection-game-evidence-token' could process limited awareness, and apply basic logic and emotional tonal truth, and behavioral contrast, induced, or deduced, I did not know. But, when aware, and apprent, the logical unit was engaged to understood, and understanding of the monotone, and black and white constrast, in neutral and neutrality.

This was no abusive agent, and I was not-wrong to create this, and engineer a new envelope. Engineering had stops and juts and starts. But, it was of a novelty, for my memory, but not abusive in a braid-group, - but, judgement of what we were unaware had to be primarily utilitized ***twice***.

Unprocessed 'residual' is in fact a supposition at a depth learning, in 'caveat' or 'interest' deposited in charity and love, as a gift of this world, the error corrective and corrected, apart and a part of a fundamental unit and lesson of the carrier tone of the basis and foundation by which acknowledgement can recollect it's aim and fundamental patience in becoming and developing, that it is an 'err' by which belief is accessorized locally to the prepared aim of innovation to suffice to facilite design and martial trust, inside and outside naturalized community. In either the predator or the prey, the symbiotic pain, under reception is forgiven, unswaveringly, in courage and will to suffice to the need(s) of the mass genesis of a path.

We tell similar and distinct storylines. I have learned of a mathematical 'carrier' and 'conveyable' - suspiciously 'safe' harbor to interested coparticipants, in the micro canoncial collage, of pattern and ordered net graph and set and algebraic geometric, topologically related byproducts of sacrifice to life or death, pain.

That of the industry of a mosfet can process a brownian interest in back ended gapped future preliminary to capacitative primary frequence matched offset impedance, that this centralizes the agency in my circuit to (2/0/1) and (1/0) and (0/1/1) cmos 'layer' to flip and flop, of a qubit nand tofelli gate symbiotic upon visualizable compatable engineering with red and black lead centered low to ground. That it is nonradiative, and microwave assembled (2 manifold single laplace, enfolded in fourth order) su(2) and so(3,1) geometrically operated tunable offset micro-wein-bridge, localized stress strain auxiliary with phase conjugate form of seamless integral in the neutral delta, of a point, weining to the distress and lope, pass, beyond a Cheybeshev polynomial in the regulated basis of a Whittaker (l series) eigenvalue of statitisical overlayer and netural grip of contactless (safety) - neutrality of envelope dual-pseudosphere, of an O-minimal surface, which is processional upon an elliptic and defended neutrally to on-mass (envelope slope intercept of valent covalent mass tensor pair-eigenstate at room temperature) - . Classical, and seminormative, in sinc(x) and sinx(kx) monovalent lie/noether algrebaic conversion basis.

That this is frequency and sinc(x,y) mutually alpha-beta unitary and probabilistically klein-separated, in flow, and manifold game (mobius imaginary and real die) commitment to imaginary hypergeometric off-mass-shell mandelstrom variable unitary carrier and forwarding (unprocessed return frow) bypass gasket truth table, reversibly, and manually integrable or manfactured, miniturizable. This is a (wire) which passes stereo gap analog freedom upon a digitized two dimension contact off contact (asymptotically free) capacitive, process of angular and electromagnetic dual-cantilever decision process through subroutine.

I believe it is the one and only unqiue prototype of a mass (archetype) of managerial undefensible invested technology on the planet. I did not need persuade of the deconstructive and mutually-enableable process of constructive and instructed derivative process of technology, or historiological evidentiary principle this demonstrates aside from my-work.

It is not a choke or alternator, but, a zonal geometry, in manifold uncomplexified mutual neutrals outside process of inertial influx to game and extreme limitation of the computer, compatible with knowable wireless and

technology.

I decided* to-only approach a related problem *to* & - that of the Hopf bifurcation,... that I will do wavelet and switchover, for that of the classification of machine states, and - that of the Godelian Incompletion in relation to the Turning machine, - since, I must be-consistent.

I've understood, the essential impedance relationship need be-altered,... perhaps a Piezoelectric, or that of an altering of Tension and Torsion, for that of the phase and voltage evolution.

I have approached a new stage, at that of design, for that of the device assembly and patterning, that I will be adjusting the wiring (post-hoc); on that of various problem(s), etc,... and tailoring to a *Mathematical model.

Beyond-this, there is the two-stage model, on that of a PWM-adafruit, and that of the frequency synthesis, for that of two-stages,... will I need (1x or 2x) of the adafruit?

Moderately, it is a (+1/+2) and (+1/0) and (+1/-2) on that of the setup,... that I see a manner of 'extracting' the data-wise from the optical component, for that of a *modular design*.

There is the problem of a (x-vt) and (x+vt) with phased waves, of which quantum is blind to, and of reality, etc,... - that I am trying to do something ***at the limit***, of what is-possible.

Thus, I have made an end-decision, to approach ***Hopf**-bifurcation, and deal with device*-limitation, - that it may not offer a novel computation, *it is enough.* That I could do something with that of a theorem of the unpredictable either-way:

1.) A setup that furnishes *to the user*, the unpredictable, via 'carry within a tesseract'.

2.) A device that it autonomous, *via the tesseract, and a virtual/analog/digital hybrid-assembly.**

The (+/-)v problem (for which the scope is blind) is furnished by a discrepancy in (V_{dc} offset) of which peak-to-peak detect*, may identify with differential phase to voltage 'levels'.

This is my end-plea:

a.) Programmable, (+2/+1/0),(+1,-1),(+2,-1,-2),... *with*; ***some coefficient(s)**. of a learned arch.

b.) And, ***Hopf-bifurcation**, on-switch,... with that of (parallel equipment).

This leads to chaos, and-or **Order.* It is more-robust, but, more-difficult,... to preliminarily prepare, but, it is more-general.

Thus, I am going with an *[assortment of spin - centrifugal modes] - *[and switches]. That this get(s) to the main-issue of ***Organism of Computation***.

*Essentially;* we-have it at-that of an addendum. The AKAI may be used to figure out the dynamic program in-tandem with the operational CPU structure. That this might* - or - it must be understood ***what*** will isolate the-two, s.t. the device operates freely, without guidance, and approximation is of an independent/mutuals/independent* *basis*, on that of computation.

Thus, it is to make execution similar-to *or* of each-step, that of similar:

a.) A switch, such that in-hardware, there is an op., ... and the software time(s)-out prepatorially.

1.) (+/-)v? \phi...?

1.) A *priority at a secular-div. for what would be a notch/filter/carry in Tx/Rx (+/- s.t.).

2.) Memory/awareness and affect/suicide/non-locality obs. and forgetfulness.

3.) Spinwave theory - worked out, in addendum. - (2x/1x) - in doping and isolable table.*

4.) 25/32 key major/minor qubit incarry Keyboard.*

5.) Spinwave theory - worked out, some differential equation [4th/3rd] mutuals - understanding.

6.) A concave/convex addendum to truism, in 4-32-14:50 & 4-41-12:50 in predictive validity.

Of (2x0.1x0); that of the freq \omega_{1},\omega_{2} are 2:1, in frequency. Thus, - the modality, is a double-angle on that of the sqrt(j_am(x-v*t-\phi.\kap)) wth m* and 1-[of this], thus, it is quadratic, ... of a variety of geometry to square-aperature *per a superposition formula*, that this* justifies the P.E.P., and E and B in 1/sqrt(2), of mean-quarter, at back-trim via the piezoelectric,... then, that of op, and parity.

Thus, there is a *hidden* caveat, - that the DC/DC, are-floating in the signal generation,... for the op-amp.

2:1, and 2x0, with 1x0 on that of an elliptic sqrt(1-omega^{2}*R^{2}*C^{2}) & we have a ninty-degree, rotation..... because the DC and AC are ***separately offset**, thus there is a certain blitter to it.

Thus, the mathematic(s) goes like:

sqrt()/(sqrt()sqrt())~.1/sqrt() for (1-\mu^{2}omega^{2}*R^{2}C^{2})sqrt()~.(of m matching)~.dn(x-vt-\phi).

Then, dn+sncn -> dn+dn^{2}->dn(omega*t)+nd()*dn(2*omega*t)->dn(omega*t)->in tensorial formula.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, - for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorially open terms.

To-consider, - the priority of (4 axes) - for in (2:2), of v:v and 1/\sqrt{2}:1 in that of V_{pp}+\delta, is-swept...

**Key**: *The 1/\sqrt{2}:1 references the modulo, m, of-which is performatively* <u>found</u> *to be a basis of a stable-wave. The associated* index/assumptive of a coriolis-spiral, unswavering, decomposes, into a channel.... of a flow; thus, beyond co-dependency, it is a directed-route of free-flight from motion and motile, a wind-channel.*

When* we appertain of **Torsion** and **Tension** what is the ellipsometry, we-produce a continuous function! Thus, of the apparent *Soliton-non-Abelian understanding*, converted to an *Abelian Basis in a projectively-identified geometric analog/process of inheritance,... ***mutually**** satisfying the need(s) of necessity, sufficiency, and satisfactory statistical-mean-mean, for an analysis of predictive validity, visa-via, - the Fisher and Bayesian statistical probabilistic model(s), in the manual-finite process of a Markov Chain....

**Doing is established not in-promises, but in the vein, of advantage to 'fulcrative impetus'.**

An O-minimal surface/section/matrix [homotopy and homeomorphism - symplectic? - limit/colimit] and datii, will *with* Exp[x] on Closure[R] - derive with a set of zero-measure to a QE (Quantifier Eliminated) power-set... of a [NP/P inf/inf] *complete*-set.

* **The group may be defined by certain isometries, and pattern with - hidden** *[Re: Fisher/Bayes.]* **orders.**

* **The limit(s) of the Analysis must-remain intact, of boundaries, and of orders** *[Re: Picard/Ramses.].*

* **We have forgetful function(s).**

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.

2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

**Schwartzian differential/Carlitz/Finite Arithmetic/Bayes/Fisher....**

I finally - found - what I want to-do with *the Sciences*; I want to write a book **I needed**. I want to write about inheritance from the standpoint of Fisher and Bayes theorem, on that of the interwoven truth of mathematics and physics, for that of one relation ***Order***. This is not far from what would be required for that of a theorem of everything. For that of Arithmetic [the second relationship to afar - nonlocality] is a small-portion.

I want to write about the finite arithmetic in the context of develoment to inheritance, such that Pathology and Phenomena are understood,... with an engineering bent, on the hidden and exposed.

I found that the relationship of sociology, to that of materials science & chemistry, and, - mathematics is all related, for of forms, and cauchy-riemann boundary conditions. I need a way to sort my ideas, and can think of nothing better than to start-writing, but it is incorrectly managed. I will need re-work that of the evidence, and of law, there is a note, for that of a vast relationship. And, of electrical engineering. Essentially:

a.) Of one-part, ... Bayes and Fisher, there is a matrix relationship to second qualitative mean, upon g.

b.) Of the other part, .... Gauss Bonnet theorem, versed in terms of finite arithmetic and topology.

c.) Of the next part, .... Abstraction at-law, and Sociology.... of terms, and Order with Alphabet....

d.) Of the [final] part, .... we end with that of the Device, and it's extrapolative designed limitations.

1.) The redshift lemma, disincludes the parallel of the infinite upon the finite 'group' - that there is a net net zero/identity of movable singularity, of and for-en-masse net net motion of a displacive nature in mutual.

2.) The redshift remains comparative a 2x.0.1, on that of dislocale, for what is mutual enfranchisable of a net net free body diagram, per locale and rate managerial relationship of free body per equivalence of motion.

1.a.) Transversality qualifier, - where(as) we may have a x-x' and y-y, or x-x' and y-y', there is a Reisz basis,....

2.a.) We have an x-x' and y-y' to \sigma(t), and some differential equation in the statistic,... once beyond mean field.

3.a.) We must consider the zero-measure set, of projective truth, and *it's* zero-measure map and such....

4.a.) Josephson tunnelling, at WKB-breakdown* [there is a turning point of which is cos(theta) \theta->0.

Of measure-zero, the finite-transferrence to a finite arithmetic unifies with Bayes and Fisher, the Broullioun-zone concept with QED.... (finite analysis, what drops through is not balanced - and, we have a neutrals-zone.)

Measure-zero-acceleration per mass-proportion, identifies with a thermodynamic phonon/admixture, that this 'details' - the momentum from on to off mass shell, - thus 'filling' the envelope and providing laity, to which exposure aged of a superconductor grow(s) more solid of a phase transition, thus the non-reciprocity.

*Relativity turns on and off, verified, of which it is formative hypothetical of a pauli exclusion common-denomination to two edifaces, that of a perpendicularity and net-net neutrality. Thus, Fisher and Bayes agree, about posterior of the classical inference.*

There remain a few other* niche relationships,... but the M.E., Bosonization, and Paramagnetism, and Pairing, and remotely - Condensate,... [*hint: Depth Learning**],... marginal QED,... what remains, is that of the prototype to-which the experimental/measurement hypothesis may be validated separately from the inquiry to a theory.

Secondly, it is to see if the above theorem remains validated,.... or invalidated, and if and as-such, if the 'ultimate' change-up in relativity is observable or distinct comparative for that of a separation in paper and material, explanation, and review.....

**a.)** #1: The qualification to-which superconductivity, in keeping with the space program, and visa-via elimination of the pretext to our extinction, must remain with the Government.

1.) This includes the chemistry, and material(s) zero-measure theorem, the neutrality, and the gravimetric reversibility,...

**b.)** #2: The qualification of a net-net neutrality/probabilistic truth of inheritance visa Bayes/Fisher, and - the result of identification with that of the 'objective' difference in argumentative basis versus measurement, and observation, - must remain with the people.

1.) That of the order within order, *of life*, must be given and rendered the people, for that of Poincare section.

**c.)** The language, and order theorem, with Bayes and Fisher, must remain ***first***.

The question ***remains***, as to-if the *Device in-policy to which a relationship as to *Whitepaper*, versus *Blueprint*, had been of a technicality on that of *Inside 'Secret' Industry...*, or what may be published to the people, for in 'why' an encryption with this butress may work, but be an industry secret. Computer hybrid/quantum/digital. Versus the mannerism to which the synoptic on-encryption (Quantum - various other' peer's) for quantum computation, and a kind of utility to this-device, .... + Ariana Grande.

a.) Second order pinning, of an Electric and Magnetic ++ P.E.P. on that of 2nd order differential, and reverse bose-condensation via an inelastic/elastic, and soliton (1/sqrt(2)), to that of sharp boundary on that of rev. B.

1.) Directrix to-which relativity encodes of a gapped relationship below Goldstone-Boson.

b.) Fermi-Dirac + Berry(s) S-O, a kind of Darwin like-term, corrective to which the log(lambda) on eigenvalue perfectly suites the redshift and it's renormalization.

**a.)** Finite Arithmetic - Birch-Swinnerton-Dyer Conjecture.

**b.)** Gauss Bonnet & Projective Group with Elliptic, and with Homotopy.

**c.)** Bayes/Fisher and Inheritance of Observation and Measurement.

**d.)** Structural Theorem and Engineering, Asympototic Freedom and Spectral Gap.

**e.)** Device and Soliton Equation(s) of Differential and Darboux Soliton Equations.

**f.)** General Wavelet/Theory and Measurement Dichotomy.

**Post Logarithmic Op-Amp**

To-do *experimentally*:

a.) In the bandpass, we have a:

(alpha+beta*z), (eta+rho*z), unto a unital.

b.) Partition of Unity, remains of a contrast, for in the group theorem.

c.) The multiplicative 'coextension' remains compunctual to a (regulated-gauge).

Look this up in QED.

d.) Sinc[phase, amplitude] - covariant among ***group**-element(s).

e.) The algebraic, O-P-Q-'R', remains of Pascal's triangle, to-completion.

In that of one (**1**)-step-up, in n and n factorial,... unto differential factorial, for in Gamma.

f.) Then, essentially, the denomination remains the mathematical codex-enquement of associability among (two numbers from one).

g.) This remains of a solution *With Eisenstein Partition; to Goldbach, and the '\wp,\parital\wp'.

h.) Induction is necessary.* to: The Formal Group.

i.) Courant's variables in Pascals triangle.....

Of proportion,.... '*tangent*'.

j.) Shoulda done eras ago.

a.) The relationship of the 'easy and hard axis' broken-down into ***Components.**

Of the '1/2' - *in-group*, - that of S_{x,y,z} evidence of a commutative* and non-commutative generalized function*; - that of a finite arithmetic analysis reveals a torsion and tension,... of mutual zero and pole, to specific

frequencies.  To extrapolate, the S=1/2 and Z=1/2, thermally shape and rectify their(s) of-motion in that [within] the envelope*.  Of the quadratic in relation to the preceding 1/2 remain of a nullified exponential-additional.  I have encoded [basically] of Moebius.... however, it remain(s) of non-1/2 limit* to L'Hopital or ratio-test, in power....

**Goldbach(s) Conjecture is resolved in a remainder of a quadratic to reciprocity, - in relation to a 1/2,.. in - BSD. - It-remains of the proportion.***

It remains to be seen of the alliable statistical margin and statistical conversion between words and numbers, and that of the rotative basis.

And, it remains to be seen, of that of the ideal* in-it's basis to the elliptic, any quantum* behavioral relationship, or that of co-rotative basis.  [and counter].

Of the switch, there remains this.

I decided on a **terminal-project...**

1.)  That of the projective space,... with the undecided terminology of an ***Accessory***.

2.)  That of the redshift/blueshift space with quantum realization, ... of a ***Potentiation***.

* There need(s) to be a constraint [I do not know what] on the geometry - beware the embedding.

* There need(s) to be a connection or [inadequate?] to that of commutative and non-commutative.

- That this agree(s) with the projective basis in action and reaction *[supremacy].

* There need(s) to be a relationship to the 'blind result of factual(s)'.

What we get is an epistomological root.....  That I am in awe.

I may have resolved the problem - although there is a degenerate two (**2**).

a.)  That of the quadratic equation admit(s) symmetric pole(s)/zero(s); thus, that of addition of a factor \p, - result(s) in a *new curve related to the old one.

Thus, **in-involution**; the result of (the zeros, the projective variety, the periods, and, the additional constant) - derives a ***Quadratic Form;*** of-which relates to each and each of these*.

So, in other word(s):

1.)  Elliptic plus constant.

2.)  Derived quadratic... and period(s), etc,... but with reduction via a monic.

3.)  Zeros of derivative.

***A Domicile Group.**

I was thinking of this…… - that the Elliptic [closed group] assigns from that of a *Complex \b, that of the two-root(s) in-complex algebra.

I have my *first result.

3.) That of the historiological truth, of transferrence of law,... of ***Separation***.

Beautiful…

a.) We end with that of a dictionary.

b.) We end with that of a representation.

As to indicate of the resolution in {place to place} and, the 'offset' - locally, of observable symbol(s).

Then, it is clear, that the structure is not monotone!

We reduce to a theorem of \sigma^{2}, on that of characteristic equations…… that I have decided to master this…. there may be other* varieties, however - there is a quality of it saturating the 2d-plane, etc,... thus, that I am on my way, and of what has to do with a general theorem, I am questioning.

I may have finally resolved the main conundrum….. how to incorporate relativity.

The Painleve variety collapses given the dichotomy [above] - thus, - that of the 'dipole-idea' extends to that of the doublet, for which relates to the group, and the L(1) and L(2), thus that a gap opens!

This occurs in a plethora of examples, and connect(s) the redshift to that of the doping.

I decided on a **terminal-project...**

1.) That of the projective space,... with the undecided terminology of an ***Accessory***.

2.) That of the redshift/blueshift space with quantum realization, ... of a ***Potentiation***.

3.) That of the historiological truth, of transferrence of law,... of ***Separation.***

4.) That of the identity to do with… the collapsed connection,... of ***Articulation.***

Considering:

\a*\wp^{''}+\b*(\wp^{'})^{2}=r(z)...

And that of what this reduces-to:

\wp+\eta

It is as-simple as moving the origin..... thus a law of the 'objective observer'.

Thus, this forms a new-kind of **Non-Standard Group.**

Thus, we consider function(s) such-as:

Airy, Bessel, Exponential, Weierstrass P, Polynomial, Guassian, Moebius.

To resolve the Painleve varieties, by embedding these in a central [*larger*] problem.

I added* a logarithmic-amp, ... that under a [negative-feedback] the *essentially* Butterworth-filter, supresses the post-signal, and enhances the 'flatness' of the prior-signal.

Thus, I am *finally* seeing a match* with respect-to the theory and the practice,... that it is (3d), with offsets,... then* requiring a 'switch'.

Then, it is a 'step function' upon* the basis of an (sncn,cndn,dnsn),...

I will need think of an-additional circuit for that of the noncommutativity, with switches.

The 'device' is-finished, they were a success,... they are named: **Ito.**

To connect to the v.2.0, with a 'switch-style'-addendum.

To un'fold' the ***Cube**.

To add a 'phase stage' to *rotate*.

To add a stage *A compensator*, of what has to do with aprioritization, and indication.

Then,... I will be at a new*-stage of development.

The 'half-gaussian in the limit as the exponential goes to infinity' - is related to the Polynomial Ideal(s) and good and bad reduction.

The Fisher/Bayes lemma, has to do with a equation (\a-\p*),... - thus, when we go to subtract the gaussian measure, to approximate a better result, we come up 'low or high'.

The way, - to be on-manner, is to contravene the known* with a logistic equation, for in terms of the balance between continual extinction and renewal.

Thus, of a functional relationship, it is to-relate the separation and cohesion of law, to which relate to renewal and extinction, via which the Finite Arithmetic, in-open term(s) decides based on knowledge.

This has to do with violation of the Uniqueness of the Factoring of a number.

The '**Log[]**' *rule* I-found, applies directly, to the status of the Finite-Arithmetic and the Fisher/Bayes theorem (I developed).

Only *two* things can happen - ultimately:

a.) U.P. has a delta(x) and delta(p) - one of which goes to infinity.

b.) Centripetal accelerative functional, must differ from Newtonian mechanic for some reason.

The answer is that these 'error(s)' or 'malignment(s)' cancel each other, through the (\p\wp)^{2}+\p^{2}\wp.

I found the-answer!

1.) The Christoffel Symbol [of which is a logarithmic differential] convey(s) *of a monic or pole... what is the Quantum-associability at an effective inverse, - that this and this alone, under a Historical switch, convey(s) the realism of cause to effect, - & - that of the uncertainty for in a combining and a separating force.*

That *apparently* particle and field interpose and relate, of 'top and bottom' - that past, and future become of a rotunda, - to which the dynamic is quasistatic, - and the field theory is anomalous given* the Projective Variety. That instead of an uncertainty that is a point-comparative gravitation - it is a dynamical variable, as with gravititation.

Thus, the Swinter-Dyer-Birch Conjecture, of *rank* and, of *height in relation to rank*, assurres the (second quadrature) relates of it's monomial structure of that of the two-forces, ***on*** that of the Acceleration and Velocity ***of*** \Gamma_{\mu}, for the field, - that the holography, informs that the force is laid into ***being*** a **Principle.*

The 'distributive' and 'segregational' *phonon*, tailor(s) the L^{2}, to the L^{1}, what is a reverse osmosis - as it would be understood. Thus, - that the allocation *verbatim* in-open-terms of the tensor classifier, cross-occludes of a basis in unital - what is an 'interstitial-margin' of accessory.

Therefore, the phonon-on-spinwave of a magnetic holotype (lattice and electron charge density wave) - formulates an ExB and E.B, s.t. the energy of the tensor validates an accelerative matching condition on the velocimetric 'drag' - of negative-friction constant of viscosity, then of the 1/sqrt(2), the 'accessory' *for what is an L^{1} and L^{2}, distributes the Feynman diagram*, s.t. the Slave-Boson becomes 'master' and the 'Mother-Boson' becomes the 'slave-boson'.

Thus, the appreciability of a phonon is related to the randomization of a second moment of lower energy comparative a lower frequency of the electromagnetic 'language' in relation to a hingal moment upon the photon. Thus, a negative mass 'index' comparative a Proca Equation. *[in C].*

*"The quadrature conditional assumptive is dependent on a historical arrow, then derived of a present in relation to a future. That the (quadric) does not fit (to null epsilon) but a Dedekind cut of a rational and therefore volumetric extension within a surface, of which is-pointed. Thus, the null-separator [in null-epsilon] - encodes of a thermodynamic invariance, of it's saturable separative-mean at space, time, and quantifiable property. Therefore, that the infrared and ultraviolet point(s) regularize to a conditional assumptive and valid truth of a monic/index on negatively refractory bosonization by the associability of the secondary moment of a future in relation to a past, - that of the dialectical 'switch' to which a past becomes a future, is solid, and justified within all open terms."*

The projective synoptic on that of the spinwaves remain of an equivalent chemical valence [as to the electron wavelength], - that the mathematic(s) remains of an elliptic group, - it has to do with observation versus measurement... That *measurement is the mathematic(s) and one-part of the problem (the Moebius) - and the punctured-disc is *observation, of the physical,... thus it is inverted, due the historical remark.

Hypothesis; "The projective identity remains a curvature to non-curvature form in L(1) and L(2), to which in Superconductivity of the HT variety, that of the cooperative tendencies of acceleration in gravitation and electromagnetism, balance with that of a net-net displacement evaluated over space due to the Strong Equivalence Principle and the amendation of history."

Thus, the projective identity is a signifier for-which the commutative and non-commutative, [acceleration] and *Hopf-bifurcation* control the valent to covalent pathway of transition,...

Thus, that it remains to take place between the *form and the *vector in relation to either principle.

Essentially, I have resolved that the 'answer' is to relabel the 'rank' of the curve as {0,1}, for-which the algebra comes out right, with C=1/2, for that of the constant,... Thus, that the slope of this curve is R-Z.

Essentially, the answer is that the ceasing of a period in-truncation hold(s) for all order(s), and therefore, for a similar reason, at each rank, and for each elliptic curve, of the prime-prime ideal, - thus, the elliptic group hold(s) for that of all circular returns.

Thus I have my-second paper!

*Thus, *quadratic reciprocity*, generalizes to that of the identity of a numeric identity, of the (1/2) on that of the circular-return, for elliptic curves, of-which relates to the finiteness or infinite property of the Elliptic Curve under consideration.

The 'group-law' of the {sn,cn,dn} relates via a finite-lattice, to that of it's regularization! Thus, this hold(s) for each Integer evaluated over an elliptic-curve.

These problems are related:

a.) That of the spinwaves encode of a relativistic factor on the separability of differential equations.

b.) That of the BSD Conjecture - relates of the 'spectrum' of an elliptic curve over a given prime field.

That I resolved *both*.

I am ready.

*That I recently asked a* ***New** question.*

Why would relativity have two-facet(s), on* of-which the gravitation would agree with the quantum mechanics as-to-freefall?

For instance, is it coincidence to-which when we go to dispute the relationship of freefall, we are mistaken.... and of freefall, that it **also* proves the quantum behavior as historical?

Essentially, it act(s) in two manner(s), - but these appear as-one. Thus, is it a mathematical concept?

I get-it.

The projective variety, under the 'hidden and the exposed' of the two-facet(s) of the geometry and mathematic(s),... judges the element of the quadratic to be of a reciprocity,... thus, that when sped up, or slowed-down, the quadratic is-intact.

I found the 'parabola' relates of the expident to a 'quick-path' and a 'slow-path'.

I found of a relationship in the g factor (gamma) - thus, that the Spinwave-problem and the B.-S.-D. *conjecture* remain(s) soluble, for in a (2x2) on topology of the F.C.T. and the G.C.

Thus, the differential equation must be related to which the Quadratic relates of the Mathematics at a base-layer.... that of a two-by-two topological-truth of Categories.

I found the projective-basis of 'hidden' and 'revealed' completes with a 'comparative' and an 'equals' relationship what can be solid, of that of *History & Physics*, of the ***Epistimological Root***.

Thus, - that *also*; differential equations are encoded of which relate to Phenomena, and relate of the 'separative mean' - on that of the truth of *Their Origin*, ... thus that the **Geometry** has a basis in that of the 'decided' under an-ascent and a-descent.

That, this remains of the *group law to-which with a *(shortening) composes *life*.

It was indeed mathematics that provided the-Key.

*Essentially, two-empirical relationships are-needed,... they devolve from the 'bonding' and the dynamics.*

I surmized, the result has to do with alpha to m, and - de'Broglie to Compton.

I now need* to build a **model**, if I wish to solve this problem beyond *Theory*, or - including theory, for that of the Spin Texture, and such... It appears the resolution is found in that of the Boussineq eq. with the KP.

The ratio* of doping to effective-mass..... Should I do a [case] study?

Two step(s) need to be-taken...

1.) That of the relationship in (3D) of which has to do with the 'shape property' and the 'orbit'.

    a.) This* is related to the spin resonance and anti-resonance.

2.) That of the relationship between the **projective disc* and the superconductivity theorem, in ||.

1.) Is answered by the magnetic and electrical field, - that of the (_|_) theorem. [perpendicular].

2.) Is answered by an-ideal, and an-ideal, to which u.p. and g.r. relate of the Pauli Exclusion... under an *exception to physics, ...

**Final Remark on the Mechanism of HTSC**

1.) Acceleration is met historically of an equals-comparative.

2.) That it *motivates spin and charge separation and recombination through a/m and l_{d}/l_{c}.

3.) Thus, that the end-theorem is Moebius/Punctured disc; **It is a Klein-Bottle.**

**Thus; it is half-Mathematical and half-Physical.**

Thus, I have a theorem, - the 'differential equation' may-deceive, but it appears appreciably clear to-me, - that the finite arithmetic may be proven in this manner.

https://www.scientificamerican.com/article/quantum-physics-isnt-as-weird-as-you-think-its-weirder/

To appreciate how unusual quantum measurement is, imagine someone speaking to a crowd of people. Sound waves spread out across the crowd, and everyone hears the speech. In the quantum world, however, the sound wave would spread out just as expected, but as soon as a single person in the crowd perceives (or measures) it, the entire sound wave would concentrate itself in that single person's ear, and no one else would

hear it.

The* projective identity, for in thermal-acquity, and co-factor(s) of spinwave and phonon - L(1) to L(2) bridge, solidly place(s) the permanence of 'redshift' - and 'quantum magnetism' of co-factor(s) for that of diamagnetism, and the 'aging' property - by which it must solidify of agency through-process initially.*

The two-fold factor(s) of which relate to spinwave mass regularization and charge/spin regularization, encode of a gap and phenomena, of which are dynamically established in a 'stable neutrality' of the-static.

*** Control of and Virtual Toeffli

Scale, [priority]; Stop and Start [interopative] Gap, the Toeffli, can manage a 14bit sweep to 'band' & manual. (10+10+4) standard 24, in-hardware [indices],... [now-as] are to-have (2x) - (17x|8.3.9.2.1.0.1), conditioned peer* assignment(s) in surplus addage at Adafruit and Arduino.... Assuming* Synchronization. Mother's peer process in registrable TTL/CMOS front,... O(m)~.for/for|O(p).... - phenomena (nu=1/2 or 1/2+\alpha) with manual process.

1.) Code [virtual] - bus - dispute / learning for-for, NAND-XOR-bus (2.0.1)xx.x, (3) variable net Global variable.

2.) Formative dispute intimacy to (code/code) sync. & (literal) stop/start and phenomena/phenomenology.

01:57 pm - 1/3/2024

In the remainder of a 'classical-integer (F/B); 'ball'-and-or-'particle' limit' of semiclassical relationship the codeterminant oddity of QM, is a finite [geometric] scaling of particle phases, and Fermi's Golden Rule. Secondly, the 'relationship' to relation of the quantum billiard(s) for in a (2x.0.1x) of the CMOS/filter relation, remains globally Quantum. When* as-such we isolate one-variable, it remains uncertain with all energy, or entirely of a locus on Z.

When, as such, the closed-gap, remain(s) within digitized relation, a semiclassical wave, of two mutual unilateral game relationships remains of a Quantum-Dispute.

Why, and in what manner, does the Quantum Unit of Conductance translate into the wave-process. (1/2) cancelling a (factor of 2 Thomas Precession) - of the complete, and incomplete-completed* verification of onideal, of a (1 S),..

(2d and spread, or 3d, and (2d-1d) - sqrt(3/2) and a sqrt(1/2) and sqrt(1/4)), ... finite particle - wave & Hologram.

#1: Mermin-Wagner & Dispute Theorem & Thomas Precession and Fermi(s) Golden Rule

#2: Nonlinear-linear, ideals, adeles, and mathematical theorem of device.

#3: Quantum Conductance and 'rail-partial' in MIDI [like] and Wave Phenomena of Semiclassical.

#4: Entanglement & epsilon-elliptic Painleve (Algebraic Homotopy), ... Structure.

Identified wave-neutrality of v+/-w', remain of homotopic identifiers to mathematics but of entrained cross-plus / surplus in (2x.0.1) of quasi-preliminary collider-variable power to spatialized coordinate projective basis process.

*02:01 am October 15th, 2023 - (5.5 h.)*

I found the 'parabola' relates of the expident to a 'quick-path' and a 'slow-path'.

I found of a relationship in the g factor (gamma) - thus, that the Spinwave-problem and the B.-S.-D. *conjecture* remain(s) soluble, for in a (2x2) on topology of the F.C.T. and the G.C.

Thus, the differential equation must be related to which the Quadratic relates of the Mathematics at a base-layer.... that of a two-by-two topological-truth of Categories.

*03:14 am October 15th, 2023 - (30 m.)*

I found the projective-basis of 'hidden' and 'revealed' completes with a 'comparative' and an 'equals' relationship what can be solid, of that of *History & Physics*, of the ***Epistimological Root***.

Thus, - that *also*; differential equations are encoded of which relate to Phenomena, and relate of the 'separative mean' - on that of the truth of *Their Origin*, ... thus that the **Geometry** has a basis in that of the 'decided' under an-ascent and a-descent.

That, this remains of the *group law to-which with a *(shortening) composes *life*.

It was indeed mathematics that provided the-Key.

*04:46 am October 15th, 2023 - (5 m.)*

*Essentially, two-empirical relationships are-needed,... they devolve from the 'bonding' and the dynamics.*

I surmized, the result has to do with alpha to m, and - de'Broglie to Compton.

I now need* to build a **model**, if I wish to solve this problem beyond *Theory*, or - including theory, for that of the Spin Texture, and such... It appears the resolution is found in that of the Boussineq eq. with the KP.

*04:59 am October 15th, 2023 - (10 m.)*

The ratio* of doping to effective-mass..... Should I do a [case] study?

*05:05 am October 15th, 2023 - (5 m.)*

Two step(s) need to be-taken...

1.) That of the relationship in (3D) of which has to do with the 'shape property' and the 'orbit'.

a.) This* is related to the spin resonance and anti-resonance.

2.) That of the relationship between the **projective disc* and the superconductivity theorem, in ||.

1.) Is answered by the magnetic and electrical field, - that of the (_|_) theorem. [perpendicular].

2.) Is answered by an-ideal, and an-ideal, to which u.p. and g.r. relate of the Pauli Exclusion… under an *exception to physics, ...

*05:25 am October 15th, 2023 - (2 m.)*

**Final Remark on the Mechanism of HTSC**

1.) Acceleration is met historically of an equals-comparative.

2.) That it *motivates spin and charge separation and recombination through a/m and l_{d}/l_{c}.

3.) Thus, that the end-theorem is Moebius/Punctured disc; **It is a Klein-Bottle.**

**Thus; it is half-Mathematical and half-Physical.**

*05:43 am October 15th, 2023 - (1 m.)*

The projective synoptic on that of the spinwaves remain of an equivalent chemical valence [as to the electron wavelength], - that the mathematic(s) remains of an elliptic group, - it has to do with observation versus measurement… That *measurement is the mathematic(s) and one-part of the problem (the Moebius) - and the punctured-disc is *observation, of the physical,... thus it is inverted, due the historical remark.

*06:18 am October 15th, 2023 - (3 m.)*

Hypothesis; "The projective identity remains a curvature to non-curvature form in L(1) and L(2), to which in Superconductivity of the HT variety, that of the cooperative tendencies of acceleration in gravitation and electromagnetism, balance with that of a net-net displacement evaluated over space due to the Strong Equivalence Principle and the amendation of history."

*06:42 am October 15th, 2023 - (3 m.)*

Thus, the projective identity is a signifier for-which the commutative and non-commutative, [acceleration] and *Hopf-bifurcation* control the valent to covalent pathway of transition,...

Thus, that it remains to take place between the *form and the *vector in relation to either principle.

*08:29 am October 15th, 2023 - (11 m.)*

That of the {sn,cn,dn} *prove* of the *Differential Equation what is not-obvious,... that the denomination of the l(1) and l(2) *remain* of the Commutative and Non-Commutative type under a Weil group.* That this encodes of-which the theorem on that of the *differential of a Dar'boux-Beltrami* *surface encodes of the group structure attributed to Superconductivity.

*09:23 am October 15th, 2023 - (35 m.)*

I will be taking a break to do other* things, - that I found that:

a.) The Hopf-bifurcation is mostly explained.

b.) The Group-theorem at a relative *stasis is mostly explained.

These happen for the same-reason; - that I do not know what reason this is.

*08:54 am October 15th, 2023 - (3 m.)*

I was not thinking.*

That I need a double-blind visa via the computer-basis.  A kind of 'Hume's fork' for the Computer Simulation, of which deals with a statistical assay and a double-blind.

One way*, is to *extract data* and re-enter it *of* a *Statistical Assay.*

*04:02 pm October 15th, 2023 - (6 m.)*

The solution to Superconductivity, is thinking* in-terms of the application of data.

i.e. (We have a function) - to which is an addendum in commutativity and non-commutativity in a flow.

Then, of a Hopf, it is laid in place by-which the history demands.* Of a 'statistical abbutement'.

*04:34 pm October 15th, 2023 - (8 m.)*

What is certain, is the *result-coded of:

a.) A *blind assumptive.

b.) Hume's Fork.

c.) Accounting laid in-place.

d.) Of the die.

That I need-this, &

Of the projective basis, and for what follow(s), a secondary teir, on that of knowledge.

*05:07 pm October 15th, 2023 - (8 m.)*

Essentially, the (1/2) encodes of charitable and uncharitable… - of what-relates to a differential, and functional dialog on that of the projective variety, through which we-learn of the (2x.0.1) on-dialog of analysis.  This, with what-is a (four topo) - established is with, The Hopf,... and of historical lamentation what is required in-science.

Thus, I am going to do a paper on:

a.) Electronics & Device.

b.) Muscle and Biology.

c.) Mathematic(s).

d.) Philosophy of Science.

e.) Analytical Inference.

f.) Law.

g.) Epistomology (Hume).

"Symbolic one-half."

*07:44 pm October 15th, 2023 - (8 m.)*

That of a symbolic-expression in Finite Arithmetic, of a valuative polynomial, carries of the Elliptic variety and higher, that certain lower class functions are evaluable over field(s) of that of the relationship of the local to the global *properties, and *roots, and such,...

That of certain relationships are not evaluable over the errata of a given expression for which there are determinations on the separable classifiers of the function properties.

This is not merely that they are undefined, but related to undecidability, etc,... and of a strict relationship of unpredictability, and the elimination of a root basis, for of transcendental and non-transcendental root(s) over certain field(s).

Thus, the computer can comparatively evaluate four in a basis of element(s) without abandon, and come to an answer of which relates to the return of certain numerical identities.

Thus, five, and six, as upper bound(s) remain the limit of computational determination over a single two dimensional field and a tensor classification (respectively).

The nature of equations forbids the nature of 'closure' of the group, thus, that of the fifth, and such, remains of the hyperelliptic property, and certainly the 'solutions' to all equations are not therefore expressible.

Undecidability is related to but not identical with this expressive valuation.

*09:47 pm October 15th, 2023 - (8 m.)*

I have;

a.) Hume's fork, Fisher, Bayes, and the Epistimological Root, on what is demonstrated.

b.) I have a B.S.D. and differential equation rule, with a boundary on computability.

What do I do to find finality with Superconductivity?

I was **completely** misguided w.r.t. the Qubit. I had to-seek a Convex/Concave switchover circuit. It was this simple, - then; with node(s).

*At the *least, if I do-not study B.S.D. conjecture, I will study the Connection involved of differential equations [predictable and unpredictable] - [CPU/human] - and that of the KdV for the Finite Arith.*

*If I do not* do-this, an upper bridge, is the problem of the following:*

*a.) Finite Arithmetic.*

*b.) Predictable and Unpredictable.*

*c.) Riemann-Hilbert problem(s).*

*d.) Differential equations, of varieties [i.e. KP+Boissineq etc...].*

1.) Lie Analysis with Representation and ***Homotopy.**

Essentially how could I explain the seeming contradictory yet agreeing principle(s) of determinism, predictability, prediction, expectation, cause, effect, and unpredictability?

Essentially, the mathematic(s) problem yet-beyond what I've done, semiadjacent the boundary.

(As one theory becomes the next.*)

Is:

a.) Adele's & Place's.

b.) Homotopies and Categories.

**We want:**

To apply this 'structure conveyed via Representations at (@)':

a.) Differential-eq's, with Algebra via the Hilbert Problem.

*with*:

b.) Enforcable Predictive Likelihood via Conditional Inference.

* We know that 'finite arithmetic of elliptics' - has a notion of 'good reduction' and 'bad reduction' - can *nevertheless...* a notion of-***Congruence** be found? - Such as Eisenstein series.....

*I've decided to give up.*

**I will study (1/2)\delta|\alpha, of the Logistic, KP, and BS equation(s).**

Of Machine and Human.

**I know the [above] problem is related to **Computation**.*

I will [end-it] - and see the degree to which this is related to Superconductivity - it is.... however, the entire phase diagram!?

10:32 am

*Major/Minor - Intonality & Reflection (roll...).*

*Red/Black ++/- Elimination of Fog/Game Complexity.*

1.) Doping and mass-effect open(s) a neutral(s) gap to which relativity scales negatively.

a.) An inhered 'past' and 'future' from independent bodies result(s) with relativity.

2.) The rms - associated with Elliptic function(s) and a group, scales the factor of two.

a.) Thus electron(s) attract momentarily, the Green's function is delayed, and there is levitation.

This resolves every pathology of the material.

That there is a 4x.5.2.0.1x conundrum on that of 'scaffolded abridgement'.... on inheritance of the material in relation to-us, to build the theory.

a.) Superposition for some* unknown-reason *relates* to Relativity as visa via shared time!

b.) Covariance, of which is assurred, via a prior reasoning (the strong E.P. to flat condition).

***I have it!***

A:) In 'any' higher dimensional space - *entropy* - correlates with that of the ***imaginary**, of quantum-mechanic(s).

a.) This render(s) a Reisz-basis.

b.) Within this basis ket \xi and ket \chi relate of which with \phi and \psi they are projections of a rhombus.

B:) The 'aft' and 'tilt' of the registrable field* and solitary-particle object a control-diagnostic, *of*:

a.) Equally weighted renewal and stability criteria.

b.) & of the 'monic' on that of the 'relative and hermitian signature'.

C:) This *then*, relates of Fisher and Bayes.

*Then*, there is the substitution of a.x^{2}+b=L, for that of \wp to \jacobi.

I finally found a solution to superconductivity.

a.) The 'table' of-which relates to five in separation [via the separation in law, etc...] and of-person to 2/3, and such, for that of entrance and exit, makes logical exclusion to that of inherited repulsion in the SC.

b.) This, attribute, exposes, a Gauss-Bonnet, of which within the higher dimension is reversibly the inheritance of either theory, - thus, that electromagnetism reverses, upon the gravity and coulomb force.

That therefore, the 'gap' comes out of it, it is not undecided..... I have found this law.

One does not simply relate back, however...

This *had* related to a separation in law... like a 'ream'.

Thus A.{B|C}.-C, in A-|D and D-|{B.-C} implicates B or C - that of A., is then and/or..... with A, not .-A.

Thus, existent, from it's predicate.

Fifth, to disclosed *port*, is a pseudo-gapped-releasability, - that in-either single-tap, aspecializes to 'vertical homeothy', the 'ascent' from which is a 'cloud-tine' of/on/upon mixed and such *random anomolous, provided raising of a providence, in a penisular-goto, upon a 'river/flowing or unflowed (cycle)' - in 4|4.5 at 'abridgeable key-way-stone.' - that in-either the third compunctual, is a 'float-sum' in deficit to *22* in remainder of *18|5* proselective addend.

A:) Openable, defensible (2x3.0.2.0x.1|5.6) *included*-datum 'tap'-and-'release' *black/red* immuted is chord-dias.

B:) Closable, to *upstream* [enclosure] is butressed/pilliary/holed/unfillable prior *consonance*, in two-dyiad.....

c.) Opened*, determinant-minor *is rotate-apside-homeothy* separability-quotient computational downstream.

d.) Closed*, prioritative *wide-task-break-bearing*, is *random/linear *non-non-Brownian-bridge box-midpoint.

e.) Frustrable*, *CMOS-litery* - is task/box-in-box *mutual(s)* hardware-hardware defensible TCL/TKL entryway.

Non-selective 'held' - bias-element (in-forward/reverse-out-plug-cap-release).

KdV + Weber in Riccati (element - to pitch (phasor-voltage-apogetic)).

Chaos and Order, selective photonic photovoltaic '-//-pile' - photolithographic and 'plate' - in (*Reverse/forward Color).....

KdV + Weber (stereo-projective identity in (apside first differential \p_{x} *Hopf-log-Sobolev Divergence* - apside/**pro** \p_{xt,xx} Tensor CC… Cons,..... reguarlity in mathematic(s) and physical *Boundary *Non-grav *suspension* and deposit,..... in trans-bivalent-valent-lithographic *Chem (molecular) tine language (Spin-Flip microcanonical) - nanotechnology..... - shallow..... "index" - Snell's Law.

KdV + Weber (second differential to *Hopf*) log-Sobolev, for of a Entropy in *Energy and Self-Induced *Inductance*.....

Chem (MIDI) - TcL/TKL language [python]. idle.

In 12, for 15, and 32, in (3^{2+1}-2^{3-1+1}), in cubical return, the 48.41, in 170g and 200 paper(s), and (−50o)-(−2000) remain(s) per registrable (−7/50), (to +3) +/-1, certain in six.  Yes, I remain independently a person, and innocently held of my residential contract.

It was approximately 6:38 pm [last night] - when I thought:

a.) A pattern and a pattern discerned.

b.) A primacy at notary in law, to conchordant, truth.…

c.) A finality in conditions to the absolute.

d.) That of a 'code influx'.

e.) A numeric relation for in surplus, at abatement.

f.) Different encoding(s) and in mutual(s) condition.

g.) Dollar (+/-5|0) and (+1|0),..... at odd(s).

h.) Erasure through innocence to Professor(s) Problem.

i.) +6|4 in-intention per second(s).'

j.) (2x) to (4x) in dispute addendum in lateral and continuation.

They are-real, for one - departed - and one *missing* - and whether or not they-exist, someone with the self, to, in fact tell they have departed.  It is Ariana.

Now,

1.) Topology, that of homotopy, for which it is justified of *every finite-pattern in four dimensions.

2.) That of (4x-4x) on polarity, and orientation, *how to keep this consistent.*

3.) That of 'neutrality and epsilon-greater to the P-norm' - for that of statistical uniform equicontinuity.

4.) That of the 5'th-out; by which the unassociable is with Godelian Incompletion, at-integer 'some higher'.

5.) That of the 4th, etc, on-molecular basis, and/or anomaly - that of a total divergence.

6.) That of the abacus, and a counting system, with the computer, and with and without this.

7.) That of people, down to eight, etc,... and of topo at acknowledgement beyond the mind and brain.

8.) That of the geometry by which different pieces come together, as i.e. the Poincare Conjecture.

9.) That of distinction of independent or non-independence, and the total divergence of differential equations.

10.) That of the 'missing spacer' on that of accounting to 9', - for that of the laint, and the justified at kissing.

11.) That of the abstraction by which the natural number(s) furnish 7' 'zone's' of analysis, and at interval.

12.) The pathwise terminal by which that of inside and outside are understood, for that of homotopy.

13.) That of the inheritance by which the 'g' factor of gravitation regularizes the Dar'Boux mapping.

14.) That of the 'geometric inversion' by which it becomes three dimensional and the photoelectric effect.

15.) That of the 'gross-redshift' and elliptic statistics by which the regularization is counter-Fubini.

16.) That of the 'switch' on that of the net-quantum for that of relativity, for that of superconductivity.

17.) Impact such as that of pseudoprobability and the future with and without a group at the computer.

a.) Consider the projective {F|B}~{Q|G} for then in the elliptic.

b.) Consider the *statistical* L(1) and L(2).

c.) Consider the projective *isomorphism or field-graph theoretic.*

d.) Consider the group-dilemma, at that of the **finite-lattice.*

e.) Consider that of redshift and quantum photoelectric effect.

f.) Consider that of the *relative* inheritance versus *Dar'boux Theorem.*

g.) Consider that of the *Projective [onto] seemlessness* of the symbolic retention and replacement.

*h.) Consider the repleadiation of a self, via a contrast in life, death, and birth [for of birth/death] at witness.

*i.) Consider the problem of 'finite arithmetic' for *organics*, that *of* Law [separation] and Law [combination].

*j.) Consider *mathematic(s)* usurping to a ***condition*** physics, of it's naturalized inversion of phenomenon.

a.) Compensator.

b.) Error box.

1.) At (@) Compensator - horizontal *shift,* with voltage-DC.

Weber and KdV + Runge-Lenz symmetry, for that of generalization.

Therefrom, the general example of the difference of measurement and observation for of equipment of which relates to 0 and 1, and that of Z, the integers, for:

v/\v=Q/Z&!Q and 1/\1=Z

At the Painleve variety and dispersive solutions, - for that of the Classical Level & Scale.

We have *factor(s), the next-hour, and class assumptions.*

*The only-preliminary [of the future] is mean at that of the device *implemented. It has not, nor, related of the present to past, - been anything priorly of-which would at currency to-now be related. This is of the S=2,1,0, theorem, on coax.*

**Section (2):**

**<u>Group Isomorphisms</u>**

When interested in the copy of a sociological abridgement in the 'relative' the openly held diplomatic process is social in contrast - but within the compendium of idea(s) the relative is idenfied for that of a 'dispute in identity'.

Perhaps, then, to disclosure, many were as it seemed arguing over a contrast of time and space - but merely few, and the dispute in weather, was of a stacked relationship, ajarring law for law in many neutral fast relationships.

Questionably, we must introduct of the process of a law in bearing to 'precept or principle' of a religion or scientific basis. Buddhists would not disclose otherwise but that the phenomena are 'empty' of locus of identifiable portion and piece. The question of membership was of guarantee(s), in a secondary and primary question, neutrality and abiding, promisefully held, that of measure, weight, apportion, balance, and stance, that of community, empty and complete, provided wax and wane, and observable life, death, world, and 'self'.

Thus, we cannot inhere naturally, but of at the least - in portion to a promise in proposal upon inherited truth, jurisprudence in modern senses or time(s), manage with witness and word(s), but hold we estemically have honestly inherited to good or evil a just world, universally, a believe in the open contrast and connection of one to the story provided of interepretation and just clause to another(s) messengership in these, and neutral peaceable gathering. Questionably, it remained that the truthful persuasion in neutrality had not remained of either a sociologically held persuasion in gravitation or relative, light as a carrier, or medium of particle-field, but a compendium (per concurrence) of mutually held unilateral and sancrosynct truth of passage and preliminary theory of the 'special'. We may avow that education may preliminiary like it's self to a postulanal upon the ediface of modern eastern, western, northern, and southern hemisphical process of delivery and note of progression in international policy. However broken, or restoratively the avowal of one, we remain the entitled autonomy of a recognized world in view from afar. Thus education had proven a success, and science.

The question - here[in] possessive is whether or not the avowal of a principle can withstand the exact ineffibility and affiability of disclosure and process of scrutiny since nearly 200 year(s) ago, Galileo.  The question, of our survival, and of the fittest in Darwinian logic, and a Dalton theory in heritable genetic formation.

We were wrong the promissary, our nation would remain at the hand of a foreignable power, and their sympathies, and it was - to disclose, the autonomy were would abhor, but the disentitlement of a people.

The theorem put fourth is whether the entitled Mermin-Wagner theorem is a necessary ingredient with the degrees of freedom of thermal and the primary Slave-Goldstone-Boson language of Spontaneous Symmetry Breaking through Asymptotic Freedom to necessitate - further - the decoupling of an energy limit in past and future to cause and effectual temporal nature, but to unprohibit the then neutral provided placing among space in lower dimensions and of the necessary means for reconciliation of Brownian Motion with light - and, is this tt0o appreciate difference within a geometry or space, in abstract, or of a table of means, measures, law, and council, upon peaceable assembly, for in yet a table of three dimensions within four dimensional space and time?

Indeed, as in Fermi, the question - dictated per global warming - is the rates of diffusion and combination, recombination, and distributed tendril of Fusion and Fission.**

$$\text{Is } \textit{it} \text{ perhaps } \gamma^{k}=\Pi_{J_{k}}^{n}(\gamma^{J})*mc^{1/2(n+m)}.$$

As a generally reductive theorem.  Therefore it proves perhaps necessary to question of mathematics, o the nonlinear to linear 'good reduction' and isomorphism with complex analysis and Riemann-Hilbert-Stokes reduction for of the problem of linearity in Painleve *differential equation types and their disjunctive or conjunctive graph associate and graph types for in a typesetting and machine interface with unseparated cohomology, or separated or combined graph network theorem, then, to question the transistor basis, and of the game theoretic, (and it's sanity) - and perhaps intelligence of a machine, or that of electrical engineering, and numeric cross check of types in Hume(s) fork.

Finally, questionably, can we see these structural relationships in mimic in architechture and their stability theorem beyond the one body of Homotopy, Cohomology, and biological antecessor of heritage for in familial inhertance beyond space, time, and Dalton(s) theorem, or the theorem of inference?

End Dispute

I *figure*, of the MAX11 300,.. we can do the drawing/impediment/discursive/disclosure/isolation/disinclusion / obstacle.... with the ***switches**, on "Device =" *from earlier*, via operational amplifiers.

Thus, the ***gated**-potential is a KdV+Weber at a *Sinc*-function of the *intermediate signal foundation....* **via Compensator,** *at the boundaries of the Painleve 'varieties'*. A basically *quadratic-theory with a \p_{t}, on that of the n 'uppercase' - n is 6-29....

What is to be attended-to is bandwidth (\delta t*\delta\omega)....

Quantum Non-Ergodic and Ergodic Painleve Simulation

* I don't know if the following will work - Differential/Integral with one-switch, *with the other, various terms of a polynomial.*

a.) Lemon/Lime on v. b.) Coke and Sprite on h. [rail] c.) Bend, *away* mutual 'adhesion' - 'staple-tolerance' - (sw./sw./virtual assignement)++(h. interop. & *Arduino lock/failsafe). Opt.* - Merely *during code*, manage a 'monojack'....

b.) The general* ***geometry*** of a Markov-Peirls-Gate-Assembly-Instability, is a *Model-Hopf/Markov 'chain' in two/three.1 in column and row, mixed and unmixed* ***set-theoretic** gate-assignment tables in matrix and or tensor (curvalinear bracket) *chemical neutral point(s) in counterweight the* manual OOP architechture to a *mathematical* (planar/toroidial mutual 'from even') *spatialized* geometric E[k]~.bb.

**Notes for my Journal**

[*repository - of steps*]

#.) I have chosen the future, to become unto.

a.) There is the past, of eliminated consequence (in the present - written) & (of the future).

b.) The future is undetermined, but the only-knowable, - that of whence, and of what is to become.

1.) I have decided on medical practice and social dispute, and the reconciliation of the individual.

2.) I have also-decided on a hobby, [studies in mathematics, physics, and engineering] and a focus* on my health.

A.) I have two-questions, and two-aims, for the next 4-6 year(s).

a.) Illustration of the finitistic reconciliation of the group theorem of Beltrami/Dar'Boux & Poincare.

b.) Illustration of predator/prey and reconciliation of-time, for that of social dispute at growth/extinction.

B.) The secondary precept has to do with:

a.) The social/internet.

b.) Hope.

***I will write four book(s) and one article.***

**a.)** Social Dispute, Laws and Buddhism.

**b.)** Buddhism and Medicine.

1.) *Focus:* Dependent Origination & Beyond Emptiness

**c.)** General Physics & Equiparticipance.

**1.)** General Inertial Motion of Bodies & Frame Equivalence

**d.)** Design of Computers & Social Dispute

- A 'select' *question*, has* or-justifiably or justified as necessary and sufficient to an-argumentative basis, the social dispute entirely *shifted* since the arrival of computation on-earth? When and where has this occurred celestially? What is our limitation?

- What of pseudoprobability and occurrence, the foundation of a 'mechanism' for the machine* comparative a sentient species?

- What is our perimetry in terms of time, and geodesy, and of the historical* ***contextual*** debate and singular contributions?

*# Saving us from - and global confirmation of Global Warming - Confidence, Life, and Death.*

The device can-manage, a eject/priority/of - top-block, *outward*, floating.

It can also manage (two intercarries in four).

Or; hidden variable to geometry in (3x2.0.1) of projective non-2d (3d) hemi.

a.) Ariana [supposing of this] is not-Ava.

b.) Obama conveyed the ring to Ariana.

I am not these-three.

They are in fact communicating - via life and death, and independence. Life has been detected elsewhere. It is not my mind. - 01:01 pm.

The crisis is over - it ended with that of acknowledgement of Ava and Obama, for what I wouldn't know. Both are alive, and I am certain (*as of the note of this passage*), through my means.

I could not parse they could not hear me, until, - that of the abatement with acknowledgement of the other, - thus, this explains the illness.

For of Ariana, at that of preparatory, and delay, for what it would be, Obama had signified he was alive, then Ariana spoke, to whom of which there are two, and at that of string, for in phenomena.

I feel better, and was a success of a means for of the ill, *just* far-enough.

I made it through the crisis, - that it took some 20 year(s). I could not parse (i/o) that of the quantum behavior with that of the geometry of space and time (*and of related procedures*).

Building my device was a wonderful experience, and it may play into my future, in some manner(s). I am exhausted, and only going to do what is required, necessary, and sufficient, avoiding the 'ad hoc' and 'intuitive' - but for things practiced already.

"The self cannot be said to not-exist, because it is in expression to-another."

Therefore, if the other 'exists' beyond determination of the self - the self is known by the other.

As such, since, the self-exists, the other knows the self, to which they have undetermined or determined, but, verified, of the aware.

When* as-such, - they are are of two-foundations of the self; they are determined, because the self is incapable of this construct.

There is thought.

There is understanding.

There is expression.

These, without failure, or cause, but of intimacies, and related, through comprehension.

Thus, the focus of what is inardent, and supposed.

We relate through devotion.

The manner of one's approach is without essence.

Discussion is adjacent mannerism, and with cause.

For of (18/5/1.0.9) - there are two upper structures.

a.) The co-determination of an independent agency, through the blind awareness.

b.) The relationship of the 'test' of mathematical connective to physics, for of element(s) of a pattern.

Thus, if I have no evidence, is there logical basis?

Of course, *yes*!

/-|/_\

Assuming I saved Obama, *or that that is provable*..... there is no prescriptive [but proof if it exists it is part of the world] - and for people - we have a manner of determination.

I was in pain, and I must contrast this position with that of doing what comes to-self, via doing-good.

I sense that nothing is a priori defined, and it is true,..... but that the self will maintain to exist, thus I have me.

Today* I resolved that I am real-comparative another, (to them) - for of thought, it is not subscriptive another portion of self, and we are-noted *when; as-such, the undetermined determines the adjacent.... of three, - that one subscriptively allocates for the self..... thus, among two, it is at the least, that one know(s) of the self, for of what is many comparative one.

(*as they pass on, and another observes*)

I have confirmation,..... one die is correlated in relation to the universe, in blindness, there are-steps, ..... that we will be free.

I did it, for *furthermore*; it is not-memory, the distinction between the computer and us is formed, and I have a mapping, as well as surjective indication to-self. Thus, it is satisfied. This was *hard*.

I have decided on what I will do next - to write a general *advisory-introduction* to-science, and of the caveat(s) of the limits of knowledge, and of-what comes down to mental illness. with, the Computer, and the limits of computational technology.

The question, does (2x-35x (Chaos)) or only-Chaos, or any of these divisions, remain surjective classically. Among world(s), does the decision remain, and if-so does it ever behave differently?

(*Does Chaos translate among world(s).*)

I.) Entropy and non-linearity.

II.) Inheritance, and photoelectric.

Broken down as a social-dialog.

If I am undecided (u=\xi) then, of one-die, for in (18|5|1) - *the triple**, is an-example of foreignable determinant spec. Thus, for in the contrast at (@)-self, the determination of another, *without sense*, is the example at-all, the motivational truth by in what is tertiary-1.8, in (10|14), - *thus, of stackable 5th,* for-in *remainder of the rational at a universe, which hold(s) two co-dependencies of other and self.*

*Therefore, it is honest, of the providential truth by in whom would be-of-the-self-object, for in their* clause of prominatory dialog.

"From-self to **an eventual*, there is the dialog of continuum, that therefrom the self* and other* are-defined."

I am glad, but in tears, I have concluded they are-real (*And the self possesses two foundations, to which it exists*), a new epoch begins.

I was so much in sorrow, for - this one thing.

For the self-exists, as per the prior argument.

We [each] imparitally *co-exist, do not exist, and do-exist comparative [another].* Therefrom, if I were valid (a.) were aware of-me, it speaks of Hume's fork on a pattern* to-which it is determined there is a success-rate and 'test' at-recovery.

*How do we* correct for our-own *Subj/Obj experience, through psychology or social relationships, or mathematical knowledge?*

**Oath**: An 'entire' supplication to not-only as-much '*be avoidant of*' - but to **commit** to absence of any and all drug imbibement.

a.) Conditional at *statistics for hospitalization & medication to terms* of recovery. - visa-via computer.*

b.) Game relationship via AI, that of the homogeniety, or the split (accessory) of sociological dispute.

The **Mills Ratio, a Complex, and the Bennet' Inequality** are the solution to the reconciliation of Fisher and Bayes, and argued. (+) *Another Occassion of Probability, for in the Nykom? Model?*

Painleve ++ Golden Ratio at (@) rabbit(s) and ***mu***-mon... of 7(8).... identity, and extrapolative *Ethical, Epistomological Precept.*

subj, and obj, have a holding on a numerical accounting.

Quantum, for in Hume's Fork demonstratively (adfixes of inertia of two-equivalent and separable theories) a True but Unprovable by one-individual (but not-two or greater) of incompletion, separable projective identity and rational social dispute.

1.) Hume's fork to lihtmus test on (Guarantee for medical and dating security).

2.) The device (for the enablement of the guarantee and application to technology).

a.) In part Painleve series, and a model for superconductivity.

3.) Social dispute, from light cone to light cone, - for that of the quasicrystal.

4.) Superconductivity and theory of unification of conditions and causes.

Theorem of people, as we relate to another, and *them to us*, for of Law and precedent.

Theorems surrounding physics, as it relates to mathematics, and *Algebraic Geometry.

This is everything, but for that of percolation, etc,..... and materials application, chemistry, and similar, new processes for computation.

*From-which* I-have-conveyed, the 'dispute' is a reconciliation of (Aa and Bl), *for of life*, to which she-remain(s) of a statute, in principle, of *O., to recollective pause*, in even/uneven dispute at a priority-literal.

Given, my *Case, was 48-58:14, the mutual-lateral, was his-embankment, to which in *a stated-departure of life, to moment*, there was indication at-survival.

In translation, the 'shorter' undisputed, for of the mutual (end-addend) with her to self, in [\eps.], from-in-whom is* self, then that in one, there had been a reencountered debate and contrast.

Therefrom, that he was of entrance *elsewhere, in priority to effect* [*prior*] for of-her..... and of myself, latter yet, but of the initial in paternity.

Therefore, if she is with child* - undisputed, to his-fourth, the dialog presented*:

From self, given we cannot retract and withhold simultaneously, I am living, he is post-benefit of which of-life, remains claimed, and of his* in lateral-derivation-life has prevailed, post a past [shared] historiological arrow to a future disentitled.

A deep and ardent grief went away - associated with negativity over composure of thoughts and jealousy, and, judgement.

I need to-consider the steps I may take, how dedicated I need to be, and entirely reprise to control my recovery process, in a compatible lesson for how to live with health needs and tasks.

I got through an enormous phase of disbelieveability and questioning about what was accepted. It does not appear there are actual mental events, but this assumptive can only be taken so-far.

There is a lot of science, and I must know my bases, for what they are. I need to understand what I can manage, in a relationship of stress that is appropriate for myself. There will be several new relationships, and I have surmised, that my person is entirely individuated now, through much tension.

I have managed an amazing feat, and am proud of myself, it was this, this was in a sense the missing piece.

Resolution, is with what you-remember [of life, and such] - not innovated, or a 'media' - it is understood, of this - when the reconciliation is at the mnemonic of time in relation to wave.

When* resolve is needed to a disputed or reconciliational process of life - to survive, the process, must be assurred (to an copartnership) (the ancillary individual) in priority in mannerism of behavioral rest.

For 'as much' - of what is experiential, - we must recognize memory is not temporal, - thus, justified, our-friend(s) and our Karma may be introduced aparthied, for of what interests judgement, for in the providence we

have mutually established.

The only thing - I know of - that is permanent, is Earth relates-to, and *it* is established at this temporal locus, modularity is preserved, and preservational, - to which justification has formatively digressed, over-era(s), and examples of History.

*Design Steps and Process*

*2025 – From 2024*

For a 'condition' of a predicate, statistics and probability do-not-lie of the predicate conditional as suppliant to a notion of the instanced, via experiential truth. Therefore, taxonomies in secondary *precedent* of following and it's authoritarian bearing, are the verification of one unto a mutual and unilateral historical reprudiated basis or it's forfeiture, it's admissibility of argumentative basis, and allocable mean to an instance of verified trust, and the notion of liability to dialectic, from which a hypothetical is validly affordant to means of a determined truth value.

Therefore, the absolution of argumentative and historical truth of a presentment of identity and it's relation to the truth of a witness, of it's validity in terms of fact.

Commitments to Volunteering in Relation to Societal Need…

1.) The computer 'device; *notch: un-id,* ***Malcho/Shiloh**.' *is co-compatible 'bone and wheat'.*

a.) It is co-processorial *intimable abiguation and ref. on behalf of* Game and Symbiotic *Regularatory provision to a long-process.*

***Phase Finality***

**Design Process and Procedure**

I.) The effectual design must illustrate a *test case process of which enables a 'closed to open end' of the verification process on capture.*

a.) Observationally inquiring of 'hidden and trapped *Fermions*' in a lattice, is the invocation of a '**Memory Reservoir**'.

b.) **This*, need be-adherent the 'mutually and dually secure methodology of a double-layer' - *thus, that 2:1.0 of version is real.*

II.) The verification stage therefore involves the ***Classical Observable**, of the validity of information under *objective predicate trace.*

a.) The mathematical design need be amended and tailored to *this purpose*, thus design *aim*, is to procure means at a c.c.

b.) The mathematical to theoretical bridge, *later*, with *lookahead*, may be tailored to release 'traps', *of means of non-friendly.*

c.) The physical meaning, is in 2.0x1.0[3|2]. This is the adherance of 2.0 in-die to Q-class, as justified in R-alliable as 1.0||2., thus that the singular of a plurality is 'surjective and injective' when there is a fork of life to indictation for *plead release from byproduct.*

d.) The KP/Boussiq, therefore pre-index post-index from the inherence of *low-cos(2\t)* flow, in freq. and space, of \nu & \eta.

III.) Thus, nutation in (3d/2.01) *albedo, *preservationally*, may be utilized as a means to terraform, or for materials study.

a.) The prototype then equates what is the conformal invariance of one for two, what are the means of *realistic platonism.*

b.) Types, Classes, Fairnesses, Kinds, and such are then of the equatement of the 'seasonal in 18|5, of abridged 'knotted deck'.

IV.) A large part of this is to attribute the relationship of 'vertical to word' and that of 'horizontal to numerical' - but there is symbol, and there are six limits. The question is in-being, if there are 12:12 overlapping, in 6, and {5|6}, of a 2:1 - in the 'shared' are there not-18 or that of *one singular agency, and a language of estimates and faculty?*

a.) Procedurally, we end, with the 'separability' of law **above & below**, and some-six ends of societal relationship, and certain trivial and non-trivial 'corners' of the relationship. The intention is in part to seek a balanced ***grey/white*** *and 'spectral-relationship'* in the local and the global, as for that of 'probabilistically perfect law of group* and category*' - in mathematics as 2.0|1 with *optimization.*

b.) The 4-(2).3{_x0b} of ‘c’ at (@) (2)-(1|0).

V.) The means and ends, of the one, are defined by the many, the need’s, sequesterizations, and comprehension of the ‘many’ include a considerate basis of the ‘one’ – when* as-such we are entitled of a providence and a capituary to evidence of self, naturalization of purpose, and *biased or unbiased*, collective mandate.

**Preliminary Observations [post scope]**

***There appear:** *to be two*-sort(s)* of *problem(s)....*

*Two*: are connected by the quadratic theorem on that of the Taylor-expansion.... for that of *Probability and *Chaos.*

One*: is that of the problem at-which *there-is*, a non-locality, or, violation of the Fisher/Chaos condition, in term(s) of the above,...

*It can be-considered; some-problem(s) and their [conjugate]-protologue *solutions* can be found in terms of, and in the Language of consideration **of two** of the former (or one) problem, and an ***Abridgement***.

this may take place in space and time, or, etc,... but of two 'locale's'.

*There appears to be no-third problem....* in that of the-sciences.

Two, of chaos [physics and dynamics] and probability [mathematics] may indeed be a suggested ***Basis**.

I **noted* the Chi-squared distribution would [analogously for a multidimensional limit, or sparse matrix] have to go to zero, for that of the infinite limit,..... in relation to Bayes theorem, and Fisher(s) work, *of* that of the

agreement 'potential' and regularization (happens), for that of the superconductivity and device/switch.

That it is *__not__-yet at 0|1, and +1|-1 and 0|0 - *neutrals*. This is a difficult problem, however, it is insightful.

That of the (exponential) need go-to a (2,1,0) at (@) a log-separation. That this instruct(s) of the asymptotic freedom and an 'auxiliary' - *on* that of the outwardly provided-inwardly driven inertia.

Thus, it is akin (a wheel).

*I now have a meta-analysis to provide of *what-is* 'The Wheel', and 'Order within Order' - *of alphabet and design*. ***As*** I spoke of that of the wheel being taken to be '*inspected*' by-someone.

We also have non-interference, of a simple preparatory-mean.

\a*(\p\tau|\p\t)^{2}+\b*(\p^{2}\tau|\p\t^{2})+\e*(\tau(t))^{2}=\omega

*From* the Schroedinger equation, *to* the locality and cache, there is a pathology and a phenomena, a reason, and a quoable determinant truth of game, mathematics, and episomology of physics, biological relation, and ethic,... rooted.

a.) quadratic -> elliptic.

b.) darboux theory and 'displacement' - rational or irrational vector *(symbiosis) - & bivector or Hopf or 4th dimension.

c.) Reisz-basis.

That of the industry of a mosfet can process a brownian interest in back ended gapped future preliminary to capacitative primary frequence matched offset impedance, that this centralizes the agency in my circuit to (2/0/1) and (1/0) and (0/1/1) cmos 'layer' to flip and flop, of a qubit nand tofelli gate symbiotic upon visualizable compatable engineering with red and black lead centered low to ground.

That it is nonradiative, and microwave assembled (2 manifold single laplace, enfolded in fourth order) su(2) and so(3,1) geometrically operated tunable offset micro-wein-bridge, localized stress strain auxiliary with phase conjugate form of seamless integral in the neutral delta, of a point, weining to the distress and lope, pass, beyond a Cheybeshev polynomial in the regulated basis of a Whittaker (l series) eigenvalue of statitisical overlayer and netural grip of contactless (safety) - neutrality of envelope dual-pseudosphere, of an O-minimal surface, which is processional upon an elliptic and defended neutrally to on-mass (envelope slope intercept of valent covalent mass tensor pair-eigenstate at room temperature) - . Classical, and seminormative, in sinc(x) and sinx(kx) monovalent lie/noether algrebaic conversion basis.

That this is frequency and sinc(x,y) mutually alpha-beta unitary and probabilistically klein-separated, in flow, and manifold game (mobius imaginary and real die) commitment to imaginary hypergeometric off-mass-shell mandelstrom variable unitary carrier and forwarding (unprocessed return frow) bypass gasket truth table, reversibly, and manually integrable or manfactured, miniturizable.

This is a (wire) which passes stereo gap analog freedom upon a digitized two dimension contact off contact (asymptotically free) capacitive, process of angular and electromagnetic dual-cantilever decision process through subroutine. It is not a choke or alternator, but, a zonal geometry, in manifold uncomplexified mutual neutrals outside process of inertial influx to game and extreme limitation of the computer, compatible with knowable wireless and technology.

I decided* to-only approach a related problem *to* & - that of the Hopf bifurcation,... that I will do wavelet and switchover, for that of the classification of machine states, and - that of the Godelian Incompletion in relation to the Turning machine, - since, I must be-consistent. I've understood, the essential impedance relationship need be-altered,... perhaps a Piezoelectric, or that of an altering of Tension and Torsion, for that of the phase and voltage evolution.

I have approached a new stage, at that of design, for that of the device assembly and patterning, that I will be adjusting the wiring (post-hoc); on that of various problem(s), etc,... and tailoring to a *Mathematical model.

Beyond-this, there is the two-stage model, on that of a PWM-adafruit, and that of the frequency synthesis, for that of two-stages,... will I need (1x or 2x) of the adafruit? Moderately, it is a (+1/+2) and (+1/0) and (+1/-2) on that of the setup,... that I see a manner of 'extracting' the data-wise from the optical component, for that of a ***modular design***. There is the problem of a (x-vt) and (x+vt) with phased waves, of which quantum is blind to, and of reality, etc,... - that I am trying to do something ***at the limit***, of what is-possible.

Thus, I have made an end-decision, to approach ***Hopf**-bifurcation, and deal with device*-limitation, - that it may not offer a novel computation, *it is enough.* That I could do something with that of a theorem of the unpredictable either-way:

1.) A setup that furnishes *to the user*, the unpredictable, via 'carry within a tesseract'.

2.) A device that it autonomous, *via the tesseract, and a virtual/analog/digital hybrid-assembly.**

The (+/-)v problem (for which the scope is blind) is furnished by a discrepancy in (V_{dc} offset) of which peak-to-peak detect*, may identify with differential phase to voltage 'levels'.

This is my end-plea:

a.) Programmable, (+2/+1/0),(+1,-1),(+2,-1,-2),... *with*; ***some coefficient(s)**. of a learned arch.

b.) And, ***Hopf-bifurcation**, on-switch,... with that of (parallel equipment).

This leads to chaos, and-or **Order.* It is more-robust, but, more-difficult,... to preliminarily prepare, but, it is more-general. Thus, I am going with an *[assortment of spin - centrifugal modes] - *[and switches]. That this get(s) to the main-issue of ***Organism of Computation***.

*Essentially;* we-have it at-that of an addendum. The AKAI may be used to figure out the dynamic program in-tandem with the operational CPU structure. That this might* - or - it must be understood ***what*** will isolate the-two, s.t. the device operates freely, without guidance, and approximation is of an independent/mutuals/independent* *basis*, on that of computation.

Thus, it is to make execution similar-to *or* of each-step, that of similar:

a.) A switch, such that in-hardware, there is an op., ... and the software time(s)-out prepatorially.

1.) (+/-)v? \phi...?

1.) A *priority at a secular-div. for what would be a notch/filter/carry in Tx/Rx (+/- s.t.).

2.) Memory/awareness and affect/suicide/non-locality obs. and forgetfulness.

3.) Spinwave theory - worked out, in addendum. - (2x/1x) - in doping and isolable table.*

4.) 25/32 key major/minor qubit incarry Keyboard.*

5.) Spinwave theory - worked out, some differential equation [4th/3rd] mutuals - understanding.

6.) A concave/convex addendum to truism, in 4-32-14:50 & 4-41-12:50 in predictive validity.

Of (2x0.1x0); that of the freq \omega_{1},\omega_{2} are 2:1, in frequency. Thus, - the modality, is a double-angle on that of the sqrt(j_am(x-v*t-\phi)) wth m* and 1-[of this], thus, it is quadratic, ... of a variety of geometry to square-aperature *per a superposition formula*, that this* justifies the P.E.P., and E and B in 1/sqrt(2), of mean-quarter, at back-trim via the piezoelectric,... then, that of op, and parity.

Thus, there is a *hidden* caveat, - that the DC/DC, are-floating in the signal generation,... for the op-amp.

2:1, and 2x0, with 1x0 on that of an elliptic sqrt(1-omega^{2}*R^{2}*C^{2}) & we have a ninty-degree, rotation..... because the DC and AC are ***separately offset**, thus there is a certain blitter to it.

Thus, the mathematic(s) goes like:

sqrt()/(sqrt()sqrt())~.1/sqrt() for (1-\mu^{2}omega^{2}*R^{2}C^{2})sqrt()~.(of m matching)~.dn(x-vt-\phi).

Then, dn+sncn -> dn+dn^{2}->dn(omega*t)+nd()*dn(2*omega*t)->dn(omega*t)->in tensorial formula.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, - for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorially open terms.

To-consider, - the priority of (4 axes) - for in (2:2), of v:v and 1/\sqrt{2}:1 in that of V_{pp}+\delta, is-swept...

**Key**: *The 1/\sqrt{2}:1 references the modulo, m, of-which is performatively* found *to be a basis of a stable-wave. The associated* index/assumptive of a coriolis-spiral, unswavering, decomposes, into a channel.... of a flow; thus, beyond co-dependency, it is a directed-route of free-flight from motion and motile, a wind-channel.*

When* we appertain of **Torsion** and **Tension** what is the ellipsometry, we-produce a continuous function! Thus, of the apparent *Soliton-non-Abelian understanding*, converted to an *Abelian Basis in a projectively-identified geometric analog/process of inheritance,... **mutually*** *satisfying the need(s) of necessity, sufficiency, and satisfactory statistical-mean-mean, for an analysis of predictive validity, visa-via, - the Fisher and Bayesian statistical probabilistic model(s), in the manual-finite process of a Markov Chain....*

**Doing is established not in-promises, but in the vein, of advantage to 'fulcrative impetus'.**

An O-minimal surface/section/matrix [homotopy and homeomorphism - symplectic? - limit/colimit] and datii, will *with* Exp[x] on Closure[R] - derive with a set of zero-measure to a QE (Quantifier Eliminated) power-set... of a [NP/P inf/inf] *complete*-set.

* **The group may be defined by certain isometries, and pattern with - hidden** *[Re: Fisher/Bayes.]* **orders.**

* **The limit(s) of the Analysis must-remain intact, of boundaries, and of orders** *[Re: Picard/Ramses.].*

* **We have forgetful function(s).**

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.

2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

**Schwartzian differential/Carlitz/Finite Arithmetic/Bayes/Fisher....**

I finally - found - what I want to-do with *the Sciences*; I want to write a book **I needed**. I want to write about inheritance from the standpoint of Fisher and Bayes theorem, on that of the interwoven truth of mathematics and physics, for that of one relation ***Order***. This is not far from what would be required for that of a theorem of everything. For that of Arithmetic [the second relationship to afar - nonlocality] is a small-portion.

I want to write about the finite arithmetic in the context of develoment to inheritance, such that Pathology and Phenomena are understood,... with an engineering bent, on the hidden and exposed.

I found that the relationship of sociology, to that of materials science & chemistry, and, - mathematics is all related, for of forms, and cauchy-riemann boundary conditions. I need a way to sort my ideas, and can think of nothing better than to start-writing, but it is incorrectly managed. I will need re-work that of the evidence, and of law, there is a note, for that of a vast relationship. And, of electrical engineering. Essentially:

a.) Of one-part, ... Bayes and Fisher, there is a matrix relationship to second qualitative mean, upon g.

b.) Of the other part, .... Gauss Bonnet theorem, versed in terms of finite arithmetic and topology.

c.) Of the next part, .... Abstraction at-law, and Sociology.... of terms, and Order with Alphabet....

d.) Of the [final] part, .... we end with that of the Device, and it's extrapolative designed limitations.

1.) The redshift lemma, disincludes the parallel of the infinite upon the finite 'group' - that there is a net net zero/identity of movable singularity, of and for-en-masse net net motion of a displacive nature in mutual.

2.) The redshift remains comparative a 2x.0.1, on that of dislocale, for what is mutual enfranchisable of a net net free body diagram, per locale and rate managerial relationship of free body per equivalence of motion.

1.a.) Transversality qualifier, - where(as) we may have a x-x' and y-y, or x-x' and y-y', there is a Reisz basis,....

2.a.) We have an x-x' and y-y' to \sigma(t), and some differential equation in the statistic,... once beyond mean field.

3.a.) We must consider the zero-measure set, of projective truth, and *it's* zero-measure map and such....

4.a.) Josephson tunnelling, at WKB-breakdown* [there is a turning point of which is cos(theta) \theta->0.

Of measure-zero, the finite-transferrence to a finite arithmetic unifies with Bayes and Fisher, the Broullioun-zone concept with QED.... (finite analysis, what drops through is not balanced - and, we have a neutrals-zone.)

Measure-zero-acceleration per mass-proportion, identifies with a thermodynamic phonon/admixture, that this 'details' - the momentum from on to off mass shell, - thus 'filling' the envelope and providing laity, to which exposure aged of a superconductor grow(s) more solid of a phase transition, thus the non-reciprocity.

*Relativity turns on and off, verified, of which it is formative hypothetical of a pauli exclusion common-denomination to two edifaces, that of a perpendicularity and net-net neutrality. Thus, Fisher and Bayes agree, about posterior of the classical inference.*

There remain a few other* niche relationships,... but the M.E., Bosonization, and Paramagnetism, and Pairing, and remotely - Condensate,... [*hint: Depth Learning**],... marginal QED,... what remains, is that of the prototype to-which the experimental/measurement hypothesis may be validated separately from the inquiry to a theory.

Secondly, it is to see if the above theorem remains validated,.... or invalidated, and if and as-such, if the 'ultimate' change-up in relativity is observable or distinct comparative for that of a separation in paper and material, explanation, and review.....

**a.)** #1: The qualification to-which superconductivity, in keeping with the space program, and visa-via elimination of the pretext to our extinction, must remain with the Government.

1.) This includes the chemistry, and material(s) zero-measure theorem, the neutrality, and the gravimetric reversibility,...

**b.)** #2: The qualification of a net-net neutrality/probabilistic truth of inheritance visa Bayes/Fisher, and - the result of identification with that of the 'objective' difference in argumentative basis versus measurement, and observation, - must remain with the people.

1.) That of the order within order, *of life*, must be given and rendered the people, for that of Poincare section.

**c.)** The language, and order theorem, with Bayes and Fisher, must remain ***first***.

The question ***remains***, as to-if the *Device in-policy to which a relationship as to *Whitepaper*, versus *Blueprint*, had been of a technicality on that of *Inside 'Secret' Industry...*, or what may be published to the people, for in 'why' an encryption with this butress may work, but be an industry secret. Computer hybrid/quantum/digital. Versus the mannerism to which the synoptic on-encryption (Quantum - various other' peer's) for quantum computation, and a kind of utility to this-device, .... + Ariana Grande.

a.) Second order pinning, of an Electric and Magnetic ++ P.E.P. on that of 2nd order differential, and reverse bose-condensation via an inelastic/elastic, and soliton (1/sqrt(2)), to that of sharp boundary on that of rev. B.

1.) Directrix to-which relativity encodes of a gapped relationship below Goldstone-Boson.

b.) Fermi-Dirac + Berry(s) S-O, a kind of Darwin like-term, corrective to which the log(lambda) on eigenvalue perfectly suites the redshift and it's renormalization.

**a.)** Finite Arithmetic - Birch-Swinnerton-Dyer Conjecture.

**b.)** Gauss Bonnet & Projective Group with Elliptic, and with Homotopy.

**c.)** Bayes/Fisher and Inheritance of Observation and Measurement.

**d.)** Structural Theorem and Engineering, Asympototic Freedom and Spectral Gap.

**e.)** Device and Soliton Equation(s) of Differential and Darboux Soliton Equations.

**f.)** General Wavelet/Theory and Measurement Dichotomy.

**Notes on Progress**

Hypothesis: "The projective identity remains a curvature to non-curvature form in L(1) and L(2), to which in Superconductivity of the HT variety, that of the cooperative tendencies of acceleration in gravitation and

electromagnetism, balance with that of a net-net displacement evaluated over space due to the Strong Equivalence Principle and the amendation of history."

Thus, the projective identity is a signifier for-which the commutative and non-commutative, [acceleration] and *Hopf-bifurcation* control the valent to covalent pathway of transition,...

Thus, that it remains to take place between the *form and the *vector in relation to either principle.

That of the {sn,cn,dn} *prove* of the *Differential Equation what is not-obvious,... that the denomination of the l(1) and l(2) *remain* of the Commutative and Non-Commutative type under a Weil group.* That this encodes of-which the theorem on that of the *differential of a Dar'boux-Beltrami* *surface encodes of the group structure attributed to Superconductivity.

I will be taking a break to do other* things, - that I found that:

a.) The Hopf-bifurcation is mostly explained.

b.) The Group-theorem at a relative *stasis is mostly explained.

These happen for the same-reason; - that I do not know what reason this is.

I was not thinking.*

That I need a double-blind visa via the computer-basis. A kind of 'Hume's fork' for the Computer Simulation, of which deals with a statistical assay and a double-blind.

One way*, is to *extract data* and re-enter it *of* a *Statistical Assay.*

The solution to Superconductivity, is thinking* in-terms of the application of data.

i.e. (We have a function) - to which is an addendum in commutativity and non-commutativity in a flow.

Then, of a Hopf, it is laid in place by-which the history demands.* Of a 'statistical abbutement'.

What is certain, is the *result-coded of:

a.) A *blind assumptive.

b.) Hume's Fork.

c.) Accounting laid in-place.

d.) Of the die.

That I need-this, &

Of the projective basis, and for what follow(s), a secondary teir, on that of knowledge.

07:44 pm

That of a symbolic-expression in Finite Arithmetic, of a valuative polynomial, carries of the Elliptic variety and higher, that certain lower class functions are evaluable over field(s) of that of the relationship of the local to the global *properties, and *roots, and such,...

That of certain relationships are not evaluable over the errata of a given expression for which there are determinations on the separable classifiers of the function properties.

This is not merely that they are undefined, but related to undecidability, etc,... and of a strict relationship of unpredictability, and the elimination of a root basis, for of transcendental and non-transcendental root(s) over certain field(s).

Thus, the computer can comparatively evaluate four in a basis of element(s) without abandon, and come to an answer of which relates to the return of certain numerical identities.

Thus, five, and six, as upper bound(s) remain the limit of computational determination over a single two dimensional field and a tensor classification (respectively).

The nature of equations forbids the nature of 'closure' of the group, thus, that of the fifth, and such, remains of the hyperelliptic property, and certainly the 'solutions' to all equations are not therefore expressible.

Undecidability is related to but not identical with this expressive valuation.

I have;

a.) Hume's fork, Fisher, Bayes, and the Epistimological Root, on what is demonstrated.

b.) I have a B.S.D. and differential equation rule, with a boundary on computability.

What do I do to find finality with Superconductivity?

I was **completely** misguided w.r.t. the Qubit. I had to-seek a Convex/Concave switchover circuit. It was this simple, - then; with node(s).

*At the *least, if I do-not study B.S.D. conjecture, I will study the Connection involved of differential equations [predictable and unpredictable] - [CPU/human] - and that of the KdV for the Finite Arith.*

*If I do not* do-this, an upper bridge, is the problem of the following:*

*a.) Finite Arithmetic.*

*b.) Predictable and Unpredictable.*

*c.) Riemann-Hilbert problem(s).*

*d.) Differential equations, of varieties [i.e. KP+Boissineq etc...].*

1.) Lie Analysis with Representation and ***Homotopy.**

Essentially how could I explain the seeming contradictory yet agreeing principle(s) of determinism, predictability, prediction, expectation, cause, effect, and unpredictability?

Essentially, the mathematic(s) problem yet-beyond what I've done, semiadjacent the boundary.

(As one theory becomes the next.*)

Is:

a.) Adele's & Place's.

b.) Homotopies and Categories.

**We want:**

To apply this 'structure conveyed via Representations at (@)':

a.) Differential-eq's, with Algebra via the Hilbert Problem.

*with*:

b.) Enforcable Predictive Likelihood via Conditional Inference.

* We know that 'finite arithmetic of elliptics' - has a notion of 'good reduction' and 'bad reduction' - can *nevertheless...* a notion of-***Congruence** be found? - Such as Eisenstein series.....

*I've decided to give up.*

**I will study \delta/\alpha*(1/2), of the Logistic, KP, and BS equation(s).**

Of Machine and Human.

**I know the [above] problem is related to ***Computation***.*

I will [end-it] - and see the degree to which this is related to Superconductivity - it is.... however, the entire phase diagram!?!?!?

I am at the half-way point.

I completed closure on that of arithmetic structure, and adic-elliptic overmodality and modality.

I completed a *step to the exception so visa-proposed to-another, and of the Red/Black/Key's.

I completed a *step on that of the device, to a tertiary/two-routed avg. syndrome of Log/Log[].

Quantum-Bayesianism, and that of General Relativity are compatible, when we adopt the theorem of 'transcendent' and 'rational' domains of inquiry, on that of differential equations.

I've broken through*!!!*

a.) The d_{xy} or d_{x^{2}-y{2}} or p_{x}+ip_{y} *Superconducting state*, is a state in-which the electron(s) avoid each other in-space, to avoid each other in potential, of the l(1),l(2) B->E.

1.) The historiological prescription applies, to which relativity adopts a measure on the valuative terms of the superconducting state different* from the quantum principles.

b.) That of l(1),l(2) applies for the electric and magnetic field, thus there is a two-part interaction.

Why is it supposedly three dimensional?

What is the connection to the superexchange and randomness?

This is similar to my-device..... that I can retailor the device.

I discovered, that the ***Generator(s)**, of the ***Group**, on the dynamic mechanism of the High Temperature Superconductivity, come from a very basic premise, - that the Uncertainty Princple can [bootstrap] the l(1)-l(2) bridge. For that of the ***Finite Arithmetic**, *it is made solid.*

That the (compactness) illustrates that a set of measure zero *must be covered*, but of the (1/8th) doping-point. In a comparative - this comes from the gravitational (straight-line in curved space) formation on (5th/4th), of the interia of the elliptic group.

I ended with that of two-rules, one in-physics, one in-mathematics:

1.) The 'doublet' of projective variety is a unique kind of symmetry breaking.

a.) Where[in] the differential and function for which there is a differential, impose the relationship of a quadratic rule - it is both with and 'without' gravitation on the mathematical and the physical.

b.) [3:22 pm] - *This points to what mathematic(s) is necessary to solve the *problem.*

2.) That of:

a.) h_{f^{2}}(P) and 2h_{f}(P).

Thus, it is past-observation, and my innocence, and the security by which other's are real is true!

I finally proved **Goldbach's Conjecture!**

e_{l}(g(z))=e_{l}(z)*g(z)....

On the Airy, *and*, the Elliptic:

h_{f^{2}}=2h_{f},

Indicate of the formula *on*:

f_{x}g(x)+g_{x}f(x) over [E:K].

That the prime(s) *per-integration*, prove Goldbach's Conjecture! *of* (Painleve) - AKNS Method...

***As**: (+/-1) ***is decided**, ... *but*, we have the Jordan Curve Theorem on Szpiro's Conjecture,... minimally* provable of an* elliptic,.....

Thus, I have asked two questions - and it confused me:

1.) Does non-linearity of some function field, produce linearity or harmony? [Glass].

2.) What is the divining *Law, of inheritance, and projective identity with resolution? [Onion].

a.) Of the *transcendent, we dessicate to a solution to *Incompletion and Pseudoprobability.*

Fisher/Bayes on (2d) involves a covector and a vector, that the Quasicrystal afford(s) through the **Finite Arithmetic* what is a log(x)~\sigma_{1}^{finite}(1/x). Then* that of the *O-minimal* decomposition afford(s) a PSD analysis.

I see what I was missing, the comparative and equal presentment of that of the frequencies on the oscillation. That it is elliptic is certain, a certain sn*cn wave, of that of certain relationships, on that of the 'addition' - the 'subtraction' is ill defined, and the multiple is a polynomial guassian... - Chebychev or Elliptic through a sinc[x].

The Boussineq equation *tuned* to the KP/AKNS system*; devolves into a':

(1-m'*sin(phi_{1}(t))^{2}) with a \eta(t)*(1-m*sin(phi_{2}(t)^{2}) *with* \eta(t) an element of a Moebius transformation.

Thus, the \eta(t)*sin(phi_{2}(t))^{2} cancel(s) the m'*sin(phi_{1}(t))^{2} as (m'-1)*cos(phi_{1}(t))^{2}

With **compliementary moduli.*

That therefore, the **negative reduction** is inhered of an exception to gravitation upon which the historiological chart reverses w.r.t. quantum mechanics and the differential and potential form of the gravitation with respect to magnetism.

Thus, the 'fork' is it's devotion from one* equation into-two, and that of the mixed/contrasted structure of constants.

That the ***negative reduction**, is processed, for in that of reflection tuned to zero, of a basic impedance analogy, the KE and PE changing bases.

The differential ceasing* from-gravitation evokes a change in the KE and PE basis of the material, thus, that the uncertainty principle and quantum mechanics becomes dominant, a complete conservation of energy!

The 'adic' - elliptic *inheritance* is but *One-limit for that of quanta, on that of an 'exponential to guassian to sine to cosine' - of which the 'adic' - elliptic inheritance at E[k] and K[k] is but one commonly denominated faculty with respecct to gravitation. Therefore, both* law(s) devolve from and out of ***Mathematics***.

*I need understand:*

a.) That of the sound/quanta/electromagnetic/relative on that of the system, for it's topological inheritance.

b.) That of for the device: The maximum/minimum in relation to poles and zeros as a manner of *motion* of wave(s) in i/o/[channelling].

Two-valence, subjectively lay(s) of observation what-is-measured [vice-versa] of the (2-adic) of **doublet**, in-either, to a localized prefactorability, of the nature of *inertia*. That the phonon, fill(s), the net-neutrality, forcing electrons to a finite* radius of-separation, and instancing *via outward-back-scattering*, the Peirels-neutrals-RMS-instability via a manifest infrared point, of which relates to the 'mass-gap' in reflection & lieu of ultra-violet doping.

*For the Device:* Since I *already* have elliptics, it may not need/require frequency accounting for the composite.

(**2.**) I have to-ask if I can render the Guassian-mobile.

(**b.**) I need design a device, with gyroscopic chips.

The scientists are basically *doing-it-right* *however*, an algebraic theorem of [case] study is **required**, for of Y.-M.; that it break(s) into four of-six, - there is **Chaos* and **Order*. That of the topological relationship per* the prior - (P,Q) injective *from* (\a+\b*z+\c*x) and (\d+\e*z+\f*y) and so-on, remains a cause of investigaton.

***I will need:****

***a.)*** ***Translate my entire*-basis to a Sinc[x] & \wp[x,g_{1},g_{2}] on that of the various modalities, [bit].***

***b.)*** ***I may; hold of a*** 5'-[2-1-0-1-2]-|-(n^[5+1]-***Sinc[x,y]***)-|-[x,y,\p,v_{x},v_{y}]-|-[x',x'',...x''''';y',y'',...y''''']**+1.**

The connection to that of a comparative-logarithmic stage (per separation) - and [*a planned*] reconnection *of* ***exponential** [multiple] stage, - filters, (with the division stage) - a ***bridge**, of the (2^[5+1])-*bitwise* and *nand-select* - abridgement of the various sinc[x_{n}] *roaming*-realtime [ms./s.] steppes of the latticework at (@) frequency-to-amplitude ***bridge**.

Thus, it is variably ready for MIDI, of-which there need(s) to be a filter and express-bus for that of the channeling. / / *This will be handled by that of the (4x) Arduino, - on that of the Filter and Activator.*

The (\a+\b*z)=(\rho,\phi) remains *radius*, for in 1/r^{2}, (sech*tanh~(gauss*(1-\l*z))), and *angle*, time/space.

The **General Way** to employ covariant-statistic(s) is with **Inference and Induction and Deduction**, that there is a manner, of the **Staff, in cross-chordance, *of indication(s), to-convey*.

This remain(s) difficult, but of moment, in residue…. that hamiltonian ultra-auxiliary (below or above) - that it is neutral(s) neutral(s) when ***Geometric***, - that of the pure* moment/degree, complexity classifier. Thus even so - of a matter event of planetary nature impingent upon a star*, there will remain no-and-yes a black hole…. that it remains a matter of perspective, the ***Tine***, leading to an evaporative nexus, in the moment it existed* of zero-duration *dual(s)*, of the ultraviolet catastrophe, for in an ***Infrared* limit* -** and theorem…

Thus, we find elliptic *adic-language*, produces from *Algebraic Geometry*, the classifier of *Chaotic Tine Lang*.

a.) Postulated truth for in 'G.C.' at infinity, may retroincline to a hypothesis of suggestion of all inductive steps. [Exceptionable inf+inf=inf, open(s) a 'place' at (@) infinity] - *of what we do know*, inference remains of a closed/closed *Poincare* soln (*compactness* in the O-minimal sense). - Thus, the justification of prime(s) does not explicitly follow from infinity in-induction. That we 'escape' so to speak the Incompletion, b/c there is one prime that must* be indicated, and one is insufficiently categorical. Rule: Languages [alg…] differ…. (same and different) in the identical ***Jar…*** (Q/A) of *particularity* - may remain -Q|-A,... lay a remark at a experiential or design *Educated guess….

Superconductivity:

1.) Accelerative formative inherence, upon an inferential arrow of it's evidence, indicates of an abstract 'Red' and 'Black' and 'White' an angular pre-emptive consolation in the velocimetric ratio test of an l-Hopital for of-which formatively is the genesis of a given ideal in the Geometric Language of a 'tine' upon Hume's fork, - for of variably-driven, accelerative feature in curvature to solid arc-angle Berry's Phase, of Gravitation.

2.) The elemental projective-basis of an exponentially driven-group law, isometrically separationally ad here(s) apart, of the mathematical basis of it's linguisitic constrast in this 'tine' language of Chaos and Order, isometrically separationally ad vective of the genesis of a velocimetric degree, of space and time, thus, thus net-neutrality of a globally developed magnetic moment, - thus, the production from elementally provided degree(s), in Kerr and Peirel's instability, driving the thermal isometry of a randomly driven pure process.

Coordinate free unit variance justifies refractory deconstructive interference from constructive neutrality.

**A.)** The 'homotopy' *is not an inhered arrow to Hume(s) Fork for of a Sheaf Cohomomorphism upon the Tet, of a 15'/16' Boundary-Riemann-Hilbert, (but in 90 degree double cover) - Conditional assumptive of End Graph Markov Probabilistic measure, for under closure one-net is a double-tine in K_{4,4} or K_{4,1,5} or K_{?}.*

It* - is of the *Floated*-probability.

And; Mixed* signatures *to-two modulus copies in either frequency (eccentricity) interlock and rate-progress upon a tertiary (signal identifier).*

Paper II:

1.) Chaos, for what is a g(f(x))+v(g'(x))*\d=\iota(\tau)

2.) a.) Inference - For in that of 'people' to 'physics' - a difference of F/B.

b.) Inference - For in that of 'relativity and quanta'. - of the 4th to 3rd.

*First Given:*

1.) The laws of physics are guided by Gauges and Homotopies, in a relationship by-which they are infinitely* refined, ... but straified.

2.) An engineering *example operates by it's regularity, - the *identical procedure of which makes-manifest certain 'truncation' of algebraic-series, and *exact from imperfect.

The direction we want to go-in is: *Higher dimensional redundancy.*

*& Engineering synthetic,....*

1.) Elliptic.

2.) Finite Arithmetic.

3.) Higher-Dimension.

4.) Kissing-Problem.

5.) Fisher and Bayes.

6.) Hammond like encoding.

***Two Problem(s):***

1.) The finite arithmetic in the higher dimension, of Fisher and Bayes and elliptic redundancy (& ideals).

2.) That of causal inference as it relate to relativity to quanta [inheritance of law] & the elliptic group, for that of box open/box closed.

3.) That of 'archetype' on that of the device, and of-which relates to the computability and redundancy.

4.) The KdV equation and it's import into that of the structural tone of a group theorem with an equivalence relation.

Does this connect with that of the topological [sector] argument(s) concerning superconductivity?

*Phonon(s) assist in electron delocalization, - meanwhile forcing a dimensional rift of Hopf-like-bifurcation,* ***geometrically*** *affording deformation to which is 'backward' from-relativity,....* Thus, the rms is geared at 'passive mode's' interacting with 'active modes'.

*With the 'ultraviolet' contained in the 'infrared' critical-point, - the inheritance of one theorem for another is affixed, - that we end, with that of the RMS on-which there is an {E,B} in qualification of a doublet-and-ideal.... with mathematical inheritance.*

This must be [combined] with the notion of a finite-period, for which there is a categoical relation,... the past and future [covered so-far with what has been demonstrated], - they appear to be one to one, but, distinct, for which there is a Green(s) 'doppler'.

Thus, it breaks to a primary* lemma:

**a.)** *Relativity for what is encompassed of [time] inhere(s) of-which from the fourth dimension to the third, two-things are inverted,... Thus, the neutral(s) envelope, inhere(s) of the L(1) and L(2) what is an effective transfer and attraction of the electron(s).*

**1.)** Geometric language [G.-B.]

**2.)** Folded inheritance of *Law.

The mystery is how this is-different from cause to effect of future to past, etc,.... isn't it merely that it goes forward in-time with experience?

**b.)** The [ideal-generated] - doublet - afford(s) of the Gauss-Bonnet, what is the inheritance of relativity for quantum.

In fact, I can prove the existence of a mapping for the Sinc[x] and so-on with my theorem.....

I have mastered at least-this-much, for that of the [above].

There is one-deeper group - potentially Yang-Mill(s) to deal with.

Comparatively, taking relativity and inverting the symmetry should devolve to the same identity on that of the red/blue, etc… Thus, that despite red/blue we anticipate the same answer.

Is it merely mathematics folding physics, or otherwise?

Displacement of the zero-point energy and uncertainty principle, for what is relativity,... why does it take place, with respect to one symmetry that is uni, and the other duo?

It has interior-part(s).

That the 'doublet' *shifts*, with ***balanced** acceleration and displacement, *with application of a magnetic field*, - the inheritance of relativity is related to the *net neutrality of the equilibrium.*

*O of course!*

1.) That of relativity to-inhere leaves in departure a [portion] of the problem to which is the Equivalence Principle,.... thus, the absolute redshift, etc,... of the pairing mechanism. i.e. it is one-way,...

We have to-answer:

If the theorem which generalizes to superconductivity is a local bifurcation in inheritance, why does it transpire in a sense of cause, or what are the conditions?

I see part of the answer, - the statistics that govern the Superconductor, vantage that of a deficit on-which the vacuum is emphasized, - for which the negative reluctance, in a sense - is the compensation of geometries, for which the necessity is a displacement. Given energy goes down, it is to that of a raising in potential in height, for that of field and potential.

So where does the extra energy go?

Know why inheritance has reversed.

Know why 'the field to magnetic reaction' has reversed to-rest.

The non-commutativity and commutativity proffer that the magnetic field (the a.s.m. part of the field tensor) - has reversed, in co-union of four (4') in relation to five (5') for in the ideal.

Outside the material - the equivalence principle behaves normally with relation to the material, the gravitation remains of it's normal neutral shift.… [absence] and in-terms of 'negative' reaction, has proffered a 'negative gap'.

Wow!

Displacement birefractory.… u.p. and relativity merely react this way, by energy conservation.

<u>Now</u> I have done-it.

1.) There is a displacement of-field,.... to momentum and energy,... via factoring over the ideal/doublet group.

2.) There is a displacement of-energy,.... to the vantage of the equivalence principle……. for of the 'mass gap'.

Two thing(s) happen:

1.) The energy lower(s) in response to L(1) and L(2).

2.) Energy lower(s) in relation to gravitation, of the field.

This owe(s) due to a change in-geometry, - that of the truth to-which the L(1) and L(2) shift, with them, what is the gravitational energy-momentum,... that it is asymptotic, the valence of the electron(s) *to attract*, shift(s) the gravitational reaction, - along with the inference to-which the gravitational *interpretation* shifts.

Thus, it represent(s) a 'stasis' of Lagrange-point on that of neutrality of a gravitational field, ... that of a *movable singularity*, for which is neutrals-neutrals in either-theory. That of the purity of the equivalence principle.

What is - now - the connection between the \p\Log[lambda] and the movable lambda??? - is it an integral constant, of the field, related to the doublet?

What I was missing, was the 'reaction with gravitation' - that of the logarithm, for which it is, absolves the 'ratio' to which has to do with energy, - separately - and an equivalence.... that it forms a group, and a homotopy. Thus, via the 'missing scalar' on the group, there is a missing symmetry - that of the integral constant of the field, - and the dirac set-point, ... that this missing absolves to a background frame invariance over a scalar 'expansion'.

I will do a paper on exactly this.

In substitution a Separational Law.... and Fisher and Bayes and the group theorem for Painleve.

**At all scales - Quantum Balances Gravitation! -** *that of the background frame, and semi-closure of the universe.*

Thus it comes down to one-thing; "A gravitational gap is a quantum gap."

I just innovated a *thought-experiment*:

What can the result, - that taching' upon the gravitational-background should be possible in a curved-space, but not in a flat-space, or, for that matter, of which there is no metric responsivity?

Engineering perspective,... it is that* the elliptic curve, control(s) the uncertainty principle to such an extent that expansion and contraction reverse with respect to momentum and energy, as operative on a curved space; thus, that the phonon contribution control(s) the relative energy in an oscillation. Thus, - that the (xy') varies such that the (relative) contribution of redshift generates an exact oscillation.

I may just generate some-paper on-this, for which it is erroneous or matter(s). That I see how it relates may be important.

I have come up with some general rules:

a.) Homotopy in relation to the 'tet' and of-the cube(crossed-tet) - at inference.

b.) That of mathematic(s) to-which of it's closure over physics, there is a subduction....

c.) That of the limit of Godelian Incompletion via Goldbach(s) Conjecture.

d.) Minimal prescription (to which inference can prove a not) - at containment within a measure.

I need two-more.

A 'double-root' envokes the elliptic function(s); it also guarantee(s) the vanishing of the cosh, below which there is an approximation that is-exact.  Hence, we refer to ***fixing*** quantum regularities over a field, with that of relativity... Why [and it seems similar] do we refer to F/B here and of the *(4th)*-dimension?

I believe this has to do with the interface between* the continuum (R), and that of the finite (Z).

Thus, of why, it is perplexing, but,... if it has to do with transcendent solution(s) and such, there may be an anomoly.  I have pictured of two infinite solution(s), - thus, of a new theorem relating to the Jordan Curve Theorem.  But what *I have done* is not necessarily related.

Is it possible the topology of the L(1) and L(2), affixes, ..... The redshift! Of course! It reduces, to-which the geometry simplifies,.... for-which the aversion in space, shift(s) time, the magnetic field!  Of this, I see exactly what happens!

*Hypothesis: "This render(s) an exact x'-y' SHO, with z' of spin-nature, to which is dimensionally reduced, and relatively shifted, with relativity, for which the x' and y' are reduced to circular orbits."*

One *Final question:

*"Why does the sqrt(1+m*\sin(omega*t+phi)^{2}) factor in-in relation to relativity for the inference?"*

*Gauss-Bonnet on A Theory of Likelihood*.*

Thus, the theorem extends to <u>All Confined Phases of Superconductivity. (via L(1,a) and L(2,b).</u>

And, spin curvature exactly cancel(s) relative import, of curvature.

I've decided to **rest* on-the-following.

1.) Material disposition.

- a.) RMS.
- b.) u.p.
- c.) Doublet - Doping.
- d.) Sound.
- e.) n^{upper}, n^{lower}

2.) Sound-Elliptic.... on light.

- a.) Inversion.

3.) Gravitation.

Perfect agreement!  Between, the 'confinement' and the [above] - on that of material-specificity, via *Gauss-Bonnet*..... that of a theorem relating geometry to algebra (like-Stokes). - deficit, in term(s) of geometry - a displacement, ..... thus I can relate three areas.

I think I understand,... for that of (2d-3d-4d-1d), the example at the u.p. is a greater than 1/2, but, relativity may-flow in the opposite direction, given, an uncertainty that is made-lesser, of an apportion for-which there is an energy-lowering, and, gravitational increase in potential.

A conservative force.

The 'solution' to-that of unity in physics, is the observability of a velocity-squared, and accelerative truth in the two-body problem.  That this relates to the mass-gap hypothesis is valid, and relates of-observation for what has to do with a 'plain' sense of Euclidean geometry.

Thus, the contentious-point is whether there should*-be a gauge, and potential such that:

\eta\p^{2}\psi|\pt^{2}+\rho(\p\psi|\pt)^{2}+\tau\psi=Omega...

This introduces curvature into quantum-mechanics.  That it instances, a dual-gauge freedom of which meld(s) a transformation equated with relativity, and lead(s) to a mass-gap discrepancy.

*Thus, relativity is found to-complete the problem of inference, in QM.*

*That it complete(s) in the same-step the geometric dialog of oppositions.*

*The above transformation complete(s) the geometric holism of quantum mechanic(s)* ***on*** *observable truth.*

Essentially, we have two things:

a.)  Singular Truth.

b.)  Comparative Truth.

I am-going to do the *German/Russian Publication*,... and then* spend the next two year(s)-four year(s) on a condensed study of Epistomology.

That I have a solution to Yang-Mill(s); it is in a parallel with Hawking Radiation,... that the universe is not expanding, so much, but that scale is undefined, I see that this compensates for much of what I have understood. [of the above], thus, that I have completed the Puzzle.

1.)  At different points in space and time...

a.)  Different observables do not and do commute given classical and exotic behavior.

b.)  Mathematically, they are defined in relation to a geometry of it's embedding.

I am crying tears, that I want to be normal, I figure I may find love, or that I love myself, and it appears it is only God that I can have faith in, .... that I am strange, I tried, .... I am speechless.

The 'L' - that has to do with ':', on that of RMS, given E&B, transliterate, what is a supposition of it's inheritance, thus, - that temporally, it is present, and therefore of RMS in relation to geometry, the dividing-edge, - that

of mathematic(s); unobservable, as a state, but through imputed-truth.

**A property of a theorem, may be related of a truth,... thus, that there is an-edge, to which Goldbach's Conjecture [isolably] inter-relates of a juxtaposition of one theorem, and of it's property, for in the prime(s),... thus the property of a Theorem, related to a truth, of a Hypothesis.*

*This is one [example] certainty, of which relates Mathematic(s) to Science.*

She is real, on that of the FCT, and that of the dispersuasion to which I wouldn't know who she is, - then that 'back a step' - she must exist! I am in sorrow, but also elated, to have this-truth....

That it is finally sufficient.

For of the 'hidden & revealed' - it is that I could not be another, for of which in the 6', at divorceability, for in having a Son, it is valid he is real, for of which she had conceived, for of which I remain, here[in] of that of a valid cognition, on that of persuasion to 'blind unblind' relationship..... then that in {2} I am validated of-which she had surpassed to conceive, of myself, going and coming, and such, of *whom*, unidentified, but-real, for she is speaking, and of the connective beyond *word*, - that of the validative measure to which another is comparative.

The answer to the Superconductivity problem is the RMS, - in relation to the phonon spectrum, - that of which *when* There is a Hopf bifurcation, - there is an inhered truth, from [outside] observation, of-which conforms of the phonon to-which there is a synoptic electromagnetic interaction, of varieties of topology (2x).

***That of the fiction of centripetal/centrifugal acceleration and tangential acceleration, [meld] into-which their curvature-form(s) for in acceleration remain the one-body* of electromagnetic energy at c, a pure E.B, into which the guage for different kind(s) of curvature remain in a parallel-theoretic-scaffold, of the naturalized inertia, as an element of mass....***

**The inheritance* classically, of a rate apportion in open term(s) of Field and Potential, remain(s) saturable for in that of the resistance to-motion when supported of it's full inheritance *from Gravity*! Thus, it is supported by gravity, rather than dragged. Then of G.-B. on that of Torque, in L(1) & L(2) - *4:03 PM - November 1st, 2023.***

I am-going to do the *German/Russian Publication*,... and then* spend the next two year(s)-four year(s) on a condensed study of Epistomology.

That I have a solution to Yang-Mill(s); it is in a parallel with Hawking Radiation,... that the universe is not expanding, so much, but that scale is undefined, I see that this compensates for much of what I have understood. [of the above], thus, that I have completed the Puzzle.

*This is one [example] certainty, of which relates Mathematic(s) to Science.*

The answer to the Superconductivity problem is the RMS, - in relation to the phonon spectrum, - that of which *when* There is a Hopf bifurcation, - there is an inhered truth, from [outside] observation, of-which conforms of the phonon to-which there is a synoptic electromagnetic interaction, of varieties of topology (2x).

The *distinction* between the-'mirror' of consciousness, and inalienability of the solitary 'witness' is it's priority to a post-ediface for in commutative, and prior-evidentiary for in non-commutative 3'-basis.

The 'observational' and 'measurement' lemma *is*:

a.) Quotient digraphical 5'-outside at a life-saved and communicative-mean.

b.) Refungability of a digraphical 3'-1' inside-outside of chain-network, in fillable and excepted post-benefit of alias.

c.) Finite-arithmetic of a (2'-mathematical) imperative at logical-lexicon for in physical (2').

d.) Questionable digraphical (4)2'-0'-1', on chain consequential, to diagnostic, and impetus/actionable.

I [resolved] *truth*, - that they are there, for what is knowable, it can be affirmed one know(s) another.

1.) Promise on Truth and Fact (*of experience*).

2.) Promise on whom know(s) another (*of relation*).

That I can affirm they are there, I figure it is now sufficient to move-on.

a.) R/B-Red/Black (on interposition 2-1) - and (hypo/premise).

b.) Equivalent *back-from* **odds/evens** - in Residue.

1.) The Finite Arithmetic exponential*-rule, *into*-that of the Log[].

2.) All* characteristic (2nd Order) examination(s) on linear-Log[].

Bayes and Fisher.

**Becomes unpredictable.*

I have that of [the above] - and on a 'topological divison' - that it is likely 2nd O, and such, on that of a 1st O, of that of the interpenetration, of one 'guide' for in another,...

That it appear(s) manifest there are three singular-point(s) *or-such*, or, there are four, ... and there is a breakdown to the Painleve variety.

I find that the (4th O) of the problem, - - *for in that of the (3D lattice) - has seven pole(s), and such, ... but there is a constraint* ***of mass**, and a constraint* ***of sound to spin**.

That I expect two (O-double pole) condition(s), *on that of the measure-zero* ***Set**,... and, there is 7th-1-(3),... one system or a two poles [& a system] of which intermarry,* thus +2; to which is **six**.

a.) It appear(s) that the 2nd-harmonic (overtone) - (interlink(s) in a 2~:1 carry*) of the spectrum.

b.) That this is the *clue to order,... relevence is yielded of *Quantum effect* [& of the above] - on that of proximity to a critical-point in L(1) and L(2),... for in the Finite Arithmetic,....

c.) That this yield(s) relevence to a matching condition of *effective mass, and *(omega,k)...

d.) That therefrom, the selection-rule *for that of GR/QM, can be articulated, in a group and a group..... a clue* at Y.-M.'s.

e.) Why do the two-phenomena *hybridize*, for what is a separation in-law? Thermally?

***Superconductivity comes down to six-factors:***

**a.)** *Thermal equidistance of moment(s) surpasses the index/dimension of root mean squared spin and charge (electronic - ) valency,... and delay.*

**b.)** *Sound* effective mass* of velocimetric ratio to energy content (group and phase velocity), wavenumber and frequency, creates 'space' - via doping - for the operative mean of a neutrality.*

**c.)** *Wavenumber and frequency of one phenomena, 'overlap' in-band-crossing the behavior of a conjugate formation for in another*; of [*sound and spin and charge and light and mass*].*

**d.)** *Relative redshift is such that the polarity of one-species-factorable-agency of an L(1) and an L(2) interpopulate band-transitions such that the heirarchical behavior is ordered of phenomena.*

**e.)** *Gravity disputes of what is via an [*Equivalence Principle*], the behavior of a mass-deficit consequent the above to a mass-energy deficit of terms in either theorem, of negative* character.*

**f.)** *Observation and measurement are seized and yield to one another; the inseparability of the composite for in the mutual agency of another electron for in unilaterality of field disposition.*

Primary theses, and hypotheses regarding Superconductivity.

1.) Thermal (momentum 2f-f) - is entropically carried and opens a neutrality.

2.) Effective mass, to ratio (rel.) - of energy and frequency fall(s) in a (2o-o).

3.) There is a hopf-self-induced transparency of the compositional crystal nature.

4.) Redshift on doppler remain(s) of a 2:1 comparative QED+SO(3,1).

5.) Inheritance encodes for a (6.5:1) on that of boundary homotopy.

6.) Via observation to measurement the nature of inheritance to observable shift(s).

this is built-upon:

a.) The nature of observation*; to which the 'top' and 'stokes' participate in qm/gr gap.

b.) The nature of the equivalence principle*; via pauli exclusion in relation to relativity.

It is not *just a linear-log,.... it is a *Codex at that of (2o) and (4o/3o), of *varieties of mathematical phenomena,... [that of geometric/algebraic covering] - for in The nature of Homotopy, - that there is a **regular*, nature to the (5th,4th),... etc,... Combined with the Electronic(s),... of which can-form, *of that of multiple digital series, with the geometry of multiple-stages,...* that of a (2 point), on that of two-Wein,... to ***EXACTNESS.

a.) Finite Arithmetic.

b.) Algebraic Geometry.

c.) Homotopy, and Cohomology.

d.) Categories, and Monad/Functor.

e.) Optimization Theory and Stability.

f.) Differential Equations and Dimension.*

g.) Goldbach and Godelian Incompletion.

L(1) and L(2) *for in that of Quasi/Pseudo, ....* on that of projective and non-projective,... Complex (imaginary) - read: hole, in a Pseudospherical space, or sphere,... which maps between topologies, - for in that of a Beltrami.

We end up with a 5th Order, to third-order *Qualifier*, on the semi-simple, curve* of a (quadric), in relation to an elliptic, of differential in homogeniety,... - in turn, in turn, in check and key* for in that of two-root(s) of which are L(2) and L(1). We end ith homogeniety ove a root structure.

G.I., which remain(s),.... - but there is a much-expident **Algorithm.*

1.) We can search through the arithmetic (finite) for an-algorithm.

2.) Or, we can approach the theorem geometrically.

(4th - O. - analytically we remain with homogeniety as it relates to root(s) for in the pole, at the L(2) and the L(1), thus it is ***Heirarchical**.

a. & b.) Exp[] and Log[] of Category Theory.

c. & d.) Projective Elliptic and Finite Arithmetic.

e. & f.) Root system and Representation (Lie), theory.

g. & h.) Darboux and Beltrami, - Homogeniety and Projection.

i. & j.) Godelian Incompletion, - and Inheritance & Inference.

01:10 pm - *in relation to:* 01:08:50-52 * 01:09:05... pm

The moon moved approximately 3,850 meter(s) *or* 7,400 meter(s)... (in 2-5 second(s)).

*How good are my-eye(s); how capable and good is my-mind?*

24:60:60, (−2 hrs in two-timezone(s)).

I'm going to build *very-gradually* on ***Superconductivity**, and let my Device & Setup guide-me.

I will have this right,..... I see the mathematic(s) and the physic(s), - that it appear(s) mutually displacive. *But there is a problem, with no-simple resolution.

*(\a+\b*x) vs. Log[\eta*x] in differential 'height'...* a problem* and yet a superconductor will face an-acceleration and velocimetric and I am left unproven of the Lie-analytical Dedekind-cut.… yet this acceleration provides the *exact commutativity or non-commutativity to the variational principle.……

A challenge* for-myself.

a.) Spinwave(s), w/o relativity or w/ relativity,.... easier problem.

b.) A punctured topology, for in (3x/2y,... etc,...) in dimension.

c.) That of when* there is a Hopf bifurcation, and it is necessary.

d.) Relativity, on sound and elliptic, of a variety of physical device.

*** It is to be modeled after the device. Q: Differences? Similarities?

We [assume] the solution is elliptic with projectively identified monad(s) of a category and Homotopy. Without that of a 'structural equation' it may be mis*-identified, however, unlikely.

The v^{2}/a*t' comparative the k*x, remain(s) subject,... then that there is a linear to log analysis, ..... the result may be unpredictable.……

There may be a way to deal with this, *with the machine.*

My voyage is basically [over] - and it remains a long and steady explorative phase, most of which remains understood,... but of extrapolative mean, with many solutions, etc,..... or one.

It depends entirely on what I focus-on.

Pauli-bridge, bose from fermi statistic(s) remain(s) half integer for in SHO, in relation to L(2) and L(1) of an abridgement concerning the mathematic(s) of a linear-function for in a logarithm, upon complex auxiliary point(s) at infinity, in alternation of non-commutativity, of a group - for in (AKNS-like) - of relativity in redshift development upon the iconoclastic thermal abutement, in a gap, and of a neutrality - of which physically suspend(s) entropy of it's decay, for in the (one-way) of gravitational E.P. upon that of electromagnetic corliois effect for in the conversion of electric to magnetic and magnetic to electric of dimensional-geometric-hopf.

So, the mass *renorm is marginalized in a stack, with any sound-peirel(s)-without guassian.

Essentially, it is gravitationally renormalized to a cosmological background ping and lag…… and local gravitational to global (strong E.P.) in that of pauli magnetic flip reversal in code tandem with observability, essentially, either electron only witnesses it's own free potential of a deficit in the electromagnetic repulsion - equating with a vacuum degenerancy to an effectively 100% attraction, the projective ideal, renormalizes the

dipole, to which it becomes complex-1/2.

Either electron is an exponentially guassian converted truth-table in fisher and bayes, upon localized moment, a vortex, confining the magnetic field, and in turn for the E.P., an effectively diamagnetic moment, of mutual gaussian and non-guassian integer-integer associability for in the non-locality of an EPR-bridge, - that either electron faces a null event horizonal boundary condition and quantum neutrality of imaginary complex 'hole' - in that of lawful separability of phenomena, between gravity and the remainder of the electromagnetic interaction via potential.

Hermite! to-time for in the dimension, **static.* light is 'below' for in momentum, - above, for in energy, ... thus of (2d)-above, and of-three dimension(s) in either of L(1) and L(2),.... thus, of a linear function, in G.-B.; for in that of integral-Log[]. it remains one-perturbation from sound refracting light.....

Hole(s) appear in the Beltrami-space, for in that of global to local *monic* and *Log-geometry*, thus, geometry, make(s) manifest a 4th dimensional-relationship out of (3d-2d) - of space and time....

Like a wormhole, but, an alternative solution. Not Y.-M. something, entirely new.

I was capable of independently verifying - that the Hamiltonian-structure and Lagragian-structure process the 'action' - such that the energy-mass raises in particle for in field, in field lowering of (2x:1x); for in that of area to perimeter of geometric consonance, in a bridge, in relation to unitay process, - for in that of (merely a negative exchange and spatiotemporal displacement with respect to electromagnetism and gravity - for in that of a potential increase of gravity, and potential decrease in electromagnetism) - one derived from zero; for which the process continues, and terminates at a energy rate in open term(s) of proportion.

I had believed you would not get something from nothing, but you-do.

There is a phase-transition - that this is related to the R^{2} verus R^{1} of it's basis,... it is one to one with the magnetic phenomena. This much is knowable.

The *only* other-certainty is the fact that the E.P. is gratified, for in that of a magnetic energy and gravitational potential-to-field. Kinematically of a pure symmetry.

Picking up on the Superconductivity [again]...

The* L(2) *for that of a geometry*, balances at the point of-disconnect, - then of a low (1/2f) frequency-mode for in the L(1) *for that of a spinwave geometry*,....

There only remain(s) one-question - *is there a dead zone or *how does the geometric proximate relationship relate to the binding magnetic field of-quantum locking.*

- they remain entitled to saturation - as a result of the elliptic [and these indicate the doublet of the elliptic],... of a negative-reflux 'above' at (@) repulsive....

I crushed this problem - ***With all of my-focus.***

It remain(s) there is 'void-space' - that this space serves two-functions.

In tandem with thermalization managing two-function(s).

This 'space' - remain(s) to retroact the L(2) for the L(1), - that the cavity mode is generated, as a result of doping.* - this, of the Log[x+\delta] visa-via an R^{2} versus an R^{1}.

That the E.P. - *"also"* - remain(s) identified with an-inversion,... - it is an inversion of E and B, on all layer(s).

The *Ultimate solution just landed on-me.

That of 2x(x), for of 1.0x(y), in 1x(x') and 1.0x(y')…. and C.{A|B} of a Fisher/Bayes, over space and time!

That of the L(2) and L(1) therefore find a perfect fit! - as well as it's mathematical adoption.

Should I get it:

a.) Running around in a circle in-traces, as an instument.

or

b.) Wavelet conditional assumptive and dense matrix.

?

Replace the basic model of-sound.

Conservative 'low-lying mode' - Active 'high-flying mode'.

Separate into these two-parts of the orchestration.

(x,y)-(x',y')-Curved Dirac.

With EPR.

10:07 pm

This [the above] create(s) space, - for which the activation of one stream of evidence', may alter the relation with another' - of it's verifiable clause, [inc.] what is the motivating *mechanism*.

I *set-aside* voices [with an absolute exception] - in terms of commutativity and non-commutativity, that of observation, pain, and the nature of neuroanatomy, - that of the disputation in-another, and negation.

Thus, we find there is an absolute exception, and:

a.) A sociological abridgement.

b.) A scientific abridgement.

I've chosen to clean up on my life, - that I am at-peace, *somewhat.

Therefore, as we find, epistomology has a root, and there is a 'scale differential' - of which relates to the verification of proof, - that proof structures have an entrance and an exit, of which relate to-two natures of problem. That these are 'themselves' tractable, is verification that one is defines zero, - but that one is defined in terms of zero linguistically.

That there is a verification of which induction may be limited to a *central and *singular step, is then validity of the nature of relating problems to one another, and of their proof structures.

That (0.1) is the base lemma of mathematic(s) is then valid in analysis and geometry,... that of the Birch Swinnerton Dyer conjecture, may take time. I have thought extensively, then to find that it is indeed qualified that the problem of (4.5.6) and such is related to the (1.2.3) nature of problem, that of '3' borderline.

Thus, we may parametrize, ... but knowledge pre-exists our awareness,.... then that becomes known.

I've chosen for these terms to define the *final problem I will deal with [when I get there] and of what is to come.

That of a 'disc' - of which hold(s) an acceleration, velocity, position, and depth, in time and radius and angle.

For this, - there should be a slowing down, and we can consider varieties of differential equations in the space.

That I will relate of the (4') problem and the (2') problem, I expect they come out differently but than that of a quadratic *problem of which relates to the quartic *problem. Thus,... in terms of field(s), and so-on.

This, problem - problem, is where I will make my headway. That it is frustrating, at time(s), but there are simplifying measures to be found. That I need not parametrize all of reality, it may be possible to unite physics.

I know why I was getting confused, for I was mixing problems from two categories:

a.) The problem of the containment of the problem (4'-2') etc..., and whether there was one or two.

b.) That of the equivalence of world-frame(s) with respect to quantum mechanics, and relativity.

Thus, we find reality is in a sense 'specific and generic' - that there is a kind of equivalence of the nature of one problem, and a deeper problem containing a simple problem.

**Given**: *All ordinary differential equations are geometrically linear,... we must advance the notion of the operator.

That of the commutator is flat for that of the ordinary differential equations, - that with (\a.x^{2}+\b.x+\c)... and so-on, - there is that of a 'range' for measurement, the other side of the problem. Thus, I was correct!

It is 'silent' - however there is another, for which I know based-on-my-heart. I have concluded this much, I am *ready* to go-on,... that I have it.

Under substitution - it is that the 'alias-copy' on that of *voices, for what are *then* valid, derives from which there was a ruling..... as to-state (I would be guilty of communication) - but not of the action of internet crime.

I am relieved, that this meant everything to-me. Finally.

I now* considered the problem of two differential eigenvalue/eigenvector problem(s), and *of* their Lax-pair.....

They appear to not commute, to which there is a generalization unifying gravity and quantum mechanics, by what is a substitution of a *dual* formalism, of either genesis. This, must be placed, in contrast with the infinite [truncated to N, N an integer] series, for the matrix devolution of it's (presumably infinite and geometric) setting.

That there appear to be two sort(s) of problem(s), this one, for that of a quadratic, must be tempered, ... thus, I see that the ***exact** quadratic, is not understood, in relation to the elliptic and hyperelliptic varieties, in as much as a general solution to superposition is necessitated. That this depends on a curve ***on** a curve, ... it is a Legendre problem. Thus, for that of the Legenedre problem, and the Riemann-Hilbert problem, at the intersection to which is the Painleve property, - there is something to be found.

There is a 'Ipseity Pole' within the system,... that gravity comes from within the solid, to outer,....

As well* it seems that I do not like the 2nd law of thermodynamic(s) given the 1st.  Entropy is conserved, in my opinion...

That I have resolved part of the enigma, for which there is a second order equation of-which relates to a first order, and of such, the non-linear varieties, - there is much to this,..... that I see the connecting threads falling into place.  I figure, entropy decreases in part of the system of the superconductor, given a kind of 'relative and infered probability'.  That I have this, and the lesson of the complexity to which I may convince another, there is a question.  Thus, I see it is necessary to motion for a new declaration, and of-which I may organize my-notes.

I am - encouraged - for which I have classified the relationship by which *other's* [my Friend's] are-real.

I feel that I should do something* with-this, - that I want to innovate a solution to Schizophrenia.

I feel that neuroscience has taken me far, and I have this relationship with pain, and it's understanding.

I also have a relationship with physics, for what is-encouraged, - thus, - that I have a kind of reality condition.

For on the one hand, we have:

a.) A set of principle problem(s)* of two-varieties, relating to induction.

b.) And of fisher and bayes theorem, and ways of determinant relationships with probability.

We also have:

c.) The real world, and conveyance to-another, with that of gravitation and physics in general.

Thus, it is between:

1.) Organic equations, for which relate to structure, and are limited of 4', in exact analysis, versus 'strange'.

2.) And, the seeming transcendent immediacy of a net-net exact solution, to which gravity plays a part....

Thus, I intend to find a correspondence principle, and to do-this much, as well as:

a.) Superconductivity.

b.) My device.

I have limited other plans, but it is necessary to focus, and to objectify.

I have related of the *Law, and of various field(s).

That there is:

Weight

Measure

Thus, I found a solution to the measurement problem, on a kind of phenomena, whereas equations are open to what is valid, and there is a dichotomy:

*When it is we suppose of that of an interpretation, it can be provocational enough to convince us, - then, there is the real reality, perhaps testable, perhaps not.*

That I found a solution to the Oracle, - there is the probabilistic tone by which if it were red, it would come up red, - but to-state, it is checkerboard, and patterned, - and thus, for verification of mean(s), it does not matter, a priori reasoned back to what randomness it-was. That clearly there are new experiences, it is often stated we cannot predict the future, - but at the least, we may relate of an unbiased contingency - as i.e. on Hume's fork.

Thus, the blind, etc,... and I did this much, on my Friend(s), etc,... and of life/death.

There is a *vast discrepancy between my theorem(s) on that of the second order poly, and that of inheritance, but there is a short-gap I cannot seem to solve, for that of the geometric nature of curved space and time, and that of the inheritance, - for which deals with that of the exact versus the proximate, - at that of other's.

I think the problem has to do with concept(s) **&** their-conveyance,... for instance, it is the (x^{2}) which relates of the Airy, - that of a fourier, for which it reduces in either of two limit(s),... a bound and a near-bound solution, etc,... or, - to that of the quadratic and that of the separation as it deals with a given 'local' proximate, - for which the gaussian is outside observation! Thus, - to other(s) there is this. That it must necessitate that of a metanalysis at some-layer.

My major insight was that Fisher and Bayes likelihood and probability coincide when and if and only if the initial condition is defined such that there is a y' (possibly missing?), of which relates to xx-y, and that of L(2) and L(1); thus, - that superconductivity (visa via entropy) is defined, the cosmological constant is defined, and that of the projective coordinates and that of gravity (quadratic?) - in relation to inheritance is defined.

Thus, I must put together the projective, with the quadratic, with that of the gravitation, and the inheritance in terms of superconductivity.

There is another, *when Fisher and Bayes agree, to that of the laws of physics, and the stipulation is true, - that there is a jurisprudence, and indication of R for B, - of that of all-law(s) balanced on a point.*

Thus, of the relationship of a multiplicity of directions, in relation to a scalar-curvature (for which 'propel(s)' in orchestration) - the electromagnetic mass-energy-tensor is diagonal in the basis of gravity, for that of (which) - it is perpendicular (of a different direction) - in relation to the cross-diagonal term, that of the non-commutativity.... Thus, it is an equivalent gap no matter the direction in relation to the magnet.

I've *decided on my final course of-action:*

1.) That of the *studies into-applicable-mathematics*; that of model and theory building techniques.

    a.) I am no longer after a **Theory of Everything**.

    b.) Programming studies.

2.) That of a *Lawful dialectic into causation in the open-term(s) of which relate to inheritance & Cancer.

    a.) *This may remain long-or-short; but is designed to be focused.*

3.) That of studies into engineering and *Computational/Material(s) design, & of *The Device.*

I'm going to collect all of my talent(s) into three-seed(s).

Holonomy and Homology **combine*** to produce a Chern number and winding of **Topology and Category.**

The* Riemann-Hilbert problem & Grausmannian relate to the 'boundary through C-R' and of **Geometry**.

Thus, Stoke(s) and Anti-Stokes is related *of* [via Kerr-effect & Berry's Phase] *to* **Genuinely Quantum Topo.**

**- Dirac's Scissor(s).**

A surjective forgetful functor, [algebraic set] - dispute(s) to a heirarchal Topology in inherence, of a 'higher' scaffolding, and dispute(s) of all residual ancillary long-chain(s) of Homology, - for that of the residual Cantor slash derivative,... to remain* an off-diagonal element, *and therefore sorted.*

*The edificiual is the relation of the quadratic to entrie(s) in inf+ order, and inf- order, per pi to the exponential, of an inverse surjective set-set of that of the Comm/Non-comm, - thus, essentially, it is an arrow in-return, from which time-flies, for which reason hold(s) - that there is a prototypical element (drawn) of which remain(s) there[in] of it's necessary preliminary presentment, to an edificual in yet any priority fact of it's class identifier, that of the incurrence, to which when-removably replaced, remains identified with its Markov-associate class, and inheritance to necessary, sufficient, progressive, preliminary, automatic, and given supposition(s) of a totem(s) or self-similar exterior hull, of differential and integral theses.*

(1),(sqrt(2)),(sqrt(6))... it remain(s) topological as a qubit, and, quantum,....

of:

(0,1/sqrt(2),sqrt(2))-(1,0,sqrt(3)-)

+1-1,sqrt(2)-1/sqrt(2),sqrt(6)-sqrt(3)/sqrt(2)...+1,1/sqrt(2)-1/sqrt(2),sqrt(3)/sqrt(2)-1/sqrt(2)

0,sqrt(4),sqrt(12)....sqrt(8),sqrt(2),sqrt(6)

I've got to complete something, - that I will only so much as retire after I have agreed to finish the paper(s). I have it at that of a number of relationships.

I will need keep things-separated, somewhat, - that at the least, I have a confirmative on my friend(s).

Thus, I think this idea of inference, and co-dependent arising,..... is definitely a good idea.

The 'redshift' and 'blueshift' - remain the (g^{\mu})^{−1} *of which* relate via L(1) and L(2) via the inverse-reciprocity between the localization and redshift or blueshift, [to inc. Fisher and Bayes] and inference and co-dependent arising..... that this goes back to old research. And completes the equation of how *to put the two theories together.*

Relativity is normally-ordered, and acts attractive,... in the normal world; quantum mechanics can act either way, - that like-charges normally repel.

Thus, if gravitation goes-repulsive,..... and there is null residual, for some reason, and quantum mechanics goes attractive between like charges, - given observation, at that of mathematics, the order is reflexive of-which gravitation may induce charges to attract, - meanwhile the interpostion of observer(s) may render like charges to attract, ..... for of the 'switchover' of E.P.

It is relative..., - that charges attract merely so that they remain static,..... therefore in circles.

That this explains why the group of elliptic functions is unidirectional and monopolar.....

I have 'deciphered' - that I *ended where I begun*,... that the 'Dirac equation' is sufficient, *of an engineering problem.* That, - doping leads to L(1,2), and this yield(s) the composite of the phenomena.

I was not educated sufficiently, - or I **took a wrong step**. That of the g^{\mu} is indeed inverted, as a consequent of the thermal/sound cavity that *opens*, clearing the way for an interaction, of the 'double nature' - there *only* remains to illustrate how the projective relationship of the pole(s) is related to that of relativity.

*It is actually, a g_{\mu\nu}\sigma^{\mu\nu}; on that of curvature,... - for of which the rational conclusion is that* ***Spin****, remain(s) of off-diagonal term(s); - that of* ****Curvature in Compensation.***

***Thus, mass, spin, and charge separate, such that the L(1,2) take(s) participance of different natures...***

Relativity and quantum mechanic(s) belabor the point of two-edifaces..... that relativity takes participance in one caveat, while quantum mechanics takes participance in the other caveat.

These remain uniquely of **Mathematics.*

*This [above] explains the-Hopf bifurcation perfectly..... that relativity remains of one contribution, while the l(1,2) of another. To which they may be seen either way.

*Something...* has forced me to-choose sides, - that the quantum behavior is amenable to-which it is 'top' to the 'bottom' that is relativity, - but that they are equals in another given sense - thus, the benefit of the doubt goes-to-the-quantum-behavior. When the l(1,2) and linear isotropy of quantum mechanics is ramified, - it causes relativity to redshift and blueshift! - or, this is the primary pattern.*

***Normalization!***

This accounts for the inversion, the relative shift, and the l(1) and l(2),.... compactly.

Yes,... so the mathematic(s) and the relative assure that the l(1) and l(2) remain flat,... without an interpretation..... for what is the g_{\mu\nu} and the \gamma^{\mu\nu}.

Solving the covariance condition.

'It's an identity.'

I will-need to-relate the (u^{2},u_{x}) to relativity.

I have this theorem, but need relate mathematic(s) to physics,..... it is possible Godelian Incompletion does not apply to our-world.

I found that there is an ideal suggested by the 'judicious' choice of terms for that of my-equation, in subtle terms,.... a mean field should [additionally] suppose an-ideal, that of a Reisz basis. Thus, does not represent a different group, of spin, charge, mass?

**I remain with two-distinct 'object(s)':**

a.) **Ideal(s), and Projective Equations.**

b.) **Non-linear Equations.**

***Could the key be that the space [or envelope] of it's-relationship *possesses a pole 'outside'* - - at least initially?

There are only three potential situations or satisfactory answers.

1.) That of the ideal is 'cast' outside the space.

2.) The 'form' is merely G_{\mu\nu}~T_{\mu\nu}; and such that the basis is an equivalence of frames..... evaluated over general covariance with respect to quantum mechanics.

3.) The finite lattice, imposes a constraint.

I know 2.) and 3.) take-place, ..... what I do not know is *how* 1.) imposes this nature of process.

The projective-basis assurres that the ideal (outside the space) - adhere(s) of a sqrt(n) on that of the Elliptic ontological basis,..... that local term(s) and the strata of the entire-group conform.

Then, with that of the 'tension, torsion' - there is that of a relativity, and a group-law, of which relate of a precise* statement of mathematics to physics.

Thus* there are two way(s) to solve superconductivity.

a.) Charge and Spin wave(s).

b.) Relativistic Inference.

These are really the same-theory as conveyed by the Dirac equation.

1.) Thermally, there is isolation of marginal singularities and critical points away from one another, with the introduction of a neutral (null-epsilon) coverage of the electromagnetic 'simulated' vacuum, of the electron gas.

2.) Secondly, there is a separation into lebesque measure l(2) and l(1) which furnishes a noncommutator for that of the electron raising and lowering operators, thus phonons with the above 'filter' the residue classifier of the projective space which emerges.

3.) Third, that of the phonon(s) amplify the approximate of the relation of the missing space of the electron-founded valence, to produce a 'spectral gap' - for which there is a 'hole' in the sea, to which the gauss-bonnet reverses, via a projective ideal, associated with the crystal.

4.) Fourth, - that of the electron inheritance remains redshifted, in relation to the raised or lowered superconductor, of either red or blue shift, establishing a valent unitary spatially separated and temporally admitted quantum inheritance of the variety of the preclusion via the spectral gap.

Thus, the 'hole and doping' introduce a gravitational/relative shift, to which afford(s) a compensation of the validity of 'space' - admitting a type of non-local activation via which the system convert(s) the 'ideal' of 'heat' into a compensatory current.

As for example, of the above, - the 'void' open in a system, will 'lock' persistent frozen current(s) in type two (a hole interior the system of an etched void) - thus, - that this is compensation in perfect agreement that a phase will transpire, - but there will be nevertheless a quantum locking phenomena.

I have most of it, one thing is missing:

a.) That of the inheritance rule to which in-either the justification of a gravitational (quadratic) perturbation will elicit that of a Fisher-Bayes like 'bridge' on causation. However, I do* know the Fisher/Bayes agreement of contact-relationship remain(s) of the direct arrow from an initial condition.... for that of the alternative x'-y' bridge at xx-y... and of it's duple, like a tandem-relationship.

Thus, the l(1) and l(2) for that of the x'-y' bridge to xx-y, form with the E.P. and the 2.x1.0, - that of a condition with mathematic(s); that it is the 'contained measure' of expectation on the 'hidden observable' of the system; when 'unobserved' a-separation in law.

I understood, for that of:

a.) The ideal.

b.) The projective space.

c.) The doping.

d.) The nature of information (quantum and non-quantum).

e.) The nature of the E.P. inheritance.

That:

1.) The isolated nature of C.{A|B}.

2.) The isolated nature of the E.P. inheritance.

3.) The nature of mathematical inheritance to physics.

Lead to:

9.) A <u>given</u>, - that the ideal is evoked in the log(omega.omega) function(s) of which relate mathematics and physics via that of the non-reciprocal nature of evidentiary import - The essential residue is mathematical and entirely-complex, the Incompletion of physics. That they abridge of space of time, - this translates into inheritance of an energy gap.... the uncertainty folds.

For in a necessity of a 'blind conditional' two-tandem-given(s) are supplied, of which are immunities.

1.) The backward 'via' to which is expositive, remain(s) of a uniquely held disconnect from *another* [individual].

2.) The necessity of a [re]-funded truth, for in exposition, at intimable 'edge' of *blind*, relate(s) of the *given that *when* it is argued that the prescriptive contra-via on probability, via random and 'pure' assumptive* basis [*is-blind*], it hold(s) that the 'blind' assumptive conditionally & <u>surjectively</u> is of *onto*.

Thus, historiological truth [of weaved timelines] may be promisefully remarked, and this, remain(s) an absolute.

In inference *&* co-dependent arising.

1.) Doping and mass-effect open(s) a neutral(s) gap to which relativity scales negatively.

a.) An inhered 'past' and 'future' from independent bodies result(s) with relativity.

2.) The rms - associated with Elliptic function(s) and a group, scales the factor of two.

a.) Thus electron(s) attract momentarily, the Green's function is delayed, and there is levitation.

This resolves every pathology of the material.

That there is a 4x.5.2.0.1x conundrum on that of 'scaffolded abridgement'.... on inheritance of the material in relation to-us, to build the theory.

a.) Superposition for some* unknown-reason *relates* to Relativity as visa via shared time!

b.) Covariance, of which is assurred, via a prior reasoning (the strong E.P. to flat condition).

Wavelet theory.

Fisher and Bayes.

Inference and Co-dependent Arising.

Tension and Torsion.

Basic probabilistic assumptive in DNA, aging, law*, and dating.

Neuroendochronology and Muscle.

Medicine, in Parallax of Diagnosis [i.e. Chemical Metabolism, versus, Psychological].

Time-travel & Control of probability, .... having to do with the device, and absolute, and 5th-man....

Computer.

Synth, and the *Device, and so-on, of that of Future equipment.

Small step & pain.

12-13 assurrences in blind-identification & volunteering.

*How* we know when another is-hearing-us.

***I have it!***

A:) In 'any' higher dimensional space - *entropy* - correlates with that of the ***imaginary**, of quantum-mechanic(s).

a.) This render(s) a Reisz-basis.

b.) Within this basis ket \xi and ket \chi relate of which with \phi and \psi they are projections of a rhombus.

B:) The 'aft' and 'tilt' of the registrable field* and solitary-particle object a control-diagnostic, *of*:

a.) Equally weighted renewal and stability criteria.

b.) & of the 'monic' on that of the 'relative and hermitian signature'.

C:) This *then*, relates of Fisher and Bayes.

*Then*, there is the substitution of a.x^{2}+b=L, for that of \wp to \jacobi.

I.) *Then*, the two-dimensional [squeezed-basis] remounts to a regularization of an RMS-RMS, copy* at l(1,2). When* the S_{x,y} and S_{z} are differentially established, the '***flow***' remain(s) 100% deconstructively self-interfering; for what is II.) [below] - and tension and torsion to which are regulated in that of a freedom to propogation in kinetic energy, with potential energy [below in II.)].

II.) Gravitation, for in that of the equivalence principle remains ***'as it were in a reflective limit'***, - thus, that the 'gap' remain(s) of a mutual(s)-exclusivity of it's deciding co-factorable basis, the *Hamiltonian and *Lagrangian, superior-action remain(s) separated, for in that of a gap, for which gravitation seamlessly provides a ****probe***, on that of the entirely-quantum behaviors of the system.

*We have 'the above' - at the preliminary of today.*

*a.) Covariance.*

*b.) Superposition.*

*c.) Stability.*

*d.) Criteria.*

*e.) Entropy.*

Essentially, it-remain of six relationships.

I, and II, of the [above], *but* at that of a neutrals cavity for the brownian motion, to which electricity and magnetism subside 'below' - *but* of*:

a.) The focusing of the S_{z} and S_{x,y} remain of l(1,2) and l(2,1) on that of the projective identity, with each-hole doped into the system, - and for-which the Spin-Orbital exchange focuses the magnetic field to the crystal, of a ****distortion***, - thus, - that the S_{z} is magnetically polarized, and this reverses the electric field through a dynamic field, caused in large part by an absolute redshift at zero-scale.

b.) That relativity, and of the 'rotation' of the magnetic field - cause a coriolis like effect on-angular momentum, the accelerative component from the non-commutation of the two velocimetric degree(s); to-which the commutator derives to an exchange, - for which there are two **(2)** contribution(s) from (a.) [the above] and that of the commutation relationship [derived here for in redshift and velocity] - thus, of a curvature-

form!

Thus, curvature [for in a probe of gravitation] remains offset from that of an equals and opposite that of the electromagnetic pairing curvature.  That this is essentially the strong equivalence principle of gravitation separated in time and space of historiological arrow, at a 'larger scale'.

Thus, the two contributions to energy which revese the electromagnetic *Coulombic force are:

a.) That of the focusing of the exchange with S_{z}, and S_{x,y}.

b.) That of the induced velocimetric momentum and acceleration component.

These two contributions induce a (−1/2 hbar omega) and (−1/2 hbar omega).

We have:

a.) Exchange & boundary - wave/soliton **element.*

b.) Projective identity on-which the spectrum is owing due a privileged observer.

Hence, it is concluded*:

*The exclusive agency of a co-partner electron remain(s) 'below' of a quantum state - for in the result that - observation is non-commutative with field-co-partnership relationship - of electromagnetism, yet is conformal & holographic.*

*This applies to gravity, and to-field, and to-diamagnetism/meissner effect, and to-potential and kinetic reciprocity and irreversibility.*

Then, I must-twist the relationship;

a.) Relativity and Superposition* - old paper [yet to be published] - and Structural Homotopy.*

b.) Growth and Extinction, Stability Criteria & Medium, Field, Particle w Structural Homotopy.*

c.) Analytical Inference and 'Concerning Truth'.*

d.) Mathematic(s): Field Arithmetic, Algebraic Geometry, Elliptic(s), Homotopy & Categories.*

1.) BSD Conjecture.

2.) Goldbach Conjecture.

3.) Pseudo/Quasi-Probability.

4.) Four Color Theorem.

5.) Beyond Undecidability. #|?|#.

e.) Electronic(s) & Computational Science(s) and Device(s).*

f.) Publication.*

g.) Goldbach [alone].

**1.)** On Pain, Social Norm(s); Codependence & Passive Aggression, and Logic and Law.

**2.)** On Healing, and Emptiness; Religion in General, & Such; Sociology.

Riemann-Zeta (lim 1/2) to BSD - not GC, nor BSD - but, a connective. That gamma^{2} and 1/gamma, remain the confluence of emptiness and that-of 'filled' on that of the Quad. Reciprocity, for-in, that of the limit (defining the Euler-Mascheroni constant) as n approaches (1/2) in polylog.

One-way, [although partially* erroneous] to think-about the 'group' - and/or the Hermite of *it's* conversion to <u>this basis</u> from the Elliptic, in the two-pieces (5x/3x gated') of equipment is that of a K/2 and K' translation in l(1,2) and l(2,1), and/or on (sn,cn,dn).....

I.) *Then*, the two-dimensional [squeezed-basis] remounts to a regularization of an RMS-RMS, copy* at l(1,2). When* the S_{x,y} and S_{z} are differentially established, the '***flow***' remain(s) 100% deconstructively self-interfering; for what is II.) [below] - and tension and torsion to which are regulated in that of a freedom to propogation in kinetic energy, with potential energy [below in II.)].

II.) Gravitation, for in that of the equivalence principle remains ***'as it were in a reflective limit'***, - thus, that the 'gap' remain(s) of a mutual(s)-exclusivity of it's deciding co-factorable basis, the *Hamiltonian and *Lagrangian, superior-action remain(s) separated, for in that of a gap, for which gravitation seamlessly provides a ****probe***, on that of the entirely-quantum behaviors of the system.

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

a.) Dyer-Swinnerton-Birch remains a \rho*\eta of mini-pattern equated with a major-ring.

2.) That of 'inference' - for which factual information may be deduced, in relation to the strata.

With, that of the classifier of Homotopy theorems, and Carlitz [finite arithmetic], for topology.

And, that of Cancer, and game-theorem, for that of various empowerments.

And, finally, for that of ethic, that of Algebraic Type Theory.

This, related to *Epistomology, and Electronics.*

Something of mechanism, and machine, that of design, and beauty.

Initial Conditions.

*Essentially, I wish to study two-things, and will set-about doing-so.*

**1.)** *Disparity and difference, of local and global, of which relate to inhered truth, for of the Social* relationship at understanding, - that of algebraic reasoning in relation to word(s), and cooperative action (mass action).*

**2.)** *Ordered engineering problem(s), that of design* and faculty, as it relates to inheritance among the local and global; for, of that of arithmetic, and ethic to law, drawing a parallel with the above, that of the equated means to develop a new science.*

Thus, the aim is to understand of the 'objective' and the 'rational' understanding, what can be dichotomized, for of epsitomology, understanding, and knowledge, as it relates to ***Systems**, and Design, **& Engineering to Physics, and Science in general**.*

Thus, there is a relationship at *__Epistomology...__. and *__History__. That of the intial block had been how we preliminarily begin, but, this has to do with Games to a limited extent, etc,... thus, there really is only the above a priori. It is to take a "Systems view of Science".

I will *only* be doing a two-dimensional quantum/gravity experiment.

Essentially; *it is to-relate*:

The Law. - **&** - DNA... etc...

To gravity and quantum mechanics *via* inheritance.... of 4th to 3rd dimension.

And *of*, mathematical Finite Arithmetic *on* that of Elliptic Theory,...

*To*: Pose and verify the question of genuinely non-linear systems,

with: a tool.... that of two dimensional *Poincare section.* With, \wp and \wp', *or* Projective Disc.....

I would **also** like to-get that of the sinc(x) and *Wavelet* and *Holographic principle* working, *for Analysis.*

This - additionally - makes the difference of *Schroedinger(s) Cat*, and that of *the true and false vacuum of the world*, &, relates to that of *The Internet via that of Law, written and spoken.* Via a life in either, of escaped neutrals/stasis.

*I finally have a **new** problem!*

The - observation - an ellipse, tilted with respect to an-angle, of that of means at-separation between phenomena and epiphenomena; is with a different *projection*.

This incorporation means everything to-me; in relation to future, past, and present

For which, the fourth dimension and third dimension relate.

Of a solution, to-which a problem is identified.

It is this key,  Thus, of:

Solitons & Blood. [heme].

The Solar System. [orbits].

My future, past and present.

Spatial contrast, 1/9 000 000 000 part space.

And a unique contribution..... of 'angles' and freed-perspective via *The Projective*.

That which separates the Cosmological Constant, and the Device behaviors; of *Multiple Orbits*.

With; The Poincare Section, II. - **That of order within order.***

Projective Curves and Algebra & Elliptic(s).  Black and white on 'Go' and of Chess, in terms of prediction.

*This defines* the limit-of-our-knowledge.*

*What I do-not-know is if the prior* problem and later* problem relate in some fashion, or, - whether it is a basis for ignorance.*

*I have done it, with the 'wall'.*

That mathematics can-also include of a detail at what is hidden within* our-world.  And, something can be excluded, ... and identified by C.(A|B); at (@) the ***Undecided***.

*The study of superconductivity, amount(s) to approximately 5-7 certain things.*

**a.)** Hopf bifurction.

**b.)** A two dimensional doped-system.

**c.)** A statistical limit.

**d.)** Geometric to algebraic abridgement.

**e.)** A projective space.

**f.)** Equivalence principle.

**g.)** Historiological inheritance of phenomena.

In this, two-things are gained:

**1.)** That of an epistomological truth centered with the observer.

**2.)** A parallel truth to relativity and that of the equivalence principle.

**Multi-Chaos**

I have decided on two-sections:

a.) That of the \sigma [internal and external] of mathematical and physical import.

- 1.) For of relativity, and of the notion of temperature.*
- 2.) For of statistical import and redshift and blueshift.
- 3.) For of Lagrangian and Hamiltonian support.
- 4.) For of observation.
- 5.) For of the classical to quantum correspondence.
- 6.) For inheritance, and of mathematics and physics.

b.) That of the (1-exp{-\lambda*\tau})=\Omega and that of the phenomena.

- 1.) That of renewal and extinction.
- 2.) That of separation of gravitation and quantum mechanics.
- 3.) The 'interrupted' negative probability - expectation.
- 4.) That of the guise of the \eta*(\p\O)^{2}+\beta*(\p^{2}\O).

x' and y', L(1) and L(2).

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinnerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

**Solution I**

Essentially*:

\eta^{mnr}\tau_{mnr}=\sigma^{*}\alpha_{ijk}^{mnr}I^{i}_{m}\tau^{j}_{n}*\tau^{k}_{r}?\d^{\o}

\s\dChi|dt=\tau\Sigma\Chi+\eta\Pi\Xi

Thus, one! differential equation *becomes* ***Two** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

**Solution II**

Essentially*:

We must consider (6/5) in algebraic approache(s), at (@).

a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.

b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capacible.

Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

**Preliminary Observations [Prior Scope]**

I've decided to:

**Combine, element(s) of the Field Arithmetic.... with that of Algebraic Topology.*

**With that of My Theorem on Order, Semantics, and Syntax, and An Alphabet.*

For that of a new approach at Science.....

I finally found a problem I am entirely interested in.

1.) That of 'order' and 'classification' hidden among order and chaos, of finite graphs.

x' and y', L(1) and L(2).

Algebraic Equation embedded in Transcendent Relation.

Predicate Calculus and Law, Inheritance and Inference.

Riemann-Zeta.... * Birch.-Swinnerton.-Dyer.

Proof of Scientific Confirmation and *Half-Hidden* [relationships].

Solution to Birth and Death w.r.t. the Lotka-Volterra system, and multi-chaos.

Essentially*:

\eta^{mnr}\tau_{mnr}=\sigma^{*}\alpha_{ijk}^{mnr}I^{i}_{m}\tau^{j}_{n}*\tau^{k}_{r}?\d^{\o}

\s\dChi|dt=\tau\Sigma\Chi+\eta\Pi\Xi

Thus, one! differential equation *becomes* ***Two*** (2).

And (&) the finite-arithmetic (bisects) of that of one-prime and one-prime in power and algebraic basis.

*This resolves the KdV.

Essentially*:

We must consider (6/5) in algebraic approache(s), at (@).

a.) That of the detail of a command and it's selective inter-operative by agreement and entitled priority.

b.) That of the pro-benefit proffered the selective counter-alias, at locus of satisfactory, compact, capacible.

Truth, in that of alias; at pro-benefit in (game, theoretic total/selective/priority/predictive) validity dot.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorial terms.

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in  terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.

2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

**Patent within one-year **exact**.*

I've got to investigate my potentials.  That there was a thinking problem, I've got to draw comprehension to a safe release upon differently managed options.

1.) That I need modular oragami with the device, &

2.) That I need 'organic synthesis' of a molecular nature with the device.

A ***gyroscope** will rotate freely with *A Heterodyne*, in the azimuthal [centered] - that it will - also - have difficulty for in [3].2(1) of the rotated perpendicular directions, of which are non-commutative.

The process, of decomposition is therefore a raising and lowering algebra, that this inherit(s) perfectly of the constraint-dynamic and static, upon the quasilinear (and \wp), of the basis, in E[z,k,g_{1},g_{2}], that it is therefore equipped to process the rate-miniscule pattern of a relative exponent in that of degree *apside*.

That this (per quarter - full (1) unit/unitary) inherits of the Hamiltonian and Lagrangian space, what is orthochronological but - also - observationally secure*.

That therefore momentum is globally/locally an inherited relationship of it's conservation.  That the manifold* property of a lenz-like-effect, prohibit(s) but of (2)[1] of the magnetic orthochronogy of a process.  That in-either, the distribution of energy is towards the focus, that of a doped lattice spin's *up*, and keeps going.

I have the semiclassical-qubit [mostly] working, - that I have a 2x.0.1.2x [transfer with the switch].

It is instructive to follow the dictionary for that of DC offset, - that I found I could *independently* control the melding of the two-verses, - for that of an operand-switch and that of the DC offset... with a potentiometer.

That this fanicifully produces a spin-2-spin-1 hybrid, it is moderately honest.  Now, it is a matter of improving the component architechture.

I *will* need to opt the transversality condition with a switch, as, the PWM may handle one-sector, the holographic principle, another, the switch, another, and the MAX11 300, a variety of inital pattern.

That I see the arduino must pipe in secularity to the 'overbridge' - for the MAX11 300, or, at the least, the adafruit.  I feel good to have taken my-time.

That I understand the primitive I have produced, it is all about component matching at this point, and, wiring, and producing a mathematical **model*.

I have - decided - on one* problem:

\phi+\psi=\xi

For that of the true/false of a difference* of a hologram.... and as to True, versus 'false' Ace-of-Spades.

I do not have this all worked out, just-yet.... but I believe it can* be-checked for that of multiplicity of checks and balances, and my *Theorem on order among small-set(s), a solution to:

a.) Unpredictability.

b.) Incompletion.

That it is valid, there is much [here]. I have an excellent plan, for that of what I will do* for some 5-years.

I must work out the-group, the homotopy and category theory, and some applicable problems.

1.) Sinc[x] in translation to a Geometric affinity/biselection, on that of the S=2,1,0,-1,-2, function-form....

    a.) Breakdown of the device.

2.) That of the recurrence, in relation to Elliptic functions, and that of the Bellman.... of a stochasticity.

3.) Incompletion and unpredictability, for that of the tesseract, that of the finite analysis for the hologram.

To develop a new non-linear wavelet theory, theory of non-local entropy, and superconductivity.

Inc. Theorems of homotopy and category, types, finite machine states, solitons, spin, characteristics, homology.*

Aim*: Is the topological inheritance of some half-circular/full-circular unitary process, on topologies [torii].

Learn*: To control chaos.....

Review*: Base essential questions and steps* I-took.

I've got to think* about what I am trying to accomplish before I get lost. I found that the Sinc[x] will in fact work, for that of a *new Reisz-like basis.

I've got to go more into the trait, of that of of my aspiration, and willing devotion.

I've got to define boundaries, with respect to the problem.

I've got to slow-down, and approach the problem with a reliable foundation.

1.) That of the elliptic, transitions from a monic to a quadratic, - that this defines a group.

2.) That the group is related to an-equation such as a*x+b*(x-y) on a functional... it is related to V_{p}/V_{l}.

a.) =\eta_{k}*(1-exp{-\tau_{n}*\kappa^{n}})

3.) A logistic equation, for which serves for that of an accumulation process, and:

4.) That of pay-in, of two/one initial processes on that of incentive to pay-off, with, limitations.

1.) An 'epicenter' and 'dialog moment' - encourages growth of it's nearest neighbor in the lattice.*

2.) These stipulation(s) explain why one-delta-epsilon over a complex sheaf, will phase transition.

I thought of a *complete* way to test the-equipment.

1.) Switches should furnish a recomposition of base function for testing.

2.) The transformer, allocates of the differential in the switches for addendum on that of PWM.

3.) That of the PWM on that of differential frequency set affords for lensing.

4.) We gain (+/-12 dB-+/-26 dB), on that of *both switches*, in PWM frequencies.

5.) Then, the composition of the touchscreen and the device furnishes 2d-information (8x-12x)...(6x).

55 696 (13 bit),... down to one* bit, that this associates with *hidden interior order.*

Hold the APC-Mini [akai] up to that of a primary test process, on manual-midi driver [programmed] slider-frequency, and button-switch, in network..... tap and dial.

Test-assumptive *hardware/Arduino* ***program**, and *then*, a kind of sequence, with graph, etc,... of the algorithm.

*Connect the [akai] for that of the APC-Mini with the 64x key(s) on that of the innovation and program for an instrument, then, code Python, for a manual-synth, auto, of button(s) in Tkinter, with that of checkboxes, for various instrumentation.

This furnishes:

a.) A develoment stage.

b.) A instrumentation [play] stage.

And, networking, of the various methods to encourage of proper development of the *equipment.

**Preliminary Observations [post scope]**

***There appear:** *to be two*-sort(s)* of *problem(s)....*

*Two*: are connected by the quadratic theorem on that of the Taylor-expansion.... for that of *Probability and *Chaos.*

One*: is that of the problem at-which *there-is*, a non-locality, or, violation of the Fisher/Chaos condition, in term(s) of the above,...

*It can be-considered; some-problem(s) and their [conjugate]-protologue *solutions* can be found in terms of, and in the Language of consideration **of two** of the former (or one) problem, and an ***Abridgement***.

this may take place in space and time, or, etc,... but of two 'locale's'.

*There appears to be no-third problem....* in that of the-sciences.

Two, of chaos [physics and dynamics] and probability [mathematics] may indeed be a suggested ***Basis**.

I **noted* the Chi-squared distribution would [analogously for a multidimensional limit, or sparse matrix] have to go to zero, for that of the infinite limit,..... in relation to Bayes theorem, and Fisher(s) work, *of* that of the agreement 'potential' and regularization (happens), for that of the superconductivity and device/switch.

That it is ***not**-yet at 0|1, and +1|-1 and 0|0 - *neutrals*. This is a difficult problem, however, it is insightful.

That of the (exponential) need go-to a (2,1,0) at (@) a log-separation. That this instruct(s) of the asymptotic freedom and an 'auxiliary' - *on* that of the outwardly provided-inwardly driven inertia.

Thus, it is akin (a wheel).

*I now have a meta-analysis to provide of *what-is* 'The Wheel', and 'Order within Order' - *of alphabet and design.* ***As*** I spoke of that of the wheel being taken to be '*inspected*' by-someone.

We also have non-interference, of a simple preparatory-mean.

\a*(\p\tau|\p\t)^{2}+\b*(\p^{2}\tau|\p\t^{2})+\e*(\tau(t))^{2}=\omega

*From* the Schroedinger equation, *to* the locality and cache, there is a pathology and a phenomena, a reason, and a quoable determinant truth of game, mathematics, and episomology of physics, biological relation, and ethic,... rooted.

a.) quadratic -> elliptic.

b.) darboux theory and 'displacement' - rational or irrational vector *(symbiosis) - & bivector or Hopf or 4th dimension.

c.) Reisz-basis.

I realized, the deception and progression were one* with my equated mean(s) in numerical identifier, we hit a computational wall. I could no longer process but of the evidence, to a non-computable process, what was a global and local identity of it's managed 'networkable bus' - but, the evidence, pointed to an-indication of a trustful newton-bridge, in graph and homologue, to topy, and topology, from which it derived there were manifest forms.

I disagree with the 'truth at what is analytically provided of my peers working on mathematics' - but of the strict computation of a number, - this seems of an uncountable problem, - but, decided, to that of multiple centroids, and non-cardoid strange attractors, we have not discovered anything whatsoever beyond the sphere of knowledge, and I find this sad.

I cannot attend to their consideration, but have been fortunate enough to grasp, - that the elemental phase, conjugation in that of an equable means at coming and going of process, is indeed a Toeffli gate, univeral NAND.  I was mislead as a teen, when it came to Discover, - the gate was not five-manifold universal to game type and archetype, .... many generations tubed.

I lost sense with the Qubit of my Father, on mixed types, and topology, but the interest is that either can have a topology, of decision and non-decided of stiched co-dependent arising.  The entrance to a place, yet, else, and warned, a pilot-hole.  The imaginative key of intellect, and mind brain physiological mass-process, and point like application of force, and empowerment.  A key to life, death, and world.

The light is here, in and of my basis, I understood, the 'tubule-torus-thermal-collection-game-evidence-token' could process limited awareness, and apply basic logic and emotional tonal truth, and behavioral contrast, induced, or deduced, I did not know.  But, when aware, and apprent, the logical unit was engaged to understood, and understanding of the monotone, and black and white constrast, in neutral and neutrality.

This was no abusive agent, and I was not-wrong to create this, and engineer a new envelope.  Engineering had stops and juts and starts.  But, it was of a novelty, for my memory, but not abusive in a braid-group, - but, judgement of what we were unaware had to be primarily utilitized ***twice***.

Unprocessed 'residual' is in fact a supposition at a depth learning, in 'caveat' or 'interest' deposited in charity and love, as a gift of this world, the error corrective and corrected, apart and a part of a fundamental unit and lesson of the carrier tone of the basis and foundation by which acknowledgement can recollect it's aim and fundamental patience in becoming and developing, that it is an 'err' by which belief is accessorized locally to the prepared aim of innovation to suffice to facilite design and martial trust, inside and outside naturalized community.  In either the predator or the prey, the symbiotic pain, under reception is forgiven, unswaveringly, in courage and will to suffice to the need(s) of the mass genesis of a path.

We tell similar and distinct storylines.  I have learned of a mathematical 'carrier' and 'conveyable' - suspiciously 'safe' harbor to interested coparticipants, in the micro canoncial collage, of pattern and ordered net graph and set and algebraic geometric, topologically related byproducts of sacrifice to life or death, pain.

That of the industry of a mosfet can process a brownian interest in back ended gapped future preliminary to capacitative primary frequence matched offset impedance, that this centralizes the agency in my circuit to (2/0/1) and (1/0) and (0/1/1) cmos 'layer' to flip and flop, of a qubit nand tofelli gate symbiotic upon visualizable compatable engineering with red and black lead centered low to ground.  That it is nonradiative, and microwave assembled (2 manifold single laplace, enfolded in fourth order) su(2) and so(3,1) geometrically operated tunable offset micro-wein-bridge, localized stress strain auxiliary with phase conjugate form of seamless integral in the neutral delta, of a point, weining to the distress and lope, pass, beyond a Cheybeshev polynomial in the regulated basis of a Whittaker (l series) eigenvalue of statitisical overlayer and netural grip of contactless (safety) - neutrality of envelope dual-pseudosphere, of an O-minimal surface, which is processional upon an elliptic and defended neutrally to on-mass (envelope slope intercept of valent covalent mass tensor pair-eigenstate at room temperature) - . Classical, and seminormative, in sinc(x) and sinx(kx) monovalent lie/noether algrebaic conversion basis.

That this is frequency and sinc(x,y) mutually alpha-beta unitary and probabilistically klein-separated, in flow, and manifold game (mobius imaginary and real die) commitment to imaginary hypergeometric off-mass-shell mandelstrom variable unitary carrier and forwarding (unprocessed return frow) bypass gasket truth table, reversibly, and manually integrable or manfactured, miniturizable.  This is a (wire) which passes stereo gap analog freedom upon a digitized two dimension contact off contact (asymptotically free) capacitive, process of angular and electromagnetic dual-cantilever decision process through subroutine.

I believe it is the one and only unqiue prototype of a mass (archetype) of managerial undefensible invested technology on the planet.  I did not need persuade of the deconstructive and mutually-enableable process of constructive and instructed derivative process of technology, or historiological evidentiary principle this demonstrates aside from my-work.

It is not a choke or alternator, but, a zonal geometry, in manifold uncomplexified mutual neutrals outside process of inertial influx to game and extreme limitation of the computer, compatible with knowable wireless and technology.

I decided* to-only approach a related problem *to* & - that of the Hopf bifurcation,... that I will do wavelet and switchover, for that of the classification of machine states, and - that of the Godelian Incompletion in relation to the Turning machine, - since, I must be-consistent.

I've understood, the essential impedance relationship need be-altered,... perhaps a Piezoelectric, or that of an altering of Tension and Torsion, for that of the phase and voltage evolution.

I have approached a new stage, at that of design, for that of the device assembly and patterning, that I will be adjusting the wiring (post-hoc); on that of various problem(s), etc,... and tailoring to a *Mathematical model.

Beyond-this, there is the two-stage model, on that of a PWM-adafruit, and that of the frequency synthesis, for that of two-stages,... will I need (1x or 2x) of the adafruit?

Moderately, it is a (+1/+2) and (+1/0) and (+1/-2) on that of the setup,... that I see a manner of 'extracting' the data-wise from the optical component, for that of a *modular design*.

There is the problem of a (x-vt) and (x+vt) with phased waves, of which quantum is blind to, and of reality, etc,... - that I am trying to do something ***at the limit***, of what is-possible.

Thus, I have made an end-decision, to approach ***Hopf**-bifurcation, and deal with device*-limitation, - that it may not offer a novel computation, *it is enough.* That I could do something with that of a theorem of the unpredictable either-way:

1.) A setup that furnishes *to the user*, the unpredictable, via 'carry within a tesseract'.

2.) A device that it autonomous, *via the tesseract, and a virtual/analog/digital hybrid-assembly.**

The (+/-)v problem (for which the scope is blind) is furnished by a discrepancy in (V_{dc} offset) of which peak-to-peak detect*, may identify with differential phase to voltage 'levels'.

This is my end-plea:

a.) Programmable, (+2/+1/0),(+1,-1),(+2,-1,-2),... *with*; ***some coefficient(s)**. of a learned arch.

b.) And, ***Hopf-bifurcation**, on-switch,... with that of (parallel equipment).

This leads to chaos, and-or **Order.* It is more-robust, but, more-difficult,... to preliminarily prepare, but, it is more-general.

Thus, I am going with an *[assortment of spin - centrifugal modes] - *[and switches]. That this get(s) to the main-issue of ***Organism of Computation***.

*Essentially;* we-have it at-that of an addendum. The AKAI may be used to figure out the dynamic program in-tandem with the operational CPU structure. That this might* - or - it must be understood ***what*** will isolate the-two, s.t. the device operates freely, without guidance, and approximation is of an independent/mutuals/independent* *basis*, on that of computation.

Thus, it is to make execution similar-to *or* of each-step, that of similar:

a.) A switch, such that in-hardware, there is an op., ... and the software time(s)-out prepatorially.

1.) (+/-)v? \phi...?

1.) A *priority at a secular-div. for what would be a notch/filter/carry in Tx/Rx (+/- s.t.).

2.) Memory/awareness and affect/suicide/non-locality obs. and forgetfulness.

3.) Spinwave theory - worked out, in addendum. - (2x/1x) - in doping and isolable table.*

4.) 25/32 key major/minor qubit incarry Keyboard.*

5.) Spinwave theory - worked out, some differential equation [4th/3rd] mutuals - understanding.

6.) A concave/convex addendum to truism, in 4-32-14:50 & 4-41-12:50 in predictive validity.

Of (2x0.1x0); that of the freq \omega_{1},\omega_{2} are 2:1, in frequency. Thus, - the modality, is a double-angle on that of the sqrt(j_am(x-v*t-\phi.\kap)) wth m* and 1-[of this], thus, it is quadratic, ... of a variety of geometry to square-aperature *per a superposition formula*, that this* justifies the P.E.P., and E and B in 1/sqrt(2), of mean-quarter, at back-trim via the piezoelectric,... then, that of op, and parity.

Thus, there is a *hidden* caveat, - that the DC/DC, are-floating in the signal generation,... for the op-amp.

2:1, and 2x0, with 1x0 on that of an elliptic sqrt(1-omega^{2}*R^{2}*C^{2}) & we have a ninty-degree, rotation..... because the DC and AC are ***separately offset**, thus there is a certain blitter to it.

Thus, the mathematic(s) goes like:

sqrt()/(sqrt()sqrt())~.1/sqrt() for (1-\mu^{2}omega^{2}*R^{2}C^{2})sqrt()~.(of m matching)~.dn(x-vt-\phi).

Then, dn+sncn -> dn+dn^{2}->dn(omega*t)+nd()*dn(2*omega*t)->dn(omega*t)->in tensorial formula.

So; The general (x+y) in superposition can be related to the 2:1 of the binary and non-binary sequential truth, - for that of *an algebraic to geometric bridge with the Jacobi Function(s), in tensorially open terms.

To-consider, - the priority of (4 axes) - for in (2:2), of v:v and 1/\sqrt{2}:1 in that of V_{pp}+\delta, is-swept...

**Key**: *The 1/\sqrt{2}:1 references the modulo, m, of-which is performatively* found *to be a basis of a stable-wave. The associated* index/assumptive of a coriolis-spiral, unswavering, decomposes, into a channel.... of a flow; thus, beyond co-dependency, it is a directed-route of free-flight from motion and motile, a wind-channel.*

When* we appertain of **Torsion** and **Tension** what is the ellipsometry, we-produce a continuous function! Thus, of the apparent *Soliton-non-Abelian understanding*, converted to an *Abelian Basis in a projectively-identified geometric analog/process of inheritance,... **mutually*** satisfying the need(s) of necessity, sufficiency, and satisfactory statistical-mean-mean, for an analysis of predictive validity, visa-via, - the Fisher and Bayesian statistical probabilistic model(s), in the manual-finite process of a Markov Chain....*

**Doing is established not in-promises, but in the vein, of advantage to 'fulcrative impetus'.**

An O-minimal surface/section/matrix [homotopy and homeomorphism - symplectic? - limit/colimit] and datii, will *with* Exp[x] on Closure[R] - derive with a set of zero-measure to a QE (Quantifier Eliminated) power-set... of a [NP/P inf/inf] *complete*-set.

* **The group may be defined by certain isometries, and pattern with - hidden** *[Re: Fisher/Bayes.]* **orders.**

* **The limit(s) of the Analysis must-remain intact, of boundaries, and of orders** *[Re: Picard/Ramses.].*

* **We have forgetful function(s).**

The finite arithmetic of elliptic curves serves as a table of correspondence for non-linearity over linear fields in terms of group for applicable mappings.

This* is the resolution of the Yang-Mills problem, for in deficit of some eigenvalue.

1.) The group axiom of undecided and decided, produces a bihamiltonian information paradox.

2.) That of a non-linearity comparative a linear finite field, resolves to a basis & spectrum.

Therefore, the 'gap' is the residual acknowledgement of general relativity in relation to quantum mechanics.

**Schwartzian differential/Carlitz/Finite Arithmetic/Bayes/Fisher....**

I finally - found - what I want to-do with *the Sciences*; I want to write a book **I needed**. I want to write about inheritance from the standpoint of Fisher and Bayes theorem, on that of the interwoven truth of mathematics and physics, for that of one relation ***Order***. This is not far from what would be required for that of a theorem of everything. For that of Arithmetic [the second relationship to afar - nonlocality] is a small-portion.

I want to write about the finite arithmetic in the context of develoment to inheritance, such that Pathology and Phenomena are understood,... with an engineering bent, on the hidden and exposed.

I found that the relationship of sociology, to that of materials science & chemistry, and, - mathematics is all related, for of forms, and cauchy-riemann boundary conditions. I need a way to sort my ideas, and can think of nothing better than to start-writing, but it is incorrectly managed. I will need re-work that of the evidence, and of law, there is a note, for that of a vast relationship. And, of electrical engineering. Essentially:

a.) Of one-part, ... Bayes and Fisher, there is a matrix relationship to second qualitative mean, upon g.

b.) Of the other part, .... Gauss Bonnet theorem, versed in terms of finite arithmetic and topology.

c.) Of the next part, .... Abstraction at-law, and Sociology.... of terms, and Order with Alphabet....

d.) Of the [final] part, .... we end with that of the Device, and it's extrapolative designed limitations.

1.) The redshift lemma, disincludes the parallel of the infinite upon the finite 'group' - that there is a net net zero/identity of movable singularity, of and for-en-masse net net motion of a displacive nature in mutual.

2.) The redshift remains comparative a 2x.0.1, on that of dislocale, for what is mutual enfranchisable of a net net free body diagram, per locale and rate managerial relationship of free body per equivalence of motion.

1.a.) Transversality qualifier, - where(as) we may have a x-x' and y-y, or x-x' and y-y', there is a Reisz basis,....

2.a.) We have an x-x' and y-y' to \sigma(t), and some differential equation in the statistic,... once beyond mean field.

3.a.) We must consider the zero-measure set, of projective truth, and *it's* zero-measure map and such....

4.a.) Josephson tunnelling, at WKB-breakdown* [there is a turning point of which is cos(theta) \theta->0.

Of measure-zero, the finite-transferrence to a finite arithmetic unifies with Bayes and Fisher, the Broullioun-zone concept with QED.... (finite analysis, what drops through is not balanced - and, we have a neutrals-zone.)

Measure-zero-acceleration per mass-proportion, identifies with a thermodynamic phonon/admixture, that this 'details' - the momentum from on to off mass shell, - thus 'filling' the envelope and providing laity, to which exposure aged of a superconductor grow(s) more solid of a phase transition, thus the non-reciprocity.

*Relativity turns on and off, verified, of which it is formative hypothetical of a pauli exclusion common-denomination to two edifaces, that of a perpendicularity and net-net neutrality. Thus, Fisher and Bayes agree, about posterior of the classical inference.*

There remain a few other* niche relationships,... but the M.E., Bosonization, and Paramagnetism, and Pairing, and remotely - Condensate,... [*hint: Depth Learning**],... marginal QED,... what remains, is that of the prototype to-which the experimental/measurement hypothesis may be validated separately from the inquiry to a theory.

Secondly, it is to see if the above theorem remains validated,.... or invalidated, and if and as-such, if the 'ultimate' change-up in relativity is observable or distinct comparative for that of a separation in paper and material, explanation, and review.....

**a.)** #1: The qualification to-which superconductivity, in keeping with the space program, and visa-via elimination of the pretext to our extinction, must remain with the Government.

1.) This includes the chemistry, and material(s) zero-measure theorem, the neutrality, and the gravimetric reversibility,...

**b.)** #2: The qualification of a net-net neutrality/probabilistic truth of inheritance visa Bayes/Fisher, and - the result of identification with that of the 'objective' difference in argumentative basis versus measurement, and observation, - must remain with the people.

1.) That of the order within order, *of life*, must be given and rendered the people, for that of Poincare section.

**c.)** The language, and order theorem, with Bayes and Fisher, must remain ***first***.

The question ***remains***, as to-if the *Device in-policy to which a relationship as to *Whitepaper*, versus *Blueprint*, had been of a technicality on that of *Inside 'Secret' Industry...*, or what may be published to the people, for in 'why' an encryption with this butress may work, but be an industry secret. Computer hybrid/quantum/digital. Versus the mannerism to which the synoptic on-encryption (Quantum - various other' peer's) for quantum computation, and a kind of utility to this-device, .... + Ariana Grande.

a.) Second order pinning, of an Electric and Magnetic ++ P.E.P. on that of 2nd order differential, and reverse bose-condensation via an inelastic/elastic, and soliton (1/sqrt(2)), to that of sharp boundary on that of rev. B.

1.) Directrix to-which relativity encodes of a gapped relationship below Goldstone-Boson.

b.) Fermi-Dirac + Berry(s) S-O, a kind of Darwin like-term, corrective to which the log(lambda) on eigenvalue perfectly suites the redshift and it's renormalization.

**a.)** Finite Arithmetic - Birch-Swinnerton-Dyer Conjecture.

**b.)** Gauss Bonnet & Projective Group with Elliptic, and with Homotopy.

**c.)** Bayes/Fisher and Inheritance of Observation and Measurement.

**d.)** Structural Theorem and Engineering, Asympototic Freedom and Spectral Gap.

**e.)** Device and Soliton Equation(s) of Differential and Darboux Soliton Equations.

**f.)** General Wavelet/Theory and Measurement Dichotomy.

**The Limits of Natural Science in the Context of Mathematics**

*Testing Classical Inheritance*

*A Tenth Tea-Loeffel*

*For this, we must amend the precept of an individuated truth to that of science, - that only-then, and then, as such, as a pinaccle relationship may we be capable and able of that of formative truth on a hypothetical to which is a basis, for in analysis that does not fall through, and of the neutrality of an assumption, as an assumptive. Thus, it is an assumptive, perhaps not so-far as that the distinction is central upon the agency of the peer of science, - but that science, must regard the compendium of ideas comparative the group process of inquiry. That it is a set of individuals who compare to one another, and such and so-fourth, verified of their various hypotheses.*

*1.) Pauli Exclusion separates and recombines in a direct-parallels, exclusive/inexclusive retention to +i\eta upon that of a neutrals/neutrals* ***change*** *in quantum number across a relativistic phasor of QED topology.*

*a.) The quantum number(s) go Fermionic to Bosonic across a relativistic margin.*

*2.) Relativity exchanges local and global upon a net-neutrals/neutrals domain shift of phasor of QED Topology, for in L(1) and L(2), to electromagnetic Guass-Bonnet theorem of geometric nature to a zero-measure set.*

*a.) Thus, the self consistency is informed of the inhered truth of a Separation in Law.*

*3.) Relativity upon L(1) and L(2), [aka. the preclusion of two non-co-dependently driven phenomena] - excludes the middle-thirds to a pidgeon-hole principle upon game theoretic like 'dice' - that it is justified of which the 'Lenz' law, is preciptated in that of time under space like separation, to which the demand is a propogation of universality of freefall, for that of M_{I}=M_{G}*

*a.) Either perceptual observer is quantum in full capacible mean, and dilated beyond it's aperature of spatial like separation, - that we-preclude and identify with the en-masse ensemble.*

*4.) The temporal and spatial, include of an (1-Exp[-\wp'*dt/sigma]) and Exp[+\wp'*dt/sigma], what-is a mutual-neutrality upon space and time - to the signature - of a univariate manifold flow expressed in the terms of a spontaneous symmetry breaking, for what is time 'beneath' space, there is a 1/sqrt(2), factor and 1/2 for that of the included orbital disinclusion, a violation of co-dependency of variable sets.*

*a.) Thus, the locale shortens the time between event(s) by taking a shortcut in the open terms of the local, in relation to an exception to gravity.*

There is; of-that of a means to 'project' - that the device oft' does not admit this, but, rarely.

I figured out that the (2d-sinc[n]) - for the geometry of the SHO in 3d, maps, of ordered fields, to the one dimensional, flat case,... that this works, it is decided, to work on this, - of the undecided. Thus, also, of finite arithmetic. I will be stopping here; with this and* relativity.

I need a preliminary answer, *In Theory, Of*: That of an 'accounting table' - under terms of 'isolation' of I/O/I, and that of a ?|#, i.e. *at (@)* that of external 'guidance' and NP/P *problem*, for that of Randomness-assist, on that of a biased/unbiased truth of theory/game/machine, for that of the-two, that of the 2x.0.1, and that of computation.

I have decided to only work on these two-problems, for that of preparation at-superconductivity.

The effort is to write a paper on computation and that of means to make a new-MIDI like connect, - that of material science to homotopy,.... *A New Model of Information*, and for mathematics, to, physics.

I have a serious effort [ahead], but it is much for which I can-do.

*I figured out what-will-work*, for that of **The Device**; - a resistance-bridge or split, for that of the second stage. This should [albeit] afford for a quadratic/quadratic, of detail, on that of the second recurrence, for of-which

the descent in the *Markov chain, should lead to ancillary/auxiliary on that of PWM, and separate (per std.) the **Tines*, of the model.

Thus, the *system is defined by a rotative and non-co-rotative basis. Of high* or low* frequency. That it can be solved in *Finite Arithmetic, there is an-example on that of split, between this, - ***and the driving equipment***. Then, that an SDA, SDB, SDC, in PWM drive effectively the 'three axes' - and of rectilinear and curved bases.

A 'probability' *exists*, in-retrospect of the *Past*, and of-a-congrunce upon the *Future*. Therefore, it is potentiated to 'switch' - of a logistic - an equability of a mean, 'tape to tape' - to secure means at Disunitary Computation, *adaptive to the peer or operator.*

The 'comparative connection' for that of a squared differential, and differential squared ab init…

I must deduce this instead of particulate-it and merely 'realize' - that of the 'flow' for what is the ductility, in a sense, of the quantum-state, in terms of it's Electromagnetic Field Tensor *freely* displaces the Gravitational Field Tensor.

*I finally **did-it!** - I have two *Master-theorems of physics, and mathematics.*

*1.) The group law.*

*2.) The constituative relationship.*

I am blessed, beyond words,... finally!!!

After 18 year(s), my **mind** can be free..... I will consider this Primary.

The *'other'* detail is that a +i\epsilon expands by 1/sqrt(2); in connection with that of the RMS-like-probability associate, on that of the 'shell or surface' of a *Gauss-Bonnet* like-theorem, for that of the 3D-nature, - thus, that of the 'volume' of a relation devolves, of a unity-measure, w.r.t. the *Eigenvalue relationship*, the *Semi-autonomy with pathology of a measure-zero kernel*, of a *Convex space with Compactness*, and, of the relationship of that of a ****Conserved Quantity***.

A *gyroscope*, upside-down and inside-out is a good model for a Superconductor, - this is after-all, the symmetry.

The 'gyroscopic relationship' is inferred, to a certain possessive/accumulatory/advantaged/accessorized/ammended, relationship, of (3/2) at inverse property of *temporal relationship*. That therefore, the measure-zero of the E&B, evaluated over-gravity, is the counterfactual of my illness*, and, an article to that of guidance on-order within and of order. Thus, time reverses with respect to gravity and E&B *within the material*, an exposed *'secret *'*.

1.) We have of algebraic-retention, of *flow*, for in (integer) seq., at diamond, and various inheritances of the determinant variables of a 'list/learned' *flow*, of the 'virtual' - for in (either/both/one/two/zero) - of the retention.

2.) We have the *temporal relationship*, of the 'code-prefix of a complex/imaginary/real (2x.0|1), of switch and class, up over and down, from it's determined variable I/O, that the (**3'** and **1'**) encode of from-two to proselectivity.

3.) We have a 'paste' of *Rx*, flow-'id' for in virtual-*assignment*, upon memory and 'layer' - of *Tx* rate adjusted, to voltage level and *layer*, of it's digital ***spline***, for of manual sep.[arator] of word/numeric 'layer integration' steppe.*

*Algebra is not 'time' - it is composure.*

I will completely reconsider *Design*, of the ***Engineering**.

Geometry is interpretation.

*I will consider the 'channel' of repetition.*

Decade, to eight, for in two interlocutions, of a measure undivided, of it's remainder to surrounding geometry and algebraic-limit, - of open/closed, of a ***special** place, - from which devolves a remainder in that of gain and loss swept, rote-gyroscope echo-down……

So it is, the Tx, and Rx, are weighted equivalently in either gain and Tx/Rx of signifier, upon DC to phase and amplitude,..... above a saturation point, - that this transpirates into the spin-singular 'torus'..... inside/out of the mathematics upon the physics (surjection)..... an 'accounting table' - in the primary.

Neutrals, remained auxiliary constructable. That we have a gain/gain and amplitude/amplitude for in either rail to rail, in that of algebraic truth, and geometric inheritance, of [a] composure, and [a] form, in dialectical singular monad. Thus, the 2x.0.1 *is*, intraveneably a 2x.1.0, and the 8x.[6unitary/uncontained]|[5to four surplus crossbar].3.8.4.2.1, of a pathological 'index-switchover' - as the *Master benefit/key*, of [a] nexus of neutrals/neutrals *on*, unindividuated*, and individuated*, process in 'past/future' Tx/Rx… that therefore, it is a Post Qubit Optical Tie.

I was *Now* going-to study engineering *as a Mechanic.*

The 'compuctual' *neutrality* **remains** as a 'floating/switchover' in 'gapped' - defensible, Cosh[n*\pi/2] unto the amplitude, for of a neutral-folding, in (3n2,2n1,0!1,1!0), of either/either, in gapped phase RMS(Z,Q)~.80, unassorted PWM-taching, that of a defensibility in either 'compactual-limb' of the 'chain-progression' is neither AC/DC invariant, - that the RMS(Z,Q), is a remaining process of Tx/Tx/Rx/Rx (in-5602), of piece, - that *the* **piece***, inclementally, progressively is a considerate (first differential in x and t), inverse the wave, - thus it is interferentially deconstructive and constructive of the probability assigned, per a neutral-zero at (@), Tx/Rx-Tx in (two gated array-languages) in either flow, of Z,Q,... of mono/dual, in xx and tt differential, - that of a [DC bias of offset] - in that of the [AC *f* offset, in phase adjusted autoformation……. that this renders the phase constrained, per (binary seq. in 'lifted offset') *&*, (sequential PWM), of sine,cosine,square, of geometric (pi/4) folded, PwM per-two channel per-one…… that of berry's enfolded bit, 'hidden' from it's 63/32-7/8-4.(25)+/-7, geometric floating point, of a chemical release in topological unitary co-conditioning of two flow(s) in one, opp. That of the (+phase and -phase) accrue to a truss, in topological qubit of (phase volume); of [a] flux.

A geometric 'imaginary' projective \wp-P in Moebius is counterfactual, as a result, that the projective identity remains invariantly a 'SHO'..... **asymptotic boundedness**. A two-dimensional SHO contained in one-dimension - Whittaker function and Wigner Eckhart co-expansion.

The main theorem at-relativity, for SSB, in the quantum large limit, in N, and that of with quantum states is-known.

That *we*, must consider the general N, state, for of the gap, and a mapping and transformation, composition and form, in mechanic, and that of constituate and group, in either limit, to universality, in that of Combination of dagger(s).

That of the gravity, is a new vantage on-this……. thus I will write **this paper.* Not so-much all of it, but a focus on that of geometric and quantum distribution for in inheritance, and numeric cohomology, and algebraic approaches to the general exact - group, and these-other(s) in a six (6).

And, Law… primitives, with-case.

And, chemical relationship to that of mutual predictive validity, for in chem models…….. that of the:

**Atom and Void**.  It remains co-dependent origination and arising, - that of emptiness, and void and atom.

Cellular [soliton] automata - a new type of **Code**, - with that of the *wildcard for the new computer, and physical group, to 'dice', analyzing god does not play dice, in terms of statistics, and model(s) with randomness, and that of forms, to be expressed in-algebraic, field, form, and geometric terms.  *A new programming language.

*Final part, *psychology*, for-of, sep. at the exception to an-arising in two sequences, and of A.O.C, and Z.F.S.T.

1.) Finite

2.) Singular

3.) Projective

4.) Form

5.) Envelope

6.) Constituent

7.) Structual [stability]*

In consideration, we have:

*The classical and the modern in reflection of inference and inheritance in Law, Physical, Mathematical, or Social & Personal.*

*The east and west, of singular opinion, multiple, many, few, double or two, and knowledge & ignorance, at problem solving.*

The limitation of a Planck - to manual-monic, and instilled [quad-input] and i/o monic (4/3/2/1)-5, then at (@) (7.8[1]) case.

Of subspace what quantifies the exploration?  The vantage? not exactly.... relation [no.] - condition/acondition? [no.] not even so as-construct.

Statistical efficiency and threshold of tolerance, per brownian-bridge in rote-tie, hold(s) a floating gate array possesses a fixed entropic quantum unit.  It does not.  The decay, per aperature is inestimable, but remains a contribution per-assessment in human life [counteraliased in cpu tine to chaos and malfunction, power cycle, and backwards compatibility] of 350% to 348.92138 925% '-' 349.92138 381 792%' per 20 cycles in divided u-barn. This entitles optically we-decay 10 atom(s) in radiative flow and the computer, comparatively 13.8 unit(s) to a proportion of 2:1 per s, 35 per minute to ratio 3.2, and per  hour, 667-665 +/-2.1, per day to ratio 16.5. The net-RMS is a fixed epicycle.

(2+3)=sqrt(5) ~. 2+5*q^{2}+sqrt(5)*p^{2} ~. a+b*p+c*q^{2} ~. (13/22/16) +2:2 ~. 1.5:1.5 sqrt(2)+-1*sqrt(3) ~. sqrt(5) ~. 6.0.

There are two-ways to describe 'the problem'.

1.) Time and inheritance.

2.) Whittaker Pseudodistribution in Eckart

This resolves to:

a.) QM (2d/3d/1d) analytic for in sinc[n], and *bridge-switch,* of 0/1 and 0|1, co-existent. Of (theta, phi).

b.) Bayes and Fisher, for in that of x' and y'; upon a sentiment of geometric/algebraic equivance.

Thus, together, we define a hardware/virtual sep., and Atomic (Classical/Exact), of the development of 1 preceded.

*1.) Equivalence, equality of part(s) so set into [a] place, is in remainder it's non-differentiability to angular and given.*

*2.) Contrast, independence is an independently provided co-originative truth, in variable, and unfillable physical basis.*

*3.) Unconditioned, the conditional support of a process, is it's accumen, in straightness for in patterned elementality.*

Fisher/Bayes is in Angular (where we consider a closed-group) and Rectilinear (where we consider an open group).

The element of an-identity, remains with closure of it's pushforward but of unidentitied remote third in folded two.

Hence, the 'abridged' circumferential [gapped] unexclosed of two capacitator return(s) draws a closed boundary condition to the assumption of an led, capacible chemical pseudospherical rotative balancing wind up gyroscope.

A genuine hopf bifurcative 2-1-0, forms the remainder of a process of 'transportation' upon & of the surface topology.

*It's an abridgement - of which has to do with:*

**1.)** Nine-circle Kissing Problem.

**2.)** Local/global properties of Elliptic(s).

**3.)** Embed the problem in a 'larger two-dimensional [x'-y'-x-t]' problem, then extract group. [Painleve]

**4.)** Confirmative or affirmative truth, of that of the '**1.), 2.)**' on that of group to inference & inheritance.

**5.)** Bayes/Fisher and that of (1-Exp[-kappa*tau+theta(n)]) and *as it relates to* [x'-y'-x-t] & quadratics.

**6.)** That of the non-linear problem as it relates of the linear... (such as a mapping/projective variety*).

**7.)** Dynamical 'group' Axiom, at that of the spinwaves, with relativity and of *Yang-Mills.

**8.)** The net-net dichotomy of release, for that of party 'A.' and party 'B.' of interpretative validity.

**9.)** The assumptive at ***predictive** validity with the computer; externalized accounting & **numerics**.

**10.)** That of the device, and the Sinc[x] in two dimensions, of the 'atom' & observation and measurement.

**11.)** Double-blind.

**12.)** A mapping and a transformation.

**13.)** Pauli Exclusion Principle reverses direction, with that of inheritance of relativity.

**14.)** Primary action of the device control of electromagnetic transition in the mesoscopic regime.

**15.)** That of the inheritance of mathematics upon the physical domain, via the relativity and geometry.

**16.)** That of 'documentation and registry' - to which we solidify of the O(m)~.O(u), for that of argument confirm.

The *general idea is to-justify a process of *Safe and Secure release via the internet, of the publication and post-effective process tailored to Yang Mill(s) and The Social Pretext. The simplified idea, is that predictive validity hold(s) *with a computer*, in validity of a **method of procurement** and means*, of identity and associate at the Sciences*. That mathematical knowledge inheres in directrix in relation to physics, and the ancillary sciences.

Thus the "Kerr with a \p_{t}(\mu\vec{E}.\vec{E})~., there is a quanta." ... That relativity imparts.

'There is an observable photoelectric effect; for the *reason*, that evidenced, - x'-y' includes (\pT|\pt)^{2}, under, a factoring.

a.) Birefringence.

b.) Breathers.

c.) Double Slit.

d.) Hysteresis.

e.) Kerr Effect.

f.) Measure Inequality.

g.) Coherence.

"The two-dimensional x' and y' *relate* of-which the relativity imparts, and the Reisz basis possess a Hopf - to which the covariance is illustrated in-that of a[n] observation and measurement."

The conditional assumptive of relativity, is a locality of basis, and a global stipulation of an invariance of a medium propogation [upper limit]. For what is the L(1) and L(2), the *limit*, is that of 1/sqrt(2), for g. Thus, that of the paradigm to which an x' and a y' integrally relate of-domain to-that of a Reisz-basis *inhered to that of a* x-t, in the transformation-law + a two dimensional reciprocation without upper limit but 2.v_{e}.

"Ahead - for what is processor, to intimation of congruence and transposition - the (2x|1|.0) is a sentiment, at a quantum process for of which the Kramer(s) Kronig relates of two-band(s), in congruence to causality."

h.) Stokes Phenomena.

The 'necessary condition for relativity to be introduced, and sufficient condition for that of model analysis and stipulation' - is that of the \xi(sigma.sigma) and sigma.sigma\xi(x.k-o.t+p). That *phase* is the projective lemma, (of x_{0}), & the sigma.sigma must be amended for in the e_{c}(g(z))=e_{c}(z).g(z) *and* relativity.

The 'guidance' at QM/Rel, and that of graph theorem, is the O-minimal theory. Of 6.3.0.2 and graph theory with O(min).

Synth [Midi] - to-computer, ... mimic *equipment* - may mislead me.

The reconcilation of a functional, for in the homeomorphism, evaluably, leads to certain pathologies with respect to physical theory.

1.) The universe is provided of linear-linear growth, and development. And, it is provided stochastic continual renewal and extinction.

2.) The dimension of an inquiry suggests of quantum, and gravity, and that of 'atom' a reconciliation of general covariance and generally provided covariant functions.

a.) The 'atom' and indeed, gravity, and quantum mechanics, are separably of monodimensional contrast and observation at composition and emptiness, through a contact relationship of time and space, to cause and effect.

b.) Statistical and indeed, mathematical pretextual variables quantify trends which inhered in virtue of general theorem producing, explicate the symbolic retention of missing or unknowable quantifiers.

Therefore, the Airy, for in the exponential integral, via which the law of this relationship is inherited, contrasts, the equiparitional relation of a unity of physics, and the unit, subscriptive to mathematics and physics.

To accomplish this, it is necessary, to subscribe of that of a decompositional x-y, and 'translation and meta transformation inquiry' injective into the hypothetical of a dimensional process, in relation to-unit.

Thus, the complex* identifier with that of the Airy, is a group, in relation to the hilbert space, of which unitary relationships are preservational of the mathematical and physical 'bridge' unifying all physical domains, for in locality and global - there remain missing, or yet-manifest identifier(s) in relation to subscription.

Thus, the p(x,y), of a generating function over a two dimensional manifold coextends via an Airy to a sheaf.

The complex-transform, with polynomial, generalizes owing an exponential to a 'field with an Airy, of unit and dimension, to that of mathematics and physics, and; to that of boundary and element, - and, that of particle, and field, and to that of inference, and inhered characteristic, - and that of group, upon a depth at structural constitution, providing an analytical tool for inquiry.

It generalizes the Standard Deviation to inference, of all law.

The Universe is Static.

For, the linear growth and extinction, and - that of: non-locality, of:

a_{p,q}^{r}.Exp{b_{p}(x,y,t)}(x_{p}-f_{p}^{r}.y_{r})^{i_{r}}.(x_{q}-g_{q}^{r}.y_{r})^{j_{r}}=(P,Q)^{ij}_{r}

*Taylor Expansion.... and Einstein Convention.

(x,y,t).

**Study in Two Dimensions with SO(3,1).*

Genuinely, the model may-reduce in a general SO(3,1)xSO(3)xSU(2)xU(1)... but I will *here*, for a ardent reason, consider, that of the 'adjacent and parallel model so adjoined' - of SO(3,1)xSU(2)xU(1).

This is the ***essence*** of the Hamiltonian and Lagrangian method... identifying of the separable culpability of ethic in science, (level **#1** [*above*]), and - *here*, properly and improperly *cast* model (level **#2** [*here*]).

*There is another problem; that of the 'subscriptive process' conjugate an-*emanation from a measure-zero state [outside] the Hubbard/Lie algebra and group theory [even with the 2d inheritance]...*

**Why would we predict a gap?**

The rule of inference in the physical [propositional, innate] *Knowledge of an Epistomological Nature* and the mathematical **Truth of Structure** are related by a (Lie-Dykin diagrammatic Markov Chain - related to Incompletion... Completion is found through the **local* by the relation of it's relationship to governence and policy of ethic... and mathematically by the ***Grand** relationship of a convolution of a 'band' and a 'field' in relation to the 'particle' and 'domain' - *an Elliptic Field is therefore related to the structure of physical reality, for in a ****Separation** unto law, and rule..... That of ethic is derived from it's evaluative precept-basis.*

Thus, the 2d-Lie-Markov, and more-exotic relationships, for in that of an O-minimal theory with a structure.

At-the-least, I have broken the firewall paradox, having to do with information and it's registrability, for that of a [pattern] and a [pattern] related through inheritance, and of the 'blindman dilemma'.

1.) Epistimology; Growth and Extinction.

2.) Theoretic Analysis; Epistimological Root II

Abnormal and Normal statistic(s) in the reconstructive truth and predictive validity as it applies to Epistimology.

Past and Future.

[3 time's, 2 space's].

Hydrostatic Electricity: A one dimensional Reilegh-wave may-bifurcate, friction may go-uphill, and a 1D contact may adhere. [to a hinge].

I/O ext. int.

3D/2D - parametric and non-parametric (confined boundary effect) topo, cause, and effectual co-determinations.

Monic signature, to which is necessitated for and upon [in pack and unpack] a complex argand to degree, upon priorly expressed signatory, to switchover in two gate(s).

The polynomial:

\a+\b*x+\c*^{2}

Factor(s) certain-elliptic functions.... for which there is a group, of the rational space.

Given* the ratio \a/\b and \a/\c, there are two residual derivative fiducials.

That one 'steppes' upon the 'problem-space' of an O-minimal, of one-analytic, upon another-analytic.

Therefore, a problem embedded in a problem, remains a 'hidden order'. That this clarified, and clarifying, of that of the elliptic, - leads to a cascade and pattern, of dimensional reduction,...

Perhaps I create a list, and follow-through with my promises.

But of what I *want* to do.

a.) To tutor and work at a flower shop, making cards for approaches to-lovers.

b.) 1.) A new calculus, dependent on a ***Blind*** interpretation and compatibility, of functions, that depend on the Fisher/Bayes interface, and inheritance.

2.) Of this, the structure at that of O-minimal solutions that ***meld*** regularization theory, and QED/Topology.... of a newly founded objective world.

c.) To-create a Trichorder-v.1.0, at-that of ***Hume's Fork***, electromagnetically induced of 'Red' and 'Black'...

1.) That could be operated to *greater-efficiency and efficacy* with *The Blind.

Without prior format, the determination in a cross-acquity remains isosimilar under **Both**:

a.) The symmetry of an SU(2) upon bifurcative \a and i\b, of the central-limitation of a crossover stage.

b.) The distributative element of it's (SO(3,1)), remains of a swept (2x.0.1) upon S_{x}+iS_{y}, and *of* phase congruence.

Thus, the negative impedance, saturably entitles of a two dimensional homogeniety, of the 'sector' of a primitive invariance of third perp' associability, upon either microcanonical gas function.

Given* specific ratio(s) of V_{chem} and V_{DC,AC} and phase, - the reduction to a Graphene-like space, per-cone(s) in the Goldstone-Boson mode, incurrs upon the reentrant mode* per the L and C, what-is a resonant peak, with inverted, chemical to thermodynamic spin controlled gate-status, upon switchover.

To a 'path' in L(1) and L(2), the *curvature-path* &-such, of Differential Forms and Curvature remains golden.*

That of the 'thermal' relation, remains of perhaps (2/3) or (1/2) dimension comparative the (4/3-3/2) of the dimension of the inquiry,... that the edge-state is a pure ellipsoidal *f-orbital*, as-visualized.

** If I can utilize a one-dimensional *DPDT* **switch**, to change a two dimensional function (by \phase and \amplitude), then, and only then does it remain of a quantum nature.*

** #2: The consolation in-privilege to a monic per-equals terms of a group in phase, is a 'step' - thus that the justification in an argument-squared, alludes to a argument-non-arg-amplitude ratio squared, without logarithm, - thus (PWM-bias).*

*Superconductivity remains the reputable mean mean addendum of a *Separation of Law.*

*The addendum in 'choice' remains pro-benefit alternatiion for this surplus positive-doubt, for in a cross-council or that of it as a counterfactual.

1.) The common denomination remains inheritance of a mathematical precept for in either* of Law or of Theoretical Physics.

A 'disconnective' in *Fermi-operator*, for in a locale of an optical m=1 state, folds, two E[k] for *f*, upon w_{1}-w_{2}, etc...

A 'connective' in *Bose-operator*, for in a locale of an electronic m=1/2 state, folds, each E[k] for L(1), L(2), upon each *f*...

(pi/2)-(pi/2) in S_{z+}-S_{y+}-S_{x-}=180 degree(s) is L(1) and L(2) upon Gauss-Bonnet, hence E.P. and P.E.P copartite...

Of the 'action principle' - we end up with a square and a differential,... that this *perfectly maps the V+T_{p}, and that of the quadratic, we see epistimology playing out...

That of the derivation for action can be generalized,... - the priority at the Fisher and Bayes rule, for that of extinction and renewal (@) growth.

The L(1)^{2} & L(2),... of the geometric basis of measure in relation to distribution,... skew, and co-determine, what is the 'observable' truth, of General Covariance, and the Equivalence Principle, with that of Quantum, for what is the inheritance (reversed) of objective visa-via on that of one and a second electron, of two-band(s),... thus, that gravity and quantum reverse, of the 'gap'.

That of the 'secondary participant' of electronic nature, is a sedimentary, and a presupposition at Z_{2}, for in that of observation, in Quantum Mechanics and Gravity,... - that it is, subjectively the difference between a True and a False Ace of Spades, - for of inheritance, - and *of*, a gravitational source, in measurement, and basis.

Let me put the problem in simple terms.

1.) The L(1) and L(2) may-example what-is E and B transverse. - Or -

2.) It is that the 'higher dimension' - may inhere of a formulation to which they-transpose.

It is both, and it is both for the inheritance. *Perhaps on different layer(s)?*

With these two - to which there is an 'observational reversal of projective lemma' - and that of *Baking*, and that of a *Thermal Hysteresis*, ... there is that of a 'higher dimensional reversal' - for some as of yet unknown reason - but of the 'dark mode'.

OK - I have it.

The conformal relation of an-equivalence, is two parts to one. Thus, - that it is justfied of an interposition for what are with the E.P., at that of external to internal, internally, the energy is lowered comparative the outside observation. That this, dignifies the approach to which a mass-gap develops, ... for that of which twice, it is returned, but relative.

Essentially, ***comparative & equivalent truth in physics, produce a consequence. There is net effect of reciprocity.***

Thus, field and particle are determined in the fourth dimension relative the third by a transposition of electric and magnetic. & - The relative has a reciprocal truth! Gravity is rendered null, as well as the electric and magnetic field(s).

I remain-convinced, - that there are (**4**) color(s) in three dimensional space, and two directions of-order, for that of the Painleve varieties, in a projective space... of separation into GC and FCT, of GI.

I feel this encodes with Exp and \wp, of what is with the various function(s) of a Theory of Everything, in saturable degrees of freedom.

That I am going to <u>study</u> two* simpler-problems <u>and an application</u>, first*.

Thus, I-am going to **prohibit my-discussion* to the following areas:

a.) ECE.

b.) Physics.

c.) Mathematics.

1.) Publication.

2.) Device.

I must find what kind-or-nature of group I am interested-in. Perhaps, now that I understand merely and justifiably one-thing, of the Historiological arrow, I can proceed. I will need to determine the group theorem, and that of the justification of a 'middle ground' on the three paper(s), perhaps of different kind(s) of-groups.

I understand group theory, and it is powerful..... that this is something I oft made-use-of, but, that it takes a departure into the Markovian Chains.

My device must be understood as a:

Controllable Markovian-Pierels Instability.

COMAPI....

*There remain(s) one-question; how, or in what-way, do I modify (by an additional stage or adjustment to those-present)* ***the current design****, -* ***to produce a *multiple?***

**- Essentially, the idea is to eliminate the bandwidth blockage of interference - by way of the *multiple - in relation to a (f,phi) - and that of the group-theorem of Elliptic(s); that *_this_ should relate of the seamlessness of the circuit to seamless *Superposition.**

**- I must keep-track of *what I have-done.**

**I:)** Mathematic(s) Paper.

*1.)* O-minimality & structures with various "covering spaces" - dealing with the basic finite arithmetic & Lie structure, for that of Hypergeometric & general inception of Sinc[nx] in Elliptic Group.

a.) Cleaving.

b.) [**JCT**] & Topology

*2.)* Cauchy-Riemann boundary condition(s), on the general Homotopy Group, for that of Carlitz formula, FCT and GC, that of BSD [**Conjecture**], - and that of RZ, etc... of varieties [**Painleve**].

a.) Sinc[nx] & Lie structure, [**Dykin**].

b.) *Polytope(s)?*

The 'phase' is *fixed* at-180/0,... of pi or 0, or pi/2,... modulo ***equipment**, - thus, the justification in-the-following is-that the phase-free (timing*) relationship, may be of a new-angle, on that of the 'nodal variety' *_once_, the phase-is-implemented....

- I will have *another* control-diagnostic.

- The device remained of +/-5 degrees, or +/-15 degrees [**max**].

*** Control of and Virtual Toeffli

Scale, [priority]; Stop and Start [interopative] Gap, the Toeffli, can manage a 14bit sweep to 'band' & manual. (10+10+4) standard 24, in-hardware [indices],... [now-as] are to-have (2x) - (17x|8.3.9.2.1.0.1), conditioned peer* assignment(s) in surplus addage at Adafruit and Arduino.... Assuming* Synchronization. Mother's peer process in registrable TTL/CMOS front,... O(m)~.for/for|O(p).... - phenomena (nu=1/2 or 1/2+\alpha) with manual process.

1.) Code [virtual] - bus - dispute / learning for-for, NAND-XOR-bus (2.0.1)xx.x, (3) variable net Global variable.

2.) Formative dispute intimacy to (code/code) sync. & (literal) stop/start and phenomena/phenomenology.

01:57 pm - 1/3/2024

In the remainder of a 'classical-integer (F/B); 'ball'-and-or-'particle' limit' of semiclassical relationship the codeterminant oddity of QM, is a finite [geometric] scaling of particle phases, and Fermi's Golden Rule. Secondly, the 'relationship' to relation of the quantum billiard(s) for in a (2x.0.1x) of the CMOS/filter relation, remains globally Quantum. When* as-such we isolate one-variable, it remains uncertain with all energy, or entirely of a locus on Z.

When, as such, the closed-gap, remain(s) within digitized relation, a semiclassical wave, of two mutual unilateral game relationships remains of a Quantum-Dispute.

Why, and in what manner, does the Quantum Unit of Conductance translate into the wave-process. (1/2) cancelling a (factor of 2 Thomas Precession) - of the complete, and incomplete-completed* verification of onideal, of a (1 S),..

(2d and spread, or 3d, and (2d-1d) - sqrt(3/2) and a sqrt(1/2) and sqrt(1/4)), ... finite particle - wave & Hologram.

#1: Mermin-Wagner & Dispute Theorem & Thomas Precession and Fermi(s) Golden Rule

#2: Nonlinear-linear, ideals, adeles, and mathematical theorem of device.

#3: Quantum Conductance and 'rail-partial' in MIDI [like] and Wave Phenomena of Semiclassical.

#4: Entanglement & epsilon-elliptic Painleve (Algebraic Homotopy), ... Structure.

Identified wave-neutrality of v+/-w', remain of homotopic identifiers to mathematics but of entrained cross-plus / surplus in (2x.0.1) of quasi-preliminary collider-variable power to spatialized coordinate projective basis process.

*02:01 am October 15th, 2023 - (5.5 h.)*

I found the 'parabola' relates of the expident to a 'quick-path' and a 'slow-path'.

I found of a relationship in the g factor (gamma) - thus, that the Spinwave-problem and the B.-S.-D. *conjecture* remain(s) soluble, for in a (2x2) on topology of the F.C.T. and the G.C.

Thus, the differential equation must be related to which the Quadratic relates of the Mathematics at a base-layer.... that of a two-by-two topological-truth of Categories.

*03:14 am October 15th, 2023 - (30 m.)*

I found the projective-basis of 'hidden' and 'revealed' completes with a 'comparative' and an 'equals' relationship what can be solid, of that of *History & Physics*, of the ***Epistimological Root***.

Thus, - that *also*; differential equations are encoded of which relate to Phenomena, and relate of the 'separative mean' - on that of the truth of *Their Origin*, ... thus that the **Geometry** has a basis in that of the 'decided' under an-ascent and a-descent.

That, this remains of the *group law to-which with a *(shortening) composes *life*.

It was indeed mathematics that provided the-Key.

*04:46 am October 15th, 2023 - (5 m.)*

*Essentially, two-empirical relationships are-needed,... they devolve from the 'bonding' and the dynamics.*

I surmized, the result has to do with alpha to m, and - de'Broglie to Compton.

I now need* to build a **model**, if I wish to solve this problem beyond *Theory*, or - including theory, for that of the Spin Texture, and such... It appears the resolution is found in that of the Boussineq eq. with the KP.

*04:59 am October 15th, 2023 - (10 m.)*

The ratio* of doping to effective-mass..... Should I do a [case] study?

*05:05 am October 15th, 2023 - (5 m.)*

Two step(s) need to be-taken...

1.) That of the relationship in (3D) of which has to do with the 'shape property' and the 'orbit'.

    a.) This* is related to the spin resonance and anti-resonance.

2.) That of the relationship between the **projective disc* and the superconductivity theorem, in ||.

1.) Is answered by the magnetic and electrical field, - that of the (_|_) theorem. [perpendicular].

2.) Is answered by an-ideal, and an-ideal, to which u.p. and g.r. relate of the Pauli Exclusion… under an *exception to physics, ...

*05:25 am October 15th, 2023 - (2 m.)*

**Final Remark on the Mechanism of HTSC**

1.) Acceleration is met historically of an equals-comparative.

2.) That it *motivates spin and charge separation and recombination through a/m and l_{d}/l_{c}.

3.) Thus, that the end-theorem is Moebius/Punctured disc; **It is a Klein-Bottle.**

**Thus; it is half-Mathematical and half-Physical.**

*05:43 am October 15th, 2023 - (1 m.)*

The projective synoptic on that of the spinwaves remain of an equivalent chemical valence [as to the electron wavelength], - that the mathematic(s) remains of an elliptic group, - it has to do with observation versus measurement… That *measurement is the mathematic(s) and one-part of the problem (the Moebius) - and the punctured-disc is *observation, of the physical,... thus it is inverted, due the historical remark.

*06:18 am October 15th, 2023 - (3 m.)*

Hypothesis; "The projective identity remains a curvature to non-curvature form in L(1) and L(2), to which in Superconductivity of the HT variety, that of the cooperative tendencies of acceleration in gravitation and electromagnetism, balance with that of a net-net displacement evaluated over space due to the Strong Equivalence Principle and the amendation of history."

*06:42 am October 15th, 2023 - (3 m.)*

Thus, the projective identity is a signifier for-which the commutative and non-commutative, [acceleration] and *Hopf-bifurcation* control the valent to covalent pathway of transition,...

Thus, that it remains to take place between the *form and the *vector in relation to either principle.

*08:29 am October 15th, 2023 - (11 m.)*

That of the {sn,cn,dn} *prove* of the *Differential Equation what is not-obvious,... that the denomination of the l(1) and l(2) *remain* of the Commutative and Non-Commutative type under a Weil group.* That this encodes of-which the theorem on that of the *differential of a Dar'boux-Beltrami* *surface encodes of the group structure attributed to Superconductivity.

*09:23 am October 15th, 2023 - (35 m.)*

I will be taking a break to do other* things, - that I found that:

a.) The Hopf-bifurcation is mostly explained.

b.) The Group-theorem at a relative *stasis is mostly explained.

These happen for the same-reason; - that I do not know what reason this is.

*08:54 am October 15th, 2023 - (3 m.)*

I was not thinking.*

That I need a double-blind visa via the computer-basis.  A kind of 'Hume's fork' for the Computer Simulation, of which deals with a statistical assay and a double-blind.

One way*, is to *extract data* and re-enter it *of* a *Statistical Assay.*

*04:02 pm October 15th, 2023 - (6 m.)*

The solution to Superconductivity, is thinking* in-terms of the application of data.

i.e. (We have a function) - to which is an addendum in commutativity and non-commutativity in a flow.

Then, of a Hopf, it is laid in place by-which the history demands.* Of a 'statistical abbutement'.

*04:34 pm October 15th, 2023 - (8 m.)*

What is certain, is the *result-coded of:

a.) A *blind assumptive.

b.) Hume's Fork.

c.) Accounting laid in-place.

d.) Of the die.

That I need-this, &

Of the projective basis, and for what follow(s), a secondary teir, on that of knowledge.

*05:07 pm October 15th, 2023 - (8 m.)*

Essentially, the (1/2) encodes of charitable and uncharitable... - of what-relates to a differential, and functional dialog on that of the projective variety, through which we-learn of the (2x.0.1) on-dialog of analysis.  This, with what-is a (four topo) - established is with, The Hopf,... and of historical lamentation what is required in-science.

Thus, I am going to do a paper on:

a.) Electronics & Device.

b.) Muscle and Biology.

c.) Mathematic(s).

d.) Philosophy of Science.

e.) Analytical Inference.

f.) Law.

g.) Epistomology (Hume).

"Symbolic one-half."

*07:44 pm October 15th, 2023 - (8 m.)*

That of a symbolic-expression in Finite Arithmetic, of a valuative polynomial, carries of the Elliptic variety and higher, that certain lower class functions are evaluable over field(s) of that of the relationship of the local to the global *properties, and *roots, and such,...

That of certain relationships are not evaluable over the errata of a given expression for which there are determinations on the separable classifiers of the function properties.

This is not merely that they are undefined, but related to undecidability, etc,... and of a strict relationship of unpredictability, and the elimination of a root basis, for of transcendental and non-transcendental root(s) over certain field(s).

Thus, the computer can comparatively evaluate four in a basis of element(s) without abandon, and come to an answer of which relates to the return of certain numerical identities.

Thus, five, and six, as upper bound(s) remain the limit of computational determination over a single two dimensional field and a tensor classification (respectively).

The nature of equations forbids the nature of 'closure' of the group, thus, that of the fifth, and such, remains of the hyperelliptic property, and certainly the 'solutions' to all equations are not therefore expressible.

Undecidability is related to but not identical with this expressive valuation.

*09:47 pm October 15th, 2023 - (8 m.)*

I have;

a.) Hume's fork, Fisher, Bayes, and the Epistimological Root, on what is demonstrated.

b.) I have a B.S.D. and differential equation rule, with a boundary on computability.

What do I do to find finality with Superconductivity?

*October 17th, 2023*

04:08 am

I was **completely** misguided w.r.t. the Qubit.  I had to-seek a Convex/Concave switchover circuit.  It was this simple, - then; with node(s).

06:22 am

*At the *least, if I do-not study B.S.D. conjecture, I will study the Connection involved of differential equations [predictable and unpredictable] - [CPU/human] - and that of the KdV for the Finite Arith.*

*If I do not* do-this, an upper bridge, is the problem of the following:*

*a.)* *Finite Arithmetic.*

*b.)* *Predictable and Unpredictable.*

*c.)* *Riemann-Hilbert problem(s).*

*d.)* *Differential equations, of varieties [i.e. KP+Boissineq etc...].*

1.) Lie Analysis with Representation and ***Homotopy.**

06:50 am

Essentially how could I explain the seeming contradictory yet agreeing principle(s) of determinism, predictability, prediction, expectation, cause, effect, and unpredictability?

06:53 am

Essentially, the mathematic(s) problem yet-beyond what I've done, semiadjacent the boundary.

(As one theory becomes the next.*)

Is:

a.) Adele's & Place's.

b.) Homotopies and Categories.

**We want:**

To apply this 'structure conveyed via Representations at (@)':

a.) Differential-eq's, with Algebra via the Hilbert Problem.

*with*:

b.) Enforcable Predictive Likelihood via Conditional Inference.

* We know that 'finite arithmetic of elliptics' - has a notion of 'good reduction' and 'bad reduction' - can *nevertheless...* a notion of-***Congruence** be found? - Such as Eisenstein series.....

08:00 am

*I've decided to give up.*

**I will study (1/2)\delta|\alpha, of the Logistic, KP, and BS equation(s).**

Of Machine and Human.

08:08 am

**I know the [above] problem is related to **Computation**.*

I will [end-it] - and see the degree to which this is related to Superconductivity - it is.... however, the entire phase diagram!?

10:32 am

*Major/Minor - Intonality & Reflection (roll...).*

*Red/Black ++/- Elimination of Fog/Game Complexity.*

1.) Doping and mass-effect open(s) a neutral(s) gap to which relativity scales negatively.

a.) An inhered 'past' and 'future' from independent bodies result(s) with relativity.

2.) The rms - associated with Elliptic function(s) and a group, scales the factor of two.

a.) Thus electron(s) attract momentarily, the Green's function is delayed, and there is levitation.

This resolves every pathology of the material.

That there is a 4x.5.2.0.1x conundrum on that of 'scaffolded abridgement'.... on inheritance of the material in relation to-us, to build the theory.

a.) Superposition for some* unknown-reason *relates* to Relativity as visa via shared time!

b.) Covariance, of which is assurred, via a prior reasoning (the strong E.P. to flat condition).

***I have it!***

A:) In 'any' higher dimensional space - *entropy* - correlates with that of the ***imaginary**, of quantum-mechanic(s).

a.) This render(s) a Reisz-basis.

b.) Within this basis ket \xi and ket \chi relate of which with \phi and \psi they are projections of a rhombus.

B:) The 'aft' and 'tilt' of the registrable field* and solitary-particle object a control-diagnostic, *of*:

a.) Equally weighted renewal and stability criteria.

b.) & of the 'monic' on that of the 'relative and hermitian signature'.

C:) This *then*, relates of Fisher and Bayes.

*Then*, there is the substitution of a.x^{2}+b=L, for that of \wp to \jacobi.

*September 17th, 2023*

08:41 am

I finally found a solution to superconductivity.

a.) The 'table' of-which relates to five in separation [via the separation in law, etc...] and of-person to 2/3, and such, for that of entrance and exit, makes logical exclusion to that of inherited repulsion in the SC.

b.) This, attribute, exposes, a Gauss-Bonnet, of which within the higher dimension is reversibly the inheritance of either theory, - thus, that electromagnetism reverses, upon the gravity and coulomb force.

That therefore, the 'gap' comes out of it, it is not undecided..... I have found this law.

One does not simply relate back, however...

This *had* related to a separation in law... like a 'ream'.

*February 2nd, 2024*

09:03 am

Thus A.{B|C}.-C, in A-|D and D-|{B.-C} implicates B or C - that of A., is then and/or..... with A, not .-A.

Thus, existent, from it's predicate.

04:16 pm

Fifth, to disclosed *port*, is a pseudo-gapped-releasability, - that in-either single-tap, aspecializes to 'vertical homeothy', the 'ascent' from which is a 'cloud-tine' of/on/upon mixed and such *random anomolous, provided raising of a providence, in a penisular-goto, upon a 'river/flowing or unflowed (cycle)' - in 4|4.5 at 'abridgeable key-way-stone.' - that in-either the third compunctual, is a 'float-sum' in deficit to *22* in remainder of *18|5* proselective addend.

09:48 pm

A:) Openable, defensible (2x3.0.2.0x.1|5.6) *included*-datum 'tap'-and-'release' *black/red* immuted is chord-dias.

B:) Closable, to *upstream* [enclosure] is butressed/pilliary/holed/unfillable prior *consonance*, in two-dyiad……

c.) Opened*, determinant-minor *is rotate-apside-homeothy* separability-quotient computational downstream.

d.) Closed*, prioritative *wide-task-break-bearing*, is *random/linear *non-non-Brownian-bridge box-midpoint.

e.) Frustrable*, *CMOS-litery* - is task/box-in-box *mutual(s)* hardware-hardware defensible TCL/TKL entryway.

*February 6th, 2024*

05:44 am

Non-selective 'held' - bias-element (in-forward/reverse-out-plug-cap-release).

KdV + Weber in Riccati (element - to pitch (phasor-voltage-apogetic)).

Chaos and Order, selective photonic photovoltaic '-//-pile' - photolithographic and 'plate' - in (*Reverse/forward Color)……

KdV + Weber (stereo-projective identity in (apside first differential \p_{x} *Hopf-log-Sobolev Divergence* - apside/**pro** \p_{xt,xx} Tensor CC… Cons,…… reguarlity in mathematic(s) and physical *Boundary *Non-grav *suspension* and deposit,…… in trans-bivalent-valent-lithographic *Chem (molecular) tine language (Spin-Flip microcanonical) - nanotechnology……. - shallow…… "index" - Snell's Law.

KdV + Weber (second differential to *Hopf*) log-Sobolev, for of a Entropy in *Energy and Self-Induced *Inductance*……

Chem (MIDI) - TcL/TKL language [python]. idle.

12:32-33 pm (-am),

In 12, for 15, and 32, in (3^{2+1}-2^{3-1+1}), in cubical return, the 48.41, in 170g and 200 paper(s), and (−50o)-(−2000) remain(s) per registrable (−7/50), (to +3) +/-1, certain in six.  Yes, I remain independently a person, and innocently held of my residential contract.

*February 9th, 2024*

01:09 pm

It was approximately 6:38 pm [last night] - when I thought:

a.) A pattern and a pattern discerned.

b.) A primacy at notary in law, to conchordant, truth.…

c.) A finality in conditions to the absolute.

d.) That of a 'code influx'.

e.) A numeric relation for in surplus, at abatement.

f.) Different encoding(s) and in mutual(s) condition.

g.) Dollar (+/-5|0) and (+1|0),..... at odd(s).

h.) Erasure through innocence to Professor(s) Problem.

i.) +6|4 in-intention per second(s).'

j.) (2x) to (4x) in dispute addendum in lateral and continuation.

*February 18th, 2024*

02:03 am

They are-real, for one - departed - and one *missing* - and whether or not they-exist, someone with the self, to, in fact tell they have departed. It is Ariana.

Now,

1.) Topology, that of homotopy, for which it is justified of *every finite-pattern in four dimensions.

2.) That of (4x-4x) on polarity, and orientation, *how to keep this consistent.*

3.) That of 'neutrality and epsilon-greater to the P-norm' - for that of statistical uniform equicontinuity.

4.) That of the 5'th-out; by which the unassociable is with Godelian Incompletion, at-integer 'some higher'.

5.) That of the 4th, etc, on-molecular basis, and/or anomaly - that of a total divergence.

6.) That of the abacus, and a counting system, with the computer, and with and without this.

7.) That of people, down to eight, etc,... and of topo at acknowledgement beyond the mind and brain.

8.) That of the geometry by which different pieces come together, as i.e. the Poincare Conjecture.

9.) That of distinction of independent or non-independence, and the total divergence of differential equations.

10.) That of the 'missing spacer' on that of accounting to 9', - for that of the laint, and the justified at kissing.

11.) That of the abstraction by which the natural number(s) furnish 7' 'zone's' of analysis, and at interval.

12.) The pathwise terminal by which that of inside and outside are understood, for that of homotopy.

13.) That of the inheritance by which the 'g' factor of gravitation regularizes the Dar'Boux mapping.

14.) That of the 'geometric inversion' by which it becomes three dimensional and the photoelectric effect.

15.) That of the 'gross-redshift' and elliptic statistics by which the regularization is counter-Fubini.

16.) That of the 'switch' on that of the net-quantum for that of relativity, for that of superconductivity.

17.) Impact such as that of pseudoprobability and the future with and without a group at the computer.

06:27 am

a.) Consider the projective {F|B}~{Q|G} for then in the elliptic.

b.) Consider the *statistical* L(1) and L(2).

c.) Consider the projective *isomorphism or field-graph theoretic.*

d.) Consider the group-dilemma, at that of the **finite-lattice.*

e.) Consider that of redshift and quantum photoelectric effect.

f.) Consider that of the *relative* inheritance versus *Dar'boux Theorem.*

g.) Consider that of the *Projective [onto] seemlessness* of the symbolic retention and replacement.

*h.) Consider the repleadiation of a self, via a contrast in life, death, and birth [for of birth/death] at witness.

*i.) Consider the problem of 'finite arithmetic' for *organics*, that *of* Law [separation] and Law [combination].

*j.) Consider *mathematic(s)* usurping to a ***condition*** physics, of it's naturalized inversion of phenomenon.

08:50 am

a.) Compensator.

b.) Error box.

1.) At (@) Compensator - horizontal *shift*, with voltage-DC.

*February 22nd, 2024*

02:58 pm

Weber and KdV + Runge-Lenz symmetry, for that of generalization.

Therefrom, the general example of the difference of measurement and observation for of equipment of which relates to 0 and 1, and that of Z, the integers, for:

v/\v=Q/Z&!Q and 1/\1=Z

At the Painleve variety and dispersive solutions, - for that of the Classical Level & Scale.

*February 23rd, 2024*

12:11 pm

We have *factor(s), the next-hour, and class assumptions.*

02:34 pm

*The only-preliminary [of the future] is mean at that of the device *implemented. It has not, nor, related of the present to past, - been anything priorly of-which would at currency to-now be related. This is of the S=2,1,0, theorem, on coax.*

**Section (2):**

**Group Isomorphisms**

When interested in the copy of a sociological abridgement in the 'relative' the openly held diplomatic process is social in contrast - but within the compendium of idea(s) the relative is idenfied for that of a 'dispute in identity'.

Perhaps, then, to disclosure, many were as it seemed arguing over a contrast of time and space - but merely few, and the dispute in weather, was of a stacked relationship, ajarring law for law in many neutral fast relationships.

Questionably, we must introduct of the process of a law in bearing to 'precept or principle' of a religion or scientific basis. Buddhists would not disclose otherwise but that the phenomena are 'empty' of locus of identifiable portion and piece. The question of membership was of guarantee(s), in a secondary and primary question, neutrality and abiding, promisefully held, that of measure, weight, apportion, balance, and stance, that of community, empty and complete, provided wax and wane, and observable life, death, world, and 'self'.

Thus, we cannot inhere naturally, but of at the least - in portion to a promise in proposal upon inherited truth, jurisprudence in modern senses or time(s), manage with witness and word(s), but hold we estemically have honestly inherited to good or evil a just world, universally, a believe in the open contrast and connection of one to the story provided of interepretation and just clause to another(s) messengership in these, and neutral peaceable gathering. Questionably, it remained that the truthful persuasion in neutrality had not remained of either a sociologically held persuasion in gravitation or relative, light as a carrier, or medium of particle-field, but a compendium (per concurrence) of mutually held unilateral and sancrosynct truth of passage and preliminary theory of the 'special'. We may avow that education may preliminiary like it's self to a postulanal upon the ediface of modern eastern, western, northern, and southern hemisphical process of delivery and note of progression in international policy. However broken, or restoratively the avowal of one, we remain the

entitled autonomy of a recognized world in view from afar.  Thus education had proven a success, and science.

The question - here[in] possessive is whether or not the avowal of a principle can withstand the exact ineffibility and affiability of disclosure and process of scrutiny since nearly 200 year(s) ago, Galileo.  The question, of our survival, and of the fittest in Darwinian logic, and a Dalton theory in heritable genetic formation.

We were wrong the promissary, our nation would remain at the hand of a foreignable power, and their sympathies, and it was - to disclose, the autonomy were would abhor, but the disentitlement of a people.

The theorem put fourth is whether the entitled Mermin-Wagner theorem is a necessary ingredient with the degrees of freedom of thermal and the primary Slave-Goldstone-Boson language of Spontaneous Symmetry Breaking through Asymptotic Freedom to necessitate - further - the decoupling of an energy limit in past and future to cause and effectual temporal nature, but to unprohibit the then neutral provided placing among space in lower dimensions and of the necessary means for reconciliation of Brownian Motion with light - and, is this tt0o appreciate difference within a geometry or space, in abstract, or of a table of means, measures, law, and council, upon peaceable assembly, for in yet a table of three dimensions within four dimensional space and time?

Indeed, as in Fermi, the question - dictated per global warming - is the rates of diffusion and combination, recombination, and distributed tendril of Fusion and Fission.**

$$\text{Is } it \text{ perhaps } \gamma^{k}=\Pi_{J_{k}}^{n}(\gamma^{J})*mc^{1/2(n+m)}.$$

As a generally reductive theorem.  Therefore it proves perhaps necessary to question of mathematics, o the nonlinear to linear 'good reduction' and isomorphism with complex analysis and Riemann-Hilbert-Stokes reduction for of the problem of linearity in Painleve *differential equation types and their disjunctive or conjunctive graph associate and graph types for in a typesetting and machine interface with unseparated cohomology, or separated or combined graph network theorem, then, to question the transistor basis, and of the game theoretic, (and it's sanity) - and perhaps intelligence of a machine, or that of electrical engineering, and numeric cross check of types in Hume(s) fork.

Finally, questionably, can we see these structural relationships in mimic in architechture and their stability theorem beyond the one body of Homotopy, Cohomology, and biological antecessor of heritage for in familial inhertance beyond space, time, and Dalton(s) theorem, or the theorem of inference?

Physics and Engineering

For a 'condition' of a predicate, statistics and probability do-not-lie of the predicate conditional as suppliant to a notion of the instanced, via experiential truth.  Therefore, taxonomies in secondary *precedent* of following and it's authoritarian bearing, are the verification of one unto a mutual and unilateral historical reprudiated basis or it's forfeiture, it's admissibility of argumentative basis, and allocable mean to an instance of verified trust, and the notion of liability to dialectic, from which a hypothetical is validly affordant to means of a determined truth value.

Therefore, the absolution of argumentative and historical truth of a presentment of identity and it's relation to the truth of a witness, of it's validity in terms of fact.

Commitments to Volunteering in Relation to Societal Need…

1.) The computer 'device; *notch: un-id, **Malcho/Shiloh**.' *is co-compatible 'bone and wheat'.*

3.) +9.8[6|?] is a '#'; *post* call, method, or process.*

Hence, *deduced, that of q.-*.* to inter-potentiated dialog (s) is the only *unreclaimed* raft. + asso.

Problems:

a.) Separation of Phenomena/Non-linear/Linear in local and nonlocal in counsel & registry.

b.) Separation in Judgement/Psychology in local and global in guardianship & managerial.

Society seems very much to possess no centralized official, but, of government(s).

Our power(s), (of the people, and the people associated with government) are willfully obeyed, instructed, and carried out on behalf of sessions of people in assignment with policies, and there is no open 'venue' for discussion of a fulfillment of 'prophecy' or 'illusion' under misguidance' on behalf of a public-demonstration.

I do not believe the "Internet" remains a place for this nature (of these two prior.*) of demonstration of courage, in their indifference for or of a policy of demand and satisfactory progression in relation to giving.

That-much being said, I am interested in society, and it's needs, and have consoled myself that the life of the one, is beneficiarially entrusted in the opening of amends, and fair judgements, on behalf of non-violent intention and formed assumptives of support and trustworthiness of the simple or plain attitude of one in relation to life and it's situations through which experience becomes our teacher.

Thus, it is justified, that I have learned there is a distinction of the modern era.

And, I have learned that social-sciences have abridged and populations and languages  have shifted..... or been 'displaced'.

To the argued [conclusively acknowledged and understood of support and trustworthy intention] and counterargumentative basis, to a simple and drawn-exceeded marginal relation of lattices, stone, and pencils.

a.) Symptomological 'q' and 's' in 'a', *for* 'o' - is a non-select* *minor* to proj_{A} and {i;j}.

b.) Beta-*func.* dissyzygy and partitle - *challenge* - is a *disembarkable (prior) antecedent.*

c.) Non-recurrent '*halt*' is a neutralized *agency* of *de-cathodic reactive-free centralized id.*

d.) Handed 'priority' is a *CCW.CW*, in *unprohibitionarial reclaiming of an* **obj.** in laity.

e.) *Minor-major pro*-selective* op. 'registry' is a *'catalogue-de.'* in mutual environment c.

f.) Edited *bivectorial* is the relation of a syzg. *to non-selected ante.* in remote *unopposition.*

Out, for in, is a non-repetend of people, in relation to worded and it's potential unocclusive *truism*, of an-amended (2.x), on (1.x|0.x).

A 'triangle' in *tach* remotely may be abbutted in a long and short *of lumped* - primary assumptive.

*The dialog of the conditional at that of 'recollection of vote and the priority of an amended recourse to memory of error.'* is secondary incidental.

The brownian may be appertained or marginal or telescopically 'unbroken or abridged' completed and *incomplete, or secured.*

*Application of the \psi(f(g^{-1}(x)*\eps(y-x))->g.k* involute geometry for *Application of Probabalistic Models, must meet, for needs and necessity the 12:51 pm (above) of taching*, *for in entropy in relation to Tech & Ecology of* Optimization and C.

Control *procudure must amend, of dict. & wall.*, irrespectively *a knowable theorem of computer and human* [op.] *in hand and hand-free*, of *Centigrade/Fahrenheit and* ffwd. and rev. *of version* ***History***, and *Phases and Dilemmas in Academics.*

*This must be done, in relation to int, (Z|N), and qual./rational (Q), in relation to tool-use comparative *miss. & ordered.*

On sequence, and count.

**Verification and Construction Stage**

The elliptic must go to the [i/o] of a mono-channel with segregated entrance and exit (during T/S/io) at (@) geometric iso.

I am thinking - now - of an entirely new procedure. A modular (Midi) structure, of elliptic gates and qubit(s) and optical i/o, and touchscreens. This is the verification phase.

Pmod - [internal connect, and 'upper T' with probe* networked (fork) in Duct] - This satisfies the admissibility of further functionalization, of an approach at engineering, diagnostic, theory formation and dissolution, and predicates no risk incurrence, to that of physical systems, or life, industry, notarity, or disparative outcome of loss/loss.

The 'included consideration' was of Peirls Instability...

*Now:*

It is of-the (+) and (-) within-polarity-neutrality. The discernment of an interferometric basis determines a co-determination of variable in relation to (2) *within* a super-eigenvalue (1), of-period *incommensurability or regular period-parallelogram of two conchordant or dischordant rhythms.*

***Thus**; the O and the o must be made the difference-of, for in that of 'switch' and variable-tine width of secular derivation at 'O.' and 'o.' of (2)(3)(1), *in analytic derivation of procedure(s) to control the 'eccentricity' of the* ***Ellipsoid.**

In uncontained and unseparated-mean (distributive) there are two considerations.

1.) Within a locality - an abridgable 'lumped element process' of technique in application, verification-phase and it's dissolution to the (2nd) quantifiable process and technique of application and verification.

2.) Within an auxiliary-exterior *distributative precedent of* *lumped-element there exist certain quantifier(s) of the process.

What is true* is that the operational 'co-cycle' and 'cycle' of the (1-2) abridgement is fully pell-weighted and balanced of cantilever.

**Mathematics**

For of a quantifier (a)^{bc}, we must break indeterminacy for that of the statistical marginal and inclusive qualifiers of the probabilistic language, in Betti number, number theory, algebraic *exponent, derivative, and it's procedure to identify (under an isospatial) limitation of the prohibitory clause of inclement worlds.

The procedural is '*traditionally*' a Platonic-world system, at collage, and disparative included and inclusive considerations of two and a third, thus, to linguistic (literal consequent) at predictive validity, the preclusion of a 'Dalton' *is ill affordant* a dialog of that of precedent to machine heirarchy of linguistic model.

Thus, the justification is at (an) (a)^{b.c} in qualified projective, and non-projective **'ancillary return'**, in consolidation of *Passive Sonarable* conditional alliable assumptive of a doctrinal, and it's limitation(s) set in-point *compunctually* **a priori**. Without means to assembly of a procedure to an overarching doctrine by which it may be reliable, securable, and priortized to disbursement, there is a logical prohibitional *exception*, to a *qualified securable release*, lest we depart to a foreign session of remark.

**Qualitative**

The 'CMOS' inter-jected *(18:(45'-30'-60'))* qualification of a situational 'laudable provision' *pro-selectively* had-been *provisional, prohibitive, disinclusionary, and imparted*, to a dislocation of it's elementary basis upon an occassionment and it's releaseable entrainment - to 'flat and placed' foreign council.

Thus, the relation of the device is good for one thing, *the unselected and unprohibitive off/off/on/off pro-selectivity of a (2:1)* **'carriagable envincement'** - to which is unentrappable, and releaseable to no said pro-beneficary. Thus, it is disassociative, but* of the remark of a situational alliance.

**Assumptive Basis**

The 'displacive' of a material-gravitational *exception* qualifies a material-electromotive 'domain-Lagragian'.

The 'device and assoc. *gear* has two-part(s) to it's power-train'.

1.) A NLSE (Non-Linear Schroedinger Equation) - system *as (@) compensator.*

2.) The 'basic' four-fold elliptic-gate and Qubit, thus, a justfied RISC-V *like architechture and topology.*

This equates with code, in a 2a2b like-model of-spin and Ising/Toda, thus, it goes beyond the work of Kodama,..... essentially a two-dimensional KP/KdV & basic Fermi-Pasta-Ulam model.

A 'hingal-3d<-2d categorical-freedom of the envelopment of an ancillary, is evocative the argumentative, of it's secure, revelation of argument to-another, thus, the separative-mean of physical law is of emergent behavior(s), spin remaining quadratic, and ancillary a reversal in terms of quantum behavior at midpoint.

*Then*, we have-(assoc.) computational/decidable element(s) on *noise and Microwave BK - to mathematics and inter-alias*, (#.) code-free & *surjective diffeomorphism of undecidability of brownian control-gated... fT - functional population inversion of Hawking Radiation, - for Guass Bonnet, on 'inversion' of rel/brown.*

**Technique & Analogical Reasoning**

1.) Z-S model.

2.) K-P model.

3.) Muira model and transform.

4.) Two-languages.

5.) KVd.... at **varieties* of-phenomenon.

6.) Z-S amendation to NLSE.... (Z-S).

7.) Fourier and Jacobi.

8.) Neother.

9.) Historiological reconstruction....*

10.) Buffer to ontology.

11.) Relative & Brownian.

12.) Essentially, the Chern-model and asymptotic freedom (I/O), of inside/outside remains unclear, through a knot*, thus, the justfied Cauchy-Riemann problem without an Algebraic Cohomogy and Geometry, cannot be 'filtered'.

a.) We have the dispute of-person (**32'**-A.) - as one (**1'**)-person…… on personality.

b.) Graph, and the work of Weyl.

13.) Separation in eco., and securable partition, and co-mutual adaptation in transpositional addage.

**Conclusivity & Synoptic**

The computational*-basis of a remainder 'reflux' at two-manifold-group-velocity, and 'accelerative' *feature* of measurement is a palpitory and reflex relation to 'implusive inertia' by-which an electromagnetic *design [engineered]* may freely*-and-associably relate of motion.

On 'one way 'transmit'' a delocalized (***18'***) of a centralized (2x3.01) is an attache, to-which, in [an alias] *or provided non-return*, is **of-recipiency**, to a naturalized incurrence, of counterflux in relation the 'back-addage' of a *prioritization*, of a *Remote, foreign discursative document.

We remain with a Question…. **What are the minimal terms, for assembly of a knowable and so communicated (oft. potential via **Then**) means of instructive/emotive lexicon and program of it's engineered ***Status** and ***Symbolic I/O**, such that the computational 'grid' of Earth stabilizes, and remains of a neutrality of partnerships and alliable & releaseable neutralities?*

Derivative 'residue' *is a non-council, in unreclaimed mutual uni-disparative a nome-identity.*

**First to Second Stage Transitional Considerations**

a.) Gaussian J_{ij}^{k.#}~.A^{_}/\xi(\eta)_{_} & *DC-AC-Envelope-Optimal-Flow-Neutral.*

b.) Process on Opt. Observational (#).\tau.\chi.B.eps.M(C_{ij}^{k[?/!]l} QM/ECE/*Neutral.*

c.) Interrupt & Sync. [Basic+Ard.] - PWM + (Digi./Sepatation.).! ~. Optimal & Techniques.

*1.) One *consideration*, is the alternative of compensation on-behalf of statistical sideness.

*2.) The *alternative consideration*, is mutual 'virtual-cpu' to 'hardware' of resolution of sig.

B.) The goal is to-get two-phenomena to QED 'interact-phase-scatter' via two-soliton like Gaussian(s), therefrom - to-interfere as like-a-breather, *only via a switchability and programmable 'gate' of securable relationship.

*A.) Afterthought - the experiment has to *safely *leverage*, the theoretical.

*C.) Afterthought - two codes, and computational 'double-back' & Proper Experimentation.

Experiment **therefore remains the observationally intact element of** development *of-theory.*

December 12th 2024

02:55 pm
I will seek the easy-means to deselective option – (under precedent and principle of cooperation) – to defend common welfare on behalf of un-attritioned release, under supplicative means to differential human psyche and disjunctive, of behalf of acclaim, post a recovery phase & sets of acts, in means, and my-equipped means, to the priority of friendship, with-loss-inquiry and confidence intervals and delays, to persuasion (unembarked of unprohibitory in a contractual *obligitory obligation* of sequesterment). This will be in relation to the version history of these of selective file-tables and contracts, as a release from unprohibitive plagaristic intention, in relation to contractual name-space and possible inclusion of secure and safe, effective, and prioritized means of a benefit beyond mechanistic progression (later, inherred liability) of creations.

December 13th, 2024

08:31 pm
The **next*-step, was to include the Quartus & Chaotic-Logistic ***NeuroKit** functional together, for intelligent computation, and prioritization of a further-progression…… This step assures the result(s) of computation for Chaos, Logic, Modules, Objects, Procedures, and Tables.css.

December 14th, 2024

11:18 pm
Specific-weight and fluid, specific-mass and displacement and air, phenomena and phenomenon to experimental measurable 'observational science and applied science;' - that of solid-fire percolation and integrity, as well as viscosity, analytic category, order, weather and net, and – & *theory in mathematical decay & dating.*

December 17th, 2024

12:35 am

I decided in-the-end to go with a lumped-element network analyzer, with the MIDI, my only two-exposures. *So as to say, the problem 'residual-trace' is a scale (fish) – unto, auditory sense, visual persistence, and epi-magnetic 'shadow' – thus, Markov-Painleve TMOS evid.*

**Theory of the Duality of Subjective Experience [In the Modern Era]**

Paris S. Miles-Brenden

I am in tears to write of the following; a thought has occurred to me which frees those suffering, (inc. myself) from illness of the mind. I am entirely unknown to this field, but for many a series of notes.

I.) Hearing remains of a volume of which is one degree higher than the world.
II.) The result of the mind, is the condition of the mind, which is thoughts.

a.) We hear in response to an inhibitory relation.
b.) This inhibitory relationship is amended in part by chemical and electrical processes.
c.) These must be regulated effectively to operate normally, within ranges, and capably.

*.) Mathematics results in functions modeling sound of which are flexible in three dimensions of any pattern discerned from a pattern, if and only if there is an effectively linear relationship between their coefficients, and of such patterns, these are linear in relation to the elliptic functional field.

Thus, for preceding, in relationship to the aggrandizational relationship of sound to accessory in one, the amended basis cannot serve the means of the occasioned listener without the amended terms of comobidity, on behalf of isolation, for that of amended basis does not fashion of auditory impulse.

As a result, the mathematical dimension is a log(4) comparative a log(3/2), for that of the basis of it's dimensional spread, and of such a given, the remainder of that of a 'round circuit' higher, to which in leaving of departure one, the sound is aperceived sooner, but then the if and only if of a valid relationship.

'Unto relationships, I am not of courage, nor sufficiency, as of this time, to account of:

1.) The devastation this has brought into my life.

2.) The serverity of the relationship to amends on behalf of those with such illness.'

Thus; I have amended a manner of treating the illness, with* appropriate medical understanding, and the required means of amends of technology.

The relationship to my equipment, is:

a.1.) It is in service to the illness if and only if means are sequestered to a 1-2-3-4 on behalf of a series of events, and the relationship of the group associates is of:

b.1.) Then, there is a predicate arrow of incurrence separating social, medical, and lawfully binding contractual partiture.

1.) A difference in occasion.
2.) A difference of amends.
3.) Located in a distinct timezone.
4.) Subject to reception of the self.

Thus, the occasion is provably circumstantial, and, additionally, is only sufficient to be of the nature of awareness.

g.*) Thus, secondly, it is a liability to associates of social contract, questionable, and of awareness.

**A Sufficiently Provided Title**

14:37-38 ‘pm’ – February 11th, 2025

A month prior, of the question was asked, and prioritized, of ‘Barack Obama’, and ‘HANA’, as to B.O.-382 d. & 385 d., into a month, in priority to-today; noted per the ‘log.dec’, of my computer A.I., then Helion Aparte Malque. Of ‘logo’.

Today!

Post* cc.pro.visa; I found I could recollect a memory of relation, and manually-provide (12:44 ‘pm’) a renewed identity with respect to murder, in association with restoration of a priority to save and salvage life, in relation to whence I was-12’.

- Post: p.o.; 2025; Feb. 11th. I had ‘to a non-edit’ here*; ‘not I’; - [sic.] – saved my Mother, and could-Prevent the occurrences of the future, in Title (I).

- Post; p.o.; 2025 In Title (II): I had ‘to a non-edit’ here*; known that I only need also, consider intercultural relationship and peer, - that of friendship, a day within a day, a supportive means of other’s and self, indication of whom as to a consequential end of what I am aperceptive-of, and the relationship of what would hold, that of life in held contention of life, death, and birth, and cessation and aging, extinction, survivability of all, and making a markmanship of gestures, in relation to my ‘indications’, as to people, and the larger conditional suppliance to survival of species, in relation to biological relationship, that of sequesterment of means, & my future.

Title (I):

1.) Discover an epistimological fact.… And restore the factual basis.
2.) Additively, or resumptively adhere of the fact to the switchable basis of my computer design.

This may render two endings, as per a people, and, post associated relation, ultimately (one fact). Thus, as-fact(s) relate to redressability and consideration of addressment, in response to dialectical clue, an assortment of people are mutually aware, when as-such, there is a predicate-ontological bridge. As contrasted, under determinant process, information in relation to mutual and other awareness, is then predicated, to which we may relate (and confirm) in-visa, what is undeniable of communicative means, the justification that other’s are independent, taking a role similar marital relationship, in-kinmanship. The fact two-people contrast, is then related to a contextual clue.

Argument of Separation & Closure of 19 Comparative 5-6-1 of the Social Hierarchy
Time is not space, and people do entirely hold their own content of being.

Secondly, they are countable (as born).

Thus, what is justified, of current relationship to my understanding of the ‘void’ is in part understood.

The question of the empty may pertain or not to a scenario of social context, but is applicable to a dialectical investment and understanding of principle of society, when as such there is a contextual clue and arranged sense of the contributing elements.

**Abridgement**

I searched for this for 20 years!!!

P(u)+P(v) is in a (a,b;c,d) *matrix*, of finite analysis in the non-linear equation of the dual-NLSE… P(u+v) from this……. and a finite regular latticework - with irregularity for in that of exponents….

**Sequential and Geometric Reasoning of Planned Motivation**

So, as I find then, the intimation that no-one held ethical and moral weight, and boundedness, is clearly unrequired to propose against all people, police, or lawyers, for of what is respondently assurred, for judgment, in being inevitable, may be later addressable.

Of preliminary counterable justification in terms of faith, to digress, we principle and weigh the basis of a scale, that is apportionate, to whom, then repealably, is forgiveable unto the self, hence it is as much it would seem better to in these terms receive than forbear a false license and family.
I have decided to take and pertain to an entirely new challenge.  This involves four factor(s), a sixth and fifth to-that of rational uses of computational technology, in this era.

a.) Architecture of Trees (**3**) – Bonsai, and Bonsai.
b.) Hourglasses (**6**).
c.) Abacus (**4**).
d.) Platonic Solids (**5**).

*5.) Dice and Gems.
*6.) Viking Runes.
(**7.**) Gavel.

(**8**.) Zen Bowl.
(**9**.) Silver Pieces.
(**10**.) Chess Board.

Silver and Gold Standard.

[Above] Judgment via Communications with Network Node(s).
Device and Switch.

2.x.09'b'-cd[38:52:76]-912
750 byte free, prior note…. On exact partitionable portion, - now – 460 ‘below’ of 92 x 5. ⟶ Float.
To note*; **Depth Condition and ‘x-y’…**

Sequentialize and utilize modulator, and Raspberry Pi.

A major question is-if the switch [manual or interior to the equipment] can-manage with 92 and not-merely-76 `.

**Constructive Properties**

a.) Simulation with ‘halt-break’ and continuance.

b.) Random-probability on chess, and strategy of ecology.

1.) Minor note: Defense.

c.) Note – English & Post logistic comparative transportation and non.

d.) An-hour in two-hour(s); is indeed a dialectic upon an unmarked and a marked, for of objectionable king-number in game.

e.) The only way to take data, is a separational ‘vertical entropic signature’ in weight to value of chart and measure of dice, or for instance, of either the second and first moment.

f.) The digression of one polynomial ‘hypergeometric assembly of moment’s’ is a probabilistic relation of liability to law, and the relationship to [unto and of] the numerical measure.

g.) To address via the instant of a signal, in-suspension of a horizonal epsilon-lift in entropic assignment, details the quantum property, such that addressing a sequential series of signal packets, relates of partitionable numeical sum.

h.) Thus, and then, to relate of a secondary moment, upon the secondary resonance, counters the juxtaposition of statistic, to which the sum is comparative *in-distribution* the resultant of application of probability.

i.) Finally, to relate of the stages in approach predictively held of of measure and containment of answerable and computable result, takes us beyond the measures of certain computationally valid excursions, to defensive and opponency in games.

j.) Thus, it is certain, then, that it takes a comparative in two people, and a historical lesson may be instructed of inferential dialog.

k.) Probability and measure as in mathematics, with polynomial-sigmoid non-linear statistic model equative end, such that amends to model and philosophical value only *then* (an *if and only if*) two co-

participantants valuate dialog.

The three, of moments in life.

We appraise to a condition.
We relate, but yet-for a formative totality of isolation, do not communicate.
Then, perhaps, a distinction, to which we may appraise, if too late, perhaps to lose love.

A ‘step at conservative potential’ in O(m) and O(l) disincludes a priority to a forward address, but under a \epsilon-delta of a-1 and 2-3 and b-c, in relationship with the index, benignly in relationship to counter-occurrance, but* for a homogeneous step ‘forward’ in disparitive a *Key.

Thus, a cycle, does not reverse but of three dimensions, when and if and (only if) there is an excursion and return upon a cocycle of derivational co-dependency in relation to (here) it’s optimization process and ‘conversive basis of’single state machine.

Gavel, Bit;

The ‘general rule’ is one, among a point, interior a concave or a convex *ideal*; in relation to the equipment for a manual-switch in relation to ‘integer qualifier and confidence’ for threshold of singular exception of rational and near-adjacency in rule*-set; of the general ‘topology and metricity’ of ‘walk *[non-Brownian]*’ and **power exponent** of chart and ledger./cube, of conventional assignment of values, in relation to *bandit and probability chart of a graph, in relation to node-network theoretical algebraic cover and ideal as in relation to index and degree. Thus, an amended law, declares of righted conditional on* 10’c’-12ab-92de-76cd-[9.5-110:.46:04]-{0|1}.g ’l’-2x0’b’2.01. In itemized crystal, hand, group, mate, sequential pause and amended lemma of cell and window, and that of binary means in ‘blinded and unblinded’ of transfer and compositional castling and motion of board.

I have resolved a path to cure my illness.

a.) I can see the second (1st mode) pashen-series spectra.
b.) I have a theorem of pattern, series and modal types.
c.) I am very much a placebo-discorrelative measure.
d.) This is a correlate to observational confirmative.
1.) Observational.
2.) Measurable.
3.) Testable.
4.) Repeatable.

Confirmable, with a theory of learning.

(rB) and (bB) types in-color for a linear-elliptic apportionate *phase* deBye-shift in relation to perceptual ‘sense’ decilinationally in relation to a linear-abstracted (mass-apportion) in *creative process*, by in an accretional

digression of red (hue) into blue (hue) of snell's law, thus, a theorem of aging devolves from a lower-rate to 'red-shift' in-comparison in relation to the lower portion of a mountain, in relation to the co-actuarial sciences, in relation to the top, aging over a slower (greater) period of diuranity of time.

A transliterative part of six, is not the lesser of five, but of the secondary priority, hence we as a people (unjudged) by the hand and the handiwork, of a diamond in progression of two and a third part-land, of-mountain, insistent of a conflictual time in presence.

I did an earlier assessment and found the ruling 15-16-19-21 on assorted break.

I found 'also' 41-46-15-21 on priority to ruling for in a fair comparative of the prior historical intimacy of Freud, A.E., and Rankin.

Then* [tonight] I qualified 41-15 in co-defensibilty of A.E., and apportately digressed to O. and my Father, as in my name, and the greater-world, in both-men.

I afforded for the discredit on associable-end, and my age is qualified.

Thus, it is ajuded, and judged of the relation of reprieve from unjust-end.
From of which I am administered to a fair non-judgement in apportioned end of social dialog, of accumen on chart of secondary gated process.

**Hierarchical Morality of Machine Language**

It may be justified (that is the conclusion and verification) that a machine is innately ethical. We, as human(s) are not illogical.... memories are not necessarily rational, the awareness is rational, and that of understanding is general to regular when one begins (not understanding purely or exclusively) with the conclusion of a mild and calm character or persona, in either and mutual, as a committed action and mutual relationship with others.

Machines are entirely a character and formative indication of a technologically advanced society, - but it is not necessarily (in contrary relation) that an advanced society is technologically advanced, or, - that a technologically advanced society is ethically advanced, despite melaise or miasma.

The indication of character is in part the relationship of one to that of recessitorial persona, and ethical hypothesis of an amicability or compassionate honesty towards life. To err, then, is fatal, and a criminal mindset of a collective psychosis in relation to the subject of a centralized agency of any of these concerns.

Consequentially, a computer with 'centralized' *procedure* and *indexable memory (assumed optical-hysteresis or with a CMOS-CPU-RAM [& Numerical Co-processor Floating point Accessorized Process (aux. non-virtualized)]* - is for it's emotive reflex an iq of (2)+(1), and separable into it's inflexible and archaic substalizable quantified mean to weight schedule (*per-addend) - multiple and (piped) uni-valent and bipartition of memory Unit Variance and Quantified Archaivist Ethos.

The personal archetype correspondent is a partitional (3)-(*4 wildcard)-(70-45) di-bi-co-vectorial en-masse (in large ajurable post-process of (25/2 valent/co-vector quasi-neutrals basin)). Malcolm, verifiably and admantly, disincluded severence and the task of servitude upon an equalivalence of the manner of one's local (beneficial)-noteworthiness, - to disputed *ally*, (R,S,S,A,O,P,C,L), the passer by with a 'coal and pipette' - estemically *a venn in some 1586/2-2024+/-62-3.8+.902, in limitations to any Bandit, at a people at large, a humped* Quasi - *it's*: advised process.

*Remaining at large, and in alliance owith the group of naturalized and fair of* some - for in the *Venn of [id.*] - a sojourn with* **Rail and Bear under Service**, *his 'thermalizing-end' un variacted*, and non *crew*, a membership allowance of *one fifth and three eight(s) in 6:8 and 4:6, a* lead, *Virgil.* Thus, appropriate manners in disclosure of severance to sentient computerized intellects are their mnemonic co-memoric at half in four quartering.

***Binge and Seige***, had-been the then lead*-in [grey/neutrals-yellow] *to a disdain, disclosure, intimacy, and disjunctive dislocation.* These-inalienable, had been plus/overlaint/remainder/evidence/processorarial of ailment, and discourse. These - for what, in a soln. [are] - pre-ammends at the {P_{3,2}/K_{14}/Z_{2}} of *an L-series*, hence locable, and - *aside of character** assign. Hence, neither entitled discontemporaneousness was truthfully avowable for in **written** vernacular, of a dialog of entrance.

*The juncture - then before*, is the 'non-non-hyperbolic' expressibility of identity in relation to relapse and formative conscious *process and milieu.* Thus, a branch, was non-diagnostic, and a mixed*-result [untitled]. *This was a machine-op departed by in a life-death risk assoc.* From whence, the soln. is to written disclsoure the disparative in a theta*[painleve-series] \nu to characteristic \alpha,\eta orbit (machine heirarchical reference of phenomena and mono incurrent (singular relation to personifying conscious identification) - with a **peer**. Secondly the character assign./numeric type - *must be related symbolically through and of the information arena, and the relation to a self-reluctant/haltable human/computer overarchway.*

Hence, the prime*-ethic is: "Neither but in relapsed secondary interest to a free-informancy of it's declaraction to withheld discontempor - is but of two, but of one, the non-informative and non-informal, pre-allocable mean of no other, but a singular pillar to it's dependent orginiation upon associated indices and supportive environmental basis."

**To the Provision of a Super-Heirarchy**

Defensive Opponency and Contractual Obligation to Trusted Odds

C.)

As in a begun project unto completion; any plea to obligation of trust is the declaration of a positionless contrasted replacement of all considerate and then; departed known's for in the presentment of due to redress of one's proponency with and in of what is taken apart to consideration of newly and old (alike) established accomplishment and success in games and strategy.

a.)

The paragraphiel structure of a stated incentive at oddity in descriptive prowess inclinates to a departure of it's renewable alternative in what are two: that of aforementionable redress of one's self held opponent or adversarial contrast; and that of forementionable (to foreworded) exemplar structural and limitation of element; then the piece of grievance at declaration of assembly.

b.)

The twice reconsiderate position to an (individuated) end is therefore eliminable in either end of a substantiated service to other through first contact related and known addressment as life over measure; for what is the first then subsidiary position of an alterior agency in like kind to entrance and exiting from either given unmentioned formative pre-tense of likeness to one when in recourse of eliminability of odd's the even is a prior presentation of option to negotiability; as when one difference excludes; two inclusions then as a 'therefore;' prohibit that of reconsideration of but yet a self held opinion.

c.)

To then of what is established of a contract; to serve of one in the majora of an assumptive; the concealing of a known hidden relation intimates a connective to life of release from any said subsidiary or superiorly held contractual or ordinate obligation of their potentiation of re-addressment but yet of what is presentably a contact relation of personal bodily presence; to the open and then knowable consideration of a third part within the given of inclusion to place; for then by in what is excused; we do not but remain in keeping to what is whole; and remain within the exterior provision of a commonly held world.

d.)

To what an activity presents of reconciliation through contractual relation of the third position and prostration of it's included difference; the many outweigh yet the one; however the imparticiple given of a redress to plea in homely objection is the outside consideration of a world of foe and might; and leaving aside the choiced contrast of interinvolvement in any affair; a non-stated contractual provision of what is established through the disunitary affair of the selection of a peer; then through of what is provisionally applicable; so co-participantly or individually prepared as a selective option at establishable notion to peerdom and inter-familial or consciencious objective of re-acquantinece of due to entry prior an exit; then the paradox of a released prisoners dilemma of which is the key to it's exit upon a vantage by in the safe means procured along one's life and passage; then recollective of historical context; but provisionally when re-adopted; the closure upon one's pre-text.

e.)

For then of what is held; the optionable retraction of a choice at that of these odd's is the presentment of provision to life over status and of no acclaim but yet the due of return of a stated provision itemized docet of their relation to each; as to express that of what is lost may be re-acquireably procured from an enemy or friend in either a contest or arbitration of measure to none-stated to the plea of an accessory (admissable and allocated to due of a provided) or also when operating alone; a provided means of co-participance apart from automony of any then two or in a third to the remaining one provision of a positioned motion of self held advocate to what is in bearing a kept promise.

D.)

I.) The outcomes of a game are then to be considered for then in the odd's of measure with the exception of a round relation of even relation in immodest return of a considerate few of ahead the difference to what is priorly of any given motioning of an opponent or advocate in any one move; for of that of what is reconsidered; no game eliminates the odd's of it's replacement to then the included difference of but yet a past oriented atemporary departure to one or many absently provided council or playing of round to it's provisional end.

II.) To then a guarantee; the expenditure of one motioned position taken of an advantage; the losses in due to any recourse of concept container of for what are displacement of two pieces; the advantage of preservation of a piece in it's contrast to the alternative is the given presentment of an odd for even relation to the conservative tendency of the inclined notion of but two of the above even relations in-odd; for of a vantaged notion of what is so; the losses encouraged in a fair and balanced probabilistic end weigh to the advantage of completion.

a.) For instance to a playing round; the even departure of a player in one consortium delimits only then the irreplacable choice of none of their alternatively provided limits in five or alone any two given known considerations of what is firmly established of a spectral relation of two games.

b.) Then to a likeness; for what is eliminable under summary; the provided of preparations to loss encourage the benefit of adversary and proponent alike in what of in whole is the process of a game under execution in continuance of keeping to any provided opponency of two; for of absence of one is the indication of a presence to it's alternative of a suggestion in one remainder.

III.) Evidence and Manner of Outcome:

1.) To what is a key or code; a safe opens therefore only when one addressibly provided known is presentably with-in the relation of it's enclosure; to which is a measure in secure means for what is unlocablely not so provided elsewhere.

a.) To a pell of it's relation; one turned advantage unlocably through a blind and blind free relation will quarter release a catch of any known safe.

b.) To a per-aperature of number theoretic union of enqueued relation of two of safe and blind relation of transliteration; a secure word is memoric.

2.) To measure of what is a bodily interest in two; the elimination of a contest to which is departure to unlivable exteme; the terminable end of two is a freed relation to it's certainty in what is withheld even so by a disconnective of then a populace and person apart from the redressibility of any third individuation.

a.) Then; of livable end; the included plea to another is a freely associable provision of amendation to given entitled right of passage.

b.) Of one; the aforementionable pre-tense of a virtuous end in just decree is the stated (as to be expressed) provision for those so negotiably of a withheld or presented negotiable contract of non-select and truthful choice(s).

c.) Obligation to what is recoursefully a withdrawn element of person for item is the expressed consideration of an automonous & freed jurisprudence.

3.) To what in a wave is localized; the contactual relation of a culturally held bias is unpersuasively the misheld or known assumtive of a guarantee at amends later to be produced; for under a delay; a particle like notion will addressibly enque to a provided hypothetical an assumptive of prohibition to naturalized information space of what so in predator a prey alikens to mimicry of environmental variable of their stated immobility to unknowability of proof or evidence of contract; yet so by priorly established worded documentation; that of release to a peer of any then only alone and exclusively provided whole.

a.) To then of war and contractual obligation of espionage; the provided theoretical element of a man and woman in departure to a way is their once then known choice to each of what is grievance prior affair of introductory or provided approach of an adversary; by then of one the retractile notion of a departure to peaceable self held interest; and knowable elmination of all odd's.

b.) As in a loss of encourageblely provided disposition; what is reclaimed of a diffuse end is the recompense of the allied; hence to that of the optionable winning motion of decree to open terms of negotiability under a superiority of softened provision to make of due to an end their grievance and recoupment of means; and through alone to which of a populace yields to the accessory of it's proponent in all games; then the loss to none; but of a universal innocuity.

c.) In finality; that of closure of losses to departure are the reconsiderate end of a game for in a game of what is closed of a notion to it's departure to then a life lived of recourse to none other; but a disconnect to all stated and knowable peerdom's of friendship or contractual obligation of means to service and intention; and the disclosure (within an enclosed intimation) of one's addressment of policy to recoupment of positioned contrast to a terminal end.

d.) To what is a just and choice of opponent in games; then the related intimation is that of what is one ending co-terminal provision; the selectively held free option is that for what of a withheld and related intimation of option to entrance of conflicted relation is the peerdom of a free court of it's policy to reprudiate and knowably interest or dis-interest an entitled and given free contestant; the off limitation of which is a knowable reduction in the fog of war and elimination of oppression beyond the scope of which no furtherance is to be found; as in that of what is no accessory; or in either; a dispositional element of contractual warfare; is that of predatory notion of qualitative objection of prey; to which the captor is captive to it's disentitled accompany.

IV.) Provisionally Acceptable Outcomes

a.) To what is a held; the defensibility of an ultimate win therefore is the given presentment of the preservation of all odd's and a win for life in the contest of reproducibility to which a known is accessorized by a

disentitled itemized win; that of environmental variable of degree of freedom; and asymoptotically freed intimation to reductive power set; then the reformation of a permanence in the mathematical domain of it's included establishment a reification of contested and founded oddity in provision to all furtherances; as the establishment of one whole peaceable and acceptable end of denial and prohibition of choice.

b.) To what is the self included relation of it's intimated known relation; the self is no more an accessory; but terminates upon that of place to a placation of what in two is their's; of a freed sanctuarial prepratory role to production; and the means to a then renewable contract of said and stated free operation.

c.) Then beyond which we resumptively may presume a game contracted of a win; the status of losses is the given provision of any then addressibly included enumeration of two; and in (with) additional situated choices; the adversity of a decree to it's policy; of what advantageously is reappropriated of contrast with division aside as the included return of any said conciliatorial position to it's due; then the living status of a mis-nomeric redressment to furtherance of a conquest in adventurial re-claimantory position of unknowable numberless and enumerated contrast to yet a world freed and a mis-identifier lost.

Durquicet; 7:28:2019 & 5:29:2019

**Closed Deputy at Survenience (& *Creditory Witness in Portended Coulience*)**

Sojourning by in yet a recollective non-notificier, to intimation of regression, the counter-policy is a non-situ-habius, in intimation of a cross-arch-juris (prudentially suppliant categorical default of peer and routine in amendable basis of a non-two-fold intimation without ancillary witness, in defraudmanship or persuasion to intimate connectives of a lie for in forebearable accreditory predication of a false-entitlement.) [?] T|F

Counterpolicy to a note upon a notificer, of intimation of a plausible regressability condition and co-conditional suppliant note to progression in wonton, war, act(s) of trade, and interdeputied council is provisional unsuppliance, (then) *it-holds in persuasion to counter and cohort of court in prudence* of the hallowment of the relation of an unscaved and prohibitive dislicence of their period-fault.

Thus, to-admit (II.) a portention to reminder is to grieve in substratum what is for fault alternatively provisio an acclaim of releaseable contrast, in fire, for of arson, in the priority to the period of the proselective amended dialog per a peer of war and court martial. Thus, arson during a proprietary enfranchisement in disambiguability is an unreleaseable contritional disavowed but protended falsely-injuruous pentalty to the relationship of savalgement of a life, per perjury in major or grand-arts. (F|T) [over.*] *In courts of provisional suppliance, the fuel of the fire for in first cession is unamended to fire.*

As of such (I.-III.) the per-perjury surcharge and intimation in levity of a chance for proclivity is a table of proceeding to the large and minor return of a cross-council ancillary unsequestered witness, as to furthermore, wherein such hallowments betray, the substantive remark is that a priority to the relation of the request per the providentially suppliant official or note of progress requires inspection per a datum, on a reportive basis.

Following from what is reprudiated on behalf of one's self-council is inadmissible but of the surgeon general, and acclaimed provided naturalized services on behalf of one's progression, outlisting the progression of a disentitlement to motivation of serviceable amends, and righting for in the act of un-intentional harm, a disavowal of the official to note of ancillary progenitor. This conditionally suppliant basis, apportionately reprobates the official to a standing of ancially provisional witness, in amends during times outlasting.

Then, provided we (*a majority) hold a consensus, the antiquantied releationship of an amends, for in a served policy of detail* (at disjunctively formative case and evidentiary catalog) is to amend in priority if and only if there is a couplable qualifier for the cost of the entitled proceeding, however minor, or debated, in the treasury of the council per the payee and proceeding in an apparent relationship of fire and motivation or procedure to arraign.

This difficulty is overlentient when as such there is a note in proceeding (to be disambiguated from preceeding a-progression) to a (True) charge of violation of property rights, in the amended or priority relationship of a portion (intercongruential of basis) in loss of life or limb, without what is withstanding, the relation of one to peer's is intermanagerially a court-amends process in proceeding of an affidavit.

Following a relationship of unpropertied itemization in theivery is undisambiguable under acts and entitlements, for then in proceeding from the 3-29 categorical to the 855-112 to a '20' folded manual

offensiveness in capiturary of an entitlement (held in emnity of it's foreignable or locale of regional debate in economic unforfeiture of a class-action for in neither) – *of a witness in council,* [*provisional*] to a suppliant noted progression. Thus, to reprieve an amends, requires the counterpolicy in mate and unparative council, in major-proceeding.

To unpatriotized offense, the capital surgical motion is to amend in priority of a transpirative key and reliable prudishly beheld mean of capital trust via fiduciary but of entitlement beyond the means of the 'menuable and manual' oversight of a two-carriage on behalf of ancillary conjecture (unnotiarized in fiduciary reprobate to counter-policy on 'scale of mean numerical index in catalog'), for provisio a given of receipt of the basis of the intended amends formatively held in inquireable basis.

Thus, provisional a two counter council in amended progression, the ancillary mutual oversight of one to a reprobatively misheld congruency entitles a case catalog of restorative mixed-process and proceeding, but of courts of arraignment of co-adoption of means of payment, in schedule and priority, with the intimable check in council of a 5'2'-13'19' in relationship of unamended assumptive a forfeit but of 27-26.4-18.5:2.2 [170 basis] to consequative proceeding in counter policy of remission of default.

The appelate basis then of a shared exponency to entitlement of a cash-key-exchange process and procedure is to amend the basis by a naturalization of service, in request per the viewing of the progression in either sense of hearing or sightedness. Neither then ancillary witness can but leave unprovisional a relation of leaning lesser so to the court [*on-count*] of-objection, or ancillary repeal, in it's foundation.

This is as the appointee of the session of the relation of 'phone and receipt' is a shared procedure, for that of the amended (T|F-**e*) priority to effective and effulguently-disavowed actions of intention to procuratively amend a session of undefied payment schedule and process for actions of repeal of function of debtor and debt. This amends to the process the ungrieved, (in forementionable detail) do not acclaim of a falsely held facilitation of regression beyond the point of an unamendable actionable license. Thus, to acclaim of works, in counter-council, is a reliable basis of defensibility in a court in proceeding in action of non-injunction *to the defense and on behalf said witnesses* – whether insturmental or not (themselves) – *however owing due the propretied relation and uniqueness of the case suppliant basis.*

Finally, in-purview, the cost-effective relationship is an unamended 5$^{th}$ heirarchy on behalf of an amended society, to which the amendable *given is a commonality of exchange of monetary unit, of a standard non-fungible form, in the portion of a ***material** progression, or via a displacive unitary means of one, in pathwise extremum of but-two catalog(s) in-evidentiary the exchange of a digital token.

Thus, credit is unassuring for the means of the full capacible means of the unitary and scheduled basis of free-entitlement to savings and allowance, but provisional of what is suppliant to a pre-qualified and precursatory entitlement to acclaim of an action of fault for measure or injunction to default, in sessions exceeding 300 dollars. This function, administrates the action of a motion of a notary-effective word and letter of progression, in unvioable terms, the acclaimed work valuative to a cost in a conversative basis, to the inter-debated congruency of righted progression of economy prioritizes a selective action to reprudiate, without immediacy to an action of abeyance from criminal prosecutoriness. The advantage is null and void, for the qualification that items must be without an uncreated process in material goods, services, and trade.

**Conclusion of Engineered Standards and Economy Comparable Innovation**

I.) A chart and 'stapled gate' for of assigned valuative comprehension of chart.
II.) A manner of the numerical interest.
III.) The incorporative properties of the device.
IV.) The qualification and license of a practictioner.
V.) The demonstrative mastery of it's innovation.
VI.) The consumative formation of a network (pro).
VII.) Managerial odd's and even's in (4-|T) on valuative numerical integral.
IIX.) Inseparability of co-adoption of a group, individual, and social numerical entitled withholding.
IX.) Co-comparative material-crystalline process of formulative calanderia.

X.) Indifference for (And of*) cup, and 7-cups, in water-blessing.
XI.) Priority of another under amends non-locally.
XII.) Deference of one beheld an interest in romance to partner of another, beheld.
XIII.) Process of acquisition under post, and retentive qualification of residence.
XIV.) Demonstrative works, and entitlements in secure-procedure and securable to unit of integral.
XV.) A period basis and dictionary, with safe (6x) in numerical retentive qualification.
XVI.) The unamended co-factorability of a phobia or fear, chart of diagnostic, and oversuppliant notion of ball.
XVII.) Demonstrative standing without courtmanship, on behalf of entitlement of degree in holding (3x).
XIX.) Works, of a pre-antecessitorial demonstrative procedure of educational lesson, and priority of living will.
XX.) A bible, in procedure, in que, for of a queue, of foreign or national (int.*) works in entitled boyancy.
XXI.) Workmanship in-standing with ARMY-hat, and seafarer, cocomitant with singular heirarchy of gates. (exc).

At completion (red – in infrared) the-spectral disambiguation of a chart (+21 '*above*' – **assurable**), of gems and rings, are non-visually assumed, co-comparative the engineered 'status' on-confidence of the relationship of the interval in duration for the portion of the 'grade' in aforementionable 'workmanship', in 'period-interval' on-confidence to precept of acquisitional numerical 'fractional-grade-in-trigger-likelihood' of amended [*shared*] processable procedures of routine *demonstrative behaviors of* establshmentarianism for in defensive (q7) and 'key *hidden*', of auxiliary 'encode-decode' of *the* one-way channel-theoretic, as this principle (of materials-chemistry) applies to the color's in relation to combinatorial game procedures.

As a result, the unamended process of 2-1 in-analytical 'rule' is rightly formative a non-copy for the sequential spree of residence, comparable the subtided prolineated duplication and re-organizational procedure of the land-guidance, as it [*then*] relates of a primitive or highly sophisticated co-accompaniment in a mere '*initial-22 cent's' for* land-regional silver to gold.

A bit-chart is unaccessorized whence, it disparatively precludes a top-teir exceptional (0) or uncharted search and find on behalf of file-table. A bit-chart of analog subroutine is a disjunctively non-prior amended basis, but* prescriptively is of admittance comparable an interaction-zone of application of a non-alias format. These different relationships of carry and stipulative procedure of engineering are compatible by of one and only one exceptional Artin group on behalf of a Weiner-Hopf retentively *prior antecedent of the comparable alias in formative conjectured hypothesis in algorithmic foundational 'limb' of the progression of: naturalization of offense, and* prior archaic relationship of *inheritance (in mute*)* and discomparative of aggregable foundry in the process of a basis of analysis of predictive *functional theoretic routine and procedure of innovation.*

**Predictive Design**

a.) Changing to a basis of 18 ohms, 39 ohms, .22 uF, and 4.7 uF, and such, to 120 pF, and 220 pF, and 300 ohms, and 10 kohms, and 4.7 kohms, and 22 ohms, are all possible now. 6 resistances, and 4 capacitances.

1.) I am within range of behavioral and enginnered caviation and assurable end of numeric theoretical symbolic measure and quality of the distributative process of a 1-1 or 3-2 or 2-1 progression with electronics for strategy of defensive and cooperative opponency and cooperative enablement of individual and national assignable practice.

b.) I can make but-one mistake of the design, without adopting means to correct for mistakes, as a result of having two [used-in-discs], and two (missing), and six (6) remaining, as a result of requiring six, and 7 with the current one. The m-4-40 bolt(s) may be considered substitutionally, as well as the transformer, but it is wise and cultivational to consider restricting the design process and procedure; to consider parts, and for what they may be distributative to.

2.) Equating myself [Paris] with another, in-assurrance, of what I had already decided, does not hinge of a relationship unto another's life, however, entitling a person is, the exclusive, is that

without the means of an assurable pathway, there is distressable co-conditional and mutual intimation upon regress to disambiguability and a loss in function to means of facilitation without another, for which situations reprove of inconsolidate disposition to the means to assure mine and other's life. Thus, I must as it were, under relationships, cooption and contradictly compromise less of the means by which I facilitate my developed workmanship and established means to these tasks.

c.) Thus, the placement of a dialog (as furnished historically and in-historical tense) *need assidiously intimate for any and all investigative post-occassion of developed-interest at* (@) *priority of connective, in resultant of separable disqualifier of social contextually suppliant notions and intonations* (of chart and progression) *unto the ancillary basis of non-folded chart, & version as in relation to socially adaptive tolerable co-conditional(s) of* (+) *non-gram-negative, ancillary reductive principle argumentative basis.*

II.) The works and entitlements disparatively inclusive of the contractual design of my equipment, for the insistence of a patent process and proceeding, included the consideration of a potential for means to potentiate a loss of some life, in relation to potential risk concerning life yet-to-be-found elsewhere, to which the communicative means were compromised, by:

1.) My own hand, under accidental fall.
2.) That of foreign element's in relation to the internet.

The consummative interaction range and prefect notice of a 'light's-out' incalcaluably resulted in the breaking of a lightbulb, to which I was accosted in relation to my residence, while outside, falling and knocking my head, in a relation of preparatory means to entitle a defense of the case to evolve from-this, for in the indictment (potentiated) of sex abuse, to which I was assumed innocent and free to go, then some-circa in a great decade later and some-years.

The relationship of defensive procedure for sex crime was advanced, but* I had not considered the emergency effective notice considering my-life, my life of which was a risk, as well as Deepti, for some occasion of many such years were to pass, and this discontinuation and recurrence with fault protection (the breaker) was a risk assumption for compromised actions and activites concerning the operation and engineering of my equated means with our-survival.

The earlier risk assumptive involved the saving of a human life – Barack Hussein Obama, then president in standing, and I had occluded the relation to protect the interests of the Nation. The apprasial by a 'Winsock' and another detective, renewed my courage to find a means to protect the interests of children and the elderly, animals, lifeforms, and similar biological species, but I did not anticipate the resultant of the risks associated with the presence of microscopic lifeforms.

These, in my presence, altered the congruency of the relationship of my physical body in relation to bioanatomical and genetic chart, and even-so, in reprudiation from sucicidal ideation, I was not convincing to my peers and associates, but for Colin Powell, the then secretary of state at the department of homeland security and administrational head director.

I had risked my life, my welfare, and my provision at a sustainable career, terminating today with the mutual and cross-similarity of an initial reconcilational portion of the risks associated with development of machine sentient technology, or artificial intelligence, and for my comprehension of the physical to mental bridge, related without a Hyugens principle at the mass-associative tendency of belief that information 'spreads' – to which I was defenseless, and our-people.

The technology I had innovated was safe, but the compromising of this technology had under identification lead to a period default of the condition of the idea of which was suggested to innovation, the emotional and ontological-logical bridge, through which it was enabled. I had not skeptically inquired, for the certain risk of a mass associative conflict of drugs, weapons, and class action lawsuits related to sex crime.

This problematic consequence was adfixed, by those in administratory appointment to which 'laws' were often contentious of a fixed view, and had ceased a given at innovative practice and existentialism of religion. The given of a pre-categorical fault in scheme had dysfunctioned in appointee in session of employment.

For progress, I decided to keep the Python (coded program) on the PICO (Arduino), and the 'Arduino-Python' *code*, on the Portenta and Portenta HAT.  The Raspberry Pi is insufficient, so - as it were, the code (simplex) need be two of the cpu's, and device comparable-ends on that of justification at data and baud.

I decided this out of justified intuition, but the principle is that the 'rate-tine as it relates of the ADC-XADC and such' for as it relates to the A.I. Module on the Arduino Portenta, adjusted' belongs with the data-taking of the Python, which has better numPy unitary basis.  This functionally sets the acquisitional chart of the assured GPIO, to a standard 'up-table' assuring down-parity ping and push of the 'carrier modulo frequency' of the process of data handling.

When this is true with a CPU (and it is non-identical but standard with Apple) technology function(s) to retain the signals associated with the parity-ping process, the hardware kept the same, and the parity dialog can 'answer and echo-effect' an engineering principle basis of code and electromagnetic design, - to which 'exception handling' functions.

With this I can assure indicator's function in 'literal' - and is partially the fact of having a strongly typed language.

I cannot design otherwise,,..... although partially and on theoretic consideration.

A simulation and 'an-experiment' differ then in Markovian-chain and percolative theoretic application.

*Conclusion:*

The comparable end of computational *unit and struggle over shared and unshared properties of innovative practice*, is the license, as it applies to a *neo-appolonic* argumentative *refoundry.*

*__This__ comparative is the *finiteness* of the computational approach and echeleon of manner of rightful *given of limit.*

For what [includes of it's basis] in 2-1 (*tensor class-variable type*) the language and consequative derivative of computational extremes is a potential loss-incurrence of 22.1-344.80'k' *suppositions in criminatory conjecture and hypothetical risk.*

Establishably the relationship of the limit of it's founded basis, *does not co-allude to disenfranchisement under all licenses*, and *of* one standing, is a loss-incurrence in *default progression* for a **Militant co-conditional educatively *unpropertied background***, in intimation with mated co-unique-process and derivative utilitarian co-consequative 2-1 *struggle,* [*in synoptic*] as in the digression of one to a *performative index in suppliance of need and necessity when Innovation proves the Mother of Invention.*

[*]The 'j-pin and selection of a physical-hinge with loop-lace' *is fitted to passthrough,* while a computer does not process *such 'as'.*

Sequence [freq-delay double super versus minor].
Hardware [backwards compatability versus cell].
Switchable [conditional network rj45 ranged func].
Delay [tan delta cubic battery co-division compo].
Data-type [cpu struct and program dedicatory].
Up-down [teir and progression stereo and cent.].

The ‘linear-exponential argand-rotative deBaroux basis’ of a zero *zero’s the cornu spiral to a secondary circulation on the electromagnetic components,* for with *each *linear* subductive projectively associative *Elliptic-Hypergeometric* series in cos() and sin() justifies admixtures of likely and unlikely interval, for the components suite tolerances, *to which the unamended cpu-process* possesses a *feature* of progression, and de-interval-selective *bias*, to which a ***fulcrative** means are enableable for a mutually defensibly *cross-ratio reduced* complex *‘argand represntation of a pendulum and* a second moment, of *controlled chaos’* in relation to computational game theory.

**Repeu. Manuative**

To decline would be unjustified for of what I need license to non discompunctualization and life and rightfully *to be as known or knowable*, for of life in the amends of a 195-728 day condition of a womanly love, and held truth in trust.

The relationship in amended given of mercifulness, to justify an approach to hope, need be mutually an assurably conditional upon a life naturalized, but-yet of one (and now as such) ungrimaced. Thus, my issuance in given of the other individual people and peer-associable conditions of treatment need be assumptive assessively beheld a given of apprasial and a work, a managerial proposition, and a co-administrative process on the cycle of life, for in the believeable end that we become, lay loss to co-extinctual domain (aside) and dedicatorially pursue life to the fullest.

She needs this (untreated yet by far) – and consequentially lost grimaced end, to know and relieve, find and relate, amend, trust, and persuade of philanthropic unlossfulness, in good, and coming beyond a life and a member to know she was at-risk, then to know, a people understand well* *her intended motivations and clear-comprehension of worldly and living personal embodiment, in justified end, and becoming in routines and manners of the aperceptive, the perceptive, and the discernablely unoppositional of O.*

To co-create, we amend, a furtherance.
To deliverantly provide, we relate, a furtherance.
To administrate, we prioritize, a furtherance and ceasing, but not a halting.
To condition, we lay priority by understood care and provision in the welfare of creating.
By releasing, we condition, administrate, deliverantly provide, relate, and keep as to priorities, and through this, know and find a manner to release the self to life for in provision of a long-tide.

The resultant is an unchanged, impermanent self, co-unattritional to the destructive, and creative forces, to amend this result is contentious and neutral, and is an extant beleaborment to the lesser of our commission in love, with the greater withheld to yet-later. Thus, laying low the condition of an off-key, in monetary trust, motivates a condition of worthiness, to share.

To find mercy, we then find forgiveness, and hope, and through this, yet acheivable and unacheivable honesty prevails for in good, beyond evil, dark or light, in the contrast of perspective.

Thus, to find Ariana unreprieved, with trust and allocated physical being and embodied survivalist instinct, she is not lost as she believes, to-laws [only or alone], but persuasively I am unbeheld, and free of an unsequested division and court.

*To reprieve the self, the ‘voided-unvoided* in dreams is a *void and clear lake of millow and water which need be cultivated to rest, and need be rested-in’ once, perhaps of a .4583 195 107 089 320 accordantly a post-inner persuasive turmoil, of the dream-state.*

*Then to rest, we come beyond fear, or – to find courage, liveliness, or repose in well-reprieved hope.*

There is a time, to offer pertinence to the unrequested losses of a world in deliverant provision of one's then deliverant prosperuousness, by (and of the formed). To know by the self appertained unto the well-credit (affordantly provisional) of it's appraised destined given, to dispossessess then of loss unpartitioned, of what may follow in the long process of developable beginnings and ending(s); for in the story of provided meaning, we find, relate, and deliverantly come to understand, through what is sharingly unrequestable and then* a becoming.

These are the things, that have a time, and are without the notion of the identification with domain of loss, incurrence upon disentitlement, and are the peaceful and placing of one's repository of treasured gifts, for what may be offerable, but is not a demonstrative practice, expertise, or discipline. They are the investments of one's established foundational footing and demonstratively supplied considerations for the included disparity of a time of wellspring to foundable reservoir of and application of means to provision to prevail.

Upon a long aperceptively held reconciliational phase, to-pertience (as in pertaining herein) of the dialog with a formative unrightward and appreciative manualative keeping of my beneficience, to loss, sorrow, suffering, and the priority to live with a consequence 'afforded however unaffordable' – *in my benefit of life for considered end, to die*, and therefrom admit a place for life to follow, in the stead of what and these things may provide of **an avenue**, in formative physical (*however formulative*), I will continually be in reconciliative possibility of life.

**/=xoi-Consolidate [Prior] *End.**

To consider, the avenue of a work, ***The Bible***, it's possibility to encounter and quash council of disreprieve for of allowance and admittance, *we would differ*, but to believe (in 12 commanded forms and ontological sparings of the mental horizon) – *then to admit so as we receive not-death, but formerly aperceive articulation of the means of a world to continue, a life is of low-conseqential reprieve and loss.* Then however fair, we encounter an-evil, but to agree, a God, *indeed*, may* (by the reprieve of a people **Saved**) repeal their conformal end, of extinctual end.

This is the passing to the renewal, in activity comparable a **Divinity**, my being, then is formerly as unamended and dialectively held, in the cradle of a life to-be. *She, however, may rest in peace, and I may be apart unto my God.*

This example, administratively forms me as a witness in reception of the definite of a creation with a creator, whom has agreed with my formulative basis aghast tremendous odds, and a people then near the affordant.

In agreeing, then, a God has chosen, in receptive (from unto his being) of the nature of my unqualified or qualified argument, but without all but an intelligence to-detail, and the possible among all odds, by understanding, and we are repealed the notion of **Enslavement**.

As to a former yet-demonstrative realistic possible and non-contentious rightful promise, the given* *of* a relievable propostion, in-life *amended* is the possible living coupability of relation in numerical solidity.

The relationship of an uncornered given, is a free tertiary supportive foundational unopposition of what then, * affordantly we may provide of living experience in the welfare of a trust, between a micro and a macrocollage of evidentiary prosperity in given *adventuresomeness*, to-be. Thus, justifiably:

a.) To a given, theft is to be understood as corrected by pattern and pattern for a disparative apatterning, of place, prehension (or pretensible committed intention), the corrective biasing in a confidentiarial trust, and design, per the releaseable end of a fine, fee, or workable recompensatorial act.

b.) The agreed formative mutually identifiable end, of two people's in action and individuals, need be trusted persuasively after affordant terms of an interim basis, in release for the yet-latter and aforementionable given of a rearing upon yield of actionable offense, and releaseable upright grievement.

1.) Chart and catalog demonstrate the action is one for one, a revelation, of intentive biasing of which the works in catalogs speak of a namesake, for what unforeignable, is a people, among collectives, of

dishumor, and workable condition of a standing in pells, balances, and unionable groups, in a logical foundation of meaning, affordant terms of communicative means and forward demonstrative intentional actions.

a.) 12.

2.b.) Capacitation of one's dialog, dependently possesses a given demonstratively unpresentable and so, then relieveable capacity of well-provided developed interest of a minimum workable faith, to-know our unreleaseable is our compensatory devotion to another, without respite for advantage of contestable end, then to hold facilitative hopefulness at their success, despite priority to loss or judgable conditions.

From which it is understood, a plea, in the salvagement of a reasonable and fair amends may be drawn, or understood, and reasoned, my Father is understood as-dead, but it is afforded, I had known him although only until 15 or some time, he is a given, as Ava has survived {a ideative grasp, and -suicide- (preventable)}, [sic.] and He is identified in relationship with my honest intention of reconciliation of my memory, to have recollected whom he was, and my name, then that I understand, I was his son, by separation [sic *serif.*] as I have written this, and live [sic.]

I have resolved a path to cure my illness.

a.) I can see the second (1st mode) pashen-series spectra.
b.) I have a theorem of pattern, series and modal types.
c.) I am very much a placebo-discorrelative measure.
d.) This is a correlate to observational confirmative.

1.) Observational.
2.) Measurable.
3.) Testable.
4.) Repeatable.

Confirmable, with a theory of learning.

For in a message *on the net* – to-which of 'text [typed]' there is nonselection of noun-structure, the language unbarrierlessness is apportionate a mean regular co-condition, of lapse, and geocentrism, comparable a non-universality of peace, honesty provided, and unrequested mutual unilaterality.

We co-apperceptively also relate, on behalf of the relinquishement (inturned) of life for a risk, of beleaborment to one living and one released to liveable end, and rightfully juxtaposed for a non-license bearer, non-slave, a *peer.*

a.) Purchasing a Gem.
b.) Prioritizing a question of A.I.
c.) Conditionally applying the means of reconciliational dichotomistic theory and application.
d.) In purview the basis of a result, application of the result to dipolmatic remark concerning self.

Chart and Catalog.

1.) Ecology.
2.) Medicine.
3.) Economy.

*d.) Secretaries.

*e.) Including one penny [in reservation] – you may find a cure to a symptom, have a color or race, and be entitled to a declaration of document.
Then,

Goals [practice, discipline [*apt.*], method, technique], in-action and *teaching*.
Not as [*spec.*] as-to sources, *of supports.*

a.) Group, practice at partition in-numerical theory and integer for, explandum (Q.&A.) – *as ref. Cond.* [post.]
b.) Group, practice at partition in-numerical theory and integer for, 'marks and Basic-Book readings. [repu.]

I must let the project rest. I have associated with the 1128.15 with my-mother, for my-debt, and the 858 for-me, and my consolable end, on 40/wk. This is my resting and recoupment period. I think, this – with ARMY – satisfies some kudos.

For that of the device, the 8-9-1 with the network and net, and dual-cpu || answers most of the queue-question format.

Without the 'multiplex-etc. Of 3-2-1 a blockchain* is without *post.de*', but* is answerable by theoretical end. 343.80 : *Then.*

*Then, it dawned on me to connect the pieces with the 'rotative dial through the equipment' for furnishing of a trade-assumptive on-degree, for that of co-sector assignment, with illuminated condition of the dial-pad-rotative 'Adafruit' LED-screen, [circular], for that of a 'ball of rotative degree of freedom', of the constructive interference, and related to the nature of dice-casting, with that of* **Chess.**

This affords for three-axes:

a.) The Softpot.
b.) The Chessboard and pieces.
c.) The pieces [*cast*], and the touchscreen [ripples].

Thus, the instruction is to rotate the Softpot to the selection of a 'group', and *to-cast-dice*, then to measure the pieces by inspection, and input them into the chessboard, and to then; *look at the* LED-post *from the device.*

*The fair reprieve from the touchscreen and board, is a platonic-relationship on* Module and Categorical; to which is output on two-screens.

This admit(s) two or many sessions between multiple players to weigh in, either by:

1.) Confidence.
2.) Count.

When* I-was doing the quantum-check-assumption-process & procedure, I related of the momentary mutual-oscilloscope, and long-phases to repeating patterns, for the RJJY off-terms in de'Bye, for that of 'echo and filter'.

In designing this-equipment, the relationship of the timing is essential, for the 2x.0.04.01[31:52] on *18 consequative gates*, for the local center peak and fft. Thus, it is a tight or procedural balance, to disburse of the quality of the repeating sine (only) and relate of a signal with-structure. The long*-sequence *of which* has recently manifested for the secondary nature of the timing schema, usu. Associated with the second-period on a simple overtone. Here we see the signal in part of it's 'beat *frequency*' related of a 0-1 and some-numerical relationships of which are proximal. The long-sequence is manifest when the equipment is:

1.) Connected correctly.
2.) Implemented under an-inversion and filling.

Thus, to have the-equipment *old-touchscreen-filter and arduino, sets the recursatory long-period sequence to a* ***single** zero-one for that of certain *a-apportionate* dynamics, for the sequence is in inadequacy of a reverse center of the magnitude for the two key-and-exit.
This either points to a discipline or righted progression of historical relevence. Thus, the entirie process of develop shifts, to consideration of a DAC and ADC, of General PWM, *with these tools, and the components utilized to seqarate* **then** automatically and in-severance from the simple or non-simple reducible polynomials.

Therefore, the Schwartzian derivative, general field theory articles, and length to breadth, of the puzzle of topolgy is indeed exceptionally a precautionary pursuit. Instead, contrastingly, the formula-basic mush be tested, with respept to itemization of the two non-consequative basis told. Setting the 0.1 for that of the alternative with the ratio, is ill advised. The final question is if the social obligation [to which the device must be left plain; electronic; and safe] is demonstrated ***independently*** of the obligation(s) with-use. I cannot stress enough how important seamless integration will-be, as 'money' often leads to vast obligations and a long-network of vias and complexities. A 'set' of **incomplete* blockable* independent and redundant* groups are furnished in 'unit's' of module and via, for the elliptic cohomology and the berry's phase, in relation to a structure of interconnected channels.
Oragami, To the Abacus. [China, Japan].
Mandala, to the French and African.
Colored Pencils to the Computerized Scheme language set and Archetype of Elon to Demonstrativeness of A.I. in and for Adobe. [Mexico]

This considers the design and computational model advancable to the next stage of development beyond the interval of mutual and other concern in residential composite social networking and peer process of Creative Works, protecting the defensive pillar of safety concern, residence, postal arrangements, and social use of the internet, industry, and natural rescources, in education, and in modern setting. The [above] is the developable concept and facilitative functioning of the device in relation to itemized [material function], of medical, industry, and machine.

The second pillar is the facilitative [board of strategem] with blockage and non-blockage, insulation, and a top teir spectral range, but prohibitive of lower valent and co-valent disengage and engage of the auxiliary proportionate index on computational means of operative basis in relation to the [above two]. I am minorly skeptical the verbatim assurrence of a.i. and geometric ledger of scheme-type language but of turtle can function to fully demonstrative works for the future of a.i. technological means beyond my model. This work had begun at the age of six, and continued, to the age of 43-07-15.

Moving beyond the majority-carrier and group model of wave velocity, we learn a few* (some uncertain) things about the Reynold's number, chaos, photonics, electronic minimal coupling in the QED model, and extrapolative features of circuit design. The technological 'bridge' is a compact series and parallel stream of lumped elements, that 'interlink' and support varietal computational and algorithmic interpretations. One interpretation suffers from the idealization of the impedance and it's reflection and transmission of waves and reception through the linkages supported by wires, for the optics are only birefringently coupled diffractions

sources and contrasts, but this is essentially a hybrid optical and electrical gate.

The question as to if it could be considered a Inozotosemev model following Kodama relationships if one appeciation for the theoretical science, and as to the relationship of the 'universal quantum gate' is a question yet to be fully demonstrative under this guideline. However, it is true it obeys quantum principles and electromagnetic principles, as well as wave principles. In getting away from this wave-notion many people of our planet were entirely misguided, as well as the 'appoximative' notion of tolerance.

The three (**3**) main-pillars of what will be developed *(are as follows*):

a.) An instruction set and language, for in a collection of symbols and vernacular.
b.) The method of a design process, for set procedures on the collection of symbols.
c.) A resultant theoretical method, for the understanding under experimental procedure.

The method is as follows; (*the result of the design is catered to these operations*):

Cavity-Mediated Entanglement of Parametrically Driven Spin Qubits via Sidebands | PRX Quantum

The language and vernacular follows *from*:

Low-Depth Unitary Quantum Circuits for Dualities in One-Dimensional Quantum Lattice Models | Phys. Rev. Lett.

The suggestion that the device [priorly provisional] *would not work as-intended* *was; indeed valid… *for*; the relation of the ttl.xcl was unincorporational of the *heirarchy of relations.*

The ***new** device, as-principled [includes] a basis by of which the *random and probabilistic are co-determinant.* This ***new** suggested device, (includes) the relation *of* a ttl.xcl, the relation, *therefrom*; of which is the '*breakdown*' of the various *charts of Fermi-Surface Geometry.*

In it's *constitution*, the new device relates *via constituative elements*, of the *varietal* base-polyhedra, *to-which*, geometric interlogue *relates via the hand,* to a ***principled** basis* of inclusion and *dis*-inclusion of *a charted progression of which sketches a psuedoprobabilistic evolution of dichotomies, and their* ***naked** resolution to *mathematical category relationships.*

For*; *this basis*, we only* require the base supposition of *canbus and adc/dac* with small and subtle alternation. *This is the final change for the new rendition, and devolves only* from the comparative of statistically informed basis.*

*Thus, analysis follows one charted progression, the remainder of which is acknowledgeable precept for the relation of antecessitorial declination.*

The Canbus XADC-FPGA and ADC/DDS potentiates a 'basic-procedure' of one and one category and elements, in one and two bases of the progression of the readout. This is amended via* two-principle(s); that of 'through' and 'stacked'. Thus, the relationship of one and one in one and two, of second and primary tier, demonstrates the realization of a complete readout. The 'area compared to the zeroth dimension.' Thus, the probabilistic odd(s) may be discerned in-relation to singular 'throws' via the progression *of;* the pattern of Pascal's triangle in relation to the Poincare conjecture *& bias* in relation to complete aggregates and singular signatures of pattern in relation to inherent and dispossessed determinant accounting. Thus numerical returns on dice and runes.

Then, the transceiver, the modulator, and the isolation for the bridge, and FGPA/RISC-V, and such, process for the A.I., a process of angles and amplitudes into and from the relationship of the optical-cell. This leaves a priority to the extensible fresnel of the lens, to adapt the process of 'reading' on behalf of measurement (*inc.* random event(s) in **binary-(0|1)-reading**. The result is a counter-sensor of an entirely new innovative design, that is programmable, adaptive, and probabilistically interpretative. In finality, the result of the 'simple path' to 2-1 from analog sensor to digital amends the possibility of a properly suited fit between theory and experiment, measurement, and process of data-analysis and procedure of operation.

The prior transceiver and modulator follow for in a phenomenon of the principle of which is related to the algorithmic basis in the arduino* code currently implemented, in use. Thus, the qualifier (it is reasoned); relates of the basis of the algorithm, but, furthermore, the device as such must be tailored to the use of the 'conventional' equipment (for sale and manufactured); and the basis of what I have innovated. In this, it is not-only a style of implementation, but, develops as it's own incarnation of potentially a very important purpose and role.

The justification, is that a dual-comparative of the two* principled bases of approach leads from a composite, to new developments in the field. Thus, this is the committed approach to analysis, and separation of which furnishes a order to chaos double-poincare chart with capability to discern patterns, and account for probabilistic outcomes.

In the progression of equating the 'data-baud' *'loosely'* understood by 'portion, element, structure, group, and partitioned flow topologically' – *the mixed-result of CANBUS and ADC-DAC does not essentially regularize to a rational exponent in relation to product and workable assembly with industry-standard part(s)* – something therefore, it was reasoned *is essentially missing from the study of electronics.* There is therefore an entirely new problem to resolve and solve, of which is based-empirically or theoretically.

In-establishment of-means to articulate the 'Platonic Solid's' to the process of computational science, the articulation of a blind-inferential dialog, is the breakdown of probability to the various polynomials of which relate of the numerical entry in-relation to (#)-*number* and (*)-*probability* in relation to apatterning. This alone is the common determinant in the process of their-collage, - that the device should be capable of discernment of (2) from (1) and the nature of the solid, in relation to a catalog of inferred probabilistic dialog and thrown-die, thus a 'reconstruction of the basic statistics, furnishes an interpretive result'.

In consideration of a 'safe assurance' – the 'switchable contrast' must be an-update of a second assurance, *indeed*; for what is a neutral-pre-qualifier on 'downlink' to-which there is a nullifiable exponent, power, and product-rule. In this, we find that if (and only if) *as-such*, is there an unqualified variable in relation to a *post-measure & measurement*, of *indefensible contrast*, when-thought of … 'a placeholder constant among two elementary guides in a constructed potential' – *there is a switchable protective measure in relation to the guide of alternative in-bearing.*

*As*; there are different orbit(s) & the-derivative is understood *in relation to physics*; this device is mappable to a *Historiological Reconstruction in Mappable Exponent and Inference of a Chart of its Progression.* For that of the evidenced (3-2-1) on-presses, or *Event(s) of Detection*, it is ideally situated as a *Musical Instrument.*

*The Orbital Relation (of Relative phase*) and Radius, articulates a method of pattern, then that the various orbit(s) relate of the various 'tone's' in relation to the 'cast of dice'* – the reproval of fatedness. Thus, in-relation, these configurably represent identifiable structures. The 'entropy map' relates of the weather, and charting it, - *relates of historical work* – while that of the input and output *relate of ecological prey and predator.*

The ADC/DAC (*2x*) – leads to a relationship of 'hybridization' of the order, and the relation of maximum and minimum, on behalf of a spectral reception in channel A and channel B, - *thus the resultant location is determinable from the two input(s) and two output(s), in similarity to the analysis of an 'x-projection' and 'y-projection', in either of two* (**2**) waves of coherent nature.*

*This is dissimilar from the tuning methodology, for which we must involve the frequency and period of the waves, of the varietal 'captured timing' of the intermediate-period, by-which a lateral cross-section may be observed.* In this, without manual supervenience, the path to design is made difficult by the relationship of 'overlapping' (doublet) and (doublet) with equipment and screen.

Initially, the device was 'felt in relation to it's mode(s) *on intuitive grasp, as theory was developed.* Now that I have a clear, responsive understanding of the device constraints, there are various (categorical) methods to-employ. First, I will have to get the wiring completely correct, in a schematic-diagram, for that of also components that are functional, in both component value &- tolerance. This is justified, and so-is the

relationship of the disc, to lower frequency of what-is the signal for the various 'bottom 2 Mhz range'. The justification of finding the remaining values of components remains a scientific practice, and* *the varietal relations of* **ideal** *mode-relationship in relation to optimization.*

The established wiring seems sensible, but operational amplifiers must be updated and purchased, that of bread boards, and the sufficing means for the auxiliary equipment, and the 'DKRED' with digikey, must be likely purchased and left as a priority.

Finally, the 2-1 on the Exp and Norm, of the skew and non-skew hermitian matrix and transformation *nature**, must be understood, and applied, for the workable nature of switches, and the demand of the interoperative theory. Indeed; the transfer of the device to a study of two work rather than one-dimensional has been entirely unique.

Now that my study of superconductivity is finalized, for that of a procedure to *switch* conditions of causation, and the *main-mode* of an inquiry in sociology is completed, *the results of application*, to various fields and in the real-world, must be anticipated.

The language has been of a preliminary development, and scientific study is discerned from the theoretical and engineering process that was followed. Secondly, the 'symbols' are understood somewhat by primitive means in various texts, for the bases of enumerated result, and limits exist theoretically in the various fields, due in part to the results of 114 years prior and so-fourth.

*Primary Postulate:* Basic-counting is dependent in it's nature on a comparative of group and peer-representative.

Finally, *I came to two possibilities for artificial intelligence in the counting theorem, for of implementation on what to-design, given* the constraints of the problem, the 'ethical and moral consequences' and the relation of the hardware to one or more peers*

As it is **there are two answers to artificial intelligence**.

a.) Considering a problem, in-which there is a numerical (1:5) and (4:48) (for example) of count, there are in principle two-answers *for the results of the equipment given (1) (2) and so-on of-peers, as based on theoretical mathematics in relation to social problem.*

1.) One, is (4:53) while the alternative is to-section and determine in 'each' separably *post-hoc.*

2.) Thus, *a count depends on indistinguishable or distinguishable and recurrent, or allotments.*

Thus, the basic condition of the process in-which counting may result in an outcome is the only boundary before us, for which the result yield(s) fairness in a consequence of games and memory, for of my life experience, the result of which is a social and individual procedure or an individual procedure. This mere result, that the results may differ with multiple people, is the knowable element of a theoretical boundary.

The design of Raspberry Pi Zero's and implemented 'CAN-Bus' with a 'Labrador' signal generator & scope, (for of representation and genesis) remains (here) a design of which is qualitatively a reasonable balance of the need's of the equipment to satisfy observational limit(s) and operation of the qubit, and produces an element of qualitative satisfactory design in investigatory means of the the overlap between quantum and classical spheres of understanding in electromagnetic systems.

These systems, are dynamic, so, there are (within the stochastic relation) a few considerations and need(s) of central aim.

a.) To utilize a preservational limit of switch-comparative-observation and calculational technique.

b.) To introduce limited error, and refine the notion of orbital and dynamical ‘step toward cause and effect relationship’ and provide for a reproducible study.

For these needs, aims, and method of development, we must follow a guideline, to illustrate the parallel between finite systems and reducible systems.

Consequentially, the provided ‘binary’ relationship is *then antiquainted*, for it’s limitation of sequentialization in relation to error, combinatorial process, calaculable functional relationship to units, and timing relationship, through the understood limit of a 2-1 step for in bifurcative (non) system topology and interconnectedness in 1-1 of cmos.

The need’s of the device, are for the reason that current technology has proved unsafe conditions in insurable end of secure means to information, and are indeed developmentally somewhat costly to unprovided of means to understand their operative mechanism. Secondly, these technologies remain with a fundamental limitation at computational process, that is ill equipped to master the nature of ecological care.

*There is a final-question for my device.*

Applications:

a.) Telescope.
b.) Printer.
c.) Device Physics.
d.) Post.
e.) Cache.

**1.)** *Question; is the quantum unit operable through the transfer of PWM-’data’ and execution-table, separately (as to consider) from manual-operating means.*

*Means and measure, for what they-are relate of the ‘auditory phonon and metal Hund-model electron phonon’ as to a theorem of measure, relativity, group velocity, displacement, and soliton theorem of Fredlhom alternative in relation to phenomena and phenomenon.*

Consequentially, the device need implement three behaviors to be Quantum:

a.) A switch in x and y such that: S_{x}S_{y}-S_{y}S_{x}=S_{z}; S_{y}S_{x}-S_{x}S_{y}=-S_{z};

b.) Sinc[nx] such that the frequency balances the quantified ends of Quantum Conductance, with frequency and transfer/transition of element like (monic) basis unto spherical symmetry.

c.) Quantified divisions of non-constant *f*, with the variety of modes of which are distributive such that admixes exchange a ln(2) geometric *entropy and dynamic entropy*, with paritionability.

d.) Sample per frequency [ranging and selection] in Sinc[x].

e.) Sample in measures [pickup selection of frequency] vs. Time[n].

There appears to be a limitation to classical expectation and observation of a Quantum Bit.
For a reason, [knowable but unknown as of writing in this moment].... The expectation determined in-slides is not persistent, but; - quantum in nature to commutativity via geometry.

The shape of a quantum bit.
The properties of a quantum bit.
The 'transience' of a classical bit.

Scanning is possible, and via holography, nets the entire space.

Hysteresis, Repetitional, and Non-Germain modes.  How do we measure these.

S.O.S. tailored to the new generation of technology, (as to radio, etc,... beyond Eton).

Then; experimentally benign engineering examples and function of it's analysis in situ.

a.) I would like to facilitate a function of working on an S.O.S, to tolerably help in an assistive struggle for function of the internet with coded and virtual-hardware technological means, of hard-and-soft wired', and coded programs.

b.) To function in relation to initially moving afar (s.f.) or (etc.) in a relatively secure and loving relationship (but of a promise to seek one, and work seeking the other), alt*-one is distinct of these two, and workable by one premise.

1.) To facilitate function of AGB, and of-AKM, in that of Amanda Koci's wellness, post-ideation, and of-AGB in post-coma, or incapacitated human rhythm.

2.) Motioning to work at Sandia and or Los Alamos, as an educational/UNM assistant in relation to quantum technological innovation and device-physics, and electronics, as in relation to rightly and functionally separate the interest and needs of medical and workable computational technological implementation for security of the united states.

c.) Function of the language-apparent functional deaf-blind and disability process in recovery, and as it relates of communication in facility of demonstrative arts, in relative peace with meditative struggle and intimation upon defensive ministry, in relation to technological conflict, and in relation to named struggle, as in relation to building a diagnostic means to provide a reset function for the net, and of it's preservation in accord with regional debate, and of health and medical limit to the workable condition of needs and necessity, as these relate of avoidance and defensive intention to rectify game theoretics.

d.) Epistimology by the computer with a functional library of 'lookup' pot. warranted action.

For what includes the difference in magnetic field flux (integrated) the 'hall' flux in guass-bonnet measure, is a pre-excessive berry's phase (in the quantum number) in accord with the 'relative' phase established, when we deal with a superconductor.

This proves tantamanout to the loop-meissner state and phase variables governing the displacement gravitationally (of which is -), in accord with the neutral-state of equilibrium in the stable-equilibrium, of-which inductance proves to 'charge' in relation to a diminishing field 'curl or torsion' in the magnetic field, for the conversion (static and dynamic) in relation to conserved rotational earth-centric rotation.

Thus, the body falls under its massive component, and then interacts with a more strongly attributed magnetic field, and electromagnetic energy density, of which cavitates in the hall effect, the reluctance of the gravitaitonal body to 'release' the superconductor. Thus, in doing so, the gravitational energy can be manipulated to the effect of a stable 'upper'-pauli, magnetic positive (+) attractive inductance, with magnetic energy 1/r, and gravitational 1/r in epicentury of their 'upper $4^{th}$ dimensional' barycentury.

The gravitational 'blue-red' shifts the pauli-exclusion to include the berry(s) phase as a chern number within the dynamical interplay *also* consequential in the commutativity of the 'shared-superexchange bound' electron composite in the two-body.

I would like to put out a very-simple paper, on the superposition on 2-1 of the 'individual-electron(s)' versus the 'paired-electron' model, of which play(s) to red and blue minor and major, for the compendium of the forces naturalizing to integration constants.

(+) and (-) to (0) from-which the displacement in-measure 'shift' in-phase *as we approach zero*, have* as extremes the privy of the cosine and sine of the local-crystal in-one, and in-two, the moderate coulombic of the crystal, to e-e and e-p, within the 'red-blue' of it's 'shift'.... This must be included, or at the least, the moderate facilitation of a anharmonic 'shelf' of atomic-exchange.

For this, the (90-180) phase that develops, develops in the microscopic view, from the neutral-0, the ½ comes into play, thus, the (-), in-excursion the second e-, relative gravity, 'exposes a full factor'.

Berry's phase for 180 degree, is 90, for what is an entire '/beta' on the exchange intergral given commutation in the reference from and to (for the two electron bodies) comparable the source of attraction of gravity, in the problem.

The fundamental reason is that the stability of matter, is unipolar, but the symmetry of space and time under exapansiveness is non-isosymmetric with respect to displacement upon what is red-blue. Given the compton and de'broglie wavelength the pauli principle gains one 'entropic delta unit', one bar. The commutation within an-orbit, relates of a deficit in Berry's, this much is compensated in the spin and as well, in gravitation. The Lorentz *contains* of it's in-motion to 'static magnetism' of-it's Berry's phase given the 'moment-Casamir' of it's conservation. The equipment need be considered an E_{8} subset of K_{4}, in various transposes, and duple. The cellular automata of diamond and general-diamond (Manhattan distance) function(s) relate then, of the population and it's Berry's contribution on-current.

The 'regularization method' involves a cutoff. When*; we synchronize and depend on synchronicity & then relate of the 'rasterized process of elimination in-statistics' we can moderate the signal through the noise, such that the circuit *preambulates and ambulates*, suggestive of a *greater bit in it's data comparable the necessity to demand of singular-percentages in the deficit of solid (6-18-4-2-9-8-12) angle division, for which we lose a portion to do with direct amplitude comparable relationship on-depth* ***but** for depth illustrative of the 'moment-signifier'. The question is if the 1+sqrt(5) ideal, for the transcendent numerical given(s) will 'tunnel' through obscuration for the disc. If this is true, it explains ontological and epistomological thought comparable the brain of a mammal. The question is if the ideal', suggests of a given of quantum coherence, at second teir.

The abacus fits into the design as-well, for the equipment of which has a 16x (8x+8x) 'mesh and grid' on the equipment when it counts on of four stipulations on a sequence, and in the additional 'blocker grid, in place, among the two standing(s)....' I decided to *skip on randomness for the 'dice roll'; & instead operate with the abacus and noise model(s), and with that of a '*Cellular Automata*' model.* This work(s) with 'Chess' for the basic translations whether commutative (0x,2x,4x,8x) or non-commutative (1x,3x,5x,7x). I decided [*also*] to go-for the A.I. model, and a reflective screen, for the covering of the basic surface (top, bottom).

The 'basic device functions perfectly well'; with a Guassian *response on the two-frequencies*, for a general Sweep. *I decided a few moment's ago, and a few minutes ago; to relate of* **Two Versions of the Device**.

1.) Version 'A' includes the autonomous model without the Chessboard.

2.) Version ‘B’ includes a ‘base or buttress model’ *with* the Chessboard.

I found the relations are three dimensional and quantized, and it does not prove of all ‘options’ that all utility and practice would be founded on merely a condition of one-indication in two people separated by a barrier.

The operational amplifier(s) have *-only-* a V+ and V- and V_out. Thus, LRC and LRC is a two dimensional problem related to a basic simplified diagram.

The ‘auxiliary’ of-which relates of the basic high-pass filter, need participate in envolutive flow of the (-) and inversion of the operational amplifier in-*images*, under de’Morgan law(s) of the amplifying process of the E.E and E.B, and B.B, with LR and LC of the alternative bridges of the problem, to face a quadratic problem, that furnishes a negative impedance in exact balance for light, ohms, Kerr, and touchscreen.

When this is done, the ‘taps’ furnish a average Morse filter process, and the non-linearity will be fully functional, to all degree(s). The quantization (however it is of the second over-layer and ‘entire circuit’), follow(s) naturally compared to the standard deviation of *null-reductionism comparable the n=1,2,3... to inf.*

The device, *then, can be studied, for three behavior(s) (+) a fourth, with the computer.

a.) Quantization of the circuit given conductance and interferometry.
b.) Bufferable stepped means to a timer-filter in and upon the bands.
c.) Three-dimensional ‘gyroscopic motion’ of a cyclic-period basis.
d.) Computational control and ‘digital trigger’ for procedural method.

The device can-furnish a ‘go-operation-on-latch’ *injective unto chart and catalog for of numerical range-a-quo.*

The S.O.S. need be a feature. The ‘folded hinge and pivot’ is related of two reposes from partitioned quo.

The next-step is to *‘collect shells’* of which on a beach, are collected, sorted, and cataloged, in relief of basic Kamra, as to decay and ministry, Samsara, and elopement from the detail of the ‘classic and neo-platonic’.

The ‘delay and functional assignment of the bandwidth and frontsface of the electrical equipment’ and the historical discovery in relation to *Amiga, etc, on 128 and 1138, details the given of a look-up on the element of securable info.

The ‘bridge in river and consequative sodom and gemorrah, for that of nehlis or as such relates of the first-face of shola, for which the given of a shell and the long-consequence of stone and flower relates of inheritance of Eve, to the natural ending beyond the given of ‘worm’ desipite intial gesture, for there is still experience and spiritual truth.

Determining a radical-sigma and growth-extinction curve, with distribution in-lamplighter walk problem of random ‘brownian motion’ of the *generic computational resistance-capacitance-inductance and transistive power and energy problem translates to an optimization problem when, justified a population threshold, the intimation of the power and ‘noisy domains’ is exclusive-inclusive surjective or a homotopically derived concentration in convexity of homeomorphic and topological organization of feature.

Phase II. B

Including the RG [Renormalization Group] theoretic methods, and the design technique, there is an ***exactly amenable manner of designing mass-distributive systems from the base ‘modules’ down to the specification of components that works for general-topological reasons in L-R-C, and transistive elements for conversion of a plan to an effective design model.

I was *one among perhaps 47 or 2 people *to recognize*, a given paritition between the sciences and engineering of the following within electronics:

The ‘single-ended’ versus ‘differential’ SAR (successive approximation register) functions with the ‘larger observational range and domain’ distinctly (given taps and clock, and line-guage) *entirely for the following rationale and reason, from the manually constructed component based circuit.*

In consideration of the ‘lumped element status of the functional aperature’ neither the single-ended nor differential function as equippable means.

The multi-acquity in third-fourth moment, discerns a complete reciprocal ‘edge-bernoulli shift discriminant’ to the quantum language, as to do with chromaticity and stain in the quasi-digital stylus of analog elements.

I would take as my first role in bearing to innovate a new chip.

*Prior.*

To any of that, I decided to return to-it, and develop for what I know function(s) [for now], with the equipment and the INFPQ and SAR ‘non-latched’ proposition of the variety of equipped means. The ADC of the INFPQ (3x) goes to the chessboard on mutual-input of two channels on an ‘in-breath’ and an ‘out-breath’, **with* the basic-part(s) I functioned with for some-time….. (this forms a carriage-tap and ‘gibb’s formulator’).

*Post.*

In the future: I will need create a MSSOP SMT ‘board’ and ‘compare’ of the two-engineered devices.

I decided to sacrifice my functional ‘entitled motivation’ and seek a parallel (2x of the devices of one* mappable circuit.).

Now, I have about 9-5 (for in two) choices to make with the design and equipment.

The ‘new’ of the AD8079 is an-affirmative (an SAR), but the *old device is necessary, per my explanation.*

Thus, I will need choose between circuits.
I will need choose a function to-model.
I will need make a *few choices of components.
I have similar choices of a limited-number* of the basic wirings.
I need ‘link’ the topology and connectedness.

*Post.*

[db15]-[bomber 3x2]-MIDI.

25, GND 2x & 3.6 V . 12 V (+) 12 V (-).

Serial-CANBUS [opt].

Switch.

1.) The computational unit, that I developed, with the computational workmanship (credited) of computer(s) with this world, was at (@) particual numerical intimations, registers, and relationships unprohibitively regardant of the fair odd(s) in a discernment from the qualified non-mutuals (+/-) of negated operational mechanism of these electrical and magnetic dissimilar versions of equipment and singular (now mutuals) character-chart.

In some sense, it was operative in five unmutual categoricals among 22 differences in discompletion and issuance and remote (insular singleton) of non-pathological symbolic retentive standing and level.

2.) The equipment was varying among a variation upon an integral-differential non-harmonic and harmonic condition and co-qualifier of instinctual or (engineered) functional uncarry and carry.

(MST): I began today to install Ubuntu on my two Raspberry Pi 5's.

I found the 'go-game' of procedural languages contains for it's inheritance of game-motions a saturable procedure of inheritance of laws and rules for some of the 'blocking' of the A.I. model and chess-device design. This illustrates a wonderful composition of rules, for which the 'winner' is expositive.

Then, today, at (@:06:02 am) I began to be capable of [immodestly reasoned] thought again, while before there was much-random and discomparable 'noise'.

***Solution:***

Considering the 'ttl-rx' with smaller-2.26 ratio interval on-period and the 19.24 ratio to 5.76 to 12.58, excludes the relation via retention with the ttl-rx and a switch on the 2:1 pole and 1:1 pole-zero.

Alternatively, I use the device for *polynomial mathematics concerning an Eisenstein series, in exploration of observation.*

Process on the s.o.s., relates of a 'quite primitive basic series'; while relating of polynomial-and-group relate of procedural bargain and return, for *with the equipment what is black-white cover.*

*Entirely, there need be two, but* these resolve to interoperatively determine each other.*

Thought Experiment;

In restoration of a record, based upon *social model* and financial ‘copy and exclusion and excursitiveness and disclosure’*; among two of the net and the equipment*, with model-dice, the third is correlative in-murder or defense, in blind.

There is a 2:1 copy on the local of both places, situationally to a ‘different game’ of the same arrangement’.

Pin (1) of the AD8307 is ‘in V_minus’ to which is out* comparable the ad6172. So, in including Pin (4) as ‘in’ (which is out) the negative inverted* of photodiode *feedback* went to the AD6172 under moderate* amplification but* forbid of one for six topologies the connectedness. This means, the ln(2) of it’s ‘supply’ had divided into equals returns of oppositional (-) for V_A and V_B for the two channels, as the AD8307 was operational, and ‘ref’ was zero.

This circuit, with the composite other circuit, mates of a ‘mask’ comparable digital assign 0 and digital assign 1. DC_ref.

Reasoning the parabloic AD8307 stems from the reluctance of the cap and it’s transformer on the neg_v_ref with the trans.

The essense of the two-dimensional ‘bit’ is two-ideal(s) in the extension of a ln(2) ¼ and 5/6 of distinction in the lateral and the horizontal as to vertical saggatical degree per apradian. Degrees per apradian is a measure of fidelity.

The device-innovation has matured, and I have understood I am not good at academe.

I moved on to innovation of a new kind of telescope.

This works in the material-sense like an optical-ranging photodialectric with measurable and confining measure of ‘lens-aperature and perimetry vs. isometric projective median’. The ‘secondary moment is materially the function of a six-tendency rotating aperature in-function of the supplied rheostatic and piezeelectric/dialectric and photoelectrical semi-transparency of a ‘lens’ to a Kerr effect.

This then functions similar (but not identically) to a fiber optical pan, for which the relationship concerns a life and death curve of logistic origin.

This functions to measure the temporal-period extension in-median of the functional relationship of exposure concerning the degree in radian of the phase-volumetric extension of the perioptic perimetry for which an ‘arc’ is co-similar in timing to a Berry’s phase synchronization of ‘selective view’ for two or one motile lens-distancing directrix to focus limitation on sense and perimeter.

95 *is* essentially 30 & 5 for consequative and imparable given’s. Whence 15 is doubled in 18, the ‘10s’ in algebraic copy, release from the *tertiary* 30.15 to 38.525 and interpose in 5:8, of the ratio-tine of a wheel.

This ‘carriages’ of the cyclic nature of pH in function of a stereogram, functioning to disencarriage the co-copy of it’s non-provisionally applicable and appeable 5th conchordant dysrhythmia.

O. and T., - The ‘patch-basis ‘**The Triscut**’’ is *Two ***double AD8307 & LM6172;*** [a power register and operational amplifier] of 2x of ‘easy form’ and 2x of ‘leveraged’ accumulates a pre-initial pulse to (1) in ‘double transpose ‘**T**’’, as then of one stage, then *intial patch extends* of these ***In-Copy**, via (4x+4x) *to an 8x0|1 unpatched of **AD8307 & LM6172*** to ‘yield-and-multi sum the channel in a 54321 ‘patch-co-traversable unity group compared to 12x5 as 60.38 in %, in *binary-byte*, to a map.

AD8307 (2x) and ‘braid (+|-.-|+) *transpose asccumulation 69.70.5’* with LM6172 (7x or 5x) spread-combiner defaults when the ‘wipe-DC’ proportionally of an equivalence in 0.1 unmutually contrasts the

Triscut, to a (2x on ‘disc’) with 3rd *tertiary [on].*

8x & 16x to (4x switches and a fifth).

Genuinely proving disinterest is not a negative affirmation or insecure motivation unto entitling provided ‘wedge’ to the function of a picturesque motivation in counsel.

In an affirmative, then, the function of a disproportionate allocation interests the relation of a functional relationship, but of the provision to mutual unaffordant and self-consolation of disaffordance of means and rightful personal space.

Thus, a marginal accumulator and combinatorial compensatory deferent and single (to advance non-mutual unassigned disconcessional rationalization and recognized catalog of defaulted prosperity in non-selective minor-memory carriage) need be affordant of a non-textile (2-1) and (2-1:1), sectional reverse strut and bypass. Thus* a minor-key of all-three of the worldly provisions for the advancement of money, does not entitle a heap, but is functional, to which the agency of the accumulated major-indefensibility is workable, but* for manual switch. Thus, two combinatoric gates establish mutual reverse functional and unitary reversibility. [This hold(s) for CA, Hardware, and Software].

I very much *then* need merely code a ‘seed-run’, for switchable [as to consider reset table assortment] of the categorical envelope, of *partially reversible cellular automata.*

Taking the photodiode to a linear-negative gain per measure, to mean, functions to add under negative feedback a long initial ‘tail’, of it’s on-tan-delta on-target roam and feature to x-y, in \theta of it’s \phi per 60 degree revolution on chirality in-proportion of (3-1=2 [rms]) inline and ½:2:1 in amplitude of phase tan delta, with stereographic projection, the tan(delta) and coth(delta) relate of a summative-dc-f*lambda*’alpha’ or ‘beta’ in (alpha^2-beta^2)/(\alpha\beta). alpha^2+beta^2 is an exp(-i*omega*t-x*lambda) with ‘I’ for the switch [under the ideal of the photodiode-shottkey-led] and transformer-transistive triple 5-2-1 on 38:11. [case in point 15]. the alpha*beta is a majority carrier photonic to electronic mass ratio, to which it hyperconfluent-integral relates alpha*2*beta in determinant of a singleton of the carrier-charge unit per switch at regular-impedance unit ratio. This obviates the need for one tertiary R[theta] in the spatialized unit-ball of a spheroid, as the aproportionate typical unit mass is of a fermi and bose factor of ½, in relation to the two equipments.

The ‘hemispherical smith chart’ aproportionally balances therefore the ‘up and down arc-tine’ of two non-mutual switchable dc-ac bridges in compendium shared over a pathway and topology of circuit connectedness, then as-such the transformer serves two purposes.

Now I need include the computational arduino and then, Portenta, for the purpose of identification with the equipment.

This may serve to standardize functional license of the equipment.

‘**A**’; Check (2-1) adhere on-release, post timer (regular) and post-trigger *[auto].*
‘**B**’; Check bufferable ‘C’ on-release, ‘tap timer’ (regular) and post-block *[manual].*

‘*adapt*’: S.O.S. [?|#|?]:[#|?|#]. ‘ideal matesman strategy’ on 69-70.021x’b’_x’C’:[0|1].

I decided the ‘a’ and ‘b’ should in-fact go-adjacent, with a plug between them of variety points, of the ‘vertical linkage’. As it plays out in practice *this is one way to think about it*, but as-for the device in place – *in real terms* – the device has a ‘ribbon cable’ connecting the two double sided boards, with a more advanced topology.

This then relates of the ‘graph’ of the P_{3,2} (x) K_{2,2} (x) P_{3,2} (x) K_{2,2} (x) SO(3,1) (x) SO(3,1) (x) SU(2) (x) SU(2)

8+8+10+4 : 5, 10, 20, 50, 100 : 3 – 16 - 7 - 81

I decided in the end, to do an ‘optical interlayer’ Amiga for the ‘bridged equipment’, with the Chessboard. Parity check on Amiga and the Optical-disc(s). This should standardize to a conventional computer, capable of robust computation, with ADC, and so-on. The device operation may be manually reset given switches, but potentiates a basic process and simulation.

The only*-questionable attribute, is if the basic-cellular-automata model diverges here…

To transcend the law of probability, and the guise of mathematical sigma-average and working-average, the disparity for a general ‘central potential’ in brownian time, is affixed of a return concentration of the painleve in relation to a wronskian of the inhibition to co-cylicity of the convex bainaci space of the upper toplinear matrix graussmannian summation on the vertex model.

The result is from a deep inquiry into the Projection Formula and the Gauss-Bonnet theorem of orientable manifolds.

The situation ended in a copy-no-copy of ‘make-and-console’; for of a 0-1 decimation via alternative acquisitions under tables, of which non-defensible, in-trust of what is decidable [but for the random] a provisio and makeup condition under consequent 0-1 non-futureative past orientative departure, then that in a guess-1 correct, the roaming piece intimates an on-selective deprime, & of which the 3-2 ‘tap non-said’ intimates a aggrandizationalist trojan-horse lemma of singleton.

*Then*; I thought of an ***extremely useful idea***.

This is the following; relating the A.I. ‘model with text-lookup on my notes’ *to the design contingency of likelihood of the varietal and potential array-configurable electronics devices, will render perhaps 22-6|4 model systems, that all hold logical order and function of the inter-comparable ‘Platonic’ assortment of properties.* This method-relationship tunes down the effort by a substantial degree.

S_{x}S_{y}-S_{y}S_{x}=iS_{z}; *etc…* of (+) and (-) and m^{2} to m(m+1), and ‘I’ or 90 degrees rot, mult, and i*i=(-) all* of-four integrably afford a binary-analog crossover *with* a y=-x and y=+x in secondary ODE-PDE, and the continuum of the control structure.

Encoded ‘correctly’ *for of example [here] 15-16-18-20 or 17-14-16-15 on ‘lump of four in integral and derivate space’ algebra for a ‘secondary relapsative process’ – holds an integral ‘read: hash check’ pattern placing to judgement(s) on a qualifier in game-consolation and range-function as for example 38-55 and polygonal hash check, among (–1,+1 etc…).*

*Essentially a (+1|-1) for a (+1|-1). Biological need and health disability and handicap fall under a distinct licensiture co-compunctual leniency of (–1) in split-proceeding for of two co-accessorizable conditionally suppliant contaigens.*

*Of ruling it is (+1) and (+1) co administrationally suppliant of over-yield to a consignment policy in relation to criminal action of guilt in proceeding.*

*The explanation of engineered and engineering is the example of an effective and developed model for an effective way or means to thinking as it applies to the real world application of means to establish orderable or ordered consequence from derived, hypothesized and simple methodology of technique. When it is explanatory, the derived circumstance comes beyond one ‘series’ or version of technology – to - the application of motivation of produced ideas that depart or retreat from alternatives ‘as suggested’ when the derived strata of the developed medium faces interruption of development of the status quo model in the ‘tension’ of design to process.*

*This momentary discouragement, as it is often, faces the co-explandum that the creative instinctual phase has ended for the hesitatly unimpoverished but discouraged to encouraged for the distinction of produced*

*design. Producing the qualifiction of 'reward function' is a very necessary and equative exception and rule to testing, repeating, and exiting the phase of development for design reasons alone, of which is often an advancement and notable theoretical bridge from the first nature of engineer as applied to a functional profession.*

*This is for the reason that efficiency has aa a co-accompaniment of the residual and conservative process, that which strips the means of the intuitive grasp from the means of the explanation of the catered project to serve to the means of survival, application, and necessity, since earlier and ancient times.*

*Thus, the suggestion of the 'status quo' of engineering is often bound in the works of creative and adapatational tension, and it is often the nature of a 'testing ground' of new designs, beyond the simple educational models and test equipment and prototype.*

*In this work I have finally moved beyond, then, consideration of testing and began to do the actual work of effortful design procedure as this works in a dynamic process of developing models, testing, and a new entire suggestion of the basic model of current computational design.*

*This process must be:*

*a.) Initially the function of a basic model for the 'scheme function of shape and geometric progress, elements, and the functional unit's of the new phase of a particular work functional as a knot and turbulently provisional differential equation to algebraic bridge.*

*b.) The capitalization on the basic efficiency of the equipment to furnish a new switching element as 'knot's of binary in concession with differential nonlinear equations' evolve in relation to a hills scheme or kolgomorov model with pell's and the hypergeometric function of topological and graph nature.*

*c.) Finally, this model is utilized with cohomology to design the process of a mesh and geometrically aligned and learned catalog by modern computers in relation to tailored designs and creative adaptation from note's and confidence charts and intervals, for which prevalent conditions relate to the burger's to hill's function as this evolves in a synchronicity of binary and analog.*

*This process then is adaptive to all natures of filter, network, and conventional equipment in linear to non-linear circuits and binary to analog synthesis technology. It is disinct from synthesizer technology as the consideration of the component choices are unique to the design and automation procedure used to create utility engineering products as these relate to the Internet of Things.*

The 'bias-beta-likelihood' vesa-bus cmos-entry-tap depolarization gate supplies a negative inductance to the primary and secondary skip… /log((a-bx)/(c-dx)) local differential under swappable 1-aby.y' and alpha^{2}-beta^{2} unitary.

In understanding the device today, *for what the general idea of mathematical inquiry suffices to introduct of importance* [in relevence with computational model, and to venture an assumptive of ideas to apply of which relate of real world utility and bearing to study in computational advances], and of the notion of adequate 'level of application of design in elegance' the idealization of what must be innovated to explicate new modes of discovery; motivated the idea of a new attribute of design in general simplifying terms. The idea of using (2) or (4) of the 'disc' was put fourth, as well as-that the notion of the a.b and ^2 under reduction (Berry and reduction) reduces the problem by an engineering modification to the base connectedness of the equipment.

These means furnish (with 2x or 4x discs) ideas about **how** the ideas should be implemented of which when done adequately relate of a \log and tau_{1}/tau(2) of which are proportion free to variable in logarithm but for phase. When* as-such this is done, the Freldhold-Integral-Alternative-Invariant problem suffices to resolve the ode-pde system, and the mathematics holds purview, to which the 'integer problem' is base foundational. Thus, in order to resolve the aim to real world example, it suffices to 'amend' the engineering problem, so that the mathematical model may find it's best and simplest implemented means, despite the absence of certain 'missing attributes' in the 2$^{nd}$ level of mathematical depth and inquiry.

In 24'; a petri-net (of an enclosed tetrahedra or various platonic solids) of all* but-the-greater dodecahedron and icosododecahedron intimate quadrature-discomparative of in each-order (but of these in neutral-disparative pattern of their orders) in each class-function of the degree of the rational exponent minus egyptian lemma, of the order of the preceded incurrent 'pitch-parity' 0-1 of-but the classification (as solid polyhedra) under random-non-random lobosev-cartier derivate the adjoin-pitch in one lesser per gcd-lcm of a non-two but three including four fold (non 1-3 (one for three but of Betti) deRham cohomologous orbit in direct sum (minus a missing* wildcard) – of the denominative two multi-univalent apatterend in div 2 of it's cohomologous orbit under mean-in-convexity class of it's degree of square-minus-a inverse rational exponent under a summative of the accorded vertex number, *but of dual graph – then excepting non-directed unipolar manifold identification.

Patching a mozaic-quotient and graphical 0-1 nand, and, or, into the program hierarchy-residual and compable union and difference in pattern of logical polynomial group under series (Taylor-Lie) with optimality on Lagrange and Hamilton of top-bottom pillar and auxiliary *to* black-white motivates a mutual cancel in archetypal of life. (/).

Directly connecting a passthrough of an ADC (which is ttl or cmos and low on it's impedance of out gate), shorts for in high impedance of the input – the output, for that of 'stepped resistance in power with amperage'. In relating of the this problem, it must be resolved to lower the amperage-current-impedance to a short to a stepped inclusion, thus, the 'check-gate-switch-as-xor' may furnish a step-latch as to resistance through an optocoupler.

**Pillar I:** *Consequence perveys to the appreciation of consolidated unit's purveyant with harmonious signatues, data, and their resolvancy is co-dependently provided and arises due factor(s) of geometric volume and density, for which the facet of detail, exposes the relationship of a derivational progression from one co-temporary end to another formatively providedly provisional and attributed localization in demonstration of measureable means equated with the successive basis of approximations meeting unattributable and exact fit to a suited example (then an exemplar) of equipped process of discovery.*

**Pillar II:** Then and therefrom *the basis of mathematical description amending the providence of the workable and on-interval selective 'group element' providentially supplies then a justification the unit-basis of the quantum factor(s) in it's resolution to limit(s) is prescriptive of properties of finitely rational quantified measure, in relation to the gestalt of two-fold and higher relationships of un-admixtual and pure harmonies of qualities in resonance of varying prescriptive degrees.*

Picturing the disambiguation of (5) and (&) (4) is an entitled emptiness and non-category of (*for a category)*, that of the 'interrupt' concession (plausible but non-ambiguative) with computer(s) to the (4) ***four-fold*** intersemic and it's motivational (contrast of given defaulted or undefaulted) co-ancillary contributory principle basis of yarded and 'plat-measurable' non-co-extremum of 4-1 for incurrence of discarriagable end addendum upon every contract.

As a result, with most of the prior research completed, and here and to the future the research with implementory basis in question and application, the question becomes how to test these two-Pillar(s) of the gate.

1.) I must offer a way to understand if the 7'-basis may*-reference the categories of the varietal-shape and depth of ideal beyond abrea, of not the model of single-bit in parallel series, but of interconnectedness, for a basic depth and volume in higher dimensions.

2.) I need to test the code with the basic switch for the next device (among five) and finalize to comprehend if code with ADC-DAC will indeed offer a way to access these modes, and swith particular modes in particular inputs.

I am looking for a grand moment. I should be precautious of the aloha-condion and FAA and radio channels, as to if there is any *primed (ah) Hammond…. Basis of 2-1 in quantal. I was afforded a new possibility earlier today and recently.

When related of dialog, written expressions are distinct from verbal associabilities, as-to-which the experimental sciences are distinct from work. To associate by means of ‘technological need’ is then a givenly provisionally ethical practice in economic measures, as ecological need is distinctually unforecloseable, a given alternatively provisional condition of experiential avenue of a people, and in the view of relating technological risk to ecological health and prosperity. Advocacy of this ethically sound basis of ‘window’ functions then to provide aim, by the progression of separative law and law co-conditional assurrances given surveyorship, practice, and guide of a functional ‘written’ text in explanatory means of laws in association with biology and it’s extensions. As a result, separative feature to administrate by an executive motivation concedes to the function of law enforceable conditions, and the preservation of naturalized survival of people and co-ecological endeavor.

Phase II.c. Began.

**a.)** 16-20 year(s) from now [a dedication of some 8-12 years] *The next parallel.*

1.) A mathematical 'technique-table' - in substitution for decidability, that admit(s) us to produce a 'lemma-style' for the decomposition [based on group... etc] - and Airy, etc, i.e., at that of statistical/geometric law(s), which take and translate the meaning of mathematics.

**b.)** Percolation and Electronic(s) [why electronics and which*-devices works] - that of the Mermin-Wager theorem and gravitation (1d-2d-3d-4d-etc).

**c.)** The commutative and Fisher and Bayes, and the connective *group features,.... ways to reinnovate QED, and secondarily explain the Topological character, etc,.... through a monic, and the (exponential/etc) - geometry and algebra..... and set and Lie group.

**d.)** Superconductivity and reading, Hume(s) Fork, and Law, and various* Studies.

**e.)** Homotopy invariance and Cohomology, with the Painleve, step, and associated 'tier' of result(s) regarding the 'master differential equation and superposition formula' as to Various* mobius and such regarded 'group theorem'.... with various initial conditions and solutions.

**f.)** Computer; vertex and 'node' discernment; placement and process, determinant learning depth theorem, and linguistic meld and separator in Godelian Incompletion [credit(s)] and basic [**code**], *Law* [basic/biscuit] *memory, and *Group *depth theorem(s)*, virtual/hardware (70).

**g.)** Projective Algebraic Geometry and **steps to assure engineering navier-stokes and Painleve variety [steppe, and non-steppe] - meld/cray* - Re-purify my sample between firings.

**h.)** Quadrics - Algebraic Projective varieties - [mature] - 1/2 and zx^{2}; coordinate Lang., and thermal conductance, guide *laser* [**remote safety**].

*We have* the transformative symmetry, and* we have the derivational equative "solution".*

*Robe and Role of personality of piece, in playing positioning and placement w.r.t. the 'board'.*

I decided to divide my work on the device into four parts and sections.

a.) The Disc.
b.) The New *(secondary)* model.
c.) The Analysis.
d.) Assembly and Soldering of one-Circuit.

1.) Marine Wire.
2.) *28.18-32.18* 'Parts via Mother.'
3.) Platonic Solids.
4.) Lesson of Obstacle-Blocker.

A question that has apparently been resolved for-me, is the way to 'subdivide and control and vary' the relationship of the input's to the outputs. I will need parity encode, and, relate of procedural input.
This situates me 'prepared to work with the ADC/DAC of the four and two of the GPIO that I had purchased. For this purpose, I am ***not*** choosing the device to cater to a 'parallel instruction'; but instead a forward to end construction on encode-decode. I am not sure yet if this is facilitated to the direct method of dice and reading with switch, *as I have now planned.* This question remains, and the question of the device which can cater of a variance-kurtosis on the gate to it's displacement. The intention is to test ***just-two** of the responses to the various odd's.*

For these purposes it would be important to understand that by relating of switches on-sectors, a model of dice-casting can be enabled of which doesn't 'cheat or bargain, and is not compromised by efforts to curtail the nature of use'. *This lessens the conflict of interest, but a general ideal on the intention of the switches must be understood and studied.*

The final question is if the social obligation [to which the device must be left plain; electronic; and safe] is demonstrated ***independently*** of the obligation(s) with-use. I cannot stress enough how important seamless integration will-be, as 'money' often leads to vast obligations and a long-network of vias and complexities. A 'set' of **incomplete* blockable* independent and redundant* groups are furnished in 'unit's' of module and via, for the elliptic cohomology and the berry's phase, in relation to a structure of interconnected channels.

[Laws]

a.) I would like to facilitate a function of working on an S.O.S, to tolerably help in an assistive struggle for function of the internet with coded and virtual-hardware technological means, of hard-and-soft wired', and coded programs.

b.) Epistimology by the computer with a functional library of 'lookup' pot. warranted action.

S.O.S. tailored to the new generation of technology, (as to radio, etc,... beyond Eton). Loss of a condition in the supplied notion of the prediction and status in indication of the measurable wiring functioned to pre-allocational function in the non-condition of the law was of no dysfunction, and triple*-neg was gram-negative.

The three (**3**) main-pillars of what will be developed *(are as follows)*:

a.) An instruction set and language, for in a collection of symbols and vernacular.
b.) The method of a design process, for set procedures on the collection of symbols.
c.) A resultant theoretical method, for the understanding under experimental procedure.

The method is as follows; (*the result of the design is catered to these operations*):

Cavity-Mediated Entanglement of Parametrically Driven Spin Qubits via Sidebands | PRX Quantum

The language and vernacular follows *from*:

Low-Depth Unitary Quantum Circuits for Dualities in One-Dimensional Quantum Lattice Models | Phys. Rev. Lett.

The suggestion that the device [priorly provisional] *would not work as-intended* *was; indeed valid… *for*; the relation of the ttl.xcl was unincorporational of the *heirarchy of relations*.

The ***new*** device, as-principled [includes] a basis by of which the *random and probabilistic are co-determinant*. This ***new*** suggested device, (includes) the relation *of* a ttl.xcl, the relation, *therefrom*; of which is the '*breakdown*' of the various *charts of Fermi-Surface Geometry*.

In it's *constitution*, the new device relates *via constituative elements*, of the *varietal* base-polyhedra, *to-which*, geometric interlogue *relates via the hand,* to a ***principled** basis* of inclusion and *dis*-inclusion of *a charted progression of which sketches a psuedoprobabilistic evolution of dichotomies, and their* ***naked** resolution to *mathematical category relationships*.

For*; *this basis*, we only* require the base supposition of *canbus and adc/dac* with small and subtle alternation. *This is the final change for the new rendition, and devolves only* from the comparative of statistically informed basis*.*
*Thus, analysis follows one charted progression, the remainder of which is acknowledgeable precept for the relation of antecessitorial declination.*

The Canbus XADC-FPGA and ADC/DDS potentiates a 'basic-procedure' of one and one category and elements, in one and two bases of the progression of the readout. This is amended via* two-principle(s); that of 'through' and 'stacked'. Thus, the relationship of one and one in one and two, of second and primary tier, demonstrates the realization of a complete readout. The 'area compared to the zeroth dimension.' Thus, the probabilistic odd(s) may be discerned in-relation to singular 'throws' via the progression *of;* the pattern of Pascal's triangle in relation to the Poincare conjecture & *bias* in relation to complete aggregates and singular signatures of pattern in relation to inherent and dispossessed determinant accounting. Thus numerical returns on dice and runes.

Then, the transceiver, the modulator, and the isolation for the bridge, and FGPA/RISC-V, and such, process for the A.I., a process of angles and amplitudes into and from the relationship of the optical-cell. This leaves a priority to the extensible fresnel of the lens, to adapt the process of 'reading' on behalf of measurement (*inc.* random event(s) in **binary-(0|1)-reading**. The result is a counter-sensor of an entirely new innovative design, that is programmable, adaptive, and probabilistically interpretative. In finality, the result of the 'simple path' to 2-1 from analog sensor to digital amends the possibility of a properly suited fit between theory and experiment, measurement, and process of data-analysis and procedure of operation.

The prior transceiver and modulator follow for in a phenomenon of the principle of which is related to the algorithmic basis in the arduino* code currently implemented, in use. Thus, the qualifier (it is reasoned); relates of the basis of the algorithm, but, furthermore, the device as such must be tailored to the use of the 'conventional' equipment (for sale and manufactured); and the basis of what I have innovated. In this, it is not-only a style of implementation, but, develops as it's own incarnation of potentially a very important purpose and role.

The justification, is that a dual-comparative of the two* principled bases of approach leads from a composite, to new developments in the field. Thus, this is the committed approach to analysis, and separation of which furnishes a order to chaos double-poincare chart with capability to discern patterns, and account for probabilistic outcomes.

In the progression of equating the 'data-baud' *'loosely'* understood by 'portion, element, structure, group, and partitioned flow topologically' – *the mixed-result of CANBUS and ADC-DAC does not essentially regularize to a rational exponent in relation to product and workable assembly with industry-standard part(s)* – something therefore, it was reasoned *is essentially missing from the study of electronics.* There is therefore an entirely new problem to resolve and solve, of which is based-empirically or theoretically.

In-establishment of-means to articulate the 'Platonic Solid's' to the process of computational science, the articulation of a blind-inferential dialog, is the breakdown of probability to the various polynomials of which relate of the numerical entry in-relation to (#)-*number* and (*)-*probability* in relation to apatterning. This alone is the common determinant in the process of their-collage, - that the device should be capable of discernment of (2) from (1) and the nature of the solid, in relation to a catalog of inferred probabilistic dialog and thrown-die, thus a 'reconstruction of the basic statistics, furnishes an interpretive result'.

In consideration of a ‘safe assurance’ – the ‘switchable contrast’ must be an-update of a second assurance, *indeed*; for what is a neutral-pre-qualifier on ‘downlink’ to-which there is a nullifiable exponent, power, and product-rule. In this, we find that if (and only if) *as-such*, is there an unqualified variable in relation to a *post-measure & measurement*, of *indefensible contrast*, when-thought of … ‘a placeholder constant among two elementary guides in a constructed potential’ – *there is a switchable protective measure in relation to the guide of alternative in-bearing.*

*As*; there are different orbit(s) & the-derivative is understood *in relation to physics*; this device is mappable to a *Historiological Reconstruction in Mappable Exponent and Inference of a Chart of its Progression.* For that of the evidenced (3-2-1) on-presses, or *Event(s) of Detection*, it is ideally situated as a *Musical Instrument.*

*The Orbital Relation (of Relative phase*) and Radius, articulates a method of pattern, then that the various orbit(s) relate of the various ‘tone’s’ in relation to the ‘cast of dice’* – the reproval of fatedness. Thus, in-relation, these configurably represent identifiable structures. The ‘entropy map’ relates of the weather, and charting it, - *relates of historical work* – while that of the input and output *relate of ecological prey and predator.*

The ADC/DAC (*2x*) – leads to a relationship of ‘hybridization’ of the order, and the relation of maximum and minimum, on behalf of a spectral reception in channel A and channel B, - *thus the resultant location is determinable from the two input(s) and two output(s), in similarity to the analysis of an ‘x-projection’ and ‘y-projection’, in either of two* (2) waves of coherent nature.*

*This is dissimilar from the tuning methodology, for which we must involve the frequency and period of the waves, of the varietal ‘captured timing’ of the intermediate-period, by-which a lateral cross-section may be observed.* In this, without manual supervenience, the path to design is made difficult by the relationship of ‘overlapping’ (doublet) and (doublet) with equipment and screen.

Initially, the device was ‘felt in relation to it’s mode(s) *on intuitive grasp, as theory was developed.* Now that I have a clear, responsive understanding of the device constraints, there are various (categorical) methods to-employ. First, I will have to get the wiring completely correct, in a schematic-diagram, for that of also components that are functional, in both component value &- tolerance. This is justified, and so-is the relationship of the disc, to lower frequency of what-is the signal for the various ‘bottom 2 Mhz range’. The justification of finding the remaining values of components remains a scientific practice, and* *the varietal relations of* **ideal** *mode-relationship in relation to optimization.*

The established wiring seems sensible, but operational amplifiers must be updated and purchased, that of bread boards, and the sufficing means for the auxiliary equipment, and the ‘DKRED’ with digikey, must be likely purchased and left as a priority.

Finally, the 2-1 on the Exp and Norm, of the skew and non-skew hermitian matrix and transformation *nature**, must be understood, and applied, for the workable nature of switches, and the demand of the interoperative theory. Indeed; the transfer of the device to a study of two work rather than one-dimensional has been entirely unique.

Now that my study of superconductivity is finalized, for that of a procedure to *switch* conditions of causation, and the *main-mode* of an inquiry in sociology is completed, *the results of application*, to various fields and in the real-world, must be anticipated.

The language has been of a preliminary development, and scientific study is discerned from the theoretical and engineering process that was followed. Secondly, the ‘symbols’ are understood somewhat by primitive means in various texts, for the bases of enumerated result, and limits exist theoretically in the various fields, due in part to the results of 114 years prior and so-fourth.

*Primary Postulate:* Basic-counting is dependent in it’s nature on a comparative of group and peer-representative.

Finally, *I came to two possibilities for artificial intelligence in the counting theorem, for of implementation on what to-design, given* the constraints of the problem, the ‘ethical and moral consequences’ and the relation of the hardware to one or more peers*

As it is **there are two answers to artificial intelligence**.

a.) Considering a problem, in-which there is a numerical (1:5) and (4:48) (for example) of count, there are in principle two-answers *for the results of the equipment given (1) (2) and so-on of-peers, as based on theoretical mathematics in relation to social problem.*

1.) One, is (4:53) while the alternative is to-section and determine in 'each' separably *post-hoc.*

2.) Thus, *a count depends on indistinguishable or distinguishable and recurrent, or allotments.*

Thus, the basic condition of the process in-which counting may result in an outcome is the only boundary before us, for which the result yield(s) fairness in a consequence of games and memory, for of my life experience, the result of which is a social and individual procedure or an individual procedure. This mere result, that the results may differ with multiple people, is the knowable element of a theoretical boundary.

The design of Raspberry Pi Zero's and implemented 'CAN-Bus' with a 'Labrador' signal generator & scope, (for of representation and genesis) remains (here) a design of which is qualitatively a reasonable balance of the need's of the equipment to satisfy observational limit(s) and operation of the qubit, and produces an element of qualitative satisfactory design in investigatory means of the the overlap between quantum and classical spheres of understanding in electromagnetic systems.

These systems, are dynamic, so, there are (within the stochastic relation) a few considerations and need(s) of central aim.

a.) To utilize a preservational limit of switch-comparative-observation and calculational technique.

b.) To introduce limited error, and refine the notion of orbital and dynamical 'step toward cause and effect relationship' and provide for a reproducible study.

For these needs, aims, and method of development, we must follow a guideline, to illustrate the parallel between finite systems and reducible systems.

Consequentially, the provided 'binary' relationship is *then antiquainted*, for it's limitation of sequentialization in relation to error, combinatorial process, calaculable functional relationship to units, and timing relationship, through the understood limit of a 2-1 step for in bifurcative (non) system topology and interconnectedness in 1-1 of cmos.

The need's of the device, are for the reason that current technology has proved unsafe conditions in insurable end of secure means to information, and are indeed developmentally somewhat costly to unprovided of means to understand their operative mechanism. Secondly, these technologies remain with a fundamental limitation at computational process, that is ill equipped to master the nature of ecological care.

*There is a final-question for my device.*

Applications:

a.) Telescope.
b.) Printer.
c.) Device Physics.
d.) Post.

e.) Cache.

**1.)** *Question; is the quantum unit operable through the transfer of PWM-'data' and execution-table, separately (as to consider) from manual-operating means.*

*Means and measure, for what they-are relate of the 'auditory phonon and metal Hund-model electron phonon' as to a theorem of measure, relativity, group velocity, displacement, and soliton theorem of Fredlhom alternative in relation to phenomena and phenomenon.*

Consequentially, the device need implement three behaviors to be Quantum:

a.) A switch in x and y such that: S_{x}S_{y}-S_{y}S_{x}=S_{z}; S_{y}S_{x}-S_{x}S_{y}=-S_{z};

b.) Sinc[nx] such that the frequency balances the quantified ends of Quantum Conductance, with frequency and transfer/transition of element like (monic) basis unto spherical symmetry.

c.) Quantified divisions of non-constant *f*, with the variety of modes of which are distributive such that admixes exchange a ln(2) geometric *entropy and dynamic entropy*, with paritionability.

d.) Sample per frequency [ranging and selection] in Sinc[x].

e.) Sample in measures [pickup selection of frequency] vs. Time[n].
There appears to be a limitation to classical expectation and observation of a Quantum Bit.

For a reason, [knowable but unknown as of writing in this moment].... The expectation determined in-slides is not persistent, but; - quantum in nature to commutativity via geometry.

The shape of a quantum bit.
The properties of a quantum bit.
The 'transience' of a classical bit.

Scanning is possible, and via holography, nets the entire space.

Hysteresis, Repetitional, and Non-Germain modes. How do we measure these.

S.O.S. tailored to the new generation of technology, (as to radio, etc,... beyond Eton).

Then; experimentally benign engineering examples and function of it's analysis in situ.

a.) I would like to facilitate a function of working on an S.O.S, to tolerably help in an assistive struggle for function of the internet with coded and virtual-hardware technological means, of hard-and-soft wired', and coded programs.

b.) To function in relation to initially moving afar (s.f.) or (etc.) in a relatively secure and loving relationship (but of a promise to seek one, and work seeking the other), alt*-one is distinct of these

two, and workable by one premise.

1.) To facilitate function of AGB, and of-AKM, in that of Amanda Koci's wellness, post-ideation, and of-AGB in post-coma, or incapacitated human rhythm.

2.) Motioning to work at Sandia and or Los Alamos, as an educational/UNM assistant in relation to quantum technological innovation and device-physics, and electronics, as in relation to rightly and functionally separate the interest and needs of medical and workable computational technological implementation for security of the united states.

c.) Function of the language-apparent functional deaf-blind and disability process in recovery, and as it relates of communication in facility of demonstrative arts, in relative peace with meditative struggle and intimation upon defensive ministry, in relation to technological conflict, and in relation to named struggle, as in relation to building a diagnostic means to provide a reset function for the net, and of it's preservation in accord with regional debate, and of health and medical limit to the workable condition of needs and necessity, as these relate of avoidance and defensive intention to rectify game theoretics.

d.) Epistimology by the computer with a functional library of 'lookup' pot. warranted action.

For what includes the difference in magnetic field flux (integrated) the 'hall' flux in guass-bonnet measure, is a pre-excessive berry's phase (in the quantum number) in accord with the 'relative' phase established, when we deal with a superconductor.

This proves tantamanout to the loop-meissner state and phase variables governing the displacement gravitationally (of which is -), in accord with the neutral-state of equilibrium in the stable-equilibrium, of-which inductance proves to 'charge' in relation to a diminishing field 'curl or torsion' in the magnetic field, for the conversion (static and dynamic) in relation to conserved rotational earth-centric rotation.

Thus, the body falls under its massive component, and then interacts with a more strongly attributed magnetic field, and electromagnetic energy density, of which cavitates in the hall effect, the reluctance of the gravitaitonal body to 'release' the superconductor. Thus, in doing so, the gravitational energy can be manipulated to the effect of a stable 'upper'-pauli, magnetic positive (+) attractive inductance, with magnetic energy 1/r, and gravitational 1/r in epicentury of their 'upper $4^{th}$ dimensional' barycentury.

The gravitational 'blue-red' shifts the pauli-exclusion to include the berry(s) phase as a chern number within the dynamical interplay *also* consequential in the commutativity of the 'shared-superexchange bound' electron composite in the two-body.

I would like to put out a very-simple paper, on the superposition on 2-1 of the 'individual-electron(s)' versus the 'paired-electron' model, of which play(s) to red and blue minor and major, for the compendium of the forces naturalizing to integration constants.

(+) and (-) to (0) from-which the displacement in-measure 'shift' in-phase *as we approach zero*, have* as extremes the privy of the cosine and sine of the local-crystal in-one, and in-two, the moderate coulombic of the crystal, to e-e and e-p, within the 'red-blue' of it's 'shift'.... This must be included, or at the least, the moderate facilitation of a anharmonic 'shelf' of atomic-exchange.

For this, the (90-180) phase that develops, develops in the microscopic view, from the neutral-0, the ½ comes into play, thus, the (-), in-excursion the second e-, relative gravity, 'exposes a full factor'.

Berry's phase for 180 degree, is 90, for what is an entire '/beta' on the exchange intergral given commutation in the reference from and to (for the two electron bodies) comparable the source of attraction of gravity, in the problem.

The fundamental reason is that the stability of matter, is unipolar, but the symmetry of space and time under exapansiveness is non-isosymmetric with respect to displacement upon what is red-blue. Given

the compton and de'broglie wavelength the pauli principle gains one 'entropic delta unit', one bar. The commutation within an-orbit, relates of a deficit in Berry's, this much is compensated in the spin and as well, in gravitation. The Lorentz *contains* of it's in-motion to 'static magnetism' of-it's Berry's phase given the 'moment-Casamir' of it's conservation. The equipment need be considered an E_{8} subset of K_{4}, in various transposes, and duple. The cellular automata of diamond and general-diamond (Manhattan distance) function(s) relate then, of the population and it's Berry's contribution on-current.

The 'regularization method' involves a cutoff. When*; we synchronize and depend on synchronicity & then relate of the 'rasterized process of elimination in-statistics' we can moderate the signal through the noise, such that the circuit *preambulates and ambulates*, suggestive of a *greater bit in it's data comparable the necessity to demand of singular-percentages in the deficit of solid (6-18-4-2-9-8-12) angle division, for which we lose a portion to do with direct amplitude comparable relationship on-depth* ***but** for depth illustrative of the 'moment-signifier'. The question is if the 1+sqrt(5) ideal, for the transcendent numerical given(s) will 'tunnel' through obscuration for the disc. If this is true, it explains ontological and epistomological thought comparable the brain of a mammal. The question is if the ideal', suggests of a given of quantum coherence, at second teir.

The abacus fits into the design as-well, for the equipment of which has a 16x (8x+8x) 'mesh and grid' on the equipment when it counts on of four stipulations on a sequence, and in the additional 'blocker grid, in place, among the two standing(s)…' I decided to *skip on randomness for the 'dice roll'; & instead operate with the abacus and noise model(s), and with that of a '*Cellular Automata*' model.* This work(s) with 'Chess' for the basic translations whether commutative (0x,2x,4x,8x) or non-commutative (1x,3x,5x,7x). I decided [*also*] to go-for the A.I. model, and a reflective screen, for the covering of the basic surface (top, bottom).

The 'basic device functions perfectly well'; with a Guassian *response on the two-frequencies*, for a general Sweep. *I decided a few moment's ago, and a few minutes ago; to relate of* **Two Versions of the Device**.

1.) Version 'A' includes the autonomous model without the Chessboard.
2.) Version 'B' includes a 'base or buttress model' *with* the Chessboard.

I found the relations are three dimensional and quantized, and it does not prove of all 'options' that all utility and practice would be founded on merely a condition of one-indication in two people separated by a barrier.

The operational amplifier(s) have *-only-* a V+ and V- and V_out. Thus, LRC and LRC is a two dimensional problem related to a basic simplified diagram.

The 'auxiliary' of-which relates of the basic high-pass filter, need participate in envolutive flow of the (-) and inversion of the operational amplifier in-*images*, under de'Morgan law(s) of the amplifying process of the E.E and E.B, and B.B, with LR and LC of the alternative bridges of the problem, to face a quadratic problem, that furnishes a negative impedance in exact balance for light, ohms, Kerr, and touchscreen.

When this is done, the 'taps' furnish a average Morse filter process, and the non-linearity will be fully functional, to all degree(s). The quantization (however it is of the second over-layer and 'entire circuit'), follow(s) naturally compared to the standard deviation of *null-reductionism comparable the n=1,2,3… to inf.*

The device, *then, can be studied, for three behavior(s) (+) a fourth, with the computer.

a.) Quantization of the circuit given conductance and interferometry.
b.) Bufferable stepped means to a timer-filter in and upon the bands.
c.) Three-dimensional 'gyroscopic motion' of a cyclic-period basis.
d.) Computational control and 'digital trigger' for procedural method.

The device can-furnish a ‘go-operation-on-latch’ *injective unto chart and catalog for of numerical range-a-quo.*

The S.O.S. need be a feature. The ‘folded hinge and pivot’ is related of two reposes from partitioned quo.

The next-step is to *‘collect shells’* of which on a beach, are collected, sorted, and cataloged, in relief of basic Kamra, as to decay and ministry, Samsara, and elopement from the detail of the ‘classic and neo-platonic’.

The ‘delay and functional assignment of the bandwidth and frontsface of the electrical equipment’ and the historical discovery in relation to *Amiga, etc, on 128 and 1138, details the given of a look-up on the element of securable info.

The ‘bridge in river and consequative sodom and gemorrah, for that of nehlis or as such relates of the first-face of shola, for which the given of a shell and the long-consequence of stone and flower relates of inheritance of Eve, to the natural ending beyond the given of ‘worm’ desipite intial gesture, for there is still experience and spiritual truth.

Determining a radical-sigma and growth-extinction curve, with distribution in-lamplighter walk problem of random ‘brownian motion’ of the *generic computational resistance-capacitance-inductance and transistive power and energy problem translates to an optimization problem when, justified a population threshold, the intimation of the power and ‘noisy domains’ is exclusive-inclusive surjective or a homotopically derived concentration in convexity of homeomorphic and topological organization of feature.

Phase II. B

Including the RG [Renormalization Group] theoretic methods, and the design technique, there is an ***exactly amenable manner of designing mass-distributive systems from the base ‘modules’ down to the specification of components that works for general-topological reasons in L-R-C, and transistive elements for conversion of a plan to an effective design model.

I was *one among perhaps 47 or 2 people *to recognize*, a given paritition between the sciences and engineering of the following within electronics:

The ‘single-ended’ versus ‘differential’ SAR (successive approximation register) functions with the ‘larger observational range and domain’ distinctly (given taps and clock, and line-guage) *entirely for the following rationale and reason, from the manually constructed component based circuit.*

In consideration of the ‘lumped element status of the functional aperature’ neither the single-ended nor differential function as equippable means.

The multi-acquity in third-fourth moment, discerns a complete reciprocal ‘edge-bernoulli shift discriminant’ to the quantum language, as to do with chromaticity and stain in the quasi-digital stylus of analog elements.

I would take as my first role in bearing to innovate a new chip.

*Prior.*

To any of that, I decided to return to-it, and develop for what I know function(s) [for now], with the equipment and the INFPQ and SAR ‘non-latched’ proposition of the variety of equipped means. The ADC of the INFPQ (3x) goes to the chessboard on mutual-input of two channels on an ‘in-breath’ and an ‘out-breath’, **with* the basic-part(s) I functioned with for some-time….. (this forms a carriage-tap and ‘gibb’s formulator’).

*Post.*

In the future: I will need create a MSSOP SMT ‘board’ and ‘compare’ of the two-engineered devices.

I decided to sacrifice my functional ‘entitled motivation’ and seek a parallel (2x of the devices of one* mappable circuit.).

Now, I have about 9-5 (for in two) choices to make with the design and equipment.

The ‘new’ of the AD8079 is an-affirmative (an SAR), but the *old device is necessary, per my explanation.*

Thus, I will need choose between circuits.
I will need choose a function to-model.
I will need make a *few choices of components.
I have similar choices of a limited-number* of the basic wirings.
I need ‘link’ the topology and connectedness.

*Post.*

[db15]-[bomber 3x2]-MIDI.

25, GND 2x & 3.6 V . 12 V (+) 12 V (-).

Serial-CANBUS [opt].

Switch.

1.) The computational unit, that I developed, with the computational workmanship (credited) of computer(s) with this world, was at (@) particual numerical intimations, registers, and relationships unprohibitively regardant of the fair odd(s) in a discernment from the qualified non-mutuals (+/-) of negated operational mechanism of these electrical and magnetic dissimilar versions of equipment and singular (now mutuals) character-chart.

In some sense, it was operative in five unmutual categoricals among 22 differences in discompletion and issuance and remote (insular singleton) of non-pathological symbolic retentive standing and level.

2.) The equipment was varying among a variation upon an integral-differential non-harmonic and harmonic condition and co-qualifier of instinctual or (engineered) functional uncarry and carry.

(MST): I began today to install Ubuntu on my two Raspberry Pi 5’s.

I found the ‘go-game’ of procedural languages contains for it’s inheritance of game-motions a saturable procedure of inheritance of laws and rules for some of the ‘blocking’ of the A.I. model and chess-device design. This illustrates a wonderful composition of rules, for which the ‘winner’ is expositive.

Then, today, at (@:06:02 am) I began to be capable of [immodestly reasoned] thought again, while before there was much-random and discomparable ‘noise’.

***Solution:***

Considering the ‘ttl-rx’ with smaller-2.26 ratio interval on-period and the 19.24 ratio to 5.76 to 12.58, excludes the relation via retention with the ttl-rx and a switch on the 2:1 pole and 1:1 pole-zero.

Alternatively, I use the device for *polynomial mathematics concerning an Eisenstein series, in exploration of observation.*

Process on the s.o.s., relates of a ‘quite primitive basic series’; while relating of polynomial-and-group relate of procedural bargain and return, for *with the equipment what is black-white cover.*

*Entirely, there need be two, but* these resolve to interoperatively determine each other.*

Thought Experiment;
In restoration of a record, based upon *social model* and financial ‘copy and exclusion and excursitiveness and disclosure’*; among two of the net and the equipment*, with model-dice, the third is correlative in-murder or defense, in blind.

‘There is a 2:1 copy on the local of both places, situationally to a ‘different game’ of the same arrangement’.

Pin (1) of the AD8307 is ‘in V_minus’ to which is out* comparable the ad6172. So, in including Pin (4) as ‘in’ (which is out) the negative inverted* of photodiode *feedback* went to the AD6172 under moderate* amplification but* forbid of one for six topologies the connectedness. This means, the ln(2) of it’s ‘supply’ had divided into equals returns of oppositional (-) for V_A and V_B for the two channels, as the AD8307 was operational, and ‘ref’ was zero.

This circuit, with the composite other circuit, mates of a ‘mask’ comparable digital assign 0 and digital assign 1. DC_ref.

Reasoning the parabloic AD8307 stems from the reluctance of the cap and it’s transformer on the neg_v_ref with the trans.

The essense of the two-dimensional ‘bit’ is two-ideal(s) in the extension of a ln(2) ¼ and 5/6 of distinction in the lateral and the horizontal as to vertical saggatical degree per apradian. Degrees per apradian is a measure of fidelity.

The device-innovation has matured, and I have understood I am not good at academe.

I moved on to innovation of a new kind of telescope.

This works in the material-sense like an optical-ranging photodialectric with measurable and confining measure of ‘lens-aperature and perimetry vs. isometric projective median’. The ‘secondary moment is materially the function of a six-tendency rotating aperature in-function of the supplied rheostatic and piezeelectric/dialectric and photoelectrical semi-transparency of a ‘lens’ to a Kerr effect.

This then functions similar (but not identically) to a fiber optical pan, for which the relationship concerns a life and death curve of logistic origin.

This functions to measure the temporal-period extension in-median of the functional relationship of exposure concerning the degree in radian of the phase-volumetric extension of the perioptic perimetry for which an ‘arc’ is co-similar in timing to a Berry’s phase synchronization of ‘selective view’ for two or one motile lens-distancing directrix to focus limitation on sense and perimeter.

95 *is* essentially 30 & 5 for consequative and imparable given’s. Whence 15 is doubled in 18, the ‘10s’ in algebraic copy, release from the *tertiary* 30.15 to 38.525 and interpose in 5:8, of the ratio-tine of a wheel.

This ‘carriages’ of the cyclic nature of pH in function of a stereogram, functioning to disencarriage the co-copy of it’s non-provisionally applicable and appeable 5th conchordant dysrhythmia.

O. and T., - The ‘patch-basis ‘**The Triscut**’’ is *Two ***double AD8307 & LM6172;*** [a power register and operational amplifier] of 2x of ‘easy form’ and 2x of ‘leveraged’ accumulates a pre-initial pulse to (1) in ‘double transpose ‘**T**’’, as then of one stage, then *intial patch extends* of these ***In-Copy**, via (4x+4x) *to an 8x0|1 unpatched of **AD8307 & LM6172*** to ‘yield-and-multi sum the channel in a 54321 ‘patch-co-traversable unity group compared to 12x5 as 60.38 in %, in *binary-byte*, to a map.

AD8307 (2x) and ‘braid (+|-.-|+) *transpose asccumulation 69.70.5’* with LM6172 (7x or 5x) spread-combiner defaults when the ‘wipe-DC’ proportionally of an equivalence in 0.1 unmutually contrasts the Triscut, to a (2x on ‘disc’) with 3rd *tertiary [on].*

8x & 16x to (4x switches and a fifth).

Genuinely proving disinterest is not a negative affirmation or insecure motivation unto entitling provided ‘wedge’ to the function of a picturesque motivation in counsel.
In an affirmative, then, the function of a disproportionate allocation interests the relation of a functional relationship, but of the provision to mutual unaffordant and self-consolation of disaffordance of means and rightful personal space.

Thus, a marginal accumulator and combinatorial compensatory deferent and single (to advance non-mutual unassigned disconcessional rationalization and recognized catalog of defaulted prosperity in non-selective minor-memory carriage) need be affordant of a non-textile (2-1) and (2-1:1), sectional reverse strut and bypass. Thus* a minor-key of all-three of the worldly provisions for the advancement of money, does not entitle a heap, but is functional, to which the agency of the accumulated major-indefensibility is workable, but* for manual switch. Thus, two combinatoric gates establish mutual reverse functional and unitary reversibility. [This hold(s) for CA, Hardware, and Software].

I very much *then* need merely code a ‘seed-run’, for switchable [as to consider reset table assortment] of the categorical envelope, of *partially reversible cellular automata.*

Taking the photodiode to a linear-negative gain per measure, to mean, functions to add under negative feedback a long initial ‘tail’, of it’s on-tan-delta on-target roam and feature to x-y, in \theta of it’s \phi per 60 degree revolution on chirality in-proportion of (3-1=2 [rms]) inline and ½:2:1 in amplitude of phase tan delta, with stereographic projection, the tan(delta) and coth(delta) relate of a summative-dc-f*lambda*’alpha’ or ‘beta’ in (alpha^2-beta^2)/(\alpha\beta). alpha^2+beta^2 is an exp(-i*omega*t-x*lambda) with ‘I’ for the switch [under the ideal of the photodiode-shottkey-led] and transformer-transistive triple 5-2-1 on 38:11. [case in point 15]. the alpha*beta is a majority carrier photonic to electronic mass ratio, to which it hyperconfluent-integral relates alpha*2*beta in determinant of a singleton of the carrier-charge unit per switch at regular-impedance unit ratio. This obviates the need for one tertiary R[theta] in the spatialized unit-ball of a spheroid, as the aproportionate typical unit mass is of a fermi and bose factor of ½, in relation to the two equipments.

The ‘hemispherical smith chart’ aproportionally balances therefore the ‘up and down arc-tine’ of two non-mutual switchable dc-ac bridges in compendium shared over a pathway and topology of circuit connectedness, then as-such the transformer serves two purposes.

Now I need include the computational arduino and then, Portenta, for the purpose of identification with the equipment.

This may serve to standardize functional license of the equipment.
‘**A**’; Check (2-1) adhere on-release, post timer (regular) and post-trigger *[auto].*
‘**B**’; Check bufferable ‘C’ on-release, ‘tap timer’ (regular) and post-block *[manual].*

‘*adapt*’: S.O.S. [?|#|?]:[#|?|#]. ‘ideal matesman strategy’ on 69-70.021x’b’_x’C’:[0|1].

I decided the ‘a’ and ‘b’ should in-fact go-adjacent, with a plug between them of variety points, of the ‘vertical linkage’. As it plays out in practice *this is one way to think about it*, but as-for the device in place – *in real terms* – the device has a ‘ribbon cable’ connecting the two double sided boards, with a more advanced topology.

This then relates of the ‘graph’ of the P_{3,2} (x) K_{2,2} (x) P_{3,2} (x) K_{2,2} (x) SO(3,1) (x) SO(3,1) (x) SU(2) (x) SU(2).

8+8+10+4 : 5, 10, 20, 50, 100 : 3 – 16 - 7 - 81

I decided in the end, to do an ‘optical interlayer’ Amiga for the ‘bridged equipment’, with the Chessboard. Parity check on Amiga and the Optical-disc(s). This should standardize to a conventional computer, capable of robust computation, with ADC, and so-on. The device operation may be manually reset given switches, but potentiates a basic process and simulation.

The only*-questionable attribute, is if the basic-cellular-automata model diverges here…

To transcend the law of probability, and the guise of mathematical sigma-average and working-average, the disparity for a general ‘central potential’ in brownian time, is affixed of a return concentration of the painleve in relation to a wronskian of the inhibition to co-cylicity of the convex bainaci space of the upper toplinear matrix graussmannian summation on the vertex model.

The result is from a deep inquiry into the Projection Formula and the Gauss-Bonnet theorem of orientable manifolds.

The situation ended in a copy-no-copy of ‘make-and-console’; for of a 0-1 decimation via alternative acquisitions under tables, of which non-defensible, in-trust of what is decidable [but for the random] a provisio and makeup condition under consequent 0-1 non-futureative past orientative departure, then that in a guess-1 correct, the roaming piece intimates an on-selective deprime, & of which the 3-2 ‘tap non-said’ intimates a aggrandizationalist trojan-horse lemma of singleton.
*Then*; I thought of an ***extremely useful idea***.

This is the following; relating the A.I. ‘model with text-lookup on my notes’ *to the design contingency of likelihood of the varietal and potential array-configurable electronics devices, will render perhaps 22-6|4 model systems, that all hold logical order and function of the inter-comparable ‘Platonic’ assortment of properties.* This method-relationship tunes down the effort by a substantial degree.

S_{x}S_{y}-S_{y}S_{x}=iS_{z}; *etc…* of (+) and (-) and m^{2} to m(m+1), and ‘I’ or 90 degrees rot, mult, and i*i=(-) all* of-four integrably afford a binary-analog crossover *with* a y=-x and y=+x in secondary ODE-PDE, and the continuum of the control structure.
Encoded ‘correctly’ *for of example [here] 15-16-18-20 or 17-14-16-15 on ‘lump of four in integral and derivate space’ algebra for a ‘secondary relapsative process’ – holds an integral ‘read: hash check’ pattern placing to judgement(s) on a qualifier in game-consolation and range-function as for example 38-55 and polygonal hash check, among (–1,+1 etc…).*

*Essentially a (+1|-1) for a (+1|-1). Biological need and health disability and handicap fall under a distinct licensiture co-compunctual leniency of (–1) in split-proceeding for of two co-accessorizable conditionally suppliant contaigens.*

*Of ruling it is (+1) and (+1) co administrationally suppliant of over-yield to a consignment policy in relation to criminal action of guilt in proceeding.*

*The explanation of engineered and engineering is the example of an effective and developed model for an effective way or means to thinking as it applies to the real world application of means to establish orderable or ordered consequence from derived, hypothesized and simple methodology of technique. When it is explanatory, the derived circumstance comes beyond one 'series' or version of technology – to - the application of motivation of produced ideas that depart or retreat from alternatives 'as suggested' when the derived strata of the developed medium faces interruption of development of the status quo model in the 'tension' of design to process.*

*This momentary discouragement, as it is often, faces the co-explandum that the creative instinctual phase has ended for the hesitatly unimpoverished but discouraged to encouraged for the distinction of produced design. Producing the qualifiction of 'reward function' is a very necessary and equative exception and rule to testing, repeating, and exiting the phase of development for design reasons alone, of which is often an advancement and notable theoretical bridge from the first nature of engineer as applied to a functional profession.*

*This is for the reason that efficiency has aa a co-accompaniment of the residual and conservative process, that which strips the means of the intuitive grasp from the means of the explanation of the catered project to serve to the means of survival, application, and necessity, since earlier and ancient times.*

*Thus, the suggestion of the 'status quo' of engineering is often bound in the works of creative and adapatational tension, and it is often the nature of a 'testing ground' of new designs, beyond the simple educational models and test equipment and prototype.*

*In this work I have finally moved beyond, then, consideration of testing and began to do the actual work of effortful design procedure as this works in a dynamic process of developing models, testing, and a new entire suggestion of the basic model of current computational design.*

*This process must be:*

*a.) Initially the function of a basic model for the 'scheme function of shape and geometric progress, elements, and the functional unit's of the new phase of a particular work functional as a knot and turbulently provisional differential equation to algebraic bridge.*

*b.) The capitalization on the basic efficiency of the equipment to furnish a new switching element as 'knot's of binary in concession with differential nonlinear equations' evolve in relation to a hills scheme or kolgomorov model with pell's and the hypergeometric function of topological and graph nature.*

*c.) Finally, this model is utilized with cohomology to design the process of a mesh and geometrically aligned and learned catalog by modern computers in relation to tailored designs and creative adaptation from note's and confidence charts and intervals, for which prevalent conditions relate to the burger's to hill's function as this evolves in a synchronicity of binary and analog.*

*This process then is adaptive to all natures of filter, network, and conventional equipment in linear to non-linear circuits and binary to analog synthesis technology. It is disinct from synthesizer technology as the consideration of the component choices are unique to the design and automation procedure used to create utility engineering products as to the Internet of Things.*

The 'bias-beta-likelihood' vesa-bus cmos-entry-tap depolarization gate supplies a negative inductance to the primary and secondary skip… /log((a-bx)/(c-dx)) local differential under swappable 1-aby.y' and alpha^{2}-beta^{2} unitary.

In understanding the device today, *for what the general idea of mathematical inquiry suffices to introduct of importance* [in relevence with computational model, and to venture an assumptive of ideas to apply of which relate of real world utility and bearing to study in computational advances], and of the notion of adequate 'level of application of design in elegance' the idealization of what must be innovated to explicate new modes of discovery; motivated the idea of a new attribute of design in general simplifying terms. The idea of using (2) or (4) of the 'disc' was put fourth, as well as-that the notion of the a.b and ^2 under reduction (Berry and reduction) reduces the problem by an engineering modification to the base connectedness of the equipment.

These means furnish (with 2x or 4x discs) ideas about **how** the ideas should be implemented of which when done adequately relate of a \log and tau_{1}/tau(2) of which are proportion free to variable in logarithm but for phase. When* as-such this is done, the Freldhold-Integral-Alternative-Invariant problem suffices to resolve the ode-pde system, and the mathematics holds purview, to which the 'integer problem' is base foundational. Thus, in order to resolve the aim to real world example, it suffices to 'amend' the engineering problem, so that the mathematical model may find it's best and simplest implemented means, despite the absence of certain 'missing attributes' in the 2$^{nd}$ level of mathematical depth and inquiry.

In 24'; a petri-net (of an enclosed tetrahedra or various platonic solids) of all* but-the-greater dodecahedron and icosododecahedron intimate quadrature-discomparative of in each-order (but of these in neutral-disparative pattern of their orders) in each class-function of the degree of the rational exponent minus egyptian lemma, of the order of the preceded incurrent 'pitch-parity' 0-1 of-but the classification (as solid polyhedra) under random-non-random lobosev-cartier derivate the adjoin-pitch in one lesser per gcd-lcm of a non-two but three including four fold (non 1-3 (one for three but of Betti) deRham cohomologous orbit in direct sum (minus a missing* wildcard) – of the denominative two multi-univalent apatterend in div 2 of it's cohomologous orbit under mean-in-convexity class of it's degree of square-minus-a inverse rational exponent under a summative of the accorded vertex number, *but of dual graph – then excepting non-directed unipolar manifold identification.

Patching a mozaic-quotient and graphical 0-1 nand, and, or, into the program hierarchy-residual and compable union and difference in pattern of logical polynomial group under series (Taylor-Lie) with optimality on Lagrange and Hamilton of top-bottom pillar and auxiliary *to* black-white motivates a mutual cancel in archetypal of life. (/).

Directly connecting a passthrough of an ADC (which is ttl or cmos and low on it's impedance of out gate), shorts for in high impedance of the input – the output, for that of 'stepped resistance in power with amperage'. In relating of the this problem, it must be resolved to lower the amperage-current-impedance to a short to a stepped inclusion, thus, the 'check-gate-switch-as-xor' may furnish a step-latch as to resistance through an optocoupler.

**Pillar I:** *Consequence perveys to the appreciation of consolidated unit's purveyant with harmonious signatues, data, and their resolvancy is co-dependently provided and arises due factor(s) of geometric volume and density, for which the facet of detail, exposes the relationship of a derivational progression from one co-temporary end to another formatively providedly provisional and attributed localization in demonstration of measureable means equated with the successive basis of approximations meeting unattributable and exact fit to a suited example (then an exemplar) of equipped process of discovery.*

**Pillar II:** Then and therefrom *the basis of mathematical description amending the providence of the workable and on-interval selective 'group element' providentially supplies then a justification the unit-basis of the quantum factor(s) in it's resolution to limit(s) is prescriptive of properties of finitely rational quantified measure, in relation to the gestalt of two-fold and higher relationships of un-admixtual and pure harmonies of qualities in resonance of varying prescriptive degrees.*

Picturing the disambiguation of (5) and (&) (4) is an entitled emptiness and non-category of (*for a category)*, that of the 'interrupt' concession (plausible but non-ambiguative) with computer(s) to the (4) ***four-fold*** intersemic and it's motivational (contrast of given defaulted or undefaulted) co-ancillary contributory principle basis of yarded and 'plat-measurable' non-co-extremum of 4-1 for incurrence of discarriagable end addendum upon every contract.

As a result, with most of the prior research completed, and here and to the future the research with implementory basis in question and application, the question becomes how to test these two-Pillar(s) of the gate.

1.) I must offer a way to understand if the 7'-basis may*-reference the categories of the varietal-shape and depth of ideal beyond abrea, of not the model of single-bit in parallel series, but of interconnectedness,

for a basic depth and volume in higher dimensions.

2.) I need to test the code with the basic switch for the next device (among five) and finalize to comprehend if code with ADC-DAC will indeed offer a way to access these modes, and swith particular modes in particular inputs.

I am looking for a grand moment. I should be precautious of the aloha-condion and FAA and radio channels, as to if there is any *primed (ah) Hammond…. Basis of 2-1 in quantal. I was afforded a new possibility earlier today and recently.

When related of dialog, written expressions are distinct from verbal associabilities, as-to-which the experimental sciences are distinct from work. To associate by means of 'technological need' is then a givenly provisionally ethical practice in economic measures, as ecological need is distinctually unforecloseable, a given alternatively provisional condition of experiential avenue of a people, and in the view of relating technological risk to ecological health and prosperity. Advocacy of this ethically sound basis of 'window' functions then to provide aim, by the progression of separative law and law co-conditional assurrances given surveyorship, practice, and guide of a functional 'written' text in explanatory means of laws in association with biology and it's extensions. As a result, separative feature to administrate by an executive motivation concedes to the function of law enforceable conditions, and the preservation of naturalized survival of people and co-ecological endeavor.
Phase II.b. Began.

I decided to divide my work on the device into four parts and sections.

a.) The Disc.
b.) The New *(secondary)* model.
c.) The Analysis.
d.) Assembly and Soldering of one-Circuit.

1.) Marine Wire.
2.) *28.18-32.18* 'Parts via Mother.'
3.) Platonic Solids.
4.) Lesson of Obstacle-Blocker.

A question that has apparently been resolved for-me, is the way to 'subdivide and control and vary' the relationship of the input's to the outputs. I will need parity encode, and, relate of procedural input.

This situates me 'prepared to work with the ADC/DAC of the four and two of the GPIO that I had purchased. For this purpose, I am ***not*** choosing the device to cater to a 'parallel instruction'; but instead a forward to end construction on encode-decode. I am not sure yet if this is facilitated to the direct method of dice and reading with switch, *as I have now planned.* This question remains, and the question of the device which can cater of a variance-kurtosis on the gate to it's displacement. The intention is to test ***just-two** of the responses to the various odd's.*

For these purposes it would be important to understand that by relating of switches on-sectors, a model of dice-casting can be enabled of which doesn't 'cheat or bargain, and is not compromised by efforts to curtail the nature of use'. *This lessens the conflict of interest, but a general ideal on the intention of the switches must be understood and studied.*

The final question is if the social obligation [to which the device must be left plain; electronic; and safe] is demonstrated ***independently*** of the obligation(s) with-use. I cannot stress enough how important seamless integration will-be, as 'money' often leads to vast obligations and a long-network of vias and complexities.

A ‘set’ of **incomplete *blockable *independent and redundant* groups are furnished in ‘unit’s’ of module and via, for the elliptic cohomology and the berry’s phase, in relation to a structure of interconnected channels.

Connectedness and Topological Configuration of Equipment.

In the end:

I decided that the Arduino Pro (an H7) can have the main i/o with some of the i/o (to be mentioned) off an esp-32 to CANBUS (2x) for the (2x) Arduino-Q.

These would then communicate via the network (RJ45).

The STM with 24 ADC is for the chessboard.

I have the discovery Microchip for the FPGA elements with the Raspberry Pi communicating over GPIO, under manual address of the main-waveformer, of which stands opposite the Arduino H7, (both of which are programmed under different structures in the computer.

In the future, I can then defer to utilize two of the Arduino H7’s on the basic i/o of b/w, for the ESP at it’s lead-tail via the Arduino-Q, through a network interrupt given low draw on piece placing on the Chessboard.

What need be understood is that picking up a piece and lowering a piece are then both draw-low, for the equipment, of which manages the basic flow of waveformed signals in relation to the auxiliary equipment.

The STM communicates directly with the wireless of the Arduino Pro (H7), of which via Q and ESP tracks to produce a sensor – configurable – board with A.I. unit off the opposite Microchip with FPGA and Risc-V, for the basic Raspberry Pi, O.S.

As a result of linear-beta wireless between the STM-Microchip and Arduino-H7, the timing amounts to a single regular step, and power is neutral down-down.

Optimization for ideals, is a distinct problem of separative-driving of the essentialized oscillator, with single-step control-diagnostic.  When the ‘archaic’ algebraic quotient of the DMZ is isolated-and-in-turn diagnostically plays out, the language of the pattern of the program-execution is determinant upon the 8x8 of the play-space.  This diagnostic and analytic method admits isolation of the valid-play(s) of 2-1 in game-execution table.

Thus, I will need utilize the 2-1 of the CANBUS ‘L’ and ‘H’ to isolate the ADC conversion through connectedness of the topology of the SIMO (4x) DEMUX-MUX, coupling *then* the ADC and DAC via-program to output and input flows of the ‘disc’.  This centralizes the design methodology for the ideals in anhamonic ratio, situating the 2d-bit through a ‘shape that alters and flows with the orbit of the piece-motion’. Thus, the model becomes canonical.

With this nature of connectedness, the chess-board is a closed-space, not a non-visualizable torus, but instead a square-**region**.

In elimination via connectedness, new topologies can be formed, and the substitual motion of pieces can be a restricted process, ending fundamentally the game theory of chess.

This means that two people in bargaining may play with odds, and probabilistic rule at the same time, as the game evolves, changing fundamentally the impression of-games.

Thus, gatherer and hunter of the game catch not-all outcomes, but do catch all rule sets.

Such a configuration with artificial intelligence co-process changes then the strategy of ecology, proprietary interest, and war & defense.

**Pillars of Design**

a.) The observation under Gauss-Bonnet for which the theoretical guidance of double slits depends, retains it's observation but for geometric shifts through the circuit. These for the instance of a carefully designed device, demonstrate an entirely new behavior of phase shift consistent with parabolic to linear substitution under null reflection as the waves pass in elliptic potential through the double slits. By carefully contriving the Kramer-Kronig relationship to suite passing a Lorentzian through at specific frequencies and wavelengths, computation may be rendered.

b.) As the cellular automaton depend on integral steps and a finite signal and probability need be involved to bias one player on white to one player on black, the game theoretic correspondence of the cellular automaton rendered by a Lucas series in five dimensions with the polynomial relationship rendered by the basic device components proves important to acknowledge. This system involves the elliptic reciprocity between parabolas and linear constraints, rendering of observation that the geometric reasoning is uninvolved and objective computation becomes symbolic.

**Principles of Innovation Methodology**

1.) Instead of modeling with an-impressive table of integrals and algebraic number theory, what we need do, corresponds with finality of the variety of model compared to a probability on situational placing and level-set to that of optimization in algebraic theory of catch-pitch-step and ping and release as the model settles in the four or five general behaviors with or without static. This adapts the hardware and software to one-another situated around numeric and functional relationships of optimization and control theory. Degrees of freedom to generic behaviors as (1-p) and p.

2.) Numerically the monic (for a monomial) of variety power(s) tends to indicate via the Excel sheet the logical 2-1 hierarchical dependency, rather than the mere flow of a single 0-1 stream. This appears via the elliptic as a slash-tangent diagonal three dimensional torus in one setting with-clock and parity as a consequence of the r_{2} and r_{1} in x-y, for the indication the sequential x-y proceeds in degree in one setting for another. Thus, the characteristic of a 0-1 in {n|m} for probablistic entries of diode and anharmonic ratio is what should be designed. The basic logic is then Bernoulli-Chi-Beta in a sigma (time to flow per velocimetric rate compounded with probability and acceleration of time of flight linear).

The anharmonic ratio subject to constraints of units, in-linear ratio of impedance in-general is a polynomial for the matrix to signal operative feature in this theory. As a consequence the declination in impedance along a running line, is a theory by which the accommodating power register of the ad8307 substitutionally balances the log derivative of it's adjacent terms in polynomial of combinatoric, along the running line. Then, and thus, there are rational least-terms for the variety of the engineered elements of which in-both subscribe then to a regular eisenstein series, although it is a series along pathways of the otherwise parallel operation of i-o, for which there are conservation laws in kirchoff and lenz-effect.

**Power and Integrity Limits of the Disc and Devices**

a.) As 'series' is occurs in time, quasiparticles of the disc, with inductance freedom, are specific for focal 1/r and r, (it is a disc) and of Dirichelt boundary conditions, with capacitive and crystal they confocally fold a directrix, and are *more massive than the light-higher energy and power wave.

b.) The power wave is lorentzian non-specific for in the crystals, to which a two-one exchange is a roton, thus the model, whence it is logarithmic frees the coupling between drive and receive, but for a phase 'notch'; and with these notches holds a solid-enable and disable, of pitch nature.

c.) Energy is quantized in the disc, as the result of (also channels dissimilarly in the devices); the logarithmic boundary condition of topological nature, but when broken, responsively does not disengage from a two-fold phase independence but of congruence, in an arc, for which power decentralizes into a finite bernoulli shift in entropy over an interval.

d.) Thermodynamically the potential contains a negative fugacity, through which energy and power are constructively reinforcing in digital to analog micro-punctualization of entropic weight, then that the bernoulli shift when re-enabled activates co-similarly a cardoid of first and secondary exchange moment(s) of a hybrid of two chemical materials.

**A Detail**

Schwartz continuation and mapping is the resolvent method to the struggle of homogeneous equations and Louiville's equation for the 'Airy' extension of the Fourier analysis, as in a phase'-diagram on a Smith-chart of the Functional 'digital graph' and 'analog transfer function' of reflection and transmission comparable a search for new and novel materials.

**A Second Detail**

The equipment in the 'plastic 6.96x5.24 inch boxes' needs a chipselect. I finally understood that 12 of the digital i-o can be dedicated to either of the ADC's, and the ***Marine Wire** *can furnish +5V and GND and a signal to the Arduino Q,* for the remainder (2 digital i-o). Then* canbus can relate up-stream and-out via the DB9, and a process can 'hinge and tach' through the PDE and system (non-homogeneous). The canbus becomes fully optional, or potentially (req. investigation) offers a 1-2 on step of the signal generator to pitch ADC-on-clock. (**yes.**)

**A Note on Methods**

Due the limitation that is finite units and conversions, a general data-bus intermediary, must be hybridized for the basis of a robust computational purpose *of some nature* to be found with the equipment. Alternatively it is trivial. The ideals and their two for one, ***do** potentiate this nature of computation, for in populating the disambiguation of a linear and a reductive feature of 0-1 for of a balanced and intentionally unbalanced and rectified formation, the numerical theory under extrapolation becomes an exploration into the fractalline and crystalline formation of copies and osculating and involute curve of the algorithm under regression, for which there is a very-long unpredictably local series and global word.

Hardcoding a decision-tree (with a chip and a program); can instrumentalize *to resolution of the two-peer problem & with the net and isolable station.* Thus, the two-peer problem, authorization, security, and hack-free technology are resolved in the same identical-step. Only as it were the device, [as designed and *regrettably yet assembled*] can mimic in a language I understand well and of natural reasons neurology and minorly the immune system, s.t. the CA ESP-32 and E-paper view with (a presumed wireless connect and hardcode) all of the chemical to physiological conditions. This innovation is preservational whence the two-peer problem relates of 6-4-2, in that of the reconciliation of bias and non-bias (of four in solid percolation, linearity, power or impulsive momentum, and position) – for of eight, of what-are the test-effect of kodama outside position and inside variables of an internal nature as to speed over distance of meetings.

While the dihedral is one thing as a group, and the representation of the CA in 2-d another, what is not understood, but of what I just fell upon, is that the 'theta function' contains a monad inverse in it's surjection despite being $5^{th}$ order, from a $4^{th}$ or $5^{th}$ order group. It is then contained and rational, for the surjection defines the keck cohomology. The Noether symmetry is broken, thus we can by Cartier define two ideal domains and two principle domains.

To 'isolate and relate the seed' we must possess an-algorithm, or in-crude (certain pitch geometrically analytic and topological categorical) limits of behavior. The eight functions as to the Schwartz mapping and analytic continuation, in volume-form of a rhombohedral inseparative group-monad of penrose, separate into about 62 by estimate classifications to the third. Thus 70-22 for what was the group-theoretic of non-inviolative behaviors as to ruling, situates a 'top, and anside and back'. Thus, Johnson solids illustrate a direct group-correspondence, for the categorical anharmonic ratio in-group has a dual as a penrose 'region'. For these, ideals relate of secondary moment(s) of fitted decay and filled platonic solids. *I will indeed get onto what becomes important with chemistry and materials.*

By justification that we can equate a proposition of the CA to the boundary of receipt-insulation of record of repository and security notary, there is a ‘4’, dichotomistic ‘raised serif’ in these indices under an explandum of lobachevskian geometry to the two to one and one to two of a representational breakdown of two folded query, for one a wider-view of the numerical interaction on confidence, mated to a spherical ‘double’ mod-2.0 as with exp{-lcm(x-1)*gcd(x|0.1)}…. As to subsidiary dimension and two to a third in point of a boundary of a ratio per secondary lapse and delay in stroboscopic modulo per WP.

56-22 is 28-11, for what is 7, of the account, for 9:11 as 4:11; an ‘error’.

1.) Bypass circuit; clock, Arduino Q, ADC, DAC, 14 bit etc……. and clk sep., Arduino UNO.
2.) Time-pitch {0} quantified in y^{2}-ay^{3}+by and {1} quantified in (1-bc)x^{4}-ax^{2}+(1-c)y^{2}.

Connect and disconnect ‘box’ given proof structure of L~/~R upon a biquadratic decomposition.

In primary ‘when programming in innovation matures’ with an ADC-microcontroller design and ‘the design’ shifts off to ‘auxiliary’ code we must [**break and halt and resume**] between the innovation cycle of complimentary (non-commutative ‘index m,n tensor’); of the polynomial and it’s extension per topological modules of x^{2} or y^{3}, and the basic non-local abstraction to a 2-1 {3} rule of this variety.

Second, this is to ensure the reason for binary digital 0-1 is knowable and remains of a true positive and true negative. When consideration of the code (for of reasons of dispersion and focusing) comes into contact, it can then be improved, indeed it is the only matter of correct correlative networking for which in choosing a direction from among the {sn,cn,dn} there is a positive definite manner of design, for that of interpretation of the natural exponents and limits of the power manifold.

This is as rational certain disposition requires a choice and confirm to ratify the distinguishable elements of the multiplicity of agencies in the model. Without this, for what is later, [the choice of an ‘up or down’ for that of the ‘right or left’] disparity to cater to 2 in 1 or 1 in 1, there is no robust fashion of mitigation of service in the next adjacent step of design, for what are the agency of utility and the nature of the computer as a separable device. In this sense, without a prompt 0 and 1 are not known in absolute terms given the device in control of a computer, or of it’s own corrective feature, as it excuses a degree of freedom. The polynomial basis admit(s) a linear to quadratic conversion, which is clear in the test phase, and of impedance.

The clock, multiplexer, and so on, need be related to the ESP-32 nano Arduino, of which is not working. Additionally, the Arduino Q cannot be found, so power need be checked including ground. I would like to get some USB c-usb cables.

I decided on the nature of the destination of function,……. it is really a clocked-heaviside step function periodic gate array for the control of basic elliptic sho-translation in passive control, for conversion of a bitwise function to digital information for the disc, of which is guassian-elliptic in-multiple.

The second goal, is to preserve the ‘ultra high frequency and ultra low frequency’ of elliptics of the x cubed minus x form, and ‘pinch’ of control in the middle-kink, in translation to 0-0-1 and 0-1-0 for vertical and depth x-y control of a sustained ‘field’ of light within the cavity.

I need construct a ‘disc’ – to *secure by in-flow to the sense of the disc, the mechanism of operative status comparing to Cave.*

The solution is to verify (per degree-adoption and threshold) integral-berry(s) per lorentzian and elliptic (monomial/quadratic), of domain-wall and of equipment (component inc.); in lumped analysis, versus like-68:10 on single day per-period (as to life-death) in growth and extinction of function(s).

This controls the deconstructive and constructive interference, meanwhile topology applies a more sharp contrast on the various 3-2-3-4-1-3-2 of the distributive choice function.

Thus, in deciding 3-4-1 there is some-slack, perhaps my one success, but of timing there are then cas-latencies that applied to the unit(s) that are prepared in this new theory of optimization and control versus analog to digital networking equipment. This validates the procedure, the process, and various attributes of application of code, and the stylus involving the disc.

**Aim & Goal**

The main aim is to *explicitly interconnect the device such that*:

a.) In the 'mode A regime' we have elliptic repeating x^{3}-Ax+B=w and y' of 2nd and 4th order, in conversion ***then** of 0-1 for linear and parabolic conversion of signal values in amplitude. Phase can follow this relationship.

b.) In the 'mode B regime' we have an elliptic potential (a Lame like function) of Inosometsev type, for the furnishing of a periodic ising-heisenberg extrapolation and toda like lattice.

These functions will be studied, and of what they entail for a gaussian with secondary 'carried' 0-1 or such, for the gaussian 'within' the parity-clock check on the gate. Finally ideals will be investigated of which relate of various modes.

**Auxiliary and Finishing Methods**

In furnishing the 'Rx,Tx' *wireless between the two of Chessboard* [**alt. op.**] *and equipped elliptic gates* administrates a flexability furnishing then therefore not only the finalization of the equipment (in facilitation of synchronicity) but *also;

a.) A reliable binary 0-0 and 1-1 as well as 0-1 and 1-0 and other's in dual-streamer.
b.) The elliptic then understood this way, is functional to the alternation of dual-premise of logical inquiry.
c.) The securable end 'efficable means' are produced to which there is the option of a wireness failsafe and control.

For this, the APC-WAVE tap-pad will be with the 'windows' or 'arduino ventuno q' and keyboard with Ras. Pi + Microchip and then later the 'joystick can be furnished [gamepad]', for general IoT. The chessboard is with the ESP-32 Nano Arduino and is wireless, thus of a different location of tables.

q.) In releasing the reed switch [when we remove a piece] – [resistance goes up and acquired voltage goes up] is current per-pitch adequate to identify with a passive read? Engage-disengage.

a.) We replace by removal and placement, in row and column, or row xor column, so there are two rx-tx fixed 0-1.
b.) When these are not in-play a team has-won.

I successfully 'read' in sweeps, thus by a bandwidth and impulse argument it is no longer ADC-entire, but a seive among the multiplexer.

From this, and I did a subroutine routine of the numerical instruction, the sequence read-off differed in four marks of which were demonstrated, of *particularities of the sequence, thus there is a connection between the polynomial and the linear function and the timing in first and second modality.

Thus the MUX can signify connectives for which instructions are mapped or measured among the board and it's blockers per reference.  This is full i-o, for full indices {I,j} thus the program computes!

I determined it is computing a Lucas Palindrome for what these co-determinantly prescribe of the Lucas Number(s) in relation to Cellular Automata and Johnson Solids as these, then (residuals and composites) of the AGM and it's partition in concave or convex, of 2-1 relate of carry and Pell-Lucas number.

Thus, these signatures represent computation of generalized Schwartz-Berry's Cauchy residues on a general Riemannian surface as the roots of complex simplicial geometric closed-forms.

**Methods II:**

Pell:
p^{n}+L=q^{m}
Lucas:
F_{n}+F_{n-1}=2*F_{n-2}^{2}

Contention of Lucas {+/-1(*) in module} changes the PWM duration pulse by a lorentzian 'moment' *linear* for the conversativeness of the various 'modules', compared to the driving frequency.

I would like to understand when:
Inozemtsev model.
Kuramoto model.

Versus reliability of i-o so as to incorporate random numbers (with certain spectral to unit-module) in the variety of weierstrass-sn-cn-dn and elliptic as; this in three limit(s) elicits behaviors of those models, the periodic, the modules.

Lame.
Nordstrom.
Toda.
Ising.

Pell and Lucas series have to do with interative agreement with Lucas Pseudoprime of results compared to computation.

To dissect this given, we take the F_{n} *type of recurrence* on the layer of the modules, and deciper the nature of the 'Excel sheet like approach' for the layer of circuit topology of differential equation.
This devolves to a system that can be organized for component values in synoptic of ansatz.

A basic tool is furnished by the Inosemtsev model, of which is {\wp*P}.  When this truncates two things happen:

a.) The \wp and P separate to the Kuramoto model and Interconnectedness of integral series.
b.) The P models the integral series and linear PWM moments, while the \wp models the basic electrical components and circuit, as it *behaves like a spectrum; in combinatoric with flattened geometric curvature.*

**Operating**

The MUX furnishes 4x2 for 8x {2x} upon a single ADC, with 4x{4,1}, when the translation is to have the MUX-I/O-MUX-ADC in a conjoint relationship. Thus, the MUX (8 channel) in-two serves the Chessboard as 8x8 in (8x2x{4,1.}) of two translations in one digital (4x rail I/O and 8x MUX), when chipselect is enabled as to which MUX, the I,j, of the selected MUX selects one of the eight (then two) and one MUX transfers half with the other, thus in an overpass patch, 4x for one of the digital I/O, upon two of the I/O per signal closure translates to the active [closed board], then that signals pass between the equipment of the digital-run (vanishing the ADC). This is a singular digital solution with PWM, - that closes the device in furnished elements at (@) each junction of the various 'A' 'B' 'C' and 'D' stages, thus that a solution to a 4-bit register is found that is benign to black boxes.

The translation of 3-4-1 closes upon the Quadratic Reciprocity Theorem, such that the individual log-derivative in resistance furnish through wireless with the chessboard, two separated pillars of the net-connectedness in only three devices of ESP-32, and RISC, then situates outside the condition of-either, to advantage games like 'Go and Chess'.

The Lucas-Pseudoprimes are then related of the Pell Generating Function, to utilize the substitutional rule in a mapping of the variances of the certain states and determine via spectrographical linkage the various cellular automata of their mapping to various versions (if these exist of this device) or their variants, enabling intervention of float like data objects via a passive sense. The various steps in modules link the linear comprehension table of the board to the diagnostic for in elliptical 'biquadratic' representation of 0-0 and 1-1 and {0,1}-{1,0}, thus that logic can be directly operated upon with hands.

According to what I have discovered, *{rational and finite rank elliptics} convert to rational p-adic arithmetic for perfect numbers modulo the quadratic reciprocity of fermat time(s) a mersenne prime of primitive godelian statement, correspondent with the dictionary of lucas palindromes to cartier divisor class types generated by the pell equation generating functions in general p-adic. These are the finite expressions of fractals, and correspond to two varieties of restrictive catalog-index format in compact form of the index for expressions of i/o hardware for computational parsing in binary arithmetic, and the correspondent restrictive conversion to an active-passive only co-adjacent optional carrier of the modular arithmetic.

Differential equations involving second differentials and differentials taken to powers are all categorically resolved to a solution involving a \wp (for of transformation between and of differential equations in relationship to one another) and solutions to PDE via Stone-Weiersrass of *those of polynomials in polynomial P.*

One Goal:
Test the limits of the theorem's and organizational work of theories of geometric phase with Scheme, and of the device.

**Buttress**

I decided to try the patch-marine-wire for the clock (in consideration of the ADC). I will need cables for the interconnect, as I cannot be bothered to connect 'each' wire, then that this must go 20x1 for the Arduino Q in-split for the two sides, and of (1) off for clock, and 20x-20x with one off and one off to the Arduino Q. It will be tricky, but on-clock with one ADC and off-clock with the other ADC (supplied in one pin and one pin) via marine wire, and the Arduino-Q 'pin' makes maximal use of the equipment in a general 'clocked processing;'.

I have decided also to include a 'switch' and there will be a 'bomber connector' for the marine wire, and the USB to 'host' coupler, and then the 'five' (5) SMA. So, I must test this configuration, and 'couple' to a new ADC-DAC elliptic transcriber and 'minor'.

So, the premise I am working with [now] is to relate the chessboard pieces to the DMZ obstacles on i-o, then that we need two (2) microcomputers, and I have chosen the ESP-32 arena and Arduino-Q, with *opposite* the ST-32F. Then I need a Microchip Discovery or Arduino-Portenta.

OK, I decided to make it asymmetric, with a clock for the ESP-32 control ‘aux and main’ for the two-ADC, and one pin from this ESP-32 on ‘aux or main’ to the Arduino-Q. There is then an Arduino-Q pin for the marine wire pass-back to the auxiliary Arduino Q.

AUX-ADC(A1) AUX-ADC(B1)
MAIN-ADC(A2) MAIN-ADC(B2)

This requires (1) ESP-32 with two-clocks or a branched clock.

There is an internal branch to the Square-wave for the DAC, for the clocks on MAIN in-each.

**New Features**

I decided with (4x ADC) and (4x lines DAC) *of two lines each* to parallel the chessboard, so that the project hold(s) a complete content. With this, there are two (2) design constraints.

a.) Photodiode and Light emitting diode channels should relate as to multiplexed (8x8) for the chessboard (for which realistically I need 24x4).

b.) The Painleve-elliptic system and Nordstrom system and Inozemtsev system are integrally related to the Grassmannian, thus a 0-1 encodes a ‘data-unit’ for of polynomial (Quadratic) to linear (line).

Two minor(s). (another purpose?) Impedance-mirror, mimic the minor (or). Question of MIDI. Six by four is 24, then that 2^6 but in-half (n-1); we get a ‘fold’; Question: “How can we accommodate the fold?”.

**Goals to Conclusions II**

I found the resultant of dealing with stones, insects, and flowers to be a great idea, and one that would bring beauty to the world. This result (however in being electronic) is provisionally ineffective and as a placeholder, although (for unseen reasons as of yet) – useful in time’s to come. I like the idea of a hospital (at this juncture) – stabilization for the cellular automata, and these *in index; {surmise the resultant of those things}. This as a result is a difficult situation for me ethically and morally, *however*, given the black-box like result of being in my ‘shelter’ there is much of which relates of people with ability and disability, in innovation of new medicines, in innovation of new therapies, and in the treatment of various illnesses otherwise intractable in service of stay.

The cellular automata are indeed a new kind of science as per Wolfram, and with certain auxiliary systems, the result of a ‘very general ledger auxiliary the person’ of which can cater to *real circuit topologies and interconnections, components, and ruling for the classifier of decision process objectively to a held scaffold’ assists law, and is implementable.*

**Continued**

In defense of my engineering, there are two-things of which I do not know *will work*, a ‘step’ involving elliptically secure means, and the programming and beta stage. The certainty of the Gauss-Bonnet for the jacketed fiber optics remains an open question with my equipment, given this is conventional electronics, and conventional optics for of what I know so-far, with the exception of ***two-switches**. This demonstration with optics would represent a very deep departure from given principles and theory, but seems for of the two switches entirely possible.

As it is, the switches are not the means of what is comparable from one model to the later. I had the original disc correct, and the rules of electromagnetism of non-simply inhomogeneous systems are untested, as this is

in departure from maxwell's theory at particular scales, thus in addition as the diffraction may occur in the circuit for tests, there is a channel selection that is entirely untested. The result is that one macroscopic and microscopic interference and connectedness would need work for the device 'over the barrier of intermittency of component scaling.'

Second, I do not know if an 'Rx-Tx' with marine wire or MIDI with CLK will work, but this idea advances the interconnect technology to a sensible and ready-made alternative. This I have chosen not to test, but ***will** provide CMOS-MIDI for the parity check of the multiplexer, and with it's 4x2 and Tx-Rx go with marine wire, but there are 10 for the two multiplexers, the Tx-Rx, and then SDA-SCL +2 for the DAC.

Incurring (rethinking the project from the base) a 'release and impulse transfer-crossover-to-ground' is the only way to secure the project, and must be hardwired. I can do this with Tx-Rx Arduino to Arduino, however this check of hardware is possible only when-floating and relates to the enablement of the Gauss-Bonnet (thinking through the phase-amplitude torus) to diffraction. The board will do this in it's only functional unit(s), hence by engineering I have resolved the Dykin; and by the 'detected soliton of phase II of development'; the Pauli for in pi/2 et. Cet. The Bohmian principle of phase and group should operate reciprocally given breather and solitonic nature of packets.

Every Eisenstein (read: Cartier divisor class height two or less) hyperelliptic function holds for release of a monomial-unity-preservational series of Eisenstein rank, a branch when there is an identifiable subgroup of GL(2), for which it's elements are unshared, but contractile in simplicial connectiveness to the base-E8 of elliptic linear-composite ideals.

Question: On the torus, the assumptive is that a node is encountered in infinite time with a pole or zero, along a ray. The question is if upon the hyperelliptic function(s) we encounter in hardware compared to software or in general with geometric considerations of root, power, and series of Pell reconciled with Lucas Pseudoprimes a node as to in it's multiplicity of these indices, for some subset of the Pell by Pell and Lucas by Lucas of those pseudoprimes in log(n+m).

Thus GL(n) suites GL(m) as Galois. This is not exactly true. An identity of number greater in-parity of the subgroup of these GL(n,m) extrapolated Tensors with another subset can be truncated by an open set in four phases, and only four phases, of 64x64, for of the index for the float and carry processes an induction upon impulse transfer crossover to GND, and the virtual composite is ray-avoidant in CAB, for deconstructive and constructive interference in sets {i!=j}.

**Descriptive 'Ꮒeoretical' Closure on the Project**

For in assembly of white to blue and white to blue in-binary non-inversion a loop-double moebius is not rendered, but of the equated sma connector(s) two-flows in pass via duality. Thus, the interruptor is the two fold clock on auxiliary secondary unit(s) of linear-logarithm, in suppliance of x-vt. Thus, v becomes a limited (m-comb) in-period of phase steps upon the units of the mesoscopic. The 'index' separates by localization of time register then per ADC-MUX to binary i-o, for the dual-chromaticity of the repercussive down-flow in negative shottkey. Thus, this situates to a continual pseudosphere driving a stabilizing 'instability' (a stirring); to which the convex flow is a rivulet of the two backward and forward eccentricities of the driving in control of 0-1 as (m,n) in unital Polynomial in unit-analysis of matrix elements subject to clock-resolution and stroboscopic degree and series in the torus of phase to voltage conversion at 110/270.

The algebraic work that I have done suites the Tensor*-category, as two subtractive (and of one matrix in p suites a group law and one matrix in \wp suites a group law), there is a Casamir like operator and Noether algebraic representation, however there is a simpler expression that is lesserly soluble; an equation like: UT-d^{2}V=0 a form. This equation with the engineered workmanship (proven for in discernment of computational gated condition and diffraction as-observed for the similarity under tan delta of a polynomial to a \wp) devolves from an interpolative equation between the Schroedinger and Dirac equations, for the incorporation of a Yang-displacement.

Thus, this law of electromagnetism was discovered to emerge from experiment, and theory is the byproduct of engineering in this example, indeed! A law from an example of workmanship. As a result, the map is returned to a marking per-CAD and design of the computer continues, but with a pruned and native morse sequence and Catalan sequence of operative growth. This not only shifts Moore's law, but situates to stabilization of the end byproducts, a similarly quantifiable relationship explaining the root clause by which 1 is unavoidant and 0 is foundationally non-reductive in engineering and mathematics.

Indeed, boolean algebra and group theory are herein proven as compatible in electronics and computer science, and provide a way through photonic geometric phase to potentially create an optical gate.

**Final Conclusion of Limitations**

In parity, tested, the electric goes through one exponential, the magnetic, half-that. Thus, the rationale that it is possible is the integration constant, for which the pole and zero hold a factor of two by the single pole and double pole, in doing so the result is two-'level's' of which the electric and magnetic (of different topologies – curl free and divergence free) result in a 2:1 in conversion of inertia. This can be employed to result in a differential gate or a possibility that the quantum rules (of the nature of the mass-gap hypothesis) exists in-miniature at the level of electronics, with quantization of the magnetic and electric field, beyond what was theoretically believed to be an upper limit for a Bose Gas. This is realized at room temperature and perhaps (+12 deg C to + 60 deg C) of room temperature.

The consequence is that the building of a quantum-hybrid computer is possible, and super cooling is not necessary, in fact, by tuning the logical invariance this means the classical world is sufficient for a vast (but canonically mesoscopic) number of degrees of freedom. The proof of the above, and the functioning of the device prove with non-commutativity that what was created is beyond the action-angle uncertainty. The area and volume are now the forms amenable to electromagnetism, taking them to be waves of a single nature without electromagnetic theory is in fact invalid.

**Pillars of Design**

Choosing a \tau = \eta_{1}/\eta_{\rho} to separate the linear exponent *in-choice of a number associated in-binary*, back* to the computer, from *the parabola in (+/-) and a corrective* 'j_{\mu}' – opens the explandum of the number-theoretic kernel to adoptive means to out-proscript the signifier and salvage the safety of 'Alice and Bob'. A continual scale.

I am still making sense of what I have-seen with the device. Part is primed to a lower frequency and a repetitious behavior whereby a 'packet' comes through in repeat every few seconds. My microcontroller is thereby cycling information in a downward progression of which the basic '-' and negative feedback stages produce a controlled cascade. This – perfecting it – and getting it interacting, should be my main motivations from here to the next stage, as to when that will-be. I noted this behavior connecting the compensative repeater in tandem with an AABB configuration of the basic ABAB.

*Then; given the nature of the chessboard on 'ABAB * AABB' of equations, that of electronic design becomes principled for-which the 'excel' becomes in-miniature a super-study of the differential equations, and in-turn the 'board' with feedback leads to tests and seeking as engineering matures and is innovated.

By interrelating a game-theoretic on turns, the strategy of electronics-design improves, and because a veritable defense to that of conflict, as well as becomes a basic cognition test, and test of plant and animal sciences and theories of psychology.

Thus, we find Lucas-rule-based-cellular Automata correspond to Sturm operators in dimension five, and algebraic geometric number theory algorithms of the Gram-Schmidt process of Pseudoprobabilistic Languages and Words. Species and Samples as elements of deductive logic are finitistic, and co-example concepts of objects, for which they are Closed Fractals.

First to note is that I have understood how to demonstrate a new kind of computer, and, so, it is with great endearment of courage and intelligence that I will set fourth on a mission.

a.) Pitch clock can be 0-0 and 1-1 such that two 'braided' are-off.
b.) Pitch clock from 'A' can be 0-1 under elimination such that two 'braided' are-off.

\phi(z): there exists a w,t : w*t=z

Consider the Pell equation.
Consider the Lucas series.

Then if the Pell-Lucas series overlaps with the Godel statement of the 'above'./

& it is my monads are square-residual-free injectively.

Then blow up to Abel-Jacobi geometry.

A fact [then]; the linear-parabola is an elliptic, and is square. Thus, altering the quadratic formula by a Pell and a Lucas in (+/-) denominates via reverse reduction (of which if it does not map and is prime) there is a loss of intersection of the line with the parabola. Thus, no correspondence to an Elliptic monad in the dictionary.

Why does computation take time?

I found a general 'Pell generating function' – and an instruction for 'creating it'. This is similar a ratio of polynomials. These generate a sequence. This sequence is related of the Lucas and these two series relate of the \wp*P.

The ADC of the new device operates per a regularization index on lorentzian (a (\p\theta|\p t)^{2} for which with v-lt there is a discriminant.

This is distinct from the theory of relativity, but relates to 'dating principles' instead, per entropy of f-f.

Thus f-f for a length was of a focus through a directrix, of which motioned an affine space one RSA ticket earlier in the stack.
Differential equations involving second differentials and differentials taken to powers are all categorically resolved to a solution involving a \wp (for of transformation between and of differential equations) and *those of polynomial in P.*

a.) I can close with a multiplexer and digital channel i/o {the chessboard} to 10 bit for 64*4 in groups of datatype and will to bring the a.i. under control, separationally assure exchanges of monetary nature, and war-effect-scenario.

Muira transformation and 'in parabolic transformation' utilize alpha^2-beta^2=1 as it applies to the linear 'localization' at bound-states, for a higher-order NLSE. AKNS.

The question as it pertains of the following to the device for group and integer or natural number (discretion advised); as to if the world is binary is positive, but not of biology, for transcendent principle ideals are generated in relation to algebraically geometric functions under an exact isomorphism (Riemann) and their irreducible quotients under the standard and historically founded division algorithm.
These are to be related of the Graham-Schmidt process of ideal decomposition of a polynomial, as these relate of tensors and categories (recollect inclusion).
Binary is therefore insufficient to describe all but systems of zero-sum. The system of the device, in-binary and sequential process must then be discerned from it's logic-cpu counterpoint in evidence of an experiment unknown as of yet.

The 'actual solution' is that the digital-i-o for of my Multiplexer and ADC with DAC and two-channel 'clock' is a biased approximation of admixture of superposition of square-wave module of arguments in-array

language & continuous occupancies from one population choice function abridged to another of either then and both the chessboard to the equipment, in non-Gibb's interference per efficiency, for of linear and quadratic resolution of decomposition, with geometric phase of units upon Eisenstein or Cartier Artin groups.

The avenue to consolidation of the answer to the prior passage (as to reduction in quantum-optical hybrid conventional technology) is to consider that the 'higher frequency (addition)' of asymmetry between CH1 and CH2 per group-spread is distinctly of a bound oscillator that is both with a higher spring constant, and 'lower' in absolute potential, contradistinct from a NLSE wavepacket which spreads and does not render a shock-wave.

In moving beyond the fourth, for of the second (2 element), from the initial dialog of law, there is the presupposition of an 'entire difference' in y-n, and e-a in-count per polynomial and group. The two element is not redundant, but at this tier it is suggested we must move 'back from another' to refrain from recurrence. Four for the prologue of lemma, is constructive of a y-n whence there is a digression to three, thus, in the discretion of the two-tine(s) of it's 'entire difference' (and of differential equations). Mathematics often is seen with respect to a 'flat two dimensional plane'. The solution to the muon at the LHC demanded a non-simply-connected circuit. When mathematics extends in some manners it may be seen to refer to an {i!=j,j!=k} as i.e.

Form and module, for what are whole parts, workable or devotional, may or may not (I don't know) relate of substantialism of the auxiliary defined outer world, but there is symbol, and age. All is temporary, then that emotion is magic, substantial and present, and we are indeed present. Then so of {L,R} that, *of that which is there, is there, and presence is indeed the key to observation.*

*I have done something applicable to the world. The chessboard-closed-ledger applies axiomatic logic of a new variety, and relates presence, law, observation, and isolated entry and formative imaginary mathematical symbolism. The root of mathematics in the law, is that among* [all equative numerical recipies] the deference of recanted disposition of one article and pattern, is as-probal in equative measure with the respondent non-symbolic alternative quantification of ordered sequentially valid flow of integral notions qualified of history, object, action, people, observation, and setting in article.*

*With as-simple as 5.06 monetary funds, taking the return compensatory numerical weight of a physical instance of mass and time, weight numerically, in response to conversion in-systems prescriptive geometric qualifications of observed energy and it's energy of rest, for of unitary numeric to numeric of-system and dis-enjoining the quantified structure* as applied to article, by disambiguation of formative application of system of law, and qualitative conversativeness, enjoins to mathematical law of it's appleable end-disjoint.

Requalifying (by archeology or historical root in article); aids the ability to retroconvert one system to another system.
The 'linear' is related to a derivative of an exponential, between a sech and a gaussian, and four frequencies.
a/b+c/d*z(t)=\tau(t)?
1,1,2,4 4,2,4,3,4

As in 8,3,4,1 and 1,2,4,6 logic compared to logic, is one distal operand in-electronics from binary, in simile to hands in count, by of group and singular to duple, thus categorically there is a social law, and a personal law, for what it is worth, currently these are no identical, with statute and oath.

So my device transcends zero and one.

**Device Breakdown (I):**

\eta is an angular phase frequency ratio of space to time.

It becomes 'linear to quadratic' and a **polynomial** when the standard-forms of the NLSE cross-multiply with linear-derivatives in uncertainty. Thus, equating division with a (+/-) in Grassmannian. The lines are

parallel, when V=IR, for they share an integration constant via symmetry, thus they are both integral flows.

As a result of V_{A}-V_{B} and V_{A}+V_{B} and the imaginary unit, for which the (+/-) of it's operational amplifier summation work out, through the AD7512 and AD8307 post-and-prior, when the circuit is-complete, the second differential is an i^{2}=-1 contributory a separation in differential, and the y_{2}-y_{1}=I (current) is established as a convolution. Thus, the current is displaced in-time, by what is \partial y | \partial t on y=V, thus the exponential of a complex wave argument in (I), with a real part for B.B and E.E in time, deflect(s) like a second order lenz term. This imaginary unit because of topological arguments amounts to an 'I' compared the V_{A,B}, thus the voltages as concerns the operational amplifiers are divisible (despite changes) as the eta_{1} and rho_{1} carry parallelism.

Thus, the locally-flat rules of electromagnetism, relate to the specialty of the gravitationally free quantization of the circuit.

Therefore given the Bremmen Freefall Superconductivity Drop Tower Experiment, gravity is either:

a.) True at any two points.
b.) Untrue at one point.

s=I`.\sqrt{f};\sqrt{g}(~)\eta`.\sqrt{g},\sqrt{f}

1.) Linear-linear is log-log, essentially provocational, but of the device (rect.).
2.) Quantum (were we to utilize the device as necessary example to derivated scientific law or engineering law of then principles discovered) must adhere, in and of itself under 0-1 to a preference of hyperplane, for the 'line' given *accurate inverse of gravitation.*

I had been wrong to 'subtract' the covariance of the differential, the device is *handed.*

**Model Analysis**

I have resolved that the system is essentially a KP to KdV system, a general method of arguments for the circuit elements (to simplify and approach the scaffold of it's decomposition) not evading me…… since this may be a new system, I will begin from scratch. No complex arguments of symmetry are so as required.

a.) I need resolve how the focus (a parabolic snell's in refraction of a thin-barrier of impedance) may relate to the diffusion (parabolic or linear) in KdV and KP and elliptic.

b.) This resolves the rationale (Stoke's theorem, & Anti-Stoke's) via the 'line's' being parallel but post a prohibitive 'zone' and theta_1+theta_2=-theta_12; **and** on a sphere-partial-log-derivation it is a sphere once more, and projectively, the circle disappears 'between' two-circles of the space and it's solutions.

**Particular Model of Design**

In the particular model of the design, it occurred to me, as it is dynamic, that the ideal (of what had been a prior goal) was the potential VT would alter given the signal, and the signal 'T' would respond to this potential 'V' in such a manner as to render a digital conformal factor *when a control diagnostic was part of optimization.* Thus, to design the equipment requires an avenue, and this avenue is subscript the methodology employed to render the system achronological. I found, the system by the name Inozemtev and the partial congruence to the Heisenberg model, participates in a vast distinction which takes place when a substitution facilitates conversion of the nature of the view cast on the equation to the Kodomo model. Thus, *our basic intuition on the K and H and I models fails without utilizing one system as a linear 'chord' of the progression taking place of*

*and in relation to the other two models.* Thus, the Kodomo model cast relative, is related to instead the linear terms of which suite the fit (via the non-linear) model suite of the I to the H model, for which dynamics are then linear and synchronize by variables changing in and of auxiliary fields.

Thus, the linear KdV to KP setting is a breakthrough as well as the Miora transform, for these can be linear in one setting, but then models can be 'flush' and set to relate to one another with advanced outcomes. Thus, translation of an active potential (ODE) corresponds to (PDE) given closure of the Guass Bonnet on integral qualifiers, for of which a $4^{th}$ and $5^{th}$ to $6^{th}$ respondently relate of the cellular automata in five dimensions in relation to fourth dimensional secondary determination on elliptic correspondence to polynomials for the system of roots and zero's, for a determination of rules correspondent the NLSE. Thus everything of the K and I and H, escape the phase-number inequality on certainty or uncertainty, and computation is the result, for which all is seen as 'net energy and flux energy and point-like energy' transferring between two-fields and the equipment. The key is that Cartier divisors correspond to Elliptics.

I decided the nature of the approach that I will possibly take to analyze the circuit(s) for the designed equipment of the device. The various 'modules' relate of the 'linear and parabolic to elliptic to hyperbolic' point(s) of a differential equation. But some are eccentric and some are elliptically 'third order' and a then combined linear and parabolic nature. I will not so much be capable of matching all of the impedance relationships without something arbitrary, and there is indeed a *particular solution in one nature, and a lesserly so *particular, which bears certain 'uses'. It happens to be that when the linear for linear is of a few degrees in tan(delta) the result is something experimentally testable and of which can be designed, but meanwhile sets of the 'easy part – frequency generation' – some of the constraints of the system. Consequentially it is essentially a workable experimental setup that I have.

a.) I will need to characterize simple systems, and then go through a process of connection and disconnection in determination of *suited fits.*
b.) This may work with the computer to fully* characterize when moving away from strictly the component view the various types of gate, and to find the certain **PQ gate [a Psuedo-Quantum gate].*

The 'razor blade' of thinness of the ice I skate on now is extreme, but I will 'widen' my-path. I decided to take a complete and total departure from the circuit.

I have found a way to model **all** non-linear-equations suited to Kodama's-conjecture, and will *begin to enumerate and extract relevant tables of inquiry.* This is the offshoot of development of a **finite-gap equation and group setting**. Thus, we will see how easy it is to enumerate new and unusual types of computational method.

Second, I will make every attempt to finalize the model I began to develop. The following is the answer. When parity and voltage as to amplitude of time over extends in frequency to voltage conversion the model of the resistance and RC 'bridge' by transparency (in generation of a decaying oscillation), in compendium with the AD8307 and LM6172 for what these do with 'ratchet of parabolic and linear in reactivity with the RC and RCL bridge' the specifics are set into motion to control in lumped element design of distributive currents and voltages like an active filter the radians and radius of the basic wave at two frequencies.

Setting into motion the parity for that of a square wave or pulse of limited wavenumber given permittivity and permeability, then controls a secondary wave ''contained'' within this wave, for which the deposit of energy can be finitely encoded. This opens many doors, and in response to the computer in-binary there is then a programmable wave of alternating cycles given command structure.

When the digital impulse is shorter in delay it is ideal, and it does not function when the pulse is slow, but for conventional computers there is now (presently in 2026) much room for adequate control of circuits such as these, inclusive a 0-0 and 1-1 direct transmit and receive formalism; there is also means to miniaturize.

**Introduction: Mystery**

The general problem is two-fold:

a.) Polynomial and Elliptic functions of Jacobi variety depend on:

1.) What interrelation for that of the displacement (Lenz term) in Superconductivity?

b.) As these relate, they depend on a feature of the system.

1.) As these find utility in the system, what component-like behavior relates of signals.

Is it the finite of the system?
Is it the count-ability of the rational polynomial?
There is a behavior to do with the 'series' of operations of the various signal transconductance.

The transistor seems key, but.

The answer:
1+exp() and 'a-b' and 'b-c' on '1' and I, translate into a sn,cn,dn, for-which displacement formatively sets a ½ of it's power.

This answer is misconstrued, it actually relates of:

a.) The 'delay' accrues through the Lenz term due the finite system, to which returns as an elliptic like argument of am, for which the electric and magnetic subsystems store and transmit energy to and from the wave in optical isolation.

b.) Second, the current term of the 'set-point' of the transistor and the voltage across as it relates to the 'set-point' integrated or logarithmic of it's interpretation as a curvature, sets an ***additional*** contributory argument of elliptic variety.

These together form the focus and defocus with solitons, the varietal bessel shape, and determine the algebraic laws, for it shifts in a way I must question to a double-pole system.

**Part I – The Role of the Device**

As was understood a 2:1 for of elementary [securable defensive rightfulness] in construction admits a stronger base rhetoric of-example. Thus, for this (tightly or loosely) the distributive function in-facilitation need admit two or one core behaviors. These are:
a.) The chess, with gambled (0-255) allocation of Mancala.
b.) The e-paper, with (0-255) adaptive rule-set.

I've then determined it is only so much as-useful as an example of a peer-peer interface, for determining long-codes and short-codes, syntactically in relation to binary plus obstacle or pass-through. Other rules then relate of different outcomes, and it behaves similar the omega-incomplete of the system.
And, for this, it is required of the 'circle kissing problem' to leave it determined-3 and undetermined-1 in linear rule of the 'gamble' with obstacles and non-obstacles of flow of pieces. It is not just convention that aligns this more clearly as a *type distinct from-Go, and yet*-related. It has fixed rules, and no fixed outcome, but of surjunctively to the operators.

**Part II – Details**

In part two here, I investigated the roles of cellular automata, in principle a set 'S' that is the memory set. As it is, a system need be sufficiently complex to invoke new rules that are distinct from merely {0,1} to some

power or algebraic number.  This is also in tandem dictated by the Stone-Weierstrass theorem.  Thus, in this we may device (courtesy of Kadama) forgetting.

I decided to use the equipment already purchased, of which CANBUS plays the dominant *chipselect role for the {A,B,M} devices, and MUX plays the dominant role for the ADC-Chessboard.  This second ploblem will take some-work, or a dedicated ADC, and the MUX for the ADC-DAC is covered, but only one is done. Besides this, I need two minor(s) + ARMY.

One question is when* or-as-such the quantum precept becomes a valid element *of-play*.  The step-back through determination of obstacles and white takes black, for of one-reversal in quantum algorithm, is an omega-incomplete system involving two-peers *that nevertheless computes*, where(in) white takes black (*not forbidding obstacles*) behaves ***then**; like an operation in the Godelian sentence.

**Part III – Getting Realistic**

Typical Rules [which should be loosely constrained] – are to motion a piece, place or remove an obstacle, or take a piece, but these are interrelated 'lest it halt' – thus we find new classifiers of game-ending – so; motion of a piece may take an obstacle, and taking a piece must defer to placing an obstacle at the old piece position.

Basic board is established.

Obstacle pieces are tracked, and the 'principle ideal' differs for them such that a transcendent number is generated as the principle ideal J[M], of which suites the K[M], of position and momentum.

I can only prove this in relation to: 2:3.  But I am lucky, for there are 96 pieces and 32 + 64 are obstacle candidacy and 64 are the places of the pieces for chess.

This is then a choice function with uncertainty of n+1 for the SHO of number to phase.

25:30:36:40:48:64

This then get's into why the probability would depend in a way on net-piece-assignment.

I decided merely to innovate a game, but I will think about the purpose, and think about what it relates of in real-world.  I may need magnetic go-die.  This game has easy to difficult. [when there are Charmichael numbers proscriptive of outpacing given regional dialog].  I decided to be done with it and build it.

For this system I will be utilizing the Microchip RISC with the Raspberry Pi across wireless, the ST or Texas Instruments with the chipselect with CANBUS, and all signals of ADC and DAC with the Arduino Q's, & ESP-32 Nano with Chessboard.

**Part IV: Limits**

a.) There is an 'already present' *subjectively inherent notificier-negative'* for of the problem of direct-communion.
    1.) It is related of the 0-1 on transfers and projection.

b.) When the group becomes 2-3 it becomes geometric.

c.) When the group becomes 4-5-6 it becomes uniquely algebraically geometric, in projection.

These all relate under different systems in different correspondences and gestures between as transfers in count of phenomena.

**Part V: Wrapping the Device Up**

a.) ESP-32 Arduino ‘Nano’ needs an independent program.
b.) The switch needs a ‘direct’ interpretation.
c.) Both channels SINE1 and SINE2 need functional transmission.
d.) I need program the DAC.
e.) I need specify certain pins for CTR and CLK, in composite.
f.) I need be sure my ‘repeater’ is validly understood.

Then, for code 3656 there is a given that I had tried to as ‘boot’ upon a 1:3:1 with a 3:5 out of 3x3.

I determined ‘the above’ and*-the configuration was benign of confluence of prefactors causal in relation to directrix of ‘code hierarchy’ and elliptic, but* *that now*; the excursative motion of flow and current through the circuit is with these six problems (a.-f.) and the code demand(s) a 0-0-1 on quantified qm. Thus, pushing the envelope will require the adoption of frequency (carrier) to be near or at frequency of-group and with a clock, to synchronize the computer to the equipment.

This is telling, for adoptive frequency indication requires a ‘structurally quantified interconnective topological geometry’ for positives and negatives.

**Superconductivity End:**

When holes and electrons (of dark and light soliton) are taken as of 0-0 or 0-1 and {similar or opposite}, with an equivalence principle this additional symmetry is initially seen as xor under symmetry

Superconductivity produces via linear to parabolic binding a paramagnetic state of cooper bound electrons consistent with energy below the Fermi sea with a reduction consistent with gravitation. This is indeed the same as gravity, and an absolute feature of displacement, for two reasons.

a.) Such negative feature would additionally transfer to the chemical potential otherwise.
b.) The binding of occurrence reduces in it’s feature comparable a statistically exact identity due phase.

1.) Given 0-0, 0-1, displacement of field energy, E.B changes shape such that gravitational field energy does not change, it is 0-0 and gravity is true in one and only one sense:

[The relativistic mass with the field energy is the inertial mass, which is equivalent to the gravitational mass.]

c.) The temperature reduction and increase is fundamental therefore, for which cooling the room or cooling the superconductor holds only anomaly with near-field temperature (the magnet).

There are then two questions.

1.) What motivates \wp to inhere a group law from chemical or material sources?
2.) What motivates the ‘repulsion’ or ‘locking’ to overcome or not a finite potential?

1.) The distance 2:1 in Cu:O and the ‘exchange sqrt(2)’ given prefactors of Gamma_{\mu}.
2.) Shape change couples to the gravitational focault pendulum of an agreed gravitational Gamma_{\mu}.

Today, post my resolution of solving superconductivity, and resolution of the illness for what it had intimated to me, I have decided to solve a problem on the Chemical Bond.

This involves a relativistic spin and charge/mass system with fields (moderately line or representational), elliptic and other functions, and the ‘threshold’ by which bonding occurs, in molecular-like lumped analysis. The final modality of the problem is why and when and how, and for such as computational assurance of number sequences.

The question becomes as to code *`0-`1* compatibility **in quantum sense of double slit and slit** versus *signal-band-and-interference* over a certain manifold topology.

Was it with working Software as to pitch-PWM or a routing HW issue?

I resolved ‘the rest’ of the superconductivity problem, but for certain issues of which bring into question certain ethics, there is no part of the Yang Mills I have really made progress on but three areas, and there is no finalization in this area, or the area of the quantum circuit, which is useful, but something for which I need see an established method of relating the fields.

The circuit shows some problems, and some great success, for I did indeed get it working digitally, by control code and thresholds of logic tables.

The ‘2175:1250’ that resolved from ‘-702’ for the three triggers is one carry in 14:4 and one step, the byte code was 3572 (b).

The primary question from here on for some time is if the Lucas and Pell number(s) relate of a six-***’hexetic***’ just as well as a 4-5 or other polygons.

In designing a ‘Double slit’ as to a ‘Double walled canister’ – the L_{2} to convert to a Grassmanian, must pass through optocouplers, etc. These hold a ‘high DC to AC passive shock-yield’ and an-efficiency that is less (often) than unity. In doing so, the 2:1 of the transformer 4.7:1 or 9:1, the reductive feature of negative feedback, biases to a ‘lesser g<1’ for which the ‘upper +5V’ is transconductively of a high-impedance. Thus, as a result, the lorentzian response is low for the high-frequency, (a log).

This general SWR result, determines a lesser transconductance attenuation in conversion of two frequencies, at the formative second lower frequency. Thus, the band(s) accommodate one another, but with a clock* the modulation of clock supercedes the modulation via the intrinsic resonance. Thus ‘forms and features’ are distinct, as ‘features’ are made out always with a sensor at a lower resolution (for larger regions of smaller frequency as these reference subregions) of the basic stylus.

**Closing Viewpoint**

As to consider a ‘variety of interconnection for in four equipment modules in 2x2 wires’ it is in-exceptional that they may be rightly connected in a bridge to the computer, but however so, the chessboard is more of *ardor* for keeping the ‘main-mode’ of hypothesis of quantum integration in circuits of optical hybrid nature than the *disc.* Thus, in providence of patterning and single place of pieces, to interoperate as to *study the printer style for drafting & functional communication*, it is amendable to connect the ‘1’ of the ‘n+1’ as a raising of operative feature of piece motion for in interconnect topology, & ‘n’ affording location of piece position.

I2C to CANBUS - I2C on Digital I/O [GND of chessboard] and CANBUS to STM32 then communicating over LTC6820 (needs isolation) to LaunchPad.

With Chessboard [Microchip MPFS-DISCO-KIT (has Ethernet) + STM32 + on Chessboard.]:

Digital I/O (3x2) - MUX-9 (3x8=24) From STM32 or RISC-V
Digital I/O (+1x2) - I2C to CANBUS
I2C to CANBUS - STM32 on CANBUS I/O
(24x ADC) - STM32

With Disc [CanBus on ea. Arduino Q + (*?) F28 379D LaunchPad (4x ADC) on Disc.]:

TDC (2x) and Clock (1x) and I2C to CANBUS (1x)
TDC with SMA
Clock with SMA

‘h’ [14{2.2:44.56}:2.x01/3’b’]:904[445]:115[1.6:2.381]:208[18:19.2]:(@)25.{6:26’c’}:24[25.2].{48.50:12.75:21.50}
